Military Ball Gala Event

After weeks of anticipation, planning and expectation, the Military Ball Weekend finally arrived. Starting Friday night, the 7th of February, the weekend was officially underway. Those who attended Friday night's activities first went to a gymnasium for a pep-rally where they were introduced to leaders of the Varsity basketball team, who held a rally on the court. The game was a triumph for the defense with a score of 111 to 84. After the game, they proceeded to Cumnock Hall, which was beautifully decorated, where Artie Barham and his swinging band provided exceptional dancing music. For those who didn't particularly care to dance, there was an Introduction where you could sit and Brian to some fine jazz to your heart's content.

Pictured above: Queen of Military Ball and her court.

During the evening, various members of the faculty mingled with the guests at Cumnock Hall, and made their preliminary selections of the Military Ball Queen and her court.

After the festivities at Cumnock Hall, the young ladies and their escorts made their way to various fraternities on campus which were holding open house. The tempo didn't subside for a moment, for when the dances at the fraternity house of their choice they found that more dancing and merriment was in store. Each fraternity had a band, which was put to good use by the young ladies and their escorts. Saturday night brought the highlight of the entire weekend, when those attending again went to Cumnock Hall for the finale of the entire weekend—the Military Ball. The mood for the night was provided by the fabulous Bob Backsider and his orchestra. The highlight of the night was when Jo Ann Hoensli, who was escorted by Flinn Nelson, was crowned Queen of the Military Ball. These in Miss Horneisl's court included Len Bowman, Deana Woodsum and Debbie Towe whose escorts were Hugh Skerry, Charles Cordes and Ted Ettin. Afterwards, the Military Ball Weekend was an affair which, those who attended will long remember. It proved to be an enjoyable affair, which will be hard to top next year.

Congratulations are in order for the Vandenburg Air Society for a job well done.

VOLUME 35

NUMBER 18

LTI MAY GET FULL FREEDOM IN SPENDING

Lowell Technological Institute would be given financial autonomy under a bill filed recently by Sen. John E. Harrington.

Harrington said the legislation would enable LTI to operate under the "full potential of efficiency" through freedom of action in the nature of funds appropriated for its use.

"The practice of giving institutions of higher learning financial autonomy is practically universal," Harrington said. "It was given the University of Massachusetts last year and has been recommended for the state's teachers' colleges."

Financial autonomy is just a high-sounding phrase for elimination of red tape that entangles educational institutions when they find it necessary to make fund transfers from one account to another, Harrington said.

When a college is given financial autonomy, it is free from a "line item budget" system under which every dollar appropriated must be counted for the item for which it was requested or not spent at all.

"No college or university, especially in these changing times, can foresee its needs for the 18-month period generally covered by a budget," Harrington said. "Emergency has a way of coming up."

Harrington said, that under the full line item system, a public institution of learning might lack an item costing as little as $20 and be forced to wait a lengthy period, because of the red tape involved in fund transfers, before being able to purchase it.

He said that, at the height of the Viet Nam era, the University of Massachusetts had to delay a demanded expansion of science courses because of a limited appropriation covering necessary equipment in its line item budget.

This system is only a basis for analysis. The final selection of students is made by a majority vote of the Senate members.

The unique selection of Edward Locken, a student at the University of Massachusetts at Amherst, who was named to the Student Council, is only one of the many ways in which the University of Massachusetts has distinguished itself in the national arena.

Student Council Representative Mike Chernack, a sophomore at the University of Massachusetts, is one of the many students who have been honored for their contributions to the University.

