Graduating Class To Be Guests of Alumni Association At Annual Banquet on May 21

Invitations To Be Extended To Seniors

Plans are already being held by the Executive Committee of the Alumni Association for their annual banquet. This will be the twelfth annual gathering of Textile Alumni and present plans indicate one of the best reunions ever held at the college.

The date has been set for Saturday, May twenty-first, and it will be an all-day affair. In the morning, the regular business meeting of the Association will be held. At this time the executive committee will make a report and all business and financial matters will be discussed. The mid-day meal will be in the form of a buffet luncheon to be served by an excellent chef, Mr. D. C. Fuge. In the afternoon, the Alumni will assemble in the Fine Arts building to make their annual reunion. The game always attracts widespread attention on the part of both the Alumni and their undergraduates due to the intense rivalry between Worcester Tech and Textile. After the baseball game, the Alumni Banquet will be held in the Assembly Hall at 8:00 P.M.

The banquet, which is the last social event on the program, will be hosted by the premises of this year's graduating class. This innovation was voted upon by the Executive Committee and Mr. Shorter, Secretary of the committee and Alumni Association, will issue formal invitations to the class members soon after May first. This is a departure from the past policy of the Association and is due to further the interest of the graduating class in the Alumni Association, also encouraging them to become interested in it. This attitude taken by the executive committee in favoring a new policy such as this is a commendable one from every standpoint and probably will be welcome by the Association as a connecting link between the graduating class and the older Alumni.

New Football Coach Appointed

W. W. Yarnell of Boston to Succeed Cleary as Football Mentor

Director of Athletics Lester M. Alger announced last week the selection of W. W. Yarnell of Boston as football coach for the 1927 season. Yarnell is a graduate of the University of Vermont, where for three years he was a star backfield performer under the curator of Tom Brady, now coach of the Quarterbacks. He is also a better future for three years in baseball and basketball. In his last year at Vermont, Yarnell coached the class football teams and did a very creditable job.

Since leaving college, the new coach has been a star performer with the ST. Alexander team of Boston, coached by Walter Cleary. This playing is on a Cleary coached team. Yarnell will produce no radical changes in the system initiated by Cleary last year.

Mr. Yarnell comes to Textile highly recommended by Mr. Cleary as well as by his old team. Tom Brady, who is recognized as one of the best coaches in the profession.

According to present plans, the new coach will bring with him a score of new players, and he will probably coach the base.

It is Mr. Alger's plan to have Mr. Yarnell visit the school at an early date in order that he may talk to the men who anticipate playing next fall.

Wanted-Men!

James Edward Hungerford

There's the chap with the side, and the chap with the won't. And the chap who's bettwen or less.

There's the chap with the "Aye," when it ought to be "Nay." And the "Nay," when it ought to be "Yea."

There's the chap who's too weak to go on when he's down. And too trudled to strike back when he's hit.

And the chap who wakes up, when he ought to stay down—

And the chap who does nothing but talk!

There's the chap who is brave, when he's nothing to fear, And the chap who doesn't say anything when he ought to say something without shame, But the world unresting men has no patience for those who show this:

What it wants is the fellow—dead gone!

What it wants is the chap with the can and the will, And the get up, and hustle, and—

And the chap who comes back with a smile on his face.

When the world thinks he's better clean through.

Show Announcements

A picture of the Textile Players Management and Executive Committee will be taken at Cambridge's Studio, Thursday, April 17th at 2 o'clock. The picture will be taken in Tel Aviv, and the Management or Committee are requested to report promptly at 2 P.M.

Tickets for the April 18th "Apple-sauce" are now on sale and reservations may be made through the office.

Musical Clubs to be Busy During April

Scholarship Fund Started By Alumni To Be In Memory of Late Professor Stephen E. Smith

We are publishing herewith a copy of the letters which was sent out April 1st to several hundred of the Alumni by Chairman Arthur S. Stewart, of the Scholarship Fund Committee. The letter reads:

Scholarship Fund Committee

Arthur S. Stewart, 90

To the Alumni of the Lowell Textile School.

At the last annual meeting of the Lowell Textile School Alumni Association held in Lowell, May 22, 1926, it was resolved that a loan fund should be established by the Alumni and their friends in memory of the late Professor Stephen E. Smith. The Executive Committee was given full power to determine the amount of money necessary to establish the scholarship and to make arrangements for raising the fund.

At a meeting of the Executive Committee held in Boston on January 19, 1927, it was decided to establish a fund of $2,000 dollars, the Alumni and their friends to contribute the scholarship. A committee was formed.

