Textile Loses a Well Played Game to Harvard 2nd

Harvard 2nd brought a team of huskies to the campus on Saturday, October 20th, and by weight alone won a game in which they were outplayed from start to finish. The Textile team was of the caliber which could stand up against such weight opponents.

Marble kicked off to Harvard's 25 yard line. Tech putted to Walker at mid-field. The ball was penalized 5 yards for off-side and Wentworth made 7 yards. Walker and Wentworth followed for a first down. A forward, Marble to Walker brought the ball to a 22 yard line. Walker broke away and carried the ball to the 6 yard line where Tech was penalized 5 yards for being off side. On the fourth down Wentworth made the touchdown. Marble failed to kick the goal. Tech immediately started a rush down the field and ended with a 20 yard forward to Colesworthy who fell over the goal line. They made the goal. This finished the quarter.

The second quarter was a punting duel, until Tech opened up an aerial attack. Wentworth intercepted a forward pass and started off for what looked like another touchdown, but he was dropped on the 25 yard line. Hadley's kick was blocked and it was Tech's ball on their 21 yard line. Tech punted and the ball ended with the ball in mid-field.

Tech kicked off to Walker in the second half. Marble putted on the third down and Tech fumbled. Textile uncovered the ball on Tech's 21 yard line. Walker made 5 yards on a forward. Walker to Jack Goosetrey gave Textile a first down on the 6 yard line. Tech was again off-side, and was penalized 5 yards. On the second down Walker made the touchdown and Hadley kicked the goal. After this Tech opened up on some forward passes and carried the ball to the 6 yard line, where Wentworth received a bad cut on his face. Moore took Wentworth's place at left half-back. This ended the quarter.

Textile held on the 6 yard line and on the fourth down Tech's forward failed and was Textile's ball on the 20 yard line. Moore punted and the final quarter ended after some pretty fare.

(Continued on Page 6)

T. C. A. Notes

The T. C. A. Cabinet has been meeting regularly since the opening of the school year. It has been in touch with many prominent men, and expects to give the students of the school a series of very interesting lectures on subjects which pertain to our college, social, and business life.

Since it is the purpose of the Association to encourage fellowship at college, it is the plan to give a social in the near future, whereby everyone may become more familiar with his fellow students.

It is of great satisfaction to the Cabinet to see the interest the fellows take in the reading and rest room provided for them, especially during the noon hour. A half hour or so among magazines and congenial friends is a diversion from studies for a while. If there are any who have suggestions as to how the services of the Association may be increased, these suggestions will be gladly welcomed, as it is the desire of the officers to please as many as possible. Co-operation of the student body is what counts.

New Class Room Portions

Partitions are now ready to be put in the barracks, as additional rooms are needed to accommodate the students. Since the fourth year engineers have taken possession of our old drawing room, it was necessary to shift the drawing benches to the barracks, and since someone is continually passing thru the hall it was deemed necessary to put up partitions. They will consist of a dado on the floor blackboards above, and on top, steel sashes holding the glass. The dado and blackboards will be movable, that is, they may be raised to make the room one large one again, should occasion require. The partition will extend the whole length of the hall on the west side, along the line of posts. Offices will be in the part nearest Southwick Hall, and these will be separated from the main drawing room, which will extend to the rear of the hall. On the east side, the partition will extend only about half way down the hall, and this will also be occupied by drawing benches, this leaving a vacant part immediately in front of the Co-operative Store. The sliding parts of the partitions will make it an easy matter to make one large drawing room if need be, while when down, there will be an open passageway to the locker room.

Executive Council of the Athletic Asso. Holds First Meeting

On Friday afternoon, November 20th, the new formed executive council met for the first time. Milton Washburn, '21, was elected temporary chairman while Harold Rubba was elected secretary.

