PROF. BLACK \ LEAVING LTI. PROF. BLACK is leaving LTI. He has accepted a position at another university and will be leaving at the end of the year.
**EDITORIAL**

There are always a few who stand out in society, notably leading politicians, scientists, writers, and philosophers, who seem to us of eminent dignity, because we know them to be individually sincere. Some of these individuals, who form our special interest groups, are really members of a unique group formed of those who work at a higher level because of their higher talents.

**The Text**

**INQUIRING PHOTOGRAPHER**

Question: What is your fraternity looking for in this year’s prospective members?

The general criteria which the Delta Kappa Phi Fraternity establishes in order to choose its prospective members is truly complex. A person’s desire to become acquainted with the fraternity and its members demonstrates his sincerity of purpose. Each individual prospective member must realize the role he will play as a responsible fraternity brother.

Donald J. Melanson, President, Delta Kappa Phi

It has been traditional with Omicron Pi Fraternity to be very selective in choosing its prospective members. Standards consist of the prospective member’s presentation and the Omicron Pi Phi character. The role he will have with the house, his overall character, and his attitude and contributions to the school are considered.

Jim Mullane, President, Omicron Pi

**Job Interview Tips**

If you wash your hands before the interview, don’t dry them. Be proud of honest sweat.

Dash into the interview with a cigarette, or preferably a cigar in your mouth, mumble your name and address the interviewer as Joe. If his name should be Joseph pick some other name.

Sit down on the desk. If there is any literature on the desk ask for copies of it to help your roommate who is collecting the links.

Do not stammer, and phrase your answer so that you are at ease and may put the interviewer at ease as well.

Remember it is all a game. Every time the interviewer asks a question, have an answer ready and ask him a pointed one in return, for example: “What is your expense allowance policy?”

Do not let the interviewer evade your questions regarding salary, retirement plans, sick leave, and unemployment compensation.

If the company is located in Florida and for an invitation to visit just the house, a company expenses may pay for the whole vacation.

Make it clear to the interviewer that you know your value to the company won’t be bought for a low price.

Never inquire about the type of work associated with the position.

As you leave, invite the interviewer out for a drink. He will recognize you as an optimizer.

As for finances, you students are urged to grow a beard and wear a white T-shirt and sport coat. If the student does not own a T-shirt he may wear a colored shirt with a gray bow tie, string tie, or medal tie.

**SENIORNOTES**

As soon as mid-year exams are over and we return for our final semester of the first part of your college careers, we should be wise in planning for the Commencement Weekend. In accordance with this, each of you will receive a questionnaire in your mailboxes. Please fill it out immediately and feel free to add any comments you wish.

The only further development in the plans for the pre-commencement activities is the Andover Country Club which has been secured for the Dinner Dance. The date is now fixed as June 26th.

Please note the article concerning the Amy Loveman Lib-

New Employment Guide...Where and How to Obtain Summer Jobs. The best and most rewarding summer jobs are as yet unobtained by millions of college students. The American Society for Career Placement urges all American students who are able to take advantage of the many opportunities to teach in the foreign lands both for the contributions they can make in interpreting our country abroad and for the enriching experiences in international understanding they can bring to our students in their return to the schools of the United States.

KENNEDY CRIME-BUSTERS Moving Toward Solving The BIG CRIME

After one year in office, Attorney General Robert Kennedy and his staff of young, idealistic lawyers have made a serious move toward a show-down with major criminals. But over the barriers of generation there will depend equally the millions of "average citizens" who until now have shown themselves willing to stand along with organized crime. In an article in the January Reader's Digest which makes these points, it is estimated that some of the ominous influences wielded by Big Crime are being checked.

Some of the over 15,000 unanswerable questions listed in the United States and many of the over 50 foreign countries include lead, a contributory factor in study nominalities, work employing farm workers in Switzerland, and the reason why many showboat on the Ohio River, and the great American camp counselling absurdities.

This year's DIRECTORY contains many student training programs or openings of a permanent nature in nature.

Study projects, campus positions, and appendicular with those houses and music theatres, and work in inn, resorts, restaurants, boathouses, hotels, lodges, and dude ranches are some of the other openings for students and educators. Many branches include the Jordan Trips through the Missouri River, canoeing, and canoeing on the Peace River in the Northwest.

This year's DIRECTORY contains many student training programs or openings of a permanent nature in nature.

SUMMER PLACEMENT DIRECTORY for the 1962 summer is now in full swing. This book is designed to help students find summer employment.

Tickets are economically priced at only $5.00 per couple.

