

Schedule  

For Pickout  

Picturcs  

Group pictures for the Pickout are to be taken on Wednesday, February 1st, in the free hand drawing room. Groups are requested to assemble promptly at the time indicated in order that the schedule may proceed without delay. It is hoped that each student will wear a collor, tuxedo, and coat so that the pictures will bear the highest color.

The schedule is as follows:

9:20 Pickout Board.  
9:35 Text Staff.  
9:50 Sigma Chi Corps.  
10:15 Fraternity.  
10:40 Sophomore.  
11:05 Junior.  
11:20 Executive Council.  
11:35 Chi C. C.  
12:05 Roll Team.  
12:20 Epsilon Sigma.  
12:35 Fraternity.  
1:00 A. A. T. C. C.  
1:30 Othorum Phi.  
1:45 Title B.  
2:30 Delta Kappa Phi.  
2:55 Students.

Senior individual pictures will be taken on February 2nd and 3rd.

CUP TO BE AWARDED  

As was previously announced in an earlier issue, a large silver trophy cup is to be presented to the fraternity which has the greatest percentage of its active members on the President's List. It appears that the completion in between only two of the fraternities, the rest of the others may spring a surprise. Since the examinations have just been concluded and the results are not available, the winner for this past term is not yet known. The Text will publish the complete results as soon as they are determined—be on the watch to see if you belong to the honored group.

EUN YOUNG, '32  

It may be interesting for the students to know that Professor James G. Dow received a Christmas greeting from Pany Yung of Shangchou, China.

“Daily Life” day at the Institute. “Tuition” made many friends among the students and members of the faculty. We all hope that he is proving himself to be the very student young man whom we all admire and love.

CLIPPER WASHER INSTALLED  

An up-to-date Rodney Hunt Clipper Washer has recently been installed in the Woolen and Textile Research Laboratory at the Institute. This machine is one of the very latest models, and the manufacturer, who is called the oldest in the business, claims that the machine was tried, and the students who have not yet seen this new wonder of machinery will want to see it. The machine is an individual drive, its power being taken from the plant's central electric system. No account of its size, a new job to be made in the store of the Institute to fit it into the best and most up-to-date machinery for the student's study.

Textile Is Victor Over Clark  

Local Hostpitals Nine Out Rivals 35 to 34  

Lowell Textile, playing at the Clark University gymnasium, made out that team by that small margin of a single point. Textile played without its center, Jerry Hix, and was, therefore, very much handicapped. Even so, the Text was unable to get "clicking" as they should and had to come from behind to bring home a victory.

The team was very slow in getting started, and Clark was in possession of a 22 to 17 lead at the end of the first half. Clark maintained this lead for the greater part of the last half, but towards the end, the Textile club started a wild west attack that could not be denied and finally passed the Clark club.

All of Textile's scoring was handled by three men, Captain Mike Kulkila, Louis Allman and Junior Jack Alan. The Textile club had the ball on the floor five times and missed one. Kulkila scored 30 points and Jack Alan 9. For Clark, Graham center played a good game.

The scores:

Textile  

G F T  
Kulkila, rf  1  2  10  
Muller, if  8  1  9  
Barnes, rn  6  3  9  
Totals  15  3  35  

Clark  

G F T  
Gatch  1  1  7  
Fouch  1  0  1  
O'Connor, if  3  9  3  
Bridgewater  2  1  3  
Graham, c  5  1  6  
Totals  13  3  34  

Our Home in 1897  

The above picture shows the Textile School as it appeared in 1897, the year when it was opened for instruction. It occupied only the third floor of a building at Middle Street, as the present plant was not ready to be used until January, 1903. Since the exact date of the original opening was February 1, 1897, the Institute will have its thirty-sixth birthday next week.

W. A. Robinson, '25, Engaged  

Junior Engineers Enjoy Party  

Members of Professor Judis's third year electrical engineering class were bent delightfully entertained by Professor Judis at his home on Wednesday evening, January 11, 1933. The students arrived at the house shortly after six o'clock, and the evening's fun began at once. Everyone encountered picture puzzles, and in no time the boys were busy trying to "solve" the "mystery" here and "that piece" there. Others of the group burled themselves with the radio and a deck of cards.

Very shortly afterwards, Mrs. Judis announced that dinner was ready, and did the boys jump! Well, so exactly, but they didn't want any time finding their proper places at the table, anyway. The table was just loaded with lots of good things to eat and the food all arranged by the students. If you'd ever tried to tell one to the fact that the food could not have been a bit better, and they say they could hold no more. A beautiful banquet of vegetables was served at the table and the boys occupied the center of the table.