In the constitution, at the present time, there is no provision for a representative from the Student Co-operative Society. As this society is likely to take a vital place in the life of the student body in the near future it was voted to amend the constitution in this particular. The council can only recommend such an amendment, but it seems quite likely that the athletic association will pass it at its first meeting on Friday, November 12th. The Co-operative Society is starting a scholarship fund for the benefit of the student body. The meeting was adjourned after a short discussion of general matters.

School Dance to be held under auspices of Musical Club

On the evening of November 19th the Musical Club will conduct an informal school dance, to be held in Southwick Hall. As this will be the first opportunity this year for the student body to get together at a social event, it is expected that a large attendance will be the most noticeable feature of the evening. Music will be furnished by the school orchestra, with the "irresistible" Paul Savage at the piano. As the dance is complimentary, on the part of the Musical Club, it is hoped that the entire student body will take advantage of the opportunity and make this, the first of a series of school dances to be conducted this year, a rousing success. Everybody out, and support Mr. Whitingfield, Mr. Hunnif, and all those who are working hard for the sake of the orchestra!

All Out for the Fall River T. S. Game Saturday!
It takes courage to face three or four years of the brand of work which is laid out for us here,—and it takes still more courage to execute that work than it requires to face it.

Let us all make up our minds that if we fail a subject on first trial, we will do the work essential to a clear record as soon as possible. If we fail, let’s get up and start off again.

Persevere,—The reward is worth while. It means that we will establish ourselves in the respect of our instructors, our classmates, our school, and, last but by no means least, our self-sacrificing parents who are helping us on our way. Go to it!

In the near future we will be in the midst of a number of school events, and it is very important that the student body make up its mind to support them each and every one to the limit. We hope to see a unity of spirit shown this year, such as has never before been prevalent.

If the school elects to support an event, business or social, it should be considered a point of honor by each of us to help as best he can.

MUSICAL CLUB NOTES

Friday night, November 19th, the Musical Club is holding an informal dance in the assembly hall. There will be no charge for admission and it comes on a Friday night, hence there is no reason for staying away. In case that the freshmen may not know young ladies to bring, we will say that thirty-five girls from Rogers’ Hall are coming to the dance very anxious to meet the verdant freshmen. It is expected that the upper classmen will bring their own partners.

The week after the dance, candidates for a mandolin club and an orchestra will be called out. The orchestra will play at the show and for the various school functions during the year. Also outside dates may be arranged in and around Lowell for the mandolin club.

ALUMNI NOTES

Mortimer Farley, ’20, is now with Delahoy & Mackay, Worcester, Mass.
Gordon M. Scott, ’20, is now with the firm of Holden & Leonard, Chicopee, Vt.
He wishes to be remembered to former classmates and others now at L. T. S.
Robert Chandler, ’23, is with the Monomoy Mills, New Bedford, Mass.
Harold J. White, ’19, has a fine position with Brewer & Co., Worcester, Mass.
Football Mass Meeting

The most lively and enthusiastic mass meeting of the season was held Friday night, October 29. Captain Goosetrey opened the meeting and spoke of the prospects of the coming Harvard 3rd game. Mr. Granada, with his usual interest in the games, enlarged on Goosetrey's words and urged everyone to help as much as possible by co-operation, that Goosetrey and the players were doing all they could and needed only the backing of the student body. Cheers were practiced under the leadership of Washburn and the season.

Coach MacKay made everyone interested by promising a third consecutive victory and promised a good game in return for the students' support.

Forward Passes

Coach Hudson has been unable to attend practice for the last three weeks because of a bad case of tonsilitis, which necessitated an operation. The entire school extended its sympathies to Mr. Hudson. It is unfortunate that the team should be deprived of his services at the middle of the season, but Mr. MacKay is working doubly hard and is doing a very creditable job.

Our injured list was of considerable length last week. Peinell was out with a bad knee received during the fracas with Hamilton. White Lombard was kept out of scrimmage because of a torn ligament in a finger which was thrown out of joint in the same battle. Both were on the job for the Worcester Tech. game on Saturday, however.