Basketball Tag Day Goes "Over The Top"

The results of the Tag Day held last week closed their season with a probable championship game. From every standpoint Tag Day was the most successful. The student body, to a man, gave the boys who have been on the court all the support which they could possibly make towards the club. A committee of seven was formed.

The Tag Day was held on Thursday afternoon, April 20th, at the Textile School.

The Tag Day went on with the usual enthusiasm, and the boys who were on the field were cheered by the students.

President Eames Addresses A.S.I.M.

At a recent banquet of the American Society of Textile Manufacturers, held in Cambridge, President Charles R. Eames was one of the principal speakers of the evening. His theme was "The Textile School as an Agency for Educating the Student in the Principles of Business," and was extremely interesting.

Mr. Eames started by telling his listeners that the Textile School was a very important institution, and that it was the function of the School to teach the students how to make their money.

The banquet was held at M. I. T. and was wet attended by prominent men in the textile world.

RECOGNITION

Have we, as students at Textile, ever stopped to think of the Alumni, its purposes, its intentions, its helping power or its organization? We have probably never visualized ourselves as Alumni, have probably seldom had occasion to think on the matter at all until we were graduated and found ourselves automatically Alumni.

The Alumni Association of our college have been working consistently and laboriously, always with the aim of bettering the conditions of the college and the condition of its undergraduates. This has always been the main purpose of the Alumni but has never manifested itself in such a pronounced manner until recently. The Alumni Association is one of the strongest, if not the strongest single unit working for the general good of Textile.

The Executive Committee of the Association is composed of a very able group of men and not of the inactive type. Arthur A. Stewart, Prof. of Textiles is Secretary of the Committee and of the Alumni Association and has the bulk of the work upon his shoulders inasmuch as his duties of secretary are concerned. He has been instrumental in furthering the possibilities of the students due to his fine work in connection with the two scholarships recently inaugurated. These scholarships are, namely, The James T. Health Scholarship Fund and the Prof. Stephen E. Smith Scholarship Fund. The committee have several other issues of importance upon which they are now working, the results of which will all be published in due time.

Let us recognize the Alumni and their endeavors towards a bigger and better Textile.

COMMENCEMENT

The mid-term exams are over! The next event on the college calendar of unanimous appeal to the student body and instructing staff is the Spring Reece. From that time only a short period of service until Commencement—the final and most emotional event in the college history of the departing seniors.

This year marks a radical change in commencement exercises at Textile. Instead of a one-day graduation with all the Commencement activities crowded into one day, as has always been the custom, the Commencement exercises will be spread out over three days. A baccalaureate sermon will be the first proceeding and the following Monday the seniors will spend their last college months together at a Field Day. A banquet will follow in the evening which directly precedes the Senior Hop. The actual awarding of diplomas and degrees will be made on Tuesday to conclude the Commencement events.

Poor Air in Pools and
Gyms Menace to Health

Famous Swimming Coach Says Better Ventilation
Would Help Athletic Activity. Richard
Plans Chain of Arenas

The greatest need of the American
people today is more sanitary or activ-
ity swimms which have been other-
wise too hot or too cold while the others
have been as regular as to com-
pletely discourage usage from at-
tempts to play a favorite game or a
"workout," improves the air condi-
tions or prevents ventilation of your
pools and gymnastic areas. The
first one is a swimming pool to
which is added a new problem.

"Swimming the caliber of swimming
pools and gymnastic areas which are
worse ventilated, Coach Bachrach
said that many persons are discour-
aged from coming into the regular
and free participation in indoor sports because the air in these places is "lukewarm, uncom-
fortable, and unhealthful, which is a
true reason."

To suit his interest in mind of the
major sports, professional and other-
wise, the American people have
becoming fitter from the fact that they
got little of the regular, regular
exercise or vital to good health and
long life.

Coach Bachrach continued: "I have been in the pools and gym-
inches and I've seen many more.

Everything's going to be all right

That's the way P. A. talks to you in the bowl
of a pipe. This national gloom-chas-
stes the darkest clouds with a ray of sunlight.

Every day a thin red tip of Prince Albert today and
see. Tamp a load of this friendly tobacco into
your jimmy-pipe and light up.

Cool as a sub-cellur. Sweet as the breath of fresh-cut violets. Fragrant in the tin and frag-
grant as you smoke it. Never a tongue-bite or a
throat-peace. So mild you can light it up from
sun-up to sun-down, with a body that satisfies
completely.

There's more philosophy in a pipe-load of
P. A. than in the average Doctor's thesis. No
matter what brand you are smoking now, you
don't know how much your jimmy-pipe can mean
to you until you pick up it with good old
Prince Albert. Get started now.