"The University of Massachusetts is a place where students can develop their talents and abilities to the fullest extent," Chernack said. "I am proud to be a part of this institution and I look forward to contributing to its continued success in the years ahead."
A WASTE OF DEMOCRACY

What is hoped to go down to no one of the "DRAKE"榕策ies, governmental corruption and inefficiency, but that the student body will rise up and take its seat in the cell of the Deer Island Peniten-

ciary. It is commonly said that a stupid act is the best way to

We know it but--we don't like it

A few weeks ago, the text received an issue of the Drake

News. The headline of this issue was:

"DRAKE FRATERNITY IS PLACED ON INDEBTED SOCIAL BURDEN"

It seems that a fraternity at Drake University caused quite a disturbance in their neighborhood and the local authorities had to be summoned. However, this is not really important. Many fraternities in many colleges are placed on social probation by the students themselves. As soon as the disturbance was created the student I-F.C. called a special meeting and took immediate, and we might add quite severe, corrective action. The whole situation was unfortunate and those at fault were the first to admit their error and apologize. But, as mentioned earlier, the important point is that joint corrective actions were taken by the stu-
dents.

A few weeks ago, on organization on campus experi-
enced a similar misfortune. They were wrong, and they realize their mistakes. Here, too, corrective actions were taken. These actions were no more severe than the actions taken at Drake; but they were far less desirable. They were less desirable because the automatic rule that was used in this situation proved, once again, that the students here at Tech are incapable of handing their own affairs. Oh, we know that eventually our I-F.C. was consulted regarding the situation--

What a magnanimous gesture!

This what amounts to an I-F.C. that acts as an inter-
mediary between two supposedly opposing factions. To put it more brightly--an I-F.C. that acts as message boys. Lowell Tech has come a long way in the past 50 years, and we hope that it will continue to do so. But, let's not engrave a glowing student spirit under the existing school policy. Next year many of us will be graduating and, to be slightly frills, must go out into the world. It doesn't seem to prepare students for the future by sheltering them in the present. Our four years at college are our years to grow and we will make mistakes. Who doesn't? The important thing is to realize our mistakes and be men enough to correct themselves. Presently, we do not know it--but we don't like it.
Letters to the Editor

To the Editor:

In reference to an editorial comment on the Student Council in the issue of the Text November 30, 1965, please allow me the opportunity of expressing my views.

What should be the objective of the "Text"? In my view, it should be to aid the student body in constructive activities, rather than to be an organ for the dissemination of mere mindless phrases. Two possible and plausible objectives are:

1. To present events in the student body in a voice reporting event honestly and capable of projection as well as criticism.

2. To present the ideals and approaching realities we arrive at as a result of our own striving outside the ambit of the student body. I am not criticizing the present situation of the "Text". It has grown progressively from a newspaper that was disfigured with cutting and erasing to one that was very much read and respected by everyone.

While seeking information regarding the "Text" I came across a memorandum from the Student Council of the Sears Trustee of the Student Council as the Sears Trustee of the Student Trustee. This memorandum, written last year, makes certain suggestions the Student Council will consider. It has gone from a newspaper that was disfigured with cutting and erasing to one that was very much read and respected by everyone.

Incorporated within this memorandum was the recommendation that the appointment of the Activities Committee be increased from 3:00 to 3:00. This was completely approved by the Board of Trustees and I have been asked, with due effect, to return to the Data page for the name of the "Text". Unfortunately I do not feel this result has been attained.

There is one point I wish to emphasize. No organization is better than its membership. The Student Council, from its very beginning, has been mentioned in this regard. Moreover, the "Text" should be a voice of criticism, but not censure. It is the duty of the "Text" to live with all the details required to make it so. You may easily reverse your stand for a moment; you may be wrong. I feel however, that it is your right and privilege to determine the points. The "Text" is the voice of all the students, not only of your circle of friends. It is the responsibility of the "Text" to question the results of the policy, I feel the "Text" needs a better job and I am sure you are looking for suggestions I would be more than happy to oblige.

That the Student Council and the student body has supported the "Text" at every all-too-frequent Board of Trustees meeting is the fact that the present Student Council is the best this institution has ever had. It is through the "Text" that the Student Council has completed this upwardly ever before, THEIR DECREASE YOUR SUPPORT. And I would like to think of the School Council as a third body. It was a poor attempt at civilization.