One of the most serious and unfortunate injuries of the season was sustained by Machter, the mainstay of Tech's backfield, when his elbow was dislocated in a scrimmage last Wednesday. It is doubtful if he will see the gridiron again this year.

In the first issue of the "Text" it was stated that this year's squad was made up of a bunch of "stickers." At that time there were thirty-five men on the team. There is now one game to be played, and on Friday last there were thirty-five men out in suits. Indeed, we have reason to be pleased with the men, who, recognizing the fact that they would have only an occasional opportunity to show what they were made of, either because of lack of weight or experience, "sticked" by the ship and are going to stick by the final game of the season is ended.

The old "come-back" was with the team up at Worcester. It took a lot of fight to overcome the lead which Worcester had at the end of the first half, handicapped as the team was by the absence of injured players.

A LETTER

Sept. 18, 1920,
39 Cambridge St.,
Leicester, England.

My dear Mr. Smith:

How are the three S. & W.? I hope that you will take good care of them, and that you will not let them have any bindlings of a student. I arrived over here about the 7th of July. I came directly to the school in Leicester and made arrangement for the fall. The best thing I could think of to do was of course to look up the British Agency of S. & W. They at once agreed to take me on for the summer. But I asked for a few days to run up to London which I did properly. They set me to work on my return clearing the grease off my favorite skis which they arrived from the States, I stayed on that job one morning. Then I slipped off, I then set about trying to repair machines after that in that wouldn't run. That "post" I held for ten days. Then according to our agreement I was sent out with one of their expert mechanics to start up sixteen machines at the Mills in Leicester. They were Model K 200 3/4. I lasted two days on that job as an assistant. I was then sent to Hinkley on my own to start ten 300-500 3/4s on cotton cloth. That lasted only a week less than I had been promised, but I did not have time to work on them. So I went back to France for eight days. There I looked up Mr. S. & W. agency M. Lequain and he gave me an introduction to his mechanic to his mechanic at Troyes. I arrived at that town about eleven and saw a few 3/4's running a la French which is a little different from a la Anglais or a la 2/4s lines. Then in the afternoon we went to see some "Bonneries," after three unsuccessful attempts he had been in that it was impossible for an American to enter a French Hosier Mill. So being a kind and considerate American I got the gate drunk on zig-zag as they call it and remaining sober that night I went to a date in Paris that evening. I then went there and visited the school of "Ecole Bonnerie" of Troyes. Kindly excuse all English and French spelling. It was very interesting. Practically all their small equipment was of the full fashion and flat type. They had one automatic—a Swiss Dubi. Most of the machines were German, French or Swiss. As my French is somewhat limited, and my hardware vocabulary a minus quantity it took a long time to gather a little information. The school was closed down at the time but opened up last this week. I may take a whack of a couple of months next fall. I am still undecided. I need the French. The French agent of St. W. has a son who is taking the course there and comes over to go there from time to time. So I may be able to work up something along that line. I returned to England after seeing a little life in Paris.

I was at St. W. for two more days and then I went to Bedworth. I moved down to Dan Eaton and finished up

(Continued on Page 4)
A LETTER
(Continued from Page 3)

Fourteen half hosiery machines in two days, 168 needles. The following week I moved to Hinckley and started up thirteen machines in four days, five 200-198 ladders' hose and eight more at another place. I submitted a heavy expense account so they let me stay in Nottingham the following week except two days, one weekend and two days to Leicester. The following week I got sixteen 8-5-220 running in Nottingham and started on my last job at Stapleford, starting four 225 K on cotton. This agrees on cotton very well but it names the hosiery centres of the Midlands and shows I have had varied work in different mills on different styles from different types of machines.

