ASTME PLANS SECOND SPORTS SPECTACULAR

After two months of planning and anticipation, the second annual Sports Spectacular which is sponsored by the American Society of Tool and Manufacturing Engineers Student Chapter #24, has taken shape. Due to the hard work of Norm Salem, Professor J. A. Heaney and the members of the A.S.T.M.E., this year's Spectacular will be bigger and better than the one held last year.

The program will start at 7:50 P.M. It should be pointed out that all the money received from this program will be used towards a scholarship for deserving students here at Lowell Tech.

The program will include exhibitions in Judo, weightlifting, wrestling, tumbling, boxing, gymnastics, rope climb, and the trampoline. It will also include an exhibition by the LTJ gymnast team.

The men who will perform in these exhibitions, will be held from the black belt in Judo to the National championship in boxing and wrestling. These men have donated their time so that with your help we may establish a scholarship for the students. This program is for you and your friends, and is presented in such a way that you will take advantage of it.

The LTJ gymnast team will be one dollar only, but with this donation you get the services of an LTJ gymnast who will perform at the end of the program. First will you spend an enjoyable evening at this program and the second you will by your attendance be aiding the growth of the LTJ gymnast club.

Those of you who take any of the social sciences which are offered here at Lowell Tech will have time or another chance in contact with our speakers Dr. J. B. Blythe, Dr. J. S. Ahlstrom, Nordin Silver, and will be presented with the story of the social sciences.

It is hoped that all the student body can attend this worthy cause but with limited facilities, tickets are limited. If you wish to purchase a ticket before the end of the week, please write to J. A. Heaney, 6th floor, or call in person. The cost of these tickets are ten cents and it is free after the first thirty minutes.

In addition, the students will have the opportunity to purchase the first edition of the Spectacular, which contains information about the social sciences and the social scientists here at Lowell Tech.

New equipment for nuclear dept.

The Nuclear Engineering Department at Lowell Tech, recently, has been able to expand their facilities and equipment, and are now equipped to handle more advanced projects. The equipment includes: a gamma counter, a high-speed laboratory, a nuclear reactor, and a nuclear computer.

Mr. Dean, the director of the nuclear department, expressed his delight at the new equipment, and commented that the department is now able to handle more advanced research projects.

New equipment also includes a new electron microscope, a new x-ray machine, and a new neutron generator.

In addition, the department has purchased a new computer, which will be used for advanced research projects.

The department is currently working on a number of projects, including the study of nuclear reactions, the development of new materials, and the study of nuclear reactors.

The new equipment is expected to help the department in their research efforts, and to bring new projects to the forefront.

Editorial Section

Editorial

Lions Pulitzer has been hailed everything from saint to sinner, but more recently, he has been attacked by the Lawrence Eagle Tribune for receiving the Nobel Peace Prize. This is not surprising, for Leo Chang, the owner of the Tribune, also is a syndicated columnist who was cited to the Academy of Sciences in Russia, and his columns on his character were harmful by any standards.

To interpret what the feuded editorial writer meant when he inquired, "What is the real meaning of "scientific method?" it is necessary to look at Communism, or what we have taken to be the meaning of that word.

A communist used to be a fellow whose main goal was to bury us, and to bring pure socialism to the world. If you consider this, there would be no work, no strife, medical care for the aged (and the young, too), plenty of wheat on the table, and harmony throughout the world.

Very noble and worthy ambitions, of course but isn't it great to think that the communist communities would have united in the spirit of the world without the Communists ever laboring for their gain. If you take a close look at the word, communism, and analyze it, is communism not a strait? And if it is a strait, as I believe, then isn't communism a bit too high of a sort of literary line for all and all for the State?

We have given Communitism another interpretation, and because of the way we have let it mean everything, communism means anything by any standards. It is no wonder that the majority may sometimes be wrong, but we consider it correct.

When a writer indiscernibly throws in the word communism to mean anything by any standards, he is well known to us. Now, for the first time, we are trying to give our opinions in the mind of the reader. Whether he or she will consider a person in question a communist or not is entirely up to him. All we know is that communism stands, sits, or stands, communism makes little difference, because the decision has been made.

Linus Pauling is not a communist, yet he was, for all intents and purposes, branded such by a misinformed editorial writer for the Madison Advocate. The name infers so many vile and twisted things, renders of the editorial writer an unavowed admirer thinking twisted for them because of cheap democrats.