As a whole I feel the best use of a journal is to print the largest amount of important truths — truth which leads to more education.

M. L. Shavel

Mr. Shavel's letter, appearing in my recent editorial concerning the Student Council and All Tech Weekend. You are certainly correct. The Text did displace the "Gannet" in the Student Council. The editor of the "Gannet" is not very popular among the students and perhaps the "Text" will have to be displaced as well. The letter was very good.

"As a banking bill turns to thimblerig, etc., do an unsuccessful author turn critic."

-Shelley

Mr. Shavel:

I have just finished reading your recent editorial concerning the Student Council and All Tech Weekend. You are certainly correct. The Text did displace the "Gannet" in the Student Council. The editor of the "Gannet" is not very popular among the students and perhaps the "Text" will have to be displaced as well. The letter was very good.

You mentioned that the Text was a voice of the students, but you also mentioned that the "Gannet" was a voice of the students. I have no opinion of the entire student body. Our only duty is to report the story, not to report the "Gannet". The letter was very good and I am sure you have many ideas for improving the "Text".

Your letter was very good. It is true that the Text is a voice of the students, but you also mentioned that the "Gannet" was a voice of the students. I have no opinion of the entire student body. Our only duty is to report the story, not to report the "Gannet". The letter was very good and I am sure you have many ideas for improving the "Text".

Your letter was very good. It is true that the Text is a voice of the students, but you also mentioned that the "Gannet" was a voice of the students. I have no opinion of the entire student body. Our only duty is to report the story, not to report the "Gannet". The letter was very good and I am sure you have many ideas for improving the "Text".

Santa Rides Tonight

Then he says, "I'll give you five minutes to get those reindeer off this street.

Don't yo ho ho! me little man.

No, thanks! I'll wait for Santa.

The Text Wishes You Merry Christmas

Ouch!

No, really, what did you bring me Santa.

Censored. The editor had no guts.
END THREE GAME LOSING STREAK

The Loyola Tech basketball team ended a three game losing streak by knocking off state college as a foul ridden contest. Friday night in the Walker room on a three point shot with 1 minute left in the game the Terrys defeated B.C. 134-118.

Dave Byre finished with 32 points, 18 of which came in the second half. Byre, who was the high scorer for B.C., was the only one of the Terrys to score in double figures.

The game was a non and took only 36 minutes. The Terrys opened the game with both teams tied 15-15 at the 15 minute mark of the first half. At this point Ken Reo, Fred Stain, and Dave Byre took charge and Tech slowly pulled away from its cross city rival. At the half time intermission the Terrys led by Byre, 61-41.

UP AND IN

Fred Hancewicz (34) and Leon "Gonk" Uzdavinis (44) look on as Techt Co-Captain Rabeni hits for two.

DI WINS BOWLING TITLE

Glorious Pi won its second straight intercollegiate bowling title by defeating Delta Kappa Phi L1 last weekend in the Chatham Lanes. One side point for the winning team was entered Monday's match. O Pi and Phi K are 10-6.

The O Pi players were down 212 after the completion of the first game. Then with the two balls, the third and fourth rolls, George Kowal of O Pi knocked out both the Muades and Dave Woodruff of Phi K and tied the game at 312. The third game was a 21-20 win for Phi K, with O Pi winning the fourth game. The game was a 211-198 victory for O Pi.

HAPPY HOLIDAYS

Merry Christmas and a sober New Year from the boys. Lapper, Cadway, Tupper, Stumpy, "the P---" Jack and Pete.
RIGHT DOWN THE MIDDLE OF THE ROAD

I'm not in favor of either the extreme right or the extreme left, but when some joker decides he's going right down the center of the road, we should all be ready to do likewise. Consider Charlie, who has been a very sensible fellow all his life. Perhaps everyone else is in the gutter; that's quite all right. He is in the extreme right, but I am sure his opinion is much better than that of the extreme left. Charlie, the extreme right, is at least capable of seeing society as any rightist could see it.