Now you would like to have an idea of what I think of English mills perhaps? They can't compare with the U. S. A. There seem to be too few kinds of work to keep a man in roasting. Most mills do only knitting and linking—that is looping. The dyeing is done by jobbers and something and they will be finished. I have only seen a few mills with less than six different kinds of machines. In two large mills they had only Maxim's i.e. Bonners and S. & W. An operative takes in 4-5, 5-6 or 8-9s and 8-9s. However, while at home they tend to sixteen, i.e. at the Ipswich. An operator is allowed to put in needles and fix the machine itself, which is poor. They have to clean and straighten the needles which is a good cheap plan. You can get a girl for three pounds a week. They have strings stretched from one leg of one machine to the other frame wherever the stockings are kept and where knitting and inspecting. It is rather poor as they are constantly in British and German quality. One good idea they have is arranging the machines in alleys of eight with a winder on the end. Then the knitter constantly has the machine handy to pull her hand if she doesn't give her bobbin properly wound. There are very few men knitters that they earn 2/10 to 3/10 a week. The maximum (fivester) gets 4 to 5 pounds a week. The machines are run on the slow side. Most have them running at 400 and on the loom they have a knock-off at the end of each stock and the girls run the machines by hand in the make up.

The American needles are more popular than the British or German. The last two months some have been able to get Burke needles. The mills run all kinds of hours. Some at 8 a.m., all at 8 a.m. for forty-eight hours a week if they have the orders, but many are running slow time on account of the cramped the Germans have made by holding the market with cheaper goods. Of course the girls gave me ten every afternoo at about four and now I need it to get along you know.

Best of luck to get back S. and of course that includes George Shea.

Sincerely,
BRIGITTE PARSONS, Technical School, Leicester, England

Pajama Parade

On Wednesday evening the "Thirteen Club" got busy and "de-freshed" the Freshies. The Sophomores say that the chauvinism began necessarily in view of several incidents of recent date. Most prominent among these "recent incidents" was one whereby a prominent sophomore was given a "beating up" while charging the nummors on the Moody Street bridge rock. Those who administered the above mentioned "beating" were freshies; freshness for the core. It was the "Lexington of 1920," the spark that ultimately caused ten of the culprits to parade Sterriamack Street in pink pajamas! The city hall was sold for $10.00, various vocal selections were rendered, and the game with Fall River Textile on Saturday was extensively advertised. At 12:30 the party appeared. The "Thirteen Club" wishes the "Text" to hereby notify all Freshies that a more severe punishment awaits those who further impede the ridiculous rights of the Sophomores. Beware, Beware!

BOSTON UNIVERSITY GAME CANCELLED

Manager Robinson has given up the idea of playing Boston University a week from Saturday as was planned a few days ago. It seems advisable to avoid this season because of the large number of players on the injured list. The latest mishap is in the form of a broken finger sustained by Marble, Textile's star quarterback. Though the break was made in the third quarter of the Worcester game, the dismounting leader "stuck" through the entire battle. There will be many disappointed because of the decision to cancel, but Football Adviser Coach McCollum, with coaches Hudson and Mackay, deem it the wisest move under the circumstances.

STUDENTS

Drop that material in the "Text" box! Remember, we want to make this paper a representative of the college sentiment. Everybody wants to know about that event that was so monumental. We are all interested in those opinions which you express to your neighbor. Don't forget that the best way to understand each other is to give voice to your opinions.

The "Text" takes this opportunity to notify all day students that a "Service Column" is always available for all who wish to sell "For Sale" goods and "Found." Take advantage of your privileges!

JOKE

Mr. Veaton (in "Steam") : "All those who have trouble with riveted joints report in Engineering Office at 1:30." Mr. Hoefhich says, "I take up the take up motion."

(Borrowed)

Freshman-Sophomore Game

On Monday, November 8th, the Sophomores and Freshmen played a game of football which was filled to the brim with exciting and laughable incidents. Coaches Schnecker and Moore of the Sophomore and Freshman teams respectively, sent in their strongest players at the start, working in a total of thirty-six men during the game.

In the first quarter the Freshman team showed considerable speed and gained good distances, making a total of three first downs. Just before the end of the quarter a Sophomore pass went wild, and reposed in the arms of a waiting Freshie halfback who romped forty yards for a touchdown. The second quarter was more or less a repetition of the first, neither team being able to gain consistently, although the advantage was with the Freshies.

