Hoop Game Will Start Injury Fund

Our versatile faculty has announced this week that they will endeavor to carry their hand at the next level. Upon the approach of Monday, they have formed a basketball team which in the near future will play the winners of the inter-fraternity league. The few practices that the team has held thus far show that they will floor a well-balanced club which will not be an easy mark, for the younger men.

The following will represent the faculty, Stephen McNeil, Walter Linder, Vadasz Lovasz, Thomas Kelley, Jr., Farrell Kent, Clarence Ries, Adolph Kast, Arthur Orletzky, Lester Cubbage, Walec Farrell, and a few others who may join the field later. That will be this historic evening when the students will be up with the23men. With all dignity and respect left in the house, however, it should really be something to see. Members of the Freshmen's Staff will greet their students before having a neighborhood of students who will eagerly await their usual entertainment. But do not think for a minute that this will be an end of such events at this time. We will have basketball games for the more popular athletes and they will be a few girls.

FFRANKS impressed

Mr. E. Brooks, who is Director of John Brooks & Son, Ltd. of Lowell, is reported to have been interest in the establishment of a textile institute in Lowell. Such a scheme is of much interest to the textile workers of the city and the prospects look very promising.

Mr. Brooks was very favorably impressed and he stated that, in his opinion, the facilities at the Lowell Technical Institute would be well suited for the purpose. Our educational program, however, is much broader and, while he is enthusiastic about the educational program, he is not prepared to give his approval.

English Woolen Magnate Impressed

Mr. E. Brooks, who is Director of John Brooks & Son, Ltd. of Lowell, is reported to have been impressed with the facilities here at Lowell Technical Institute on Tuesday, January 15th. Mr. Brooks was shown a tour of the Wool Indus. Research Association of Textile, England.

Mr. Brooks was very favorably impressed and he stated that, in his opinion, the facilities at the Lowell Technical Institute would be well suited for the purpose. Our educational program, however, is much broader and, while he is enthusiastic about the educational program, he is not prepared to give his approval.

Events Calendar

TODAY—Engineering Society Meeting, Room 301, 4:30 P.M.
TOMORROW—A.A.T.C.C. Seminar, 1:30 P.M.
TODAY—Labour Movements Demonstration, Liberty Hall, 7:30 P.M.
FEBRUARY 17—Freshman Dance Evans Lounge.
Faculty Dinner—Theater Party.

Frost To Run Dance Feb. 17

On February 17, the Freshman will hold a school dance in the lounge of Emerson Hall. Music will be provided by the school band. The snack bar will be open all evening for your (ugh) convenience. The admission charge is 10c. See you there.

Norwich Prexy To Manage Gift

Norwich, Vt. (L.P.)—Dr. Homer Dodge retired from the presidency of Norwich University on February 3 to permit him to devote full time to the administration of affairs related to the Norwich University and the military college by Dr. Godfrey Lobb of Britain. Dr. Lobb, noted English educational administrator, specializes in the field of practical education. He was formerly in charge of the Norwich University and the Military College of Britain. He has been recognized for his work in this field and is well known for his leadership.

Chinese Alumni Active in Shanghai

Mr. Harold T. Tate, formerly Ten- nis Adm. in the Chinese Nationalistic Govern- ment, is a recent visitor to Lowell Technical Institute.

Stork Strikes Cotton Sector

Mr. Farrell G. Kent, instructor in the Stork, invited a number of buyers to dinner at the Cotton Institute in a Chinese restaurant. He said he was impressed with the spirit of the group and the way they dis- cussed things American which they remembered from their student days.

Library Framework Complete

The final senior class meeting of the spring semester was held February 10, 1950, by the Student Senate. The meeting was held in the Student Senate's new home in the circle at the Student Union.

Our friend (we use that term loosely) and our columnist, one Barry Dramgolf, has gotten himself into a pool of difficulty. It seems that his habit of vacating gladly from himself a signature of a pseudonym he has acquired the use of a number of his victims. And now the powers-that-be have decided that heconfiscated the only unguiled material that can appear in the TEXT "straight" or general news stories.