To take sides in a controversial issue is both natural and healthy, for it puts the issue to the proof of one opinion before imposing on our minds the contrary. If you can't find any opinion that touts them as the extreme right, and any of the other side would be equally extreme, you would probably be unable to find any beliefs for which there is a willingness to stand and have your head knocked in. The main attraction will be left to the gutter by the way, so in order to get somewhere you must first be led into the gutter.

I have a right to preach democracy, either civilistc or socialist, wherever I feel that the influence would be of some benefit to the people. On the other hand I don't begrudge the Communist Party the right to preach their doctrines to all who will listen in any country of either the western or the eastern hemisphere. They have as much right to as much world power as the next party, or no one can deny that it wasn't the cold of democracy that was responsible for creating civilizations as we know it today. We all like to feel that we are living in God's chosen country, but let's not get too self-righteous and claim the middle of the road for ourselves. Isn't Jordonism God's chosen hog, isn't Rumanism? Don't the Europeans think that they are living on God's chosen land? How do the English feel about the British Empire? Do you think there are any patriotic illustrations?

The fact is that if we want to survive we must make a firm stand for what we believe is right. We have enough organized dynasties and do-gooder organizations already. Now we need some self-conscious, ideal-headed citizens who are willing to take a stand on the major issues.

Charlie may have been able to drive down the middle of the road forty years ago, but not today. Even in this day of roads with its multitudes and cars, I don't think Charlie's are dumb enough to try driving down the grass strip.

AVS SPREADS CHRISTMAS SPIRIT

A new sound is in the air at L.T.E. which stands out from the usual scraping and grinding of the hoard of cars, trucks and buses that swarm through the middle of our campus. This, of course, is the sound of Christmas carols which manages to drown out the hubbub of traffic and adds a Christmas spirit to our school.

This music is being provided for our enjoyment by our Audio-Visual Society as their contribution to Christmas. The hours of playing are tentatively scheduled to be from 4 to 7.

For the technical minded, the equipment consists of two PA speakers provided by the ROTC Dept and an amplifier. Those speakers are mounted on the roof of Smith and Eames hall. The amplifier is a 100-watt stereo job, provided by a very fine firm and is located in the library along with the records.

Christmas carols are certainly a welcome addition to the campus at this time of year, as they do much to add to the Christmas spirit and make our final week before vacation more enjoyable, exams notwithstanding.

PRINCIPAL'S NIGHT AT TECHNO RAMA

Principals of more than 50 high schools in the Merrimack Valley area were given an opportunity to participate in Technorama VII next spring. This is the seventh annual area science festival held at Lowell Technological Institute, which each year attracts more than 150 exhibitors.

Dr. Arthur F. Habey, Lowell Tech admissions officer and chairman of the fair, felt that Technorama is one of the local regional affiliates of the National Science Fair International, that the NSF in 1963 will be in Albuquerque, N. M., May 3 through 10, and, again this year, Technorama's winner will receive a trip to participate in that fair in addition. The judges committee will select one exhibitor to represent Technorama in the Massachusetts State Science Fair.

Other prizes will include the U. S. Navy Cruiser award, the Grolier Society's Encyclopedia of Science, the New American Library of Literature and Language award, Air Force awards, professional and technical awards and more than $100 in prizes, and plaques.

The 1963 Technorama committee includes George F. Abbot, chairman, Miss Babbitt, Miss Barlow, A. Browne, Walter M. Drabowsky, Prof. Charles E. Jarvis, and Prof. Earl L. Watt, all of L.T.E. and George J. McCuan of The Lowell Sun.

Named to the high school advisory committees for the undertaking were Vincent C. Pappademos of Georgetown high school, Dr. Elene W. Forbush of Wilmington high school, Robert W. Martin of North Middlesex Regional High school, in Ayer, Massachusetts, and George H. Groller of Chelmsford High School. The committee also includes Sister Marie of the Benedict Gunam School in Tyngsboro, and Mr. Browne mentioned that invitations have been sent to the invited schools for distribution to their science departments so that all students may begin next fall's work on their science projects.