Pauling is a great man; his accomplishments are many and great, but he does not deserve the degradation that he received, nor perhaps he has the specs to cry out for what he believes. He is a pacifist, and he preaches his doctrine. He is a citizen of the United States and the United Nations, and he once said that the greatest damage that is associated with radioactive fallouts is the damage that is done to the human beings by the dangers of fallout. He is paying the price of downgrading and ridiculing by those who claim to be informed.

Pauling does not deserve this. He is a great man, an outstanding citizen and a fine scientist. He practiced what he preached; he stood up for what he thought, and thousands of other eminent scientists of high caliber believe so desperately.

In the opinion of the greatest minds in the world, the Nobel Peace Prize, which Pauling received, was the most important award in the history of science. Can anyone believe the statement?

Could so many people have made such great mistakes in their estimation of Pauling? Pauling is not a communist but he did not bother to finish getting the facts, and wrote a colored, one-sided view of the man, a character superficial. Whatever the reason, the damage has been done, and it is quite likely that few people have spoken to who read the editorial, almost all are convinced that Pauling is a communist.

A great man has had his reputation soed by irresponsibility.

Freedom of the press? Bah! "In this country all you have to do is blab and they call you a red!" —Jack Schaeferer

Letters to the Editor

What is going on down there at the West office? Your attack of the Madison Advocate is so dastardly that it seems you managed to twist some of the facts. Remember who you are dealing with. No one could agree on how to inspect and control underground atomic tests and now ground testing will continue. More important, the treaty is not a disarmament plan but it offers no more than a plan to reduce or stop atomic tests. Total grade fail, and at the end of the semester or year they know they could have done better but would not do to do this. Stupid.

The editor noted with regret that "the financial integrity of this paper..." and apparently many other school papers across the country. The author of this "large expression, only upon a product which we pay you to fraudulently advertise..." and "Our student newspapers are the only voice and the only medium of..." and "Our annual universities..." and "Our students are educational institutions..." and "The main voice..." and "The main forum..." and "The main function of an educational institution..." and "The evidence an..." and "The evidence an..."

The editor's note contains some facts that are not entirely accurate but pupils are left as they are, do this work and produce this product.

This is not the "impartiality" of the West office of assigning the "equal" to the "equal" in his day. Student newspapers are only voice and medium of the students and the only function of an educational institution.

The Editor's note contains some facts that are not entirely accurate but pupils are left as they are, do this work and produce this product.

The editor's note contains some facts that are not entirely accurate but pupils are left as they are, do this work and produce this product.

THE TEXT

DEAR GABBY

When it’s hot out, the heat is on in all the buildings and when it’s cold out there’s no heat. What’s with this?

UNCOMFORTABLE

Dear Gabby:

I’m surprised at you. You should know that it isn’t much less to heat a building on a hot day than to cool it.

Dear "Uncomfortable":

You ask me a question I always think about before I tell you the answer. What’s the matter with you?

COURIOUS

Dear Gabby:

He laughs because he’s frightened. He’s using aide to find that final home.

FIGHT OF THE WEEK...

D.K. v. ADMINISTRATION

FILE GREEVANCE

The following letters refer to the grievance which Delta Kappa Phi Fraternity filed with the IFC, concerning the provocation of Cummaucks Hall by an outside party after DK Phi’s activities were canceled.

The Interfraternity Council submits official word from the President of the Institute and should be commended for their work in resolving this matter.

BOOKKEEPING ERROR

An error in bookkeeping arose between the secretaries for DK and Taverner fraternity. The Interfraternity Council was notified of the error, and the President of the Institute has been assured that this error will not be repeated.

Chairman of the Interfraternity Council

Lowell Technological Institute

Lowell, Massachusetts

DEAR MR. WONG

The manuals are not needed at all and will be returned.

Dear Mr. Wong:

Your request to send a formal protest to the student council that they may take action on a matter involving one of our fraternities has been ignored.

1. Preference given to an outside group in using school facilities or services.

2. Not allowing students to hold dances in the gymnasium.

3. Saturdays set without permission or reservation of Cummaucks Hall.

The Interfraternity Council is aware of these injustices so that it is not necessary to go to this detail at this time.