Mr. Robinson is an explorer and author. His "Thousand Leagues Over the Sex" which is now in its fifth edition, was written after his trip around the world in a thirty-foot boat, the smallest craft ever to circle the earth. He is heading an expedition in the Arctic next Autumn, and no date has been set for the expedition.

Vanderzwan, H  2  1  7  
Netson, if  9  1  1  
French, if  9  0  9  
Ollson, if  9  8  17  
Totals  13  3  34  

The above picture shows the Textile School as it appeared in 1897, the year when it was opened for instruction. It occupied only the third floor of a building at Middle Street, as the present plant was not ready to be used until January, 1903. Since the exact date of the original opening was February 1, 1987, the Institute will have its thirty-sixth birthday next week.

Second Annual Rifle Tournament  

Date: Feb. 611  
All-School Match  
Open to: All students.  
Registration: Fee 25 cents for each team.  
Ten entries for each school.  
In one position or 3 reentries for 25 cents.  
Course of fire: 3 shots prone 5 shots sitting 5 shots offhand.  
Distance: 50 feet.  
Prizes: 1 silver medal for the highest score.  
1 bronze medal for the 2nd highest score.

Non-Members Match  
Open to: Any student who is not a member of the L. T. I. Rifle Club.  
Registration: Fee 25 cents for each team.  
Ten entries for each school.  
This match will consist of the same conditions as above.  
Prizes: 1 silver medal for the highest score.  
1 bronze medal for the 2nd highest score.

Conditions: All firing to be conducted according to the rules of the club and the regulations of the NRA.

The tournament is to be under the direction of the faculty members of the club and the Tournament Committee, to whom all questions, etc., should be referred.

A contestant may enter in one or more positions as many times as he desires (10 cents for each 10 shots). Announcements and rifles are provided by the club.

No one may win more than one medal. The schedule will be open for firing on Monday—Lunch hour—16 P. M. to 5 P. M.

Thursday—4 P. M., 7 P. M.  
Saturday—10 A. M. to 5 P. M.  
Tuesday—4 P. M., 7 P. M.  

The prize giving will take place lunch hours and evenings.

(Continued on page 4)

Show Tryouts  

The tryouts for this year's Annual Show were held Wednesday afternoon, January 11, 1933, in room 301. The screening was under the direction of Charles J. Keene, the co-producer of the Textile Players. Approximately thirty students were present who were both interested in a chance to be cast in the 1933 production. The play which is to be presented is called "Golden Arrow" and it was written by William Smith and William Collier. The play is to be cast in the same as last year, and all indications show that the play will be even better than in previous years, and that the beginning very early in the evening will be a great plus. A ticket for admission is all inclusive, and the play will be as far as possible versus to be a hit. The play's director, Jack Keene, and director, will be in charge of the show, and the play will be a hit. The play's director, Jack Keene, and director, will be in charge of the show, and the play will be a hit. The play's director, Jack Keene, and director, will be in charge of the show, and the play will be a hit. The play's director, Jack Keene, and director, will be in charge of the show, and the play will be a hit.
And Still We Thirst!.....

Many unfavorable comments have been heard lately relative to the supply of drinking water in the Institute. It appears that the students are beginning to be "fed up" on the poor water which is available for them and hence they are voicing their opinions in no uncertain manner. There are enough places in the building where a drink can be obtained, but the trouble is that the water is very warm instead of being cold and refreshing. The men of the medical profession say that the average person should drink six glasses of cool water every day. That is all right, but what is one to do when the water which is available does not quench the thirst but simply leaves an unfavorable taste? Oftentimes after working in the laboratories, a cool refilling drink of "aqua ordinaire" would be just the thing. We go to one of the builders in the building and then proceed to drink. Instead of being refreshed, we are disappointed to find that all we can have is warm water. Then, with much patience we stand and allow the water to run, hoping that after a while it will become cooler. Our wait in vain for the temperature of the water drops little or not at all. It is the sincere wish of everybody that something will be done in the very near future—even if it's only the installation of a regular portable cooler system—so that we can have decent drinking water.

The staff would like all its readers to know that this issue is the first one ever to be published during a mid-year examination period. Always on the job!

Herman Churchill
"Good grades, Junior, I forget to drink the water before I gave you that advice!"

"Don't worry, Junior, I turn a few heads anyhow—Chicago News."

The Question Box

Questions sent to Professor Dow or the Editor will be answered in this Column.

In 1915, we hardly knew whether we had a house, a country, or a life in it.
In 1937, most of Eastern factories were closed.
In 1937, soldiers guarded the National Treasury against robbers.
In 1912, over 150 railroad cars were bankrupted.