AT PRATT & WHITNEY AIRCRAFT...

YOUR EYES CAN BE ON THE STARS BUT YOUR FEET MUST BE ON THE GROUND

The glamour and excitement of space-age programs often obscure a fundamental fact. It is simply that engineers must be coupled with sound, practical, down-to-earth engineering if goals are to be attained. This is the philosophy upon which Pratt & Whitney Aircraft's position as a world leader in flight propulsion systems has been built.

Almost four decades of solid engineering achievement at Pratt & Whitney Aircraft can be credited to management's conviction that basic and applied research is essential to healthy progress. In addition to concentrated research and development efforts on advanced gas turbine and rocket engines, new and exciting efforts are being explored in every field of aerospace, marine and industrial power application.

The challenge of the future is indicated by current programs. Presently Pratt & Whitney Aircraft is exploring the areas of technical knowledge in magnetic hydrodynamics...hypersonic and thermo-electric conversions...hypersonic propulsion...fuel cells and nuclear power.

If you have interests in common with us, if you look to the future but desire to take a down-to-earth approach to get there, investigate career opportunities at Pratt & Whitney Aircraft.

To help move tomorrow closer to today, we continue to seek ambitious young engineers and scientists. Your degree can be a B.S., M.S. or Ph.D. in MECHANICAL AERONAUTICAL ELECTRICAL CHEMICAL and NUCLEAR ENGINEERING or PHYSICS CHEMISTRY METALLURGY CERAMICS MATHEMATICS ENGINEERING SCIENCE or PHYSICS. The field is wide, the challenge great. A future of recognition and advancement may be here for you.

For further information regarding an engineering career at Pratt & Whitney Aircraft, consult your college placement officer or write to Mr. William L. Stoner, Engineering Department, Pratt & Whitney Aircraft, East Hartford, Connecticut.
PHI PSI

The final week before Christmas vacation was featured by Phi Psi's annual Christmas party for some of the more needy children of Lowell. Most of the brothers, as well as the secretaries of L.T.L., were in attendance, and the kids really had a great time watching cartoons and eating a turkey dinner. Their Christmas gifts this year were donated by "Broodly" who anonymously assumes the role of "Santa Claus" to some of the brothers of Phi Psi.

Military Ball weekend last week contributed to the success of the two parties held Friday and Saturday night, and many freshmen were present. Our appreciation for all the guests and those who pitched in—thank you to Mr. Murphy and Mrs. Murphy who chaperoned Friday night, to Coach Jim Oliver for Saturday night's entertainment, and to Mr. Plourde, whose absence was felt when his humor was missed.

Of other things, our house team is currently riding atop the intramural league, featuring a well-balanced attack which has netted wins over O.P and D.K. Our bowling team, considered the second best in Lowell, is beginning to achingly miss their quicksilver ace, and you could prove to be the "spoilers" of the league. An urgent plea is for you five to get your skates and don your sticks around the del drunks and put us back in a respectful position we assumed two years ago. With just one loss, it wouldn't be difficult to duplicate the success of our freshman team.

Once again Phi Psi set a precedent as it won the I.V. cigarette bracket containing over 30,000 packs and has a new Motorola in perfect working order, with a new "Red Room." Finally, we wish to all the brothers and their families, a Merry Christmas and a prosperous holiday.

DELTA KAPPA PHI

At the highly-anticipated vacation approaches, we report to you the latest activities at the house of Delta Kappa Phi.

First, we wish to thank Ed Mark for entertaining the brothers with an excellent barbecue yesterday afternoon, and for transporting the brothers to his house in the way of a housewarming party. The house is beautiful and all those who attended were enthusiastic.

