Following the conclusion of the first floor, the second floor of the library will be opened to the public. This floor will feature a new collection of rare books, as well as a larger reading area equipped with comfortable seating and study carrels. The second floor will also house the library's archives, which are currently located in a separate building. Students will have access to a wealth of historical documents and materials here.

At the top of the library, the third floor will accommodate the library's technical staff, who will continue to manage the day-to-day operations of the facility. This area will also serve as a space for conferences and seminars, with ample room for presentations and discussions.

In summary, the Library Expansion is a significant step forward in providing a modern, user-friendly space for students and faculty. The new facilities will enhance the learning experience and support the academic mission of the school.

STUDENT ACTIVITIES

In the past few years an increasing student body has made possible an enlargement of extra-curricular activities. Many new clubs and groups have been formed. These clubs now number over four hundred, and clubs and nouns have been formed. Despite this, however, there has been a definite decrease in the titles during the school day allotted to "meetings and convocations." In the past two weeks the school day has been reduced to one meeting and convocation. This has led to a decrease in the number of student activities and clubs.

The decrease in the number of meetings and convocations has led to a decrease in the number of student activities and clubs. This has led to a decrease in the number of meetings and convocations. STUDENTS TEACH

MEDFORD, Mass. (I.F.) - For the first time in the history of the University, the student body will have a voice in the administration of the University. The decision to involve the student body in the administration of the University was made by the faculty last week.

The students maintain that they are the ones who are affected by the decisions of the administration. They also believe that they are the ones who are best equipped to make the decisions. The students' involvement in the administration of the University will give them a voice in the decision-making process.

The students have been working on this issue for several months. They have been meeting with the faculty and administration to discuss the issue. They have also been gathering information and data to support their case.

It is the editorial position of this paper that the students are the ones who should be involved in the administration of the University. They are the ones who will be affected by the decisions made by the administration. They are also the ones who are best equipped to make the decisions.

ARCHIVE

Articles regarding the handling procedures of TIGA's, which the paper has followed with no explicit purpose, are given here as either a test of your knowledge or as a test of your ability to follow a story. The TIGA's, as the paper has followed, are given here as either a test of your knowledge or as a test of your ability to follow a story.
PI LAMBDI PHAUG

Another Plebe Regatta! Another regatta with the Brothers originating a new batch of boys to P.I., Lemieux is still at it and all the others still in the same positions they have been in for the past three years. (Genie) Berenson, Dick Bishop, Ted Daigrepont, John Dickey (who is going to a Regatta this week) and Ed Gibbons will all be at the Regatta.
The location of the Regatta will be at the Palace of Fine Arts. The Regatta will begin at 9:30 a.m. on Sunday and will continue until 3:30 p.m. on Sunday. The Regatta will be held on the Lake Michigan, near the Chicago Skyline. The Regatta will feature various races including the Deans Cup, the Mayor's Cup, and the Lake Shore Classic. The races will be held in the morning, and the afternoon will be reserved for social events.

PHI GAMMA PSI

Sept. 53 again bring a new year, a new crew, and changes for the Bros. and neighbors, and especially the plebes at the house on this wet September day. At this time, let us express our gratitude to our Fraternity, which is a great honor and a source of pride. We would like to thank all the new Fraternity members who have joined us this year, and we would like to welcome you to the PHI GAMMA PSI family.

DELTA KAPPA PHI

As the fall semester begins, once again, the Brothers of Delta Kappa Phi wish to extend a cordial welcome to the incoming Freshman class. We hope that you will enjoy your time at the school and the five-year plan will always be available.

SIGMA PHI OMEGON

Scholarship year 1967/68 has begun at L.T.I. and Sigma Phi Omegon is looking back at its past. During the past year, the Fraternity has worked hard to maintain the high standards of Sigma Phi Omegon, and we are proud of the progress we have made.

PHI BETA KAPPA

As we begin the new year, it is time to reflect on the past year and set new goals for the future. The Brothers of Phi Beta Kappa are excited to welcome the new Fraternity members and wish them the best of luck in their college careers.
In the Intramurals, one can easily see that it has been vastly expanded. Many new sports have been added, many new teams have been taken part in the programs, and it is fairly being published well enough so that all students will be aware. That congratulates Mr. Morrison on the fine job he has done.

On the Deanship, Dr. Sparks merely mentioned that it was a shame more people didn’t take advantage of the pool. He implied that Mr. Cytryn was one of the better Coaches around as can obviously be seen by the number of swimming champions he produced at the Lowell YMCA.

In his closing statement, Dr. Sparks repeated his condition that Individual sports provide the answer to J.T.I.’s athletic needs. He hopes that when these sports do present themselves on campus, that the students will not support them so they have never been able to before. He feels that if this is done, J.T.I. can really become one of the big athletic schools in New England.

THE SPREAD-EAGLE OF TECHNOLOGY AT GRUMMAN
Ranges from inner to outer space

Grumman has special interest in the growing engineer and scientist seeking the widest spread of technology for his life at J.T.I. Engineers are involved in deep ocean technology—explorers on their advanced aircraft designs proven deeply in the air over Vietnam, and soon—in outer space, the Grumman L.I. Lunar Module will land the astronaut on the moon. Grumman, located in Bethpage, L.I. (30 miles from N.Y.C.), is in the cultural center of activity. Universities are close at hand for those who wish to continue their studies. C.C.N.Y., Manhattan College, New York University, Polytechnic Institute, Columbia University, State University at Stony Brook, Polytechnic Institute of Brooklyn, Hofstra University and Adelphi College are all within easy distances. The surroundings are not hard to take. Five beautiful public golf courses are in traveling two minutes away from the plant. White sand beaches stretch for miles along the Atlantic (12 minutes drive). The famous sailing grounds of Long Island Sound are only eleven miles away.

The informal atmosphere is a Grumman tradition, matched by equally hard-honed one of turning out some of the finest high-performance aircraft systems and space vehicles. To quote a few...

LM—Lunar Module to land the astronauts on the lunar surface

EA-6A Intruder—Air-to-air, tactical, electronic weapon system

P-19 (10—57)nms Hydrofoil Seacraft

PX-15—4 Man Deep Submarine Vessel to conduct undersea experiments

Here then is the opportunity for graduating engineers, A.E., C.E., B.E., M.E., B.S., People majoring and Enlarging Engineering majors... to take their place in the forefront of technology that is Grumman. Grumman representatives will be

ON CAMPUS

To obtain Grumman information and arrange an interview, contact your placement officer.

If an interview is not convenient at this time, send comprehensive resume