Why so many news stories this year? Why will it continue?

This is a trick, so don't say we didn't warn you. Read this reference: The Tenth Book of Knowledge, and you will see the result of years of scientific study, combined with the experience of years.

Now, count the number of stories that tell you to do something. Only once do we count back and count them again.

Below you'll find the answer, and it will tell you something about how good your health is.

There are six F's in the sentence you read in the paragraph above. If you could spell all six, you are a genius, and a bit too good to be wasting your time on foolishness like this.

What About It?

In 1936, Lowell's courses were more in line with the needs of the times. In 1936, more courses offered to meet the desires of students are being offered. No student in our college is looking for chemistry on the calendar there will be an increase in activity.

Flax's legs are getting a lot of attention. We have found that the last three summers there have been a lot of vegetable nutrition classes.

Our astrologer predicts a busy year. No doubt the mechanical and technological courses on the calendar there will be an increase in activity.

Foolish Questions

Dear Heirs Pal:

Where can one find a potato soup here that tastes like the in their lavatory at L. T? 140

Sincerely,

Supperer of Long Standing.

Dear Superer of Long Standing:

As you keep your January dates locked in your mind, have you been unable to get a sample of the soup mentioned. However, I am referring your question to our expert on potato soup in the Wool Department. I hope to have something to report in the next paper.

Sincerely,

HEERA PAIK.

A Dog's Life in Day Dogs

A Château ice cream manufacturer advertised that he would give a copper pot to every customer who filled it with ice cream and brought along his dog. One dog was reported near college after assisting all the boys in one neighborhood to obtain their cones.

She Wished Pestalozzi

A young lady entered the stationery store and asked for a good pair of ice floe slacks. "It's very, very small," said the clerk, "all we carry is serving-wax." "Don't be silly," she snapped, "Wouldn't want a waxing?"

"So you are one of those poison-tongued professors?"

"One pair for long night, one pair for short night and the third pair to look for the other two."—Troy Times.

LOWELL TEXTILE INSTITUTE

Four-Year Degrees in Textile Design and Manufacture, B.S. in Textile Engineering. Courses in Textile Manufacturing, Textile Design, Textile Economics. The Institute is equipped with the latest in equipment and laboratories. The faculty is composed of well-qualified men.

Houdini's Milk Can Escape

It's fun to be fooled...it's more fun to know.

What exciting magic there is in cigarette advertising!

Let's look at one of its greatest illusions...that cigarettes can be mystically given superior "flavor.

The explanation: Just three factors control the flavor of a cigarette. The addition of artificial flavoring...the blending of various tobaccos...and the quality of the tobaccos used...Quality is the most important. Artificial flavoring can never wholly disguise the poor flavor of cheap tobacco.

The blending of several cheap, raw tobaccos cannot improve the flavor of any of them. A fine cigarette is a cigarette blended from costly, ripe tobaccos.

It's a fact, well known by leaf to leaf observers, that cigarettes are made from finer, MORE EXPENSIVE tobaccos than any other popular brand.

This is why the Camel flavor has never been rivaled...why Camels can mean more pleasure to more people than any other cigarette ever made.

In more costly tobaccos lies the secret of Camels' delicate "bouquet"...of their rich, cool flavor...of their non-irritating mildness.

It's the tobacco that counts. All the natural goodness of Camel's tobacco is kept fresh and rich for you by the special, padded Humidor Pack. Don't remove it. Its moisture-proof cellophane also protects your Camels from dust and germs. Put a pack in your pocket today.

...just costlier tobaccos
IN A MATCHLESS BLEND
PHI PSI

Talk about the Hall Moony House—so much change. The boys, who are all back from Yale, have put on a real show this term. There has been much activity in the dormitory, and the result is noticeable.

Division of work has been set up, and students have been allotted certain areas of responsibility. The result is that the dormitory has been kept in better order than ever before.

The students are all enthusiastic about the new system, and many are already planning to continue it when they return to their home towns.

ROCKIE

Rockie, get that behind me, and then again stay close by, if you want. I've been interested in learning about the history of your school, and I'm sure you can tell me more.

The New York Historical Society has been most cooperative in helping me, and I'm looking forward to seeing more of the city.

The Paramedics Corps has been very helpful, and I'm sure they will continue to do so.

The nurses of the War College have been especially helpful, and I'm grateful to them for their service.

THE TEXT

FRATERNITIES

TAKE HOME A SMILE

Take home a smile; forget the petty cares.
The dull, bare world of all the day's affairs;The day is done; shut the door tight;Twixt Eck, to those who wait, take home a smile.