Bringing the social calendar a little more up to date, last weekend proved to be a winner at D.K.P., for it was Mill Ball Weekend, and in lieu of the usual party at the house, we decided to insert a note of thanks to brothers Paul DePasse and Ed De Veaux for the very fine season they gave us (day and night). After the jazz concert at Glennock, brothers, freshmen, and their dates packed the house and danced the rest of the night to the music of Miss Moonlight. Fresh, others and we were glad to see you at the house that night. We hope you had a ball and that we'll see you again next season when the rushing seasons start. You are always welcome at the house of Delta Kappa Phi.

On Saturday night, the R.O.C. men attended the formal ball and danced to the sounds of Bob Bachelder, then returned to the house for a party and a little relaxation.

In the theater department, a few go out to brother Skip White, for the good job he did on the big D.K.P. top hit on the front of the house; to brother Jack Maloney and brother and Mrs. George Mandel for chaperoning Friday and Saturday night, respectively.

We wish Deks are faring pretty well. As of this writing, we shall see top on top of the volleyball roster after defeating the Fresh team and the stemmed Shremkots. In the basketball, Deks still hold a 1-1 record after defeating Holyoke and losing to a well-practiced Phi Psi team. On the bowling lane, we shall stand with a 15-5 record, running a close second to O.P.'s 16-4.

Coming up this weekend is a traditional event for the Deks, for it is the annual winter break and their desire to journey to Tewksbury State Hospital, bearing gifts and enter- tainment for those who know us. Who knows what they will concoct. Gifts have been donated from the local merchants and the Deks will provide the refreshments and entertainment. At the end of the day, the brothers will return home, with the houseplants cracking and the tree to be decorated. We will have a good time and we hope you do over the vacation as well.

All the brothers of Delta Kappa Phi sincerely wish all of you a Merry Christmas and a prosperous New Year—and, by the way, don't study hard!

JOSEPH J. FOLEY
WHO'S WHO IN American Colleges & Universities Lowell Tech's Honored 17
WHO'S WHO ON CAMPUS

Tom Brennan.

William Paul Chandler, that's who. A native of the Pawtucketville section of Lowell, entered Tech with a Commonwealth scholarship in the fall of 1959 after graduating from Lowell High School.

Since entering Tech, Bill has participated actively in many extracurricular activities, served as a class officer, and received several honors and awards.

Bill has been an active member in the Newman Club for four years, serving on the executive board as a junior; the physics and math society as a sophomore; the A.I.P. in his junior and senior years, DK since his sophomore year, serving as secretary and special activity chairman as a junior, and as vice-president this year; the IFC as a senior; and the VAS as a junior and senior, serving as secretary this year.

Bill made the dean's list his freshman year, was awarded the ASIT Distinguished Cadet award and has been recognized in Who's Who in American Colleges and Universities, both as a junior and senior.

As a junior, Bill served as secretary for the class of 1963. Majoring in physics, Bill expects to receive his B.S. in June, 1963. As a student at Tech, Bill has worked as a student lab instructor in physics, and during the summer as a data analyst and lab technician in the Geophysics Research Laboratory of the Air Force Cambridge Research Laboratories at Hanscom Field.

Upon graduation, Bill, a Captain in Advanced AFROTC, will enter the Air Force for an indefinite period in which he will work for his master's degree in nuclear physics and as a research assistant.

Bill's pinned to Miss Margaret Connaughton of L.S.C. They are contemplating marriage, but have yet to set a date.

Seasons Greetings

President - BOB LODIE
Vice-President - JAMES CARRO

College Week Planned December 16-21

The Student Director, Karl Pfed, has announced the present schedule of events for Kipsini's annual "College Week." November 16-21.

Although numerous functions will be scheduled at a later date, existing plans call for:

Tuesday, November 16:

Wednesday, November 17:

1. Dance in afternoon. Miscellaneous.
2. Theatre.”
3. Open house for all. Miscellaneous.
4. Open house for all. Miscellaneous.