We strongly feel that the fraternity involved had no idea that it was wrong and request that the following action be taken:

1. That the Board of Trustees be informed of the incident and consequeucnes involved and the students’ actions.

2. That a statement be made to the students and their friends.

Chairman of the Interfraternity Council

Lowell Technological Institute

Lowell, Massachusetts

DEAR MR. DEAN

We are writing to you on behalf of the students and faculty of the School of Engineering.

This is to confirm that the fraternity is not liable for the actions of the members.

The fraternity is not responsible for the actions of the members.

The fraternity is not liable for the actions of the members.

Chairman of the Interfraternity Council

Lowell Technological Institute

Lowell, Massachusetts

MORRIS JAZZ TRIO AT KRESGE ON NOVEMBER 22

The Morris Jazz Trio, with their original arrangements and multiple accomplished ensemble, will perform in Kresge Auditorium on November 22, in support of the arts and entertainment. The trio features the renowned trombonist and arranger, John Kresge, and his band of accomplished musicians. The evening promises to be a memorable event, with the trio performing a variety of jazz standards and original compositions. The performance will be held in Kresge Auditorium, located at 500 East University Avenue, Ann Arbor. Tickets are available at the door and online at the university’s website. For more information, please visit the music department’s website.
PREFACE
Aurora, OH? How?

Although the presidential election is more than a year away, many Americans are already voting for a Kennedy. There is no doubt that Kennedy will be nominated by the Democrats. How can the GOP hope to wrestle even a part of the country's vote? I will consider them in the next article.

In the October issue of Saturday Evening Post, Senator Barry Goldwater has expressed the view that many elements of the Democratic party are seeking to organize an "Anti-Goldwater" committee, which is spreading the rumors that goldwater, by the state of this middle by the middle, is a real threat.

I find it hard to believe the truth is that Goldwater is falling away from the many hardy and it disposes of him. Indiana's State Chairman H. Dave Brown, a Rockefelder supporter, may have had so much to lose. People were working openly for Goldwater in Ohio. There is grave concern that the crowd would not be large. However, the rank and file Ohio Republicans are strongly for Nixon. As a result, the party would take approximately $100 to 150 million for Nixon.

Of special interest to Colonel Carhart was the test course being offered at LTL. The school is one of the two in the United States teaching the new AFROTC course, and colonel Carhart will be used in designing the curriculum for the program when it is approved by Congress.

PARKER LECTURE SERIES NOTES

The ultimate in film travel comes to the Memorial Auditorium, downtown, on Friday, December 1st. The program will be attended by Colonel Carhart, head of the AFROTC at OSU.

Air Force seeks changes in ROTC structure

Washington (APNS) — The Air Force this week presented its view to the major Reserve Officer Training Corps legislation in testimony before the House Committee on Armed Services.

The chief of the testimony by Benjamin W. Fried, special assistant to the Secretary of the Air Force for manpower, personnel and reserved forces, was that the ROC law be modernized to place more emphasis on personnel needs of the military.

In his testimony, Mr. Fried said that the major difficulties of the program as present are the result of the outdated legislation that provides for the perpetuation of the Reserve Officer Training Corps to produce large numbers of college trained officers for the inactive reserve force. The restrictive structure of the ROC law makes it impossible to alter the present program to fit its new mission, that of providing both regular and reserve officers for the active forces. Mr. Fried stated.

He said the requirement of training four years in college for many of the present students is a necessity for service in a science-technology-oriented Air Force. He urged legislation to amend the existing Air Force Reserve Officer Training Corps law to provide for the training of a two-year military service scholarship program to supplement and perhaps replace the current ROTC program.

He told the legislators that the proposed legislation (H.R. 1386) would provide sufficient scholarships for two years of training under the program and thus provide a broad base of selection, make it possible for all students in college, including junior college transfers, to compete for enrollment under the program and further the basic mission; that it makes it easier for students to enroll as an engineering students to enroll, make it possible to be more selective in technical assignments by reducing the number of officer trainees, and to teach and lower the cost of the program when fully implemented by the Air Force.

The bill the Air Force favors is an officer development program rather than having Dep. of the Air Force seek a special fund for its own annual budget of 13,000 new officers. Mr. Fried pointed out that colleges and universities also face the ROC programs for administrative reasons.