Second Half

In the second half a rateless pass system was opened up by the Sophs, and in three minutes the ball was carried into the waiting arms of "Ray" Farrell, who made an easy run of twenty yards for a touchdown. More scoring was done this quarter. The Sophomores showed a much more powerful attack however.

The third quarter was played in semi-darkness; at times the ball could not be seen by the onlookers. At this point of the game, McGovern, the Freshman right full, gained a forward pass that was thrown practically to the sideline. It looked like another touchdown, but "Mac" was downed after running thirty yards. The game ended with the ball in the Sophs' possession.

Final score: Sophs 8, Freshies 0

TO OUR ALUMNI

The "Text" will greatly appreciate any information received pertaining to brothers who have taken on changed residences, etc. Send your notification at once, about that L. T. S. "grad," who has bettered himself, or about the chap who has changed his residence. Your classmate in Missouri may be interested!!

THE SUCCESS FAMILY

The father of Success is Work. The mother of Success is Ambition. The oldest son is Common Sense. Some of the other boys are, Perseverance, Honesty, Thoroughness, Forgiveness, Enthusiasm, and Cooperation. The oldest daughter is Character. Some of her sisters are Cheerfulness, Loyalty, Competency, Economy, Simplicity and Harmony. The boy is Opportunity. Get acquainted with the "old man" and you will be able to get along pretty well with the rest of the family.

YOU TELL 'EM

You tell 'em, Judge, you know the sentences.
You tell 'em, Rouge, your lips stick.
You tell 'em, Brown Sugar, I'm refined.
You tell 'em, Miss, you can sing 'em.
You tell 'em, Foot-rat, I haven't got the brass.
You tell 'em, Auto, I'm tired.
You tell 'em, Scissors, you can eat it short.
You tell 'em, Window, you see clear.
You tell 'em, Doctor, you can spread the salve.
You tell 'em, Tadpole, I've got a frog in my throat.
You tell 'em, Mirror, you reflect our sentiments.
You tell 'em, Cine, I'm the only one.
You tell 'em, Elevator, you brought me up.
You tell 'em, Teacher, you have the class.
You tell 'em, Magazine, you're under cover.
You tell 'em, Tattersall, I'm dressing.

Alumni News

The following past and present "Textile" attendants renewed acquaintances at the Chemical Exposition recently held at the Grand Central Palace, New York City.

Prof. L. A. Olsen, Jr., H. D. Smith, Mr. E. F. Fickett, Roach, "Capt." Hassett, 12; Finley, 10, Park, 11; Speaker, 17; Nelson, '00; Kirby, 17; Porkey, Flynn, 11; Brainard, '09; Brainard, 20; Plummer, '17; Anderson. '17; Skip; McCool, '10; Gooding, '19; Nelson, '15; Rose, 01; Stott, 07; Whitcher, '20; A. Presents, 01; Ruber, '20; "Huck" Sawyer, '15; Miss Burbeck, '20; Lewis, '08; Deadly. '14; "Chick" Holden, '09; Jethine, '01; Foster, '99; Hadley, '08; "Art" Sampson, '12; Culver, "04; I. N. Strohmach, '10, is now located with the Hampton Co. of East Hampton, Mass., at which place he is supervising the dyeing and mercerizing operations.

Frank Gainey, 11, of the National Aniline and Chemical Co. of Buffalo, N. Y., while attending the recently held Southern Textile Exposition reports meeting "Cheny" who is in the cotton commissioning business at Greenwich, S. C. Pete" Manning, an efficiency engineer for Ash and Lucy Co. is now located at Savannah, Georgia.

"Sime" Elliott, 12, of the same company is located at S. Louis, Missouri.