Prince Albert
—no other tobacco is like it
SPORTS

LOGAN CLOSES 1928 BASKETBALL SALES

At a meeting of the basketball team last week, Dr. Leslie Logan of South Portland, Maine, was elected to head the basketball team during the 1924-25 campaign. The new leader is a veteran of three years, during which time he has played a forward position.

McKay

Besides basketball, he is a two-year letter man in baseball and bides time to aid in training his outfield berth this spring for the third consecutive year. Logan is also a member of the varsity club and of Phi Psi Fraternity.

Basketball will enter a severe time by graduation this year, fewer than five of six letter men being lost to the field. The new captain will be the only letter man to return. However, a nucleus for a team is on hand from the members of the second teams of this year. John W. Stewart of Eddle-3

McKay Elected Captain of 1927 Baseball Team

At a meeting of the baseball letter men last week, Fredrickson J. McKay of Oronoko, Maine, was elected to head the baseball team. McKay was appointed to fill the place left vacant by the failure of "Stick" Walker to return to school. The new captain is just beginning his third campaign in a Textile uniform. He has played for three years in the sports gardens where he has put up a fine game. As a batsman there are few who can slug as Danny can.

THE CALL OF SPRING

BASEBALL TEAM BEGINS INTENSIVE WORK

With the preliminary conditioning work out of the way, Coach Duffy is now working his Textile basemen at a faster pace. The squad has been coming along in fine shape since it went out of doors, although the rather cool weather of the past week has slowed up matters somewhat. At this writing, all veterans except Kenney, scoring first, and Coffey, last year's hot corner guardian, have reported. Kenney will be out soon however. Coffey does not intend to report this year due to the condition of his health, preferring to stay out of action for the remainder of the year.

At present, it seems to be a thoroughgoing success in all departments of the spring baseball season. The outlook for both teams is bright, and the Textile team is expected to win the first place, although the Eagles are expected to put up a good fight.

HOCKEY LEAGUE PLAY-OFFS

In the play-offs between the second and third place teams of each division in the National Hockey League, the Boston Bruins triumphed over the Chicago Black Hawks, and the Canadien took the last year's winners, the Montreal Maroons. The play-off in the American section between the Hawks and Bruins was a walkover for the Boston team. They jumped out to a five-goal lead in the first game, and although tied by their opponents in the second game, they were in no danger of being headed.

The play-off in the Canadian section was a thriller, the teams being tied 1-1 after the first night's game. In the second game, both teams fought a scoreless sixty minutes, in an over-time sudden death period, Toronto, Canadian champion, carrying a left back shot after twelve minutes of play, this victory gives the winners the right to face the league leading Ottawa Senators in the play-off for the American section winner. The Bruins on the strength of their win will play the Senators, American section leaders in the second place.

Scientific Air Conditioning To Play Big Role In
Protecting Animal Health, Zoologists Declare

Washington:—The animals of the United States National Zoo, who will have the cold and the rain to themselves when winter comes, have been given a chance to live in a land of eternal spring and sunshine in the new exhibit—one of the wonders of the world—opened by President Roosevelt.

The exhibit consists of a large room with windows through which the visitors can see the animals. The room is kept at a temperature of 72 degrees, and the animals are kept in the exhibit 24 hours a day.

The animals are housed in a series of rooms, each of which is kept at a different temperature. The rooms are connected by a series of tunnels, which the animals can enter and leave at will.

The exhibit is designed to give the animals a chance to live in a natural environment, and it is expected that the animals will be able to live longer and healthier lives in the exhibit than they would in their old home.

The exhibit is one of the many wonders of the world that have been opened to the public in recent years. It is one of the many ways in which the United States is making the world a better place to live in.

Make Page’s Your Rendevous
Poor Air in Pools and Gyms Menace to Health
(Continued from Page 2)

When the youthful Canadian George Veuve recently won the Wyngrey Prize by being the first and only one who swam across Caddoan Bay, it was an outstanding example of the body being prepared and conditioned by clean, wholesome air and vigorous exercise, as well as of strong physical and moral courage," Coach Bouchard said.

He pointed out that physiological tests conducted by the United States Public Health Service and the American Society of Heating and Ventilating Engineers on more than 500 men in a special air research laboratory in the bureau of mines at Pittsburgh had clearly established the fact that indoor conditions bring far worse reaction on athletes and people working or exercising violently than to those at rest in ordinary activities.

