CIRCLE K TUTORING Among many undergraduate organizations on and off campus, an outstanding one which the incoming freshmen were eager to join is the tutoring program run by Circle K. It was started here at Tech about five years ago with instruction given in physics, math and chemistry. These courses were chosen, since they were found to be the freshmen's greatest difficulty. In past years this tutoring program was only run during the first semester but due to the large response this year it was continued in the second semester. This year the program will be extended to include social science.

The tutors are all members of Circle K with high academic standing and are well equipped to help with most of the problems freshmen may have in a particular course. These instructors are not there to help next door's homework, their purpose is to review and help the student understand past work which is not clear to him. Even if a freshman feels he understands a particular material, it might be worth a few minutes of his time to review and reinforce himself. At the same time he might be interested in joining in lectures or of the homework assignments, often, the Circle K tutors can credit that with extra few points on the end of the school year.

Companies Scouting for Engineers

The 1949-50 business scene presented problems to many of the students. The annual meeting of the COLLEGE PLACEMENT ANNUAL, held recently at San Francisco, by the Director of Placement, Prof. Joseph Bassett.

The ANNUAL is an offical hand-picked publication during the job-hunting season, available by the more than 1,700 participating colleges and universities throughout the United States and Canada where it is being distributed. Copies for personal or reference use are available at the Annual office.

In 1949-50, as in most years in recent history, engineers and engineers felt themselves in great demand among the many companies. Close to twenty-five per cent of the companies listed in the ANNUAL are interested in hiring some type of engineer, and call for total numbers of engineers for various types of mechanical employers. For the third year in a row, will be the process which new students wish to advance through the Engineering Societies.

IT'S ABOUT TIME

The following is a selection from the 1956 Pickwick:

"The Nucleus is composed of a select group of campus leaders chosen for their scholastic abilities and participation in extra-curricular activities. Membership is limited to a total of fifteen students who may be either juniors or seniors. There are no fixed membership requirements and no advisors. Meetings are held each month at which one of the members presents a paper on any topic he chooses. The main purpose of the organization is to contribute to the leadership role and to give the individual member practice in presenting a paper to a highly critical group, and the group itself experience in planning and carrying out programs in any area of student activities.

On October 7, the Student Council dissolved the Nucleus. By taking away its charter, the Student Council put an end to the biggest farce ever perpetrated at Lowell Technological Institute. The selection of the editors of the Text, Garth Las is the only President of the Student Council to take such a bold step toward smoothing out some of the school's rough spots. It was Las who first brought up the idea of "dissolving" the Nucleus, and it was Las who pushed the final decision through the Council.

Let me delve a little into the history of the Nucleus. At the time of its inception it was intended to be a genuine effort to accomplish its progressive ideals. There was great personal satisfaction in becoming a member of this select group. But for run of years past, the choice of its successive editors deteriorated to an unmeaning procedure of "nud-moe-choice." The present Council consisted of a select number of fraternity men and independents; in fact each fraternity had its own fixed percentage of the total. It was Las who was most deserving of membership, but rather which of my friends was the most deserving. The group existed in its Biological, social, and academic life in an atmosphere conducive to its indistinguishable career, it became for all intents and purposes non-existent. The ideal group of true leaders, not only once during the entire school year '58-'59.

Now here is the current chaos. The thirteen outgoing members left with the usual amount of last-minute projects. The remaining two took it upon themselves to hand pick the new group. It coincidentally developed that seven members of the old group were hand picked to the new group. The group which was most deserving of membership, but rather which of my friends was the most deserving. The group existed in its Biological, social, and academic life in an atmosphere conducive to its indistinguishable career, it became for all intents and purposes non-existent. The ideal group of true leaders, not only once during the entire school year '58-'59.

The Student Council, in its recent meeting was unanimous. It suggested that the organization, in presenting its plans for a new charter, draw up a new constitution and acquire a new charter from the Registrar's office. It recommended to the Student Council and Joeszurita, President of Delta Kappa Phi Fraternity and the Leather Engineering Society that all members of the charter group be removed from the dean's list.