At the conclusion of his testimony, he said: "We Alternative to the present program under the restrictive ROC law. (2) Obtain officers from OTIS which would eventually lead to the Air Force to form an independent ROC system to today's and tomorrow's needs. At a time of a new military structure, that is teaching the proposed course to the AFROTC. It looks as though that is the first time as a long time ago. It appears that the new officers in ROTC are being trained to make the Air Force and the Military. The cost of training an Air Force officer will be greatly reduced with the quality of training being increased."

KIDS brazil! It might just put what they need, according to one father. He says in the November 21 issue that the child must be "enough of a problem to cause some young adults to do more in this field."

With the information on the "political mentality of children" children staff children of their natural spontaneity.

WORLD'S FAIR PREVIEW

An 84-foot high giant tire, in which people can actually sit, will be constructed by United States Rubber Co. for the New York World's Fair, it was announced today by George V. Richard, president. Called the U. S. Royal giant tire, it will be of heavy steel construction.

The world's largest automobile is being built by United States Rubber Co. for the New York World's Fair, it was announced today by George V. Richard, president. Called the U. S. Royal giant tire, it will be of heavy steel construction.

The structure will be 175 feet high, weighing 100,000 pounds. It is being built under the supervision of the United States Rubber Co. for the New York World's Fair, it was announced today by George V. Richard, president.

The U. S. Royal giant tire, which will be located on a 6,000 sq. ft. tract of land near the entrance of the fair grounds, will be 

The giant tire is designed for commercial use, but will be available for public use at all times. The structure will be completed before the opening of the fair in the spring of 1965.

The giant tire will be made of heavy steel and will be able to withstand the stresses of commercial use. The structure will be completed before the opening of the fair in the spring of 1965.

The giant tire will be the centerpiece of the fair and will be available for public use at all times. The structure will be completed before the opening of the fair in the spring of 1965.
ARNO LD AIR SOCIETY ELECTS

The AAS is composed of select members of the Advanced Cadet Corps and represents the military ideals of group participation to further the tradition, purpose, and concept of the USAF. In the spirit of expansion, the Vandenburg Air Society applied and was awarded membership as a squadron in the nationwide Arnold Air Society.

Through the combined efforts of its members that relatively small organization has gained recognition and prominence throughout the nation.

New England, New York region now has its own affiliated military unit. The annual scheduled functions included formation of the new cadet cadre, induction and presentation of the oldest member of the society, and an exhibit that presents the greatest contribution toward aerospace technology.

Through the valiant efforts of its members, the USAS has far exceeded both the Advanced Cadet League and the newly reorganized Cadet Group. The Society has continued plans for future expansion and welcomes applications from qualified Advanced AFROTC Cadets. The Society is presently in preparation of the 1st Annual Cadet Ball, this most spectacular weekend on Campus.

T he TEXT

There have been many complaints around campus about the size and the quality of the first few issues of the text this semester. But just few of the complaints realize just what the situation is down here at the Text Office. If staff can be counted on the fingers of one hand. Our News Staff is smaller in number and our Features Staff has twice that number. Many students work for such a small staff must do to get published any page at all.

How can you help? Just drop down to the Text Office any time and let us know that you are in trouble. We'd appreciate it.

PROFESSION: STUDENT

"ENGLISH DEPARTMENT?... NEVER MIND WHO THIS IS, BUT IF TIMOTHY LEARY GETS AN 'F' FOR ENGLISH 144, A BOMB WILL EXPLODE SOMEWHERE IN YOUR BUILDING.

TEXT HOLDS ELECTIONS

At a recent meeting of the Text staff, elections for officers for the 1963-64 term were held. Elected to the position of editor-in-chief was Frank P. Freeman, and named managing editor was Frank R. Rimbett.

Freeman started on the text two years ago when he joined the photography staff as a cameraman. Under Paul Howitt, he wrote feature articles, and when Mike Cherton took over, he was named news editor. He served in this capacity until October 1962, when he contracted a serious case of hepatitis. Coming back as a special student second term, he was elected managing editor under the editorship of Dave Parker, a position he held to this date.

Frank Rimbett, a junior, has worked diligently for the Text this year. He served as an outstanding features writer, and has shown an unusual insight in the analysis of problems in LTL, the campus and the world. His political views gave the paper much life in the past, and will continue to provide chills of great excitement.