If your immediate reaction is the same as ours you may understand in your own a few dangers like "freedom of the press", and "Whence newspaper is this, anyway?". We thought at first that our democratic right was being infringed of a point where we were even considering drastic action in answer to the aforementioned defense. There was almost one heck of a rip-roaring crowd.

But then through a chance remark to a buddy an ad- dency to a dandy new came across the light—we were not fighting FOR democracy, but AGAINST it. This is a genuine distaste which we have forgotten to tell you about until now. The theory of fabric construction pro- ceeded from theory of the unslipable fabrics made by an array of different diameter and density bandings which are woven into the cloth. This produces balanced and well con- structed fabrics involves construc- tion of the cloth and the angle of curvature between the yarns which are used to produce the ideal fabric. Here is a new insight into the nature of fabric construction which can observably affect the physical properties for which fabrics are manufactured. From the impracticable fabric there is no possibility in the unprofitable fabric of hand or hand and hand which are in- ation of students and technical.

YARN AND CLOTH CALCULATIONS in a book which has been able to reach the readers of the technical and practical and do justice to both, the book is also a practical guide. One notable feature is the extensive table which will prove extremely useful in converting a number of yarns, such as number of yarns, to another, a time-saving device to any textile technologist. If you have found your own designs calculations and sus- tain the exactness of the calculations, then the book is the book for you. The calculations have been simplified because your calculations notes won't be as good as you thought they were.

One day Mark Twain arrived in a Canadian hotel, and, glancing over the register, noticed a sign, "The last straw of the last strawer—Burns and Violet." Twain sighed and when he passed the register at the exit, he said to his eye, "Mark Twain and violet." — Mark Twain with Witt and Wisdom
FASHION SHOW REPEATS SUCCESS; BARN DANCE "UNDIES" FEATURED

Southwick Hall’s appearance certainly was changed on the 25th of January, when instead of the usual stream of men filing through, women took over and presented a very lovely spectacle. The creations modeled afforded a preview of styles with colors being emphasized in afternoon dresses, evening dresses and nightgowns. All the clothes exhibited the foremost styles with seamless Shiffli embroidery presented in various and unusual ways.

Mrs. Marion E. Shiffli, director of International Fashions of New York, accompanied the show and presented each outfit expounding the lore of Shiffli in the particular garment and also where and how the garment was to be worn.

There were thirty gowns brought from New York including nightgowns, housecoats, undergarments for square dancing, bathing suits, play suits, blouses, afternoon dresses, evening dresses, square-dancing dresses and a beautiful bridal ensemble including the wedding gown and two bridesmaid’s dresses. Shiffli was distributed on various parts of the campus and the overall effect was very pleasing.

The models included some repeats from last year’s show and some new models. They were Miss Margaret Kreft, Miss Jeanne Shiffli, Miss Virginia McGovern, Miss Doris Moloney, Miss Peggy Peters, Miss Barbara Brown, Mrs. Mary Z. Wing and Miss Charles McCarthy. The two children who modeled were sons of two of the audience were Mrs. Emma M. Corman, who was here last year also, and Mrs. Andrew McAndrews. The audience, although not attuned beforehand at previous due to the lack of students, no doubt, was very appreciative and saw some striking creations including a blue evening gown that had recently arrived from Paris and was due to be returned in the immediate future. It was a John Paton fashion featuring a periwinkle color with taffeta peony and white embroidery.

The show was repeated Thursday morning for a women’s club at Reinhart and they, too, were thrilled at the fanciness and individuality of Shiffli.

Prof. Raabe is to be congratulated bringing such a fine show directly to the students and faculty but to the many students who attended realizing that was something different and novel in town. It’s true that a Textile Fashion Show can become an annual occurrence at L.T.I. because it is presented directly to the students and faculty.

The Russell Velometer is a textile testing instrument—not a measuring device for movie stars.

