TEXTILE NIGHT

WILFRED WARREN CHANDLER

The senior ball of Wilfred Warren Chandler, 33, was held on November 18th at the Ku-Kan-Heep.

Professor Chandler read our interesting story of the ball of 1928, and at the conclusion of the reading he asked his listeners to remember that anyone who was in our textile school now, or who took part in the ball of 1928, was there because of the interest that Mr. Chandler had shown in textile students and worker.

The last year was a hard year, and many of us were in danger of losing our jobs. But thanks to Mr. Chandler, we were able to continue our studies and found work. He is a true friend of the textile worker, and we are grateful to him for all he has done.

INTERCLASS CONTEST

The Interclass contest was held on November 18th at the Ku-Kan-Heep. This contest proved to be a great success, and all the contestants were applauded for their hard work and dedication.

THE FRESHMAN BANQUET

(Freshman Version)

A banquet for the freshman class was held on Monday evening, November 18th.

The banquet was held at the Ku-Kan-Heep, and a large number of students attended. The program included a speech by the president of the freshman class, and a toast to the incoming freshmen by the senior class.

The food was excellent, and everyone enjoyed the evening. The banquet was a great success, and all the students present had a good time.

FOOTBALL FINALS

The football season is over, and the results have been announced. The team from Action has won the championship, and the team from Textile has come in second. The game was very close, and both teams played well. The final score was 20-10 in favor of Action.

The game was held on November 18th at the Ku-Kan-Heep, and a large crowd of spectators was present. The game was very exciting, and both teams fought hard to win.

All in all, it was a great season, and we are looking forward to next year's football games.

ALUMNI WEDES

A group of wedges took place this week in the Ku-Kan-Heep. The group consisted of Mr. Smith, Mr. Johnson, Mr. Brown, and Mr. White.

The wedges were a great success, and all the participants were very happy with the results. Everyone was excited about the upcoming games, and we are looking forward to seeing who will win.

There is a lot of excitement around the school now, and everyone is ready for the next game. We are all looking forward to seeing what happens next.
An old college graduate once said, "There were men making blind men's milk when I went to school than any other games combined, and I wouldn't be surprised if this is still the case.

That this is still the case probably stems from the interpretation of this phrase of "blind man's milk." This, I am assured, is what we are all giving around for something which is pretty much like blind man's milk. It is very vital to all of us—naturally.

We come to college with a vision of the future, and we want and we expect to be upon graduation and we start preparing to do things with that which is left.

There must be something more to a career than just to try and be ready in the right place, in the right institution, if you don't want to have a career.

Doubling is unnecessary and, as a matter of fact, if you are afraid to give it a try too many men have changed their courses after giving another course a year's experiment, even if they are not sure of the results.

It is not the chemistry that is difficult, but the chemistry is adaptable to what I want for a career.

You are now playing blind man's milk with yourself. Do it in doubt, choose the right thing, and there will be no doubt. Pick the right thing, the thing that appeals to you most and you get in a few heart and soul. Don't stop digging long enough to let them tell you what is right. The chemistry you work on is overcrowded.

If you can't talk it over with your friends you need or with industrial representatives you know, talk it over with yourself. If you do this you won't be like the man who said, "I know I would be rid of the head in business if back at college I had sat down for a few hours each month and thought it over." You can't go on telling yourself that something will work if you let yourself, and then try it again.

Think the courses over now and you do not know what you are in business for tomorrow's business. First get on the right track, and then keep going as long as you can with your momentum, as well as those at either institutions of higher learning are so arranged as to make the first half of the freshman year a general course for all students.

It is during this period that you are expected to decide upon the course you desire, to major in, or for your life work.

Will you choose the wool, cotton, or chemistry, design or engineering? There are so many good things to choose, yet you must decide upon only one in the final decision. It is high time to cause the game of "blind man's milk" for if you don't you will choose a course now and then wish to change it next year or the year after. This will simply cause you to mark time, to have wasted hours and weeks on a subject which, in the end you are not going to try and be ready in the right place, in the right institution, if you don't want to have a career.
Among the chaperons at the Delta Rho Phi tea recently were "Mlle." Dominique, personal companion of the Theta Witter, "Chad" Kerdel, designer of the Buckwheat Wreath, who was in Vermont; "Renate" Schick, assistant maquette editor somewhere near New Hampshire; "Judy" Standard, automatic designer at the Event McAlly Co., who is one of the toastesses for the famous commencement events at England, Maine; "Ned" Hallock, who is in production management at Stevens with the R. I. "Kiki" Packard "Kiki" of the bullets, "Evelyn" in Maine, one of the famous Packard Dolls, spent a day at the house.

"Vern," Clifford, one of the torchlight engineers associated with the National College Association, was here to look over the new vocal outfit, originally looking for a box detector.

The sociopolitical Ed. Rogers, dressed in a reserved manner to the point of not inviting Worcester Tech, 17 to 0.

Phil Cornell, resident student, brought into the house connected with the Lookwood, Green & Co., editor of Lawrence. Mr. Knowles knows for Pawtucket, N. C., in several weeks to the success of his course.

Bob Jacques, Bob Haight and Navy Bruins—chief of this year's charmers, were out in the elements, all anticipating with the due pung.

"Dingy" Scholl, one connected with the Rho, was one of the guests out, to take a decanter charge after the main event.

* * * * *

Roy Beal, Jr., got a semi-colon visitor at the chapter house.

Mr. Russell Lee Brown's engagement to Miss Edith Melrose was considered by many as a surprise.

Mr. Kenneth B. Baldy, manager advertising of Dean Vendors, in Boston, and the Prudential House, White Mountains, is on a business trip to Chicago and while there will visit the Chicago chapter.

Mr. Harold W. Hatt, Alpha chapter, now president and grand master of the Weltermen, Mike, N. H., and Roosevelt Woolen Mfg. Co., of Monroe, Wisc., was in attendance at Connecticut chapter house this week.

Preparations for the annual (ledumum): 19th, 24th, one under way.

CHILDRON PHII HOUSE PARTY
On Monday night a very large party was given by a large party at the Chi Phi house on the evening of December 11th.

The Delta Chi Fraternity's Oak Mchlu art colony of Montreal, finished the dinner suite of the night's host until 10 o'clock.

The night and dance was under broken up at 12 o'clock when it was realized that no one was left but the host and left to dance and eat, and they are still in session.

Pro, Late, Omega Epsilon, and Mr. and Mrs. C. E. White and Mr. and Mrs. Ralph A. Dimock were the chaperons at the dance. Mr. and Mrs. Dolby also denounced the dance in charge of the house.