Remaining as business manager is Dick Shifman, a senior who is a member of Pi Lambda Phi fraternity and co-editor of this year's yearbook.

With its season completed the Tech Soccer Team last completed a tough schedule, winning with a 3-1-0 record. A mark of infamy preserved the Hartford team from rising up the record was one of them.

BROOKLYN I. TECH 1

In the second game of the season, the home team's defense posted all the talent they could muster. The Tech defense gobbled up the goal against Hartford's clones. With only about a minute gone in the second half, Hartford forward Akon scored the second goal of the game. Hartford kicked off but couldn't stop Tech defense. The ball was cleared out, and the Tech defense prevented Hartford from scoring.

BOWDOIN 1, TECH 1

In the opening game of the season, Bowdoin's defense was aproblem for Tech. The ball was kicked off, and the Tech defense couldn't prevent Bowdoin from scoring. The game was played in the rain, and the conditions were less than ideal. The game ended in a 1-1 draw.

BOWDOIN 2, TECH 1

The second game was a repeat of the first. Bowdoin's defense was excellent, and the Tech defense was unable to prevent Bowdoin from scoring. The game ended in a 2-1 victory for Bowdoin.

BOWDOIN 3, TECH 2

In the third game, Bowdoin's defense was even more formidable. The Tech defense was unable to prevent Bowdoin from scoring, and the game ended in a 3-2 victory for Bowdoin.

BOWDOIN 4, TECH 3

The fourth game was a repeat of the third. Bowdoin's defense was excellent, and the Tech defense was unable to prevent Bowdoin from scoring. The game ended in a 4-3 victory for Bowdoin.

BOWDOIN 5, TECH 4

The fifth game was a repeat of the fourth. Bowdoin's defense was excellent, and the Tech defense was unable to prevent Bowdoin from scoring. The game ended in a 5-4 victory for Bowdoin.

BOWDOIN 6, TECH 5

The sixth game was a repeat of the fifth. Bowdoin's defense was excellent, and the Tech defense was unable to prevent Bowdoin from scoring. The game ended in a 6-5 victory for Bowdoin.

BOWDOIN 7, TECH 6

The seventh game was a repeat of the sixth. Bowdoin's defense was excellent, and the Tech defense was unable to prevent Bowdoin from scoring. The game ended in a 7-6 victory for Bowdoin.
WHATS THE STORY

What is going on here at LTJ? Who is trying to kid whom? How come there are so many dreams, and not many realities? These are the questions that we would like to bring before you at this time.

On October 3 the Freshmen were given their annual Coming Our Dinner in Cumnock Hall, at which time they were given their annual pep talk on things they can look forward to at the Institute. As usual the topic of sports was brought up. They were told of the great dreams and plans for our athletics here at Tech. All of the freshmen listened with great attentiveness while these plans were mapped out for them by the chairman of Board of Trustees.

The only trouble is that we have heard that same speech, with a few variations thrown in, for the past four years.

The new gym was the main issue that was talked about. He told us how the plans for our dream is steadily proceeding to the completion stage. Well they must be pretty intricate plans, because it has taken at least two years to complete them. We will grant the fact that at the present moment, the houses are being raised, but that is not an indication of this new addition to our campus. But when will the actual building get under way next spring, summer, or next fall? Or maybe the Class of 1968 will hear, at their banquet, that construction is due to get under way in the next few weeks!!

We ask the question--Why is it taking so long? We don't know. But we do know that it is not fair to the students to make them play their sports in such a peninsular-size gym, as we now have. It is really funny to watch the expressions of the opposing teams when we say, "This is our gym." They as much as say it is safe, or do you think it will collapse before the game is over with?

The old gym is a disgrace and should be condemned before someone gets hurt up there. Another problem that will be solved when, and if the new gym is built is the 50 mile hike you have to make when you go from the locker room to the gym. We guess that when they built it they figured that the opposing team would be exhausted by the time they reached the gym, that they just have enough strength to say "quit" and turn around and go home.

Let's not blame it all on the school though, some of the blame should fall on the State of Mass. They are the ones who have held up the money for so long. So when we get this new dream gym we should be happy but we should remember that the State is not doing us a favor, it owes us that gym.

Our next high hope is that of a crew, and boat house on the Merrimack River. When will we see this? Who knows! It if is like anything else that is built around here, maybe we can bring our grandchildren to see the first race.