Thursday, November 18:

1. Open house for all. Miscellaneous.
2. Open house for all. Miscellaneous.

Friday, November 19:

1. Open house for all. Miscellaneous.
2. Open house for all. Miscellaneous.

THE TEXT

"AS I SEE IT"  
David Hopwood

In the last issue of the Text, I mentioned the parking situation. Unfortunately, I must mention it again. Instead of any improvement in the attitude of the student body towards cooperating with the Student Council, there has been an increase in parking violations.

When we first decided upon a system for registering violators, we were lenient. Unauthorized students are parking in the lot until they get a warning and then may either stop or continuous violating Student Council ordinances.

The parking situation is completely out of order and stem measures must be taken before the situation is rectified. Although plans are not definite yet, one may assume that no more warnings will be given. From now on, the first offense will be treated just as seriously as any subsequent one.

Another source of confusion on the L.T.T. campus is the Thurday meeting hours. Many active students have two or more meetings scheduled for the same hour. In the near future a meeting of the presidents of every campus organization will be held, and at that time a master schedule will be designed.

With the co-operation of the various campus organizations this source of confusion may be eliminated.

Merry Christmas from

S. C. SOLVES PARKING PROBLEM

Quality is the key to success at Western Electric

Admittedly, our standards are high at Western Electric. But engineering graduates who can meet them, and who decide to join us, will begin their careers at one of the best times in the history of the company. For plentiful opportunities await them in both engineering and management careers.

As we enter a new era of communications, Western Electric engineers are carrying forward an innovation program which will affect the whole art of telephony from electronic devices to high-speed signal transmission. And, in the manufacturing category alone, several thousand supervisory jobs will be available to W.E. people within the next year.

Many of these new engineers will come from the class of '62.

Now is the time for you to start thinking seriously about the general work area that interests you at Western Electric, the manufacturing you came into it, or the research in pre-production of the telephone System. Then, when your representatives come to your campus, you'll be prepared to discuss career directions that will help make the interview profitable.

After a man joins Western Electric, he will find many programs that will aid him in exploring the exciting course of his career—advancing just as fast as his abilities allow. And he'll be sure in the knowledge that he is growing with a company dedicated to helping America set the pace in improving communications for a rapidly growing world.

Challenging opportunities exist now at Western Electric for electrical, mechanical, industrial, and chemical engineers, as well as physical scientists, mathematicians, and business majors. All qualified applicants will receive careful consideration for employment without regard to race, creed, or national origin. For more information about Western Electric, write College Relations, Western Electric Co., P.O. Box 6740, 22nd Street, New York 24, New York. It’s sure too late now to apply if you're in college this year, but we'll be on the lookout for you when our college representatives visit your campus.

W. E. is an equal opportunity employer.
Text Elects Managing Ed.

On Thursday, November 29, Dave Parker was elected new Managing Editor of the Text, Dave will take over replacing Mr. Hope, who had to refind his job to get his family already busy schedule.

At the November 29th meeting, "Mike" Clarson, Editor-in-Chief of the Text, outlined the duties of the managing editor, and asked for nominations for this important post. Nominations were written in the book. The vote was done by Mr. Bob Guter, Joe Cyr and Jack Belliveau. The result of the ballot was unanimously in favor of Dave Parker.

The duties of the managing editor are many-fold. These include writing at least two editorials or features for each issue of the Text. Another assignment of the managing editor is to write occasional news or feature articles that he feels that it is necessary.

The managing editor is also, among his other duties, a co-cordinator. It is his job to work with the various editors in the paper, especially in deciding on the design and content for the paper.

The Text has already proved himself equal to these difficult tasks, by admirably discharging the duties of his previous position, that of features editor. Furthermore, he has not only carried out the duties of the position, but has since Jim Manosh resigned.

For now, main majoring in Physics, plans to receive his Bachelor's degree of Lowell Tech. His future plans include going on to graduate school and hopes to teach at the college level.

At present, Dave's extracurricular activities are limited to his interest in the Text. At a result, he will be able to devote much of his time and effort to keep the Text at present standard of quality.