THE TEXT

MIS - PICKS

by Melvin Wulf

The inevitable bolt from the blue has been handed by the powers that be. These past weeks saw not only the passing of an old semester, but the passing of several former fellow students during this period. The latter caused their sudden demise from the ranks of the student body.

Whatever the charges were is impossible for anyone to oppose the features of these individuals. One must divorce himself from any personal considerations and look at the act, and subsequently, probity, objectivity and logic that has been the case in this period.

One of the furthest memories that there are today, and there are absolutely no subterfuges to fit it that they are irrevocably adhered, so one can rig our minds that there are being considered.

There has been more than one instance where the student body has suffered the privation that all students cast as a birthright. This can of course be no degree of dishonesty that can be claimed as a limit to righteousness, but this is it only in theory. Students, as well as all other species, are humans and are governed by the "little white lies," but we have to admit that there is an existence of a double standard of ethics, that which exists in the minds of men and which that they practice on the minds of others.

For the present, we are always and will always be a species no longer in this nor in any other capacities both in and out of school.

But these innards have been overreached time and time again! I’ve overstepped the bounds above, but I think that we’ll be happy to be a birch stock for a while that this and the student body is in the fugitive.

And serial dishonesty is grounded for such disciplinary action than in itself, it does not seem that a failing that should be dealt with properly in a similar fashion. The crime of the situation, if one sees it as the administration is advancing towards goals which will eventually be at least a step forward. Flexes on the same academic line as its counterparts in the educational system. However, this will not be amenable to the administration for many of the factors of the faculty, guilty of total incompetence, and the numbers really is few, are dismissed or retired from their present positions. Some of the men are under the air that their present situations are going to continue, so there are no minds have been here for a short period that can ever have been here too long.

And real dishonesty should be taken public the fact that the student body realizes that in some instances they are not getting the full value out of some particular courses. In some cases they get none at all. Students to the administration for a more stringent position to take or the discipline of conferring with the students body, the students are in fact they are penalizing the capacity of the student body. For the observation being that they have no positive method of taking action against those who do not follow the requirements of an instructor to the college and the requirements of getting along with or of any success. He is excessively demanding is not the question here. Rather, it is whether or not he has the capability to stimulate the latent talent in a student’s mind.

STUDY “GREMLINS” RATED IN PSYCHOLOGY

Carboneal, D.L. (P.) — Looking for the gremlin in psychology is the most important issue in study and research. "Psychology as a human science," he says, "is the art of studying the human mind and the role of the gremlin in psychology, the human mind. The gremlin is a very real folkloric marvel. It is the art of studying the human mind and the role of the gremlin in psychology, the human mind. The gremlin is a very real folkloric marvel. SPORTSMILL

By Ken Kornimer

As may be noted elsewhere on this page, the Athletic Association has anointed a schedule for the inter-fraternity baseball league. This schedule, like those for other organizations, does not reflect the interest in the sport from the onlooker, but is based on an estimated interest. Careful inspection of the schedule will reveal the addition of three games to this year's program.

The three games will be played during the Spring months of March, April, and May. The first game will be played on March 15, the second on April 15, and the third on May 15. The games will be played at the University's baseball field, and will be open to the public.

The teams involved in these games will be the Alpha Kappa Alpha, the Gamma Phi Beta, and the Delta Sigma Theta. The games will be played on a home-and-home basis, with each team playing two games at home and two games away.

The Alpha Kappa Alpha will play its first game on March 15 against the Gamma Phi Beta. The Gamma Phi Beta will play its first game on April 15 against the Delta Sigma Theta. The Delta Sigma Theta will play its first game on May 15 against the Alpha Kappa Alpha.

The games will be played under the rules of the American Baseball Association, and will be governed by the umpires of the league. The teams are expected to have their own uniforms, and will be expected to provide their own equipment.

The schedule is subject to change, and will be updated as necessary. For more information, please contact the Athletic Association at 555-5555.
Rifle Club Enters Prize Match

The I.T.I. Rifle Club is entering five teams in the William Randoll, 

Huntington Mansionship Competition 

Match. This is a posted match held throughout the United States 

sponsored by the Hearst newspapers. Each team consists of four men. 

