Granulated Sugar

MEDITATION HIERARCHY

Under the auspices of the American Society of Fine Arts, the Lowell Textile School held its annual meeting on April 27th. The meeting was well attended and the business was conducted in a business-like manner.

The following officers and committees were elected for the ensuing year:

Chairman: Prof. A. C. Derra

Vice-Chairman: Prof. J. C. Lowell

Secretary: Prof. W. H. Foster

Treasurer: Prof. C. H. Kendal

Program Committee:

Prof. A. D. Adam

C. L. Denmark

R. E. Sergeant

Committee on the Exhibit of Student Work:

Prof. A. C. Derra

Prof. J. C. Lowell

Prof. C. H. Kendal

The meeting adjourned at 10:00 A.M.

The exhibitions were divided into two sections: the first section consisted of the exhibits of student work, and the second section consisted of the exhibits of commercial textiles. The exhibits were judged by a committee of judges, consisting of Prof. A. C. Derra, Prof. J. C. Lowell, and Prof. C. H. Kendal.

The exhibits in the first section were divided into three classes: the first class consisted of the exhibits of student work in the fields of weaving, printing, and dyeing; the second class consisted of the exhibits of student work in the fields of design and graphic arts; and the third class consisted of the exhibits of student work in the fields of business administration, marketing, and sales.

The exhibits in the second section were divided into two classes: the first class consisted of the exhibits of commercial textiles, and the second class consisted of the exhibits of student work in the fields of business administration, marketing, and sales.

The exhibits in both sections were judged on the basis of their technical merit, their commercial value, and their aesthetic appeal.

The exhibits in the first section were awarded the following prizes:

First Prize: $100 to John Smith for his exhibit in the field of weaving.

Second Prize: $75 to Jane Doe for her exhibit in the field of printing.

Third Prize: $50 to Mary Brown for her exhibit in the field of dyeing.

The exhibits in the second section were awarded the following prizes:

First Prize: $100 to John Smith for his exhibit in the field of business administration.

Second Prize: $75 to Jane Doe for her exhibit in the field of marketing.

Third Prize: $50 to Mary Brown for her exhibit in the field of sales.

The meeting adjourned at 1:00 P.M., the officers and committees being elected for the ensuing year.

The exhibitions were opened to the public on April 28th and remained open until May 1st.

Story of Cotton

On March 29th, interest groups at the Lowell Textile School held a meeting to discuss the cultivation and processing of cotton. The meeting was attended by Prof. H. J. Bell, who gave a talk on the history of cotton cultivation and processing.

Prof. Bell explained that cotton was first cultivated in India around 2500 B.C. and that it was introduced to the Americas in the 16th century. The processing of cotton began with the invention of the gin, which was invented in India in the 12th century. The gin was later improved by Eli Whitney in the 18th century.

Prof. Bell also discussed the role of cotton in the American economy. He explained that cotton was a major crop in the southern United States, and that it was a major source of income for many farmers.

The meeting adjourned at 1:00 P.M., the officers and committees being elected for the ensuing year.

The exhibitions were opened to the public on April 28th and remained open until May 1st.

Woolen Manufacturers

NOTE.—We are larynges "flapper" faults for this issue; we discontinue the column of publicity.

"Jesse James" Jesse essays to correct the popular impression that his margin of profit is seventy-five per cent. Mr. Jesse emphatically states that he never makes over seventy-four per cent. If a sale, and emphatically, that he never makes less.

Mr. Frederick J. Cusack better known as "Blackie," announces the publication of his new essay tented according to popular demand. Mr. Cusack is a man of mark in the dustin field, having simultaneously held the offices of president of the American Society of Secretary of the "Dirty Dozen."

Charles Hudson Southwick, formerly of Woonsocket, now unattached, and similarly known as "the lady champion," was six months ago to announce that in June he will cease to be a broken bottle in the road of progress and prominence as his successor "Blimp" Rollins, a most promising youth.

Lombard smiled twice the other day; his smile was more than a smile. Morns are improving here at school; Francy Valentine was drunk only twice that week.

"Holman" Schweitz, the man with the mad English accent has, with already attained the ice cream fame in Manila's ice cream jokes. Latest reports indicate that he is really. Poking his nose into the business of the Hawaiian Electric Company, is the next exciting event in the life of the leading superman of the business world. The Hawaiian Electric Company is the next exciting event in the life of the leading superman of the business world.

A well known manufacturer in the chemical department firmly believes that a well directed kick quickly accelerates the brain action of the Junior Chemist.

The boy leaned on the burning deck. His hands were cold as ice. The sun shone hot upon his neck. The cubes had failed him twice.

Mother: "What did her father say when she returned home from your ranch about your horse's feed?"

"Scorify" Bird: "He pulled fun at me."

The United Order of Fishermen No. 69 have extended a very tempting offer to Mr. H. P. Golle. Because of his vocal possibilities. Should Mr. Golle accept the offer his duties will be to make our foundation of the Barrie Radio Club plans and sing the following song in his usual sweet tones:

Flour, pigweed, parsley, and coo,
Yellowish, ballet, caviar, and ood.
Lobsters, crayfish, caviar, and dunks.
Selected from our own very thin and dum.

But among all these fish of which we speak,
I am the big fish, H. P. Golle.

Here and There Among Great Men
Jean Val Jean, the hero of French novels, may have hired a six-foot lad of bay and saved the life of the man made pinocchio, but he has nothing on one little seaside, William Clifford Jones, who is reported to have wrestled a huge sea-monster back from the door of the house since Tuesday night.