Take home a smile; don't scatter grief and gloomWhere laughter and light hours should always bloom;What though you're troubled, and there's a dark side,Let the world know, there's a smile at your side.

POMFRET

What next? Garver and Leonard purchased a very nice, 1937 model T, Ford. It was blue, and they kept it in a very good condition. It was quite a catch for the both of them.

Emilio (Herrera) received a beautiful, hatchback at the hands of some unknown cryptic. The car was quite a find, and it was given to Emilio as a gift. He was very pleased with it.

Brockie and a friend of his were seen at "The Emb" for a short time. They were both quite content, and Brockie later told his friend that he would like to see them again.

OLD TROUBLE

Old Trouble took a convenient position, and waited for a good opportunity. He was not seen for a few days, and then he reappeared on the scene. He was quite a nuisance, and the boys were glad to see him.

Despite the efforts of the boys, Old Trouble was quite successful. He managed to get into the dormitory, and made himself at home. He was quite a bother, and the boys were having to work very hard to keep him away.

DELTA KAPPA PHI

The turf is still green on the Old Manse, and the boys are still enjoying themselves. They are quite pleased with the place, and are looking forward to spending many more years there.

SIGMA OMEGA PSI

We have found out that "Old" Phil is a nickname for Raymond, Bernard Green. He says that he doesn't like the names "Phil" or "Bud" and that he wants people to refer to him as "Bernard.

John Bunt was found打ちhard at the office on the morning of the 16th. He was running behind schedule and was quite busy. He is expected to be fine soon.

The boys are all preparing for the annual picnic, which is scheduled for next week. They are looking forward to a good time, and are planning to make it a success.

ROCKIE

Rockie, get that behind me, and then again stay close by, if you want. I've been interested in learning about the history of your school, and I'm sure you can tell me more.

The New York Historical Society has been most cooperative in helping me, and I'm looking forward to seeing more of the city.

The Cut Sheet
(With Apologies to the Regalator)

Having already endured the merriment of the New Year's Eve celebration, now that the season is now upon us, it is most appropriate to bring to your attention an event of interest to all cigarette smokers.

The annual gathering of the Tobacco Club, held at the Palace of Fine Arts, was a most enjoyable occasion for all present. The President, Mr. Quigley, welcomed the members and guests, and introduced Mr. Todd, the toastmaster, who read a paper on the history of tobacco.

The evening was spent in the company of friends, and the refreshments were ample. The buffet table was laden with an array of delicacies, including a variety of smoked meats, cheeses, and wines.

The highlight of the evening was the presentation of a new cigarette, the "Aladdin's Lamp," which was created by Mr. Todd in honor of the Tobacco Club's founder, Mr. Samuelson. The cigarette was described as a "superior blend of the finest tobaccos," and it was received with great enthusiasm by the members.

At the close of the evening, Mr. Quigley thanked all for their attendance and announced that the Tobacco Club would meet again in the fall.

The Cut Sheet

[End of article]
**My Experience With Winter Sports**

A few weeks after our latest batch of deep snow finally settled, and a freebie was delivered by the blizzard itself, I finally realized the challenge of the winter season. It was a thrilling experience, full of adventure and excitement. The snow cubed up and bit into my cheeks, but it didn't deter me. I was determined to make the most of it.

I soon found myself participating in various winter sports, each offering its own unique challenges and thrills. Skiing, snowboarding, and ice skating were some of the more conventional activities I enjoyed. But I also discovered hidden gems like snowshoeing and cross-country skiing, which offered a more tranquil and meditative experience.

Skiing, in particular, was a revelation. The rush of adrenaline as you glide down the slopes, the crisp snowy air, and the breathtaking views of the mountain range made it a truly exhilarating experience. I even took up snowboarding, which required a bit more balance and coordination, but was equally rewarding.

Ice skating was another favorite. The smooth, cold ice provided a unique form of exercise and a chance to enjoy the beauty of the frozen lake or pond. I even ventured into more advanced territories like curling and ice hockey, which tested my skills and endurance.

The winter season brought with it a sense of community and camaraderie. I joined a local ski club and spent many afternoons skiing with friends and family. The sense of achievement and shared enjoyment was infectious.

But as much as I loved the winter activities, I couldn't help but feel a tinge of nostalgia for the warmer months. The days were shorter, the evenings colder, but it was all part of the cycle of nature. I looked forward to the warmth of the sun, the buzz of the spring flowers, and the promise of the upcoming season. Winter may have been beautiful, but it was the change that truly captivated me.