"Don" Kirby is "on the road" for E. L. Dupont de Nemours and Company with headquarters at Boston, Mass. Reger, a former member of the Students Army Training Corps is with the Atlantic Dyestuff Co. at New York City.
Clippings from a Dumb Bell's Diary

The jaws of the clamp are slowly tightening; and the iron hands of strong discipleship and hard work are pressing heavily upon the shoulders of the wretched sophomores. Till twelve o'clock one night and until one o'clock the next, the poor unfortunates are striving to master the intricacies of advance subjects in volume. But under it all they are "staying up" more than simply at night—their spirits continue to be the best, and they have settled down to the grind with a minimum of complaining. As they go their ways, however, all of them see irritating happenings and hear remarks savouring of dissatisfaction, which things could be prevented by a little forethought on the part of the student as well as on the part of the governing body of the institution.

There are diaries; and then there are other diaries. Read and think it over.

Monday. Copied my weak notes tonight too bad we didn't have printed copies of those lectures it would put weav ing lectures on the same basis as dye lectures. If booklets in type-written or printed form were procurable the course would run more smoothly both for students and instructors.

Tuesday. Noticed today that the math problem book is still littering upon table, floor and rack in 362. It seems as if the freshmen ought to have learned by this time where all their folders are and they should have sense enough to go and get them.

Wednesday. Read the new rules for the first time this morning. Good stuff, but I fear there is a general dissatisfaction of the proposed discounting of marks on account of too much cutting. I don't know how the exercise system will work out, but it's going to be more of a bold move to undertake to subtract points from the marks if men, who, conscientious in every respect, have incautiously once to many times.

Thursday. Had occasion today to go thru the weave room and as I saw the cloth on the looms it struck me that as a business proposition, the finished products should be on sale to the student body. As a business proposition, I say, for the student and for the school, for, with cloth and clothing as high as it is today, much could be saved for the students if suitings and shirtings were procurable at a little more than cost. On the other hand, the school could make money and save for the men by selling the goods at a price which would bring more than is now received. Also, if demand was sufficient, the manufacture of cloth could, to a certain extent, be placed upon a commercial basis in the school and give the men an idea of production and how things are done commercially.

Friday. Wonder if John ever heard of "O'Sullivan" and the theory about hard pavements and steel heel plates?

Monday. Back on the job again and feeling as fit as ever. I see that the class-room doors are kept locked in the morning now. Men must wait until the instructor arrives before they can go in and sit down. We like the idea very much of having five minutes before classes, but it's not very pleasant to wait until 8:30 every morning in the corridor, when you feel that the doors would be very easily unlocked by a janitor at 8:30.

Tuesday. Had a drink at the bubbling fountain today. I don't know where the pipe line runs, but the water tastes as if it ran pretty close to a steam pipe.

Wednesday. I see "Red" is getting chummy with the new Prof. I wonder if that's why he's late so much so? Or is he studying the effect of the balance-weights on the drivers of a locomotive?

(Signed) DUMB-BELL DECK.

Lowell Loses to Harvard 2nd

(Continued from Page 1)

the quarter with a touchdown and kicked the goal. After an exchange of points Harvard made another touchdown from the yard line and kicked the goal. The game ended after Textile had broken up several of Harvard's forward passes.

FEBRm FROM THE SIDE LINES

"Mitch" Washburn had his cheering section as well as his enemies busy during the game.

Mr. Lupien was right there on the side lines with the longest and fondest yell for Textile. He was always shouting, "look out for a forward," which seemed like old times, when they used to call time out to chase Mr. Lupien off the side-lines.

The white bull dog that nearly broke up the game in the second quarter wanted to sub for somebody, but Hubbard persuaded him to "take the air." The dog was also an admirer of Washburn, and helped lead the cheers.

Captain Goosetree and Jack Goose-

tree both played a fine game in the line, which was outweighed on a whole by about twenty pounds to the man.

The line-up and summary:

LOWELL TEXTILE—7

Summary: Harvard Seconds 7, Lowell Textile 7. Touchdowns: Jamin, 3; Macher: goals from Touchdowns, Thomas, 2; Cronin, Hadley. Time: four 12-min. periods. Officials: Referee, Mahoney; umpire, Thorpe; Head linesman, Moore.

