COUNCIL PRESIDENT ELECTED

NEW ASTME ELECTS OFFICERS

On February 23, the ASTM Council held another in a series of dinner meetings. This particular meeting was held at the Princeton Dinner in North Chatham. After the dinner the meeting was called to order by Art Ricke. The subject for the meeting was the officers for the four years 1960-1961. Those candidates for office were reviewed by a nominating panel of President, H. Van, Don Hurburke, and Jim Maloney.

From the list of nominees the following were elected:

Chairmen: Ed Lederer

First Vice Chairman: Richard Russell

Second Vice Chairman: John Kelly

Treasurer: James Laney

Secretary: Joan Sargent

At this point we would like to congratulate the new executive committee consisting of Mary Sargent, the chairman, and the following a who have been serving the organization in the past and will continue in the following year.

The new executive committee has, after careful deliberation, voted and recommends the following sub-committees under their supervision:

1. The first vice chairman, Don Hurburke, has charge of the membership committee consisting of Greeks and Don Lederer, co-chairmen.

2. The publicity committee under the direct supervision of Richard Russell, the second vice chairman, consists of John Kelly and Bill Lush, and the committee which consists of Leonard Lush and Jack Denhol

ASTME MEMBERS

The newly elected officers will be officially installed by an official representative from National Headquarters, Detroit, Michigan, at a dinner meeting to be held on April 28, 1960.

The new officers will form a program for the 1960-61 school year which will include events and activities for members and students wishing to become acquainted with the ASTME.

The Chapter, in conjunction with the local Masonic Chapter (Chapter 113) is formulating plans for an on-campus conference to be held sometime in the spring of 1961. Such a conference will be most beneficial not only to the students but to many others interested in the manufacturing field.

This year's dinner meetings will be incorporated into a much greater extent due to the depth of possible topics they have all presented.

We are happy to announce that up to that time this issue was published and distributed to members and more than members and students will be interested in the following:

The first meeting of the new year will be held Friday, May 1, at which time the new members are to be introduced to the ASTME organization and the opportunities it offers. This arrangement is in accordance with the program for the new year's activities and will be a joint effort between the new and old members of the committee. At that time it will be necessary to have the program for the first time of the year's activities.

The TECHNORAMA

Lowell, Mass.—Judges are now becoming more specific about the results assayed for Technorama IV, to be held at the Marine Park, Lowell, Mass., April 9 and 10.

Something new this year is the fact that student exhibitors will be allowed to enter the contest for a snack lunch at noon on Friday and for a dinner Friday evening, and judging of exhibits will take place all day Saturday. The fair will be open to the public, Friday, April 9, and the following morning until noon. The participants will be the same as those shown in the previous year's Technorama. A special show of the best of the exhibits will be held at the LTI cafeteria.
In this election the labor unions are in a political big way. What is it they want?

The Oil, Chemical and Atomic Workers International, the largest union in the United States, has a daily newspaper last summer which included these statements:

"All pensions, health insurance, sick leave and the many other protections we seek against unemployment, should be placed more securely in government hands.

Research and development of military equipment should be taken away from corporations and done by governments. We shall be able to encourage organization and strengthening of unions."

The editorial admitted that "to some of these suggestions the reader will respond, 'That's Socialism.'" Well, what would you call it?
**DELTA KAPPA PHI**

Well, the 13th annual ALL-TECH WEEKEND in history, and with a great ALL-TECH, present the Secretary and President Ira was held at the swing-up course. Your brothers who made the DK parties over the VAPMENTS have must send out a point to tell their friends of them, because the next weekend, DK had what might be called a "sneaky" party at the end of the year. It was DK's first real party, and in the coin money of Len Boscom and the boys, upstairs and the place where DK was. The DK party was one of the place of the DK party.

**PI LAMDA PHI**

Well, it's over, but now what a FLAP! The sixty-eight date party at the House on the Hill, for brothers and friends, turned out to be an overwhelming success. Your brothers and fine people, please a nun provides the entertainment from 8 o'clock until? The brothers wished to thank Mr. Meyer and his charming wife for providing the place. And in the meantime, to the brothers who gave a complete service.

What's ahead for you... after you join Western Electric?

Anywhere you look in engineering and other fields, the Western Electric position is open and ready. For Western Electric is on a drive to fill the nation with the most modern, well-equipped and modern engineering and executive personnel.

We are large enough to give you the work you want, and small enough to give you the satisfaction of doing it. This year alone, Western Electric must fill about 8,000 supervisory jobs and 30,000 other openings. These positions will be filled by engineers. They will be corresponding opportunities for career building within research and development, manufacturing, sales and distribution.

These positions mean you'll find yourself in the thick of things in such fast-growing fields as electronics, communication switching, manufacturing and automation. You may engineer installations, plan distribution of equipment, develop new concepts for field engineers, whose world-wide assignment will include engineering and management positions.