It suggested that the organization, in presenting its plans for a new charter, draw up a new constitution and acquire a new charter from the Registrar's office. It recommended to the Student Council and Joeszurita, President of Delta Kappa Phi Fraternity and the Leather Engineering Society that all members of the charter group be removed from the dean's list.

The Text would like to make its position clear. Mr. Las should be congratulated for having the foresight and gumption to go as far as he did. We realize that the real need are more men with his ability, initiative, and drive. Mr. Las, we salute you for a job well done.
SPORELIGHT
by Bob Davis and Lee Woodward
THE DOGERS DID IT

Yes, last week it was Brooklyn's turn to cheer; or, as we say Los Angeles' turn. This week last year's World Series champion, the Brooklyn Dodgers, kept the boasting bats of the National Leaguers silent. This they did do to an extent in the first and fifth games as they shot out the Bums 11 to 1 and 10 to 7.

But in the second and third games, the dodgers.Marks set for attendance at a Series game when they squeezed some 92,700 people into the Los Angeles Coliseum for the fifth game. In the first game LA, they drew 3,000 less people than had seen the first two games in Chicago, and the players in need of the Series foot shapes up like the log jam of all other record.

In the last issue of the TEXT, we mentioned that the White Sox will play the Dodgers in the World Series. We omitted the broadcast of the World Series. This week Bad put the Dodgers in the Series by holding the Braves in their opening game, thus being in a tight situation. We're going out on a limb and make predictions concerning the wording of Sport Magazine's annual Correct the Keys. Of course, the odds couldn't be surprised to see Larry Sherry handing the keys.

This was a year when the Dodgers would never say die. Well, with the LA Dodgers, a team's rise is a remarkable one. In and out of first place at the beginning of the season, the Dodgers stayed comfortably slipped to third and almost were over-taken for that by the spouting Pirates. Then with a bunch of three weeks remaining in the season, the Dodgers for the Braves and Rogers Craig for the Dodgers just kept raking up victories. Then came a crucial series with the Giants that the Dodgers won by a large enough score. And in fact, as a footnote, Milwaukee moved into first place too and when the season ended, the Dodgers were in the lead for top place. We'll call this series may 3,000 was the difference for the Braves and Rogers Craig for the Dodgers just kept raking up victories. Then came a crucial series with the Giants that the Dodgers won by a large enough score. And in fact, as a footnote, Milwaukee moved into first place too and when the season ended, the Dodgers were in the lead for top place. We'll call this series may 3,000 was the difference for the Dodgers. The Dodgers faced the Brooklyn Dodgers in the World Series.

The Dodgers, amorous with the reports of White Sox fans, for those who predict the pass speed, and ability to win one run game were "about as low as a dog with fleas," they too to their dressing rooms after the first game beaten 11 to 0. But there is no way to go, and so the Dodgers returned to Los Angeles to win two out of three and then returned to Chicago to see Lyle Wynn, the Los Angeles white socks. And in the final game, they will go on from 9 to 3 the victory and the World Championship.

The World Series is the international tournament of the World Series for his 11th World Series honor which leaves him second to the greatest Babe Ruth in lifetime Series runners; RYAN.

This, to be really truthful, was one of the most exciting Series in the past few years. Not since the Giants took Cleveland fourth straight a couple of years ago, has a World Series had so much to offer. Note: Your editors are Braves and Pirates fans respectively.

SPORT QUOTZ
1. Jim Gilliam of the Dodgers hit what record not set by any other Player in the World Series?
2. Who was the only Starter of both teams to get a four hit game?
3. Which of these baseball players with the team they played for?
4. Who hit the first home run of the Series?
5. Which of these baseball players with the team they played for?
6. What batting average did this hitter hit with the Dodgers?
7. Which of these baseball players with the team they played for?
8. Which of these baseball players with the team they played for?