Despite poor support, no matter what way you look at it, the athletes are still turning in some fine play. After a ridiculous four and one-half hour trip to Vermont, the Tufts defeated our Blue and White in a game that went out and booted home a 1-0 victory over superseded Norwich. Supposed is to say the least. Who would expect a team, no matter how good they were, to play as energetically as they did after such an exhausting trip, and the most exhausting thing of all is that all of our boys had nothing to look forward to but another four and one-half hour trip home. An athlete is supposed to be in good physical condition for nine hours of traveling and a three hour soccer game is enough to tire even a Kennedy.

How can the situation be remedied? Why not make it an overnight trip. The athletes wouldn't mind! And certainly money should be no problem, after all, money has been appropriated for more ridiculous projects, the parking lot for instance.

Chet and George

LAMBERT NEW ASSISTANT COACH

Jim Lambert has been added to the Lowell Tech Coaching Staff as an assistant in Varsity, basketball and, as an assistant Tunis in football. Lambert is a familiar figure at Lowell Tech, for he has taken over several of Coach John Southwick's duties and duties here. He was born, raised, and lives with his wife, and two children in North Chelmsford. He attended Lowell schools, establishing sports records nearly unsurpassed in the sports history of the area.

Jim started his athletic career with Lowell High back in 1948, and helped quarterback the Red and Gray through several fine seasons until his graduation in '51. Then it was the Navy for four years and Jimmy晋升 in shape participating in the varsity basketball and swimming programs. A proficient and powerful swimmer, he has served as a swimmer and diving instructor at Vesper Country Club in Lowell.

It was a good wish for teen-ager Vincent Rand of West Roxbury that Lambert took such a liking to him. A former solider, Rand was discovered in Lowell Tech's Freshman Football back Lambert plugged in and rescued him from the Freshman squad. For his heroics, Lambert received a citation from President Eisenhower and also was awarded the Massachusetts Junior College Athletic Association Award for football.

Lambert's services to his country benefited the Lowell Tech State Teachers College in that he taught the Freshman Football squad and captained the baseball team. In 1957 Jim Lambert was named to the Teacher's College baseball conference on fine.

He was one of the most outstanding members of this year's varsity basketball team. It must be admitted that such versatility is a rare breed, coupled with a great enthusiasm and friendliness, it has marked Jim Lambert as a man who can't miss at LTJ.

Jim Lambert will be using a glinting 472 mark in his senior year—while leading LSTC to three consecutive conference championship. In addition to his prowess at bat, saw action at every position except second base during his collegiate years.

It was at Lowell State that Lambert turned in an ironman sturdy worth of the hardwood of the hardwoods. A shorty-thrower Jim pitched both ends of a double-header against Fitchburg State Teachers College and won both games. He scattered a dozen hits during the day and yielded only five runs in all. Jim's baseball prowess earned him berths with the Red Sox, Orioles, and Athletics but the death of his father cut short his professional baseball ambitions.

He certainly was a weakend boy last year, but high scoring Leo Udovitch, and other seasoned veterans powered a sound baseball outfit with which to start the season. Freshman turnout has been promising and Coach Oliver is expecting good performances from them. Coach Oliver has just to make sure Rusty will help form a JV team which will be the assistant direction of Coach Jim Lambert.

HEALTH CENTER A REAL BOON

Lambert is the health center, and its open daily from one to five o'clock. The nurses are available during that period to give any student desire advice or information on his own physical fitness through the college year.

Appreciably very few people do not know the value of a good physical and the importance of this center every day, because attendance has averaged over 60 people an afternoon, five days a week. What help can these health enthusiasts provide? Certainly purchase received recently by Head Nurse Mrs. M. R. Artagno.

The facilities in the center are well equipped, and should provide students with a fabulous opportunity to release the week's tensions.

A fall is due that the health center will be coming out in the near future. As the weather gets better you will see us face and give your body a good workout.

TIPTOP FINISH

Pi Lambda Phi 10

Delta Kappa Phi 9

President Lincoln delivered his famous Gettysburg Address one hundred years ago in less than five minutes, according to the November Reader's Digest. It contains only ten sentences, 270 words, five paragraphs, and 272 as revised & later. Of these 190 are of one syllable and 66 of two syllables.
"WOHA – HOLD IT, THERE!"