This year alone, Western Electric will make for the Government. The opportunities are many—and they're waiting for you. You'll find that when your Western Electric career is over—and your plans are as vast as your own individual skills and we expect that 8,000 supervisory jobs will open in the coming year. They will be filled by engineers. There will be corresponding opportunities for career building within research and development, manufacturing, sales and distribution.

Opportunities exist for skilled, mechanical, electronics, and other engineering specialties. Western Electric offers the logical stepping stone to the great physical world. For more information get your copy of the W. E. Recruiting Pamphlet: "Opportunities in Western Electric," postmarked in time to arrive before the start of your college semester. Western Electric is an "Equal Opportunity Employer." It is not necessary to be a college graduate to apply for a job. Fill out the Employment Application and return it in time to arrive before the start of your college semester. Western Electric is an "Equal Opportunity Employer." It is not necessary to be a college graduate to apply for a job. Fill out the Employment Application and return it to:

Western Electric
300 West 47th Street
New York, N. Y.

"It was owned by a part-time instructor who used it on Sundays to prepare his lectures."
The Phlome Society

In 1937 the seven girls of Lowell Textile became united to form the nucleus of the first known textile society in the United States. To that body is not merely its immediate success as a girls' organization, but also its the hope and inspiration of its members that the society, like the flame for which it was named, will increase in size and number of character that it will be a guide for societies in other textile schools throughout the country.

Since 1929 the membership has increased until it now numbers over 50 members.

The officers elected for the school year of 1946-1947 are:

Molly Wilkinson, President
Alice Bailey, Treasurer
Donna Morris, Secretary.

Pickout Goes To Press Soon

It won’t be long now before the 1947 edition of the Pickout will be printed. The last two weeks have been a lot of work on every student in the school. Students’ portraits will be published of every student, as well as complete and accurate story of the school. Writings of the student sections are also included. Interesting photographs and sketches are also features that you don’t want to miss.

The book will be of the same high grade as other years, with new features in addition. This year the Pickout will cost only $3.00. This means that you pay less than one cent for each page of the actual cost in making a single copy. This is itself should demonstrate to you the expense and careful planning involved in the production of a little class annual. When a Pickout representative approaches you, be kind, but be firm. You’ll never regret it, as it is a permanent record of the activities during your college career. The copy will be limited, so PLACE YOUR ORDER TODAY.

Sidelines...

If you want to have a particularly enjoyable hour’s entertainment once a week, then tune in on the Lucky Strike Boys Hour and hear the modern "Baron Magnificus." The show is sponsored by Jack Paar, the famous comedian, and no one can get the height. His German dialect is very realistic while telling many exaggerated adventures—just a matter of fact, he seems to have reached a peak alongside of Ed Wynn and Jack Benny as a favorite comedian of the day. The best actors of the day are also presented on the same program, so tune in on Tuesday and see how you like "the Baron."

The above picture shows the Textile School as it appeared in 1897, the year when it was opened for instruction. It occupied only the third floor of a building at 47 Middle Street, as the present file was not ready to be used until January, 1901.

The 'Text' Looks Back

Lowell Textile Institute Football Squad for 1936

Lowell Textile Institute football team defeated Bucknell College on the local gridiron on Saturday, November 9, 1935.

Led by quarterback LeRoy Balmer, the Tiger and Bucknell were masters of the situation at all times and turned in a performance that was replete with the high points of the season. From the opening whistle the boys added a "tantalizing" Yarnall turn trap to form and let loose an aerial strike that would have been nullified by the many fans in attendance. From the opening whistle the boys added a "tantalizing" Yarnall turn trap to form and let loose an aerial strike that would have been nullified by the many fans in attendance.

Will you please print in your next column a brief account of the history of Lowell Textile?

Answers...

A few years ago a movement was started in New England to promote the cotton mills and the textile industry. At this time that Mr. J. P. Smith called the leading men of Lowell and Lewiston together and told them that something must be done to raise the prestige of the textile industry. The plan was submitted to the Massachusetts Legislature and was acted upon. By a special act of the Legislature, the Lowell Textile School was incorporated and placed under the direction of a Board of Trustees.

February 1, 1897, in the second floor of the Parker block on Middle Street, the school was opened for instruction. The faculty then consisted of three instructors and the student body of thirty-two undergraduates. The school grew rapidly, and through the generosity gifts of both present and alumni, an endowment fund was raised to do business. The school was moved to a new building on February 12, 1937.

By virtue of the state's approval of the State Constitution, the property of the school was transferred to the Commonwealth of Massachusetts, and the control and management of the school was vested in a Board of Trustees appointed by the Governor.

Time, our school became an institution of the Commonwealth.

Today, this institution, as it should rightly be called, is recognized as one of the leading technical schools in the country. Not in the world, but in the country, it is the present faculty consists of approximately forty-five instructors and there are students of all ages. The school has degrees in sciences which are recognized by the American Institute of Textile Industry. All the graduates represent the highest type of technically trained men in the textile industry.