"I have been told that these tests show that pulmon, body temperature, respiration and blood pressures increase with the room temperature and humidity," Coach Bouchard added. "Considerable body moisture and heat are thrown off in work and exercise and that's why the ventilation should be so handled as to carry this off and constantly supply clean, fresh air of the correct motion, temperature and humidity. It is an axiom of physiology that a man should give off heat to be healthy. If you don't give body heat you don't have energy. A man who lives or works in a room that is well ventilated throws off more heat than when in a room not ventilated."

"We have found that such mechanical ventilation or the manipulation of weather within buildings has been reduced to an exact science. We need more of this in our gymnasiums, arenas and other public gathering places. I have attended several boxing shows where patron was insist on smoking. Ventilation is needed to carry this out. We need more of it in factories."

Coach Bouchard called attention to the fact that Tom Richard, famous manager of fights and other sporting events of national appeal, has announced that he proposes to build a chain of arenas and athletic buildings throughout the country. Plans are to provide the best of air conditioning systems for these. It was stated that it was planned out that in the huge new Madison Square Garden in New York during prize fights, these shows and other entertainments where between 15,000 and 20,000 persons gather under one roof, an audience is made to keep the air clean and fresh by air

Farrara Resigns as Coach of Textile Players, Successor Appointed.

Due to unforeseen circumstances, Frank Farrara, who had been engaged as professional coach for "Applevale," was forced to relinquish his charge last week. Through his skill however, a capable successor has been found and, as a result, satisfactory results have been going on without interruption.

Electricity Class Goes Through Lynn G. E. Plants

On Tuesday, the 14th, the Engineer's who take Electricity with Mr. Wells, traveled down to Lynn, through the courtesy of the General Electric Company, were conducted through the plants of that company located there.

They arrived at the Electric Works at about ten o'clock, having made the trip by automobile. They were given instruction sheets to aid them in their observations, and reminded in the plants until noon, visiting the various departments. At twelve o'clock they were the banquet guests of the company, having lunch in the plant.

In the afternoon they went over to the West Lynn plant and observed various other machines in action.

Mr. Wells forer the opportunity for those.

A prize offered twenty-five cents to the boy who could call him who was the greatest man in history. "Christopher Columbus," answered the Irish boy. "George Washington," answered the American lad. "St. Patrick," shouted the Jewish boy. "The quarter is yours," said the judge, "but why did you say St. Patrick?" "Right down in my heart, I know it was Moses," said the Jewish boy. "But business is business."
Gleaned From The Press

Flowers are now being grown by electric light. We know wild roses were.

Too many people think opportunity exists to get money without work.

Time flies, and hardness are other unwelcome, underdeveloping virtues are electrodes, and trusts are mercies.

New York has cannot advertise for "Girls to trim roses flowers.

"Eddies are to be shouted," says a London note. Why?

The two chief causes of disease however are sickness and silence.

"Vendetta is in fashion," says a headline. Last week probably wanted a light for his cigarette.

Too much of the world is run on the theory that you don't need real men here if you have a few too much.

Mistaken desires that character have started wars. Wonder how many papers he has married.

Visitors have said, says a professor, none of them sound like the best variety.

Allen Bootleggers Face Deportation

America for American bootleggers. What?

The two groups thataddock knew just what the people wait are the oligarchs and the people.

The federal treasury has called in all 50,000 bills. If you get one in your next week's pay envelope, send it on to Washington at once.

Some bright senator proposes a national law forbidding the marriage of bonded persons. Does he want to put Catholic entirely out of business?

Photographs of floods show that water in the streets is not enough to make a city look like Venice.

Wonder what the man who names Pullman cars names his children?

Among those enterprises which depend for success on health faith are democracy and bath.

It is called "medical comedy." But neither the movie nor the comedy afforded the appeal.

All the Constitution guarantees is the parent of happiness. You have to catch up with it yourself.

Modern smoking pleasure
that never fails

Tobacco makers of this age are the most independent ever known. Accepting no bazaar, they have smoked out the facts. They have learned that the choicest Turkish and Domestic tobaccos grown are rolled into Camel, that here is the incomparable blending for goodness, that Camels simply never tire the taste.

Camel is the cigarette that never fails to please the modern age. Regardless of how often you smoke the contents of a smoke, of how steadily you light one after another, Camel will never fail you, never give you any but the finest thrill of smoking pleasure. This is why Camel's popularity, by far the largest in the modern world, keeps overwhelming in the lead. As modern taste becomes more insistent upon choice tobaccos, increasing millions discover Camel's incomparable mildness, smoothness and all.

If you want the cigarette that's good to live with from morning to midnight, the one that is the choice of the modern age, "Have a Camel!"
