Are You Doing Your Own Work?

Doesn't it seem disgusting to see so many students who are conscientiously depending upon others to do their thinking for them? Mental labor is one of the traits we try to overcome by going to school and yet many fail to remember this. It is their habit to go to a show, dance or party during the evening and then come to school the next morning in time to do their assignments. We are not condemning those who try the lesson and then because of some small point which they do not understand, come to school early to ask someone for help. They should, in part, be commended upon this; but many students who are in a position to do their work will not. They fail to say anything or make trouble because it is a very serious offence. They are sincerely hoping that you will come to life and stop the underhand business. Don't fail them. Start in at one and turn over a new leaf. It is hoped by everyone that sooner or later every student will do his own work, thereby assuring himself of the benefits of a college education.

The Day and the Work

Edwin Maraham

To each man is given a day and his work for the day. And once and no more he is to travel the road; it's we who sent him if he flies from his task, whatever the odds. For his task is appointed to him of the scroll of the gods.

There is waiting a work where only 12 hoods can avail. And so, if he falters, a chisel in the stone will fall. He may face at the sky, he may play for an hour in the sun. But he does not know but to the hour appointed is due.

To each man is given a skull to carve for the gods. A stone that is needed to fashion the beauty of all. And only the soul has the power to give it the grace. And only he learns that he would have to put it to play.

Yes, there is waiting a work for each man no other can do; So your own mind is waiting; it has waited for ages for you. And now you are young and limited; are turning your gang To see what you do with your chance in the chamber of the gods.

Well, that's something about cigarettes I never knew before

I'd never thought much about what's inside a Chesterfield cigarette. But I have just been reading something that made me think about it.

Just think of this, some of the tobacco in Chesterfield—comes from 4000 miles away! And before it is shipped every single leaf is packed by hand. All because Turkish tobacco is so small and delicate.

Of course I don't know much about making cigarettes, but I do know this—that Chesterfields are mild and have a very pleasing aroma and taste. They satisfy—and that's what counts with me!

Norton R. Reed of the Lowell Mills Club. Reed was formerly the Shaw Street Co. Plating is a rule thronerways which has been approved of the young people in the Chicoldon and Methuen streets section of town.

Some time ago, Mr. Reed created Troop 110, Aca,. consisting of approximately 600 feet of space in one of his building and in the vicinity.

The news that the scouts were at the quarters for their meetings circulated rapidly among the boys of the section. A short time ago, this. Mr. Reed received a call from the presidents of the age of 16-18 years and he arranged that the parents be notified. They asked that they be permitted to use the same quarters that the scouts had used.

The same rules and regulations were used and they now enjoy the use of the rooms three or four times a day.

Mr. Reed has had proof that the boys appreciate his kindness in providing them with these facilities. They always prepare to leave the halls when the boys are through with their. The scouts have baskets for basketball in place and the other groups of boys of the building using them and provide their own basketballs. Many boys converted the same games and here each week.

Mr. Reed believes that not only is he doing something for the benefit of the whole community, but the boys are also using the benefit of the community because the scouts, he was very thoughtful about their kine and the other rules for you.

We don't mind your being kids until you don't please don't laugh to playing in the street.

"Peard" Harwood has been sitting out lately. Someone new, Randolph, we hear. Cy Shapiro says that he caught his finger in a machine the other day.

That's his way of telling the story.

The well known Nathan triangle is now ever so much better. It seems a square of getting in again.

At a new type of Kebistan has sprung up at the house, since Dave Landau found a Ghost Story magazine. Some of the boys are trying to figure out the plot along their oca. We hope they are not going to waste our time. Let Old Chinsky's discoveries be escaped.