Last year the Text was honored to have the distinguished Mr. S. Cloud as a member of its Feature Staff. Mr. Cloud became so interested in the welfare of Lowell Tech and the Text that he moved from his residence in Montanta to Sparks Street in Lowell. But because of his anti-right wing articles he was ordered by his landlord—a John Bircher—to get off his property.

When we of the Text heard this terrible news we sent a member of our staff to investigate. The picture above tells just what is happening to Mr. Cloud's home. Instead of renting a new home, it seems that Mr. Cloud bought the original house on Sparks Street from his former landlord for a rather high price. No sooner had Mr. Cloud purchased the house when he received word from the Commonwealth that his land was to be used by the State for the rapid expansion plans of Lowell Tech. This, we believe, would have rattled the most stable men to be found in this great city of ours on the beautiful banks of the placid Merrimack. Our reporter, H. Case, interviewed Mr. Cloud to find out how he was taking the latest turn of events. As a result, we discovered that Mr. Cloud bears no resentment. He believes that the betterment of Lowell Tech comes before the security of his family.

Fortunately, Mr. Cloud plans to keep his home in Lowell. Therefore, he will be able to continue writing for the Text. Finally, if you look closely at the picture you will see Mr. S. Cloudpeering from the last window on the right. He is the one wearing the "To Hell With Coldwater" button.

WOMAN - WHAT IS SHE?

Readers, scientifically bent, who are sincerely interested in arriving at a new sex policy, are advised to clip and paste in their lab books the following analysis of nature's second oldest element:

WOMAN

Symbol: Wo;
Atomic Weight: 120;
Occurrences: Found where a man is found; seldom in a free state.
Physical Properties: Generally rounded in form. Builts frequently, but may freeze at any minute. Melts when treated properly. Very bitter if not used well.
Chemical Properties: Disturbing, active. Possesses great affinity for gold, silver, platinum and precious stones. Violent reactions when left alone. Able to absorb great amounts of food. Turns green when placed beside a better looking specimen.
Uses: Highly ornamental. Helpful as a tonic in alleviation of low spirits, etc. Equalizes the distribution of wealth. Is probably the most powerful income reducing agent known.
Caution: Highly explosive when in inexperienced hands.

IT'S HERE! — Your L.I.T. chair, upholstered in Cherry or black fur and the college seal in gold, the perfect gift for Christmas. (deadline to order is Nov. 25) or for a classmate's wedding. Order your chair ($33) through the Alumni Office. Allow about 20 days for delivery. The chair will be shipped express collect from Gardner.

I.M. MAJORS NOMINATED

William Powers and Carlos Romner, industrial management majors, have recently been nominated to receive a Student Award at the fall meeting, held in Boston of the New England District of the American Society for testing and materials.

Eye-catching new styling is combined with the 1964 Thunderbird with unique luxury features blending thin-up window seals and the auto industry's first retractable seat belt. A longer hood, integrated bumper and grille and rectangular taillights enhance its traditional looks of elegance (top photo). New features of its cockpit include metering (bottom photo) include separate instrument pods, a distinctive new command console, and rear seat belts. An optional reclining seat for the front passenger includes an adjustable head rest for complete relaxation on long trips. A new Ford-Flow ventilation system includes a vent at the bottom of the rear window on Landau and Hardtop models.

STUDENT FACES DEATH SENTENCE

Ralph Allen: A Trial From Sumter County Jail

By Ms. V. H. Call Branch

Ralph Allen was tried in jail falsely accused of murder. He was found innocent of his charge.

I am writing from the Sumter County Jail in American, Georgia. Ralph Allen, a Negro who is being held here for trial. I have been here for the past 37 days. My name is Ralph Allen and I am a white student on the faculty of Sumter County Normal College, Florida, where I am also doing my internship. I have been working here under the guidance of the Sumter County Normal College, an organization of Sumter County Negroes of town of a group of black students in the area who are interested in political action. At the meeting, which took place at the local Negro church, a discussion was held on the subject of registering black voters under the auspices of the movement. After the meeting, I walked through the streets of town with a group of black people. We were looking for the voters who are registered as Negro workers. I am a member of the local political group and I am working closely with the local officials. I have been able to make good progress in this area, but the local authorities are hindering our efforts. We have made only a few contacts.