PLEASE SUPPORT THEM!!
Making Good With The Campus

Our Fraternities

About the hardest thing which can be said of a Fraternity is that it is "not without honor save on its own campus." Many go well with those nearest you and you will have no trouble making good with outsiders. Making good at home does half your rushing for you; it wins the fraternity and reflects upon each individual member.

Three things you must have to make good at home: Industry, Progressiveness and Breadth of Mind. With these you can go far and without these your thousand dollars house and your capacities are nothing.

Industry. Show the other crowds that you know how to work work collectively and individually. Work to keep your men up in classes, work to get them out to support plays, the "Text" and school associations of all sorts. Work! Make it believed on the campus that when the order goes out from the chapter for a member of it to do a certain thing, it is done. Make them believe that if your men will go to mass meetings because they're wanted to go by the crowd in general, that the fraternity will support a student movement or a rushing agreement or what not when they are told to. Give a "Prof." the belief that he has only to mention that "so and so" is behind in Physics to have "so and so" backed up at once. Make the other students believe that when an occasion comes someone can say "The (any frat.) will stand back of this movement," and that (any frat.) will! Industry means work. It means class work, team work (don't let "Fat" do it all!), extra curricular activity work, and good accredited training work.

Progressiveness: This clumsy word stands for having the nerve to "take a chance," and trying something new once in a while. Stop thinking that the dear old Alumni did it this way and therefore you must go on doing it the same way. The most progressive crowd in the field which does a new thing becomes an automatic leader, when the rest get to the point of doing it. Inspect a new thing, consider what its costs in money, time, and trouble. Then take a chance. It may be just the thing you need to give an additional inch to your prestige as a fraternity.

Broad-mindedness. Remember that in spite of your pride in your ritual, your house, your men, or your age, you as a fraternity are not God's chosen children. It is only by accident (myself for one) that half of you got into your fraternity instead of a different one. To start with, every fraternity on the campus is as good as yours. In two years the right crowd of men can oustrip a chapter that has been on the grounds for half a century. It has been done before. Be fraternal with one another, but not "ciggy." Make friends in other houses, too—as they over, not in a hasty, as one fraternity entertains another, (something which we haven't done in this school since I've been here), but as individuals. Don't be afraid of the prestige of the "A" fraternity, and don't look down on the weak "B." You may have to ask a "B" man for a letter of introduction for your first job.

Apply this same principle to the "non-frat" men (we call them "book" from whence I hail). Remember they are not necessarily non-fraternity men because they are inferior. It is merely because some of you have organized and they have not. They could very easily form locals out of their numbers if they wanted to. Your possession of a pin does not indicate that you have any more brains, money, muscles, affability or "pal-ship" than they have.

The finest thing that can be said about a chapter is that it is popular with the non-fraternity men.

Work—keep your mind open for new ideas and your heart open for the other men—and you are bound to make good every where at home. And there is no greater asset to a business than local good will.

X. Y. Z.

Textile Wins Over Tech

(Continued from Page 1)

ward passes with the ball on Tech's 30 yard line.

NOTES ABOUT THE GAME

Textile's cheering section was right on the job, and the fellows all enjoyed the game.

Jack Goosetrey made one of his standard tackles, when he dropped Morse on the 30 yd. line.

Tech had a band on the field and it seemed things up. A band would be a great addition for some of our home games.

The Textile men were well pleased with the treatment they received at tech and were much impressed with the fine gymnasium.

The summary:

LOWELL TEXTILE—13
7—WOOSTER TECH
J. Georgette, le. Groesworthy
Lombard, br. Brown
Capt. Georette, lg. Bushnell
Schwarz, c. Stewart
Bird, rt. Hadley
Brown, rt. Capt. Sessions
Sweet, re. Douglass
Morse, qb. Smith
Wentworth, lbh. Neenham
Brigham, rdb. Clough
Wallace, lb. Morrison