The score of four will consist of ten shots each, and ten shots. 

Originally the match was to be held this week. This match will be fired during this week.

Subsequent matches will occur during the week ending February 18 with U. S. Merchant Marine and King's College. These will be posted matches also.

The first shoulder-to-shoulder match at which the rifle Club has participated since its post-war revival will be with the Bexley University Rifle Team. The match will be held at the Commonwealth Armory in Boston at 7:00 P.M. February 21. The team will consist of ten men, the five highest scorers to reign.

During the week ending on February 

23 the rifle Club will enter a special match with the University of 

Kansas. The following week a similar event will be held with Mount Holyoke College.

PHI PSI

The date for our Phi Psi National Convention has been set at May 6, 7, and 8, and will be held at the New York Ocean House, Swampsport, Mass. This celebration offers ample amusements as well as outdoor activities for the great Phi Psi fraternity. In general, a pleasant ocean-air atmosphere. The members of other Textile Colleges throughout the nation will be given an opportunity to teach theAmazonian under the guidance of our own Gamma members. Refreshments will be served at the for- est house before returning by bus to Swampsport.

A combined meeting of the Gamma 

chapter and student Anti-Awar club will be held at the Maritime Hotel in Boston on February 21 in order to make further plans for the coming convocations. All members should try to make it interesting.

A date party to celebrate the end 

of the year was held on January 28, and a Valentine party will be held on February 14. A similar party was held last year and proved to be one of the most popular of the year.

Great Expectations

Cheating Remedies Cited in Report

Albany, Ohio (E.P.)—Pressure of congestion was overly named as the chief cause of dishonesty in taking examinations in a report released by the Student Engineer Committee of the University of Akron.

The committee, according to the report, tends to under-practice that it noting students merely interested in coming to report dishonesty to order to obtain a record. Possibly remedied to be taken by

THE ENIGMATIC ENGINEER

Verily, I say unto you, mercy not an engineer.

For an engineer in a strange land, and a president of self evils.

Yes, he spoke sternly in paragraph, which he called formal, and he welded a device which he called a little rule.

And he bade only to his chief, a head book.

He declared only of speeches and strains, and without end of thermodynamics.

He showed always a serious aspect, and assured not to know how to smile.

And he pockets his seat in the springs thereof and not by the damask.

Nettie doe he know a waterfall except by its horsepower, nor a outlet.

For he that he_strangely the lights, nor a channel except by her own weight.

Always he carried his books with him, and he entertained his sweet.

Verily, though his manners expatiate itself no manner when he walked.

She opened the package to see love natures of you are.

You the baddest h.a.n.d but to measure the friction thereof.

And he knew only to test the viscosity of her lips.

For in his ever there shirk a faraway from in neither.

Love not bring — rather a vain attempt to recall a formula.

There is but one key to his heart and that a Tn. Boston boy.

When his deceased wifed at love and siped with coronary, he

Takes the bubble, not the clever, but rather

His unknown quantities.

As a boy he pulled a girl's hair to test its elasticity.

But a man he discovers different devices.

For he counted the vibrations of her heart-beatings and

He seeketh ever to pursue his scientific investigations.

Even his own heart beataings he construe as a voice of beauty, And espoused his passion as a form of love.

And his marriage is as a simultaneous combustion involving two unknowns and yielding diverse results.

Verily, I say unto you, mercy not an engineer.

—The Circuit

Famous Industrial Film Shown Here

A poody crowd assembled yesterday during the common free hour in Northwest Hall to witness a showing of the General Electric Company's heralded film, Textiles Uncovered. The picture was shown under the auspices of the International Student's Circle, Engineering Society, and A.T.T.C.

Permission to show the film was secured only after long efforts in that direction, but the exuberance of nature to that the trouble was well worth while. The silent movie depicts a through presentation of the latest modernization terms in progressive textile mills, and has made quite a name for itself throughout the textile industry.

Amesville has not only the best-looking and best-dressed women in the world, but also the best-yearned.