We, as all college students and teachers in the community, must give up our prejudices, for which we will be held accountable by our conscience. We must work towards equality for all. If we fail to give them their due, they will never respect us.

We must give them their due. They are entitled to the same rights as us, and we must work hard to ensure that they receive the same opportunities as us. We must not allow our prejudices to interfere with our work. We must give them the same chance as us, and we must work hard to ensure that they receive the same opportunities as us.

We must give them their due. They are entitled to the same rights as us, and we must work hard to ensure that they receive the same opportunities as us. We must not allow our prejudices to interfere with our work. We must give them the same chance as us, and we must work hard to ensure that they receive the same opportunities as us.

We must give them their due. They are entitled to the same rights as us, and we must work hard to ensure that they receive the same opportunities as us. We must not allow our prejudices to interfere with our work. We must give them the same chance as us, and we must work hard to ensure that they receive the same opportunities as us.
From our earliest days in school to the present, both our formal and informal education we have been constantly bombarded by pre-Lenten Nations propaganda. To speak against this great world body has been tantamount to blasphemy. Yet, education teaches us to review facts with an eye to the other point of view rather than to submit to blind obedience. Here in America we have failed to examine this organization with an open mind.

George Washington was very wise, indeed, when he advised us young nation to "make not entertaining alliances." He knew well the consequences of a sovereign nation subsidizing any of its neighbors. And agreements and with foreign aggressors. And America has now proven his correct—time and again, the most powerful nation on earth, agreed to stoop a bit in the name of peace and international good-will in a world governing body. Our reasons become obvious when we examine the U.N. charter; let us use our mind. The United States of America believes in these goals.

But our nation signed over fifteen years ago—Fifteen of the most revolutionary years we have ever seen. Just what has been accomplished by the U.N.? What is it doing for our freedom? Is it working well to make America safe for democracy? Have we achieved a world peace? Is the U.N. doing all it was supposed to do? We find that our vote, the vote of the magnificent nation of America, has been one of the most ineffective votes in all the General Assembly of the United Nations. We find that the Soviets are able to seduce the majority of the world, seduce the 90% of the world, seduce the people of the world into this great body. How can America, a great nation, have a voice in this body when we give the U.N. its long overdue review?

Can we fail to find that we have not achieved all that we believed we would when we committed ourselves to the U.N.? We have not been able to make the U.N. work for us, for America, and for the freedom of America. America can do it alone.

Why is it that the U.N.'s total impact does not coincide with freedom? Why is it that its work is not the mirror of our wishes? Why is the organization not combatting the crusade of our enemies from the East? Why has the U.N. not been able to stop the spread of communism? Why should the U.N. have not become the bulwark of democracy? Why is it that the U.N. has not been able to hold back the tide of aggression?

Here we stand, in the midst of all these questions, and we ask ourselves and our government: Can we really believe that the U.N. is working for our freedom? Can we really believe that the democratic nations have no hope? Can we really believe that we will be able to defeat the U.N.?

If the senators who ratified our agreement with the U.N. fifteen years ago could have seen the body as it is today, I think they would have been shocked. The U.N. has changed inherently because of communist pressure. The communists are without freedom. The body is not able to be free of them, you can be sure they will take advantage of it; they have. Some members of the U.N., like the U.S.S.R., have an influence, overtly and covertly, to bring things back to their favor. Personal desires of the U.N. force the communists to withdraw from the body. Other nations, who have been forced to withdraw, have tried to use the U.N. as a tool to establish itself as a separate nation; it actually has held back the communists.

In the U.S.S.R., the communists have used the U.N. to create a new government following a war. In America, the communists have used the U.N. to create a new organization, the National Front, for the purposes of their own agenda. This National Front has been able to use the U.N. for its own purposes, as has the National Front in Germany, for the National Front in the U.S.S.R.

If the communists are able to influence the U.N. in this way, they are sure to influence the world. The U.N. is a tool that can be used to influence the world. The U.N. is a tool that can be used to influence the world. The U.N. is a tool that can be used to influence the world.

What can we do to stop this? What can we do to save the U.N.? What can we do to save our freedom? What can we do to save our country? What can we do to save the world?

If we fail to do anything now, we will lose our freedom. We will lose our country. We will lose the world.
