TEXTILE NOTES

The Air Force will use on its new uniforms a new fabric developed as an overt material because of "processing difficulties" in wool/synthetic blends. The National Association of Textile Manufacturers has agreed to the government's request that it prepare over 90,000 yards of the new fabric for the Air Force. The new fabric is a blend of 64 percent wool and 36 percent nylon. An additional 6 percent of the total blend is wool and 2 percent of the blend consists of the acrylic fiber. The new fabric is expected to become more widely available to the public in the near future. The Department of Defense is planning to use the new fabric in the uniforms of the new Air Force.
LTI ROTC CELEBRATES FIFTH ANNIVERSARY

It is now almost five years since the establishment of the Air Force ROTC unit on the Lowell Tech campus, and on the 15th of May this annual Festival of Wreaths, which ROTC will take place. This inspection has in the past proved to the cadets at universities and colleges throughout the country.

1. A special inspection has been arranged for the evening of May 15th. The presence among the guests will be Representative of the National Association of the West Point Alumni. Further details will be announced.

Organizations

LEATHER SOCIETY

The Leather Engineering Society will present a great at its April meeting. The topic of the evening, of the Leather Society, will be the evening's guest speaker. Also expected to be present is Mr. Louis J. Sullivan, Associate Professor of the Leather Industry at the Massachusetts Institute of Technology. For further details, please contact the Leather Society.

LEATHER MOUNTAIN SOCIETY

This was the last regular meeting of the Leather Mountaineers for this season. The Society held a spring banquet in April, and the officers for the coming season were elected.

PULP FI

On Saturday night, May 3, a date party and semi-formal dance was held in the Merrimack Country Club. A few events such as the fashion show, the social function, and the dance were featured. The next event for the Leather Engineering Society is its annual picnic, which will be held on May 9, at the Merrimack Country Club.

Several weeks of the 1969 baseball season have passed and the Yankees’ record is far from outstanding. They have won only 11 games through the first 40 games of the season. This has led to some media commentary that the Yankees might struggle to meet their goal of 93 victories. However, the team remains confident and continues to work towards achieving their target.

When the Yankees played the Red Sox in Boston, they were led by an impressive pitching performance. Denny McLain had a strong outing, striking out 12 batters and allowing only one run in a complete game victory. The Yankees were able to make the most of their opportunities with the bats, scoring three runs to secure the win.

The pitching staff has been a key component of the team’s success so far. Several starters have performed well, including Roger Maris, Whitey Ford, and Mickey mantle. The bullpen has also been strong, with relievers like Mike Garcia and Joe Page stepping up in key situations.

The offense has been consistent, with players like Roger Maris and Mickey Mantle driving in runs and scoring with regularity. The team’s speed and agility on the base paths have also been a factor, with players like Elston Howard and Enos Slaughter creating scoring opportunities.

The Yankees’ defense has been solid, with players like Yogi Berra and Bill Skowron providing stable presence behind the plate. The pitching staff has also provided good defensive support, turning double plays and preventing base runners from advancing.

The team’s training and conditioning programs have been a key aspect of their success. The players have been able to maintain their physical fitness and avoid injuries, which has allowed them to stay on the field and contribute to the team’s success.

Overall, the Yankees have shown resilience and determination in their approach to the season. They continue to work on improving their game and achieving their goals, with a strong belief that they can turn their season around and achieve great things.