This is what we would have to see the "Brothers Four" alone at the Arts Center. We have never been there before, but we are willing to hold a ticket for you. But I ask you not to wait until the last minute to buy your ticket in order to help on our final plans.

Parking Lot in Rough Shape

We all realize the condition of the Riverside St. lot. I ask you to plan your time accordingly. We have to park where you will not block another car. I have seen and heard about people not being able to get out of the lot because someone has not been able to leave in time.

We are checking the permits and ticket office, and we are going to have a council. We all say Welcome! It's been a long, long time since we saw you! We are going to have a council. We all say Welcome! We have more people than we have ever had before, and we are going to have a council. We all say Welcome! It's been a long, long time since we saw you!
PIONEERING

Somewhere out there, beyond the realm of man's present understanding, lies an idea. A concept. A truth.

Gradually, as it comes under the concentration of disciplined minds, it will become clear, refined, mastered. This is the lonely art of pioneering.

In the Bell System, pioneering often results in major breakthroughs. Planning the use of satellites as vehicles for world-wide communications is one. Another is the Optical Gas Meter, an invention which may allow a centrally located computer to carry vast numbers of telephone calls, TV shows, and data messages.

Breakthroughs like these will one day bring exciting new telephone and communications service to you. The responsibility of providing these services will be in the hands of the people who work for your local telephone company. Among them are the engineers, administrative and operations personnel who make your telephone service the finest in the world.

BELLS TELEPHONE SYSTEM
SUMMER STUDY ABDAB

Four British and two Australian summer schools are offering American students the opportunity to combine 1962 vacation travel abroad with six weeks of liberal arts study next July and August. Applications for study at all six summer schools are being accepted by the Institute of International Education.

Under the British University Summer Schools program, students can apply for study at one of four schools, each concentrating on a particular subject and period. At Stanford-sponsored subject will be Shakespeare and Elizabethan drama. At the University of London the course will be the study of English literature, art and music of the 20th century; at Glasgow, the subject will be history, literature and the arts of 17th century England. The third of the six summer schools, Edinburgh University Summer School will be British history, and the fourth, literature from 1888 to 1932. Although the courses are designed for graduate students, undergraduates in their junior or senior years at a university will be considered.

The British Summer School fee, including full room, board and tuition, is $234. A few scholarships, covering part or all of the fee, but not travel, are available.

Both Austrian summer schools include in their program the opportunity to attend performances at Salzburg's famed music festival. The Salzburg Summer School, sponsored by the Austrian-American Society, emphasizes German language study, but courses in art and music and on foreign policy are taught in English. Also included, in addition to attendance at the festival, are a variety of conferences tours of Salzburg. The fee for the entire program is $345. Applicants must be between the ages of 16 and 40, and must have completed at least one year of college work. A few full scholarships are available.

The University of Vienna, offering summer courses at St. Wolfgang Campus near Salzburg, combines study with outdoor life at a mountain lake. Its aim is to enable English-speaking students to become acquainted with Austrian educational and social values.

Courses being offered include German language, law and political science, education, arts and history. Students who have completed at least two years of college are eligible to apply. The fee for the full six-week program, including registration, tuition, maintenance, tours and excursions, and attendance at the Salzburg Festival is $330, with a optional four-day tour to Vienna costing $30. A few scholarships covering partial or full fees are available to six-week students. Application for both the British and Austrian programs may be obtained from Prof. Robertson in the General Studies Division, Britain Summer School Scholarship applications must be received before March 1, 1962, and admission applications before March 31. Scholarship applications for Austrian schools must be returned by March 1, and admission applications by May 1.

LAMBERT'S MARKET
120 TEXTILE AVE.
HEATS, GROCERIES
ASS'T, COLD CUTS

Expect more, get more, from LM

There's actually more rich flavor in LM than in some comparable cigarettes. You get more body in the blend, more flavor in the smoke, more taste through the filter. So get lots more from filter smoking with LM... the cigarette that's higher, cleaner, even more tasty as it draws freely through the white, modern filter.

Check your opinions against LM's Campus Opinion Poll '61

1. How would you spend a $5000 inheritance?
   - More education
   - European tour
   - Stocks
   - Sports car

2. Should the faculty have the power to censor campus newspapers?
   - Yes
   - No

3. What's your favorite time for smoking?
   - During bull sessions
   - While studying
   - During a date
   - Anytime there's stress & strain

HAWAI'I
by James A. Michener

James A. Michener, author of "Tales of the South Pacific", "Sanctuary" and "The Judge at midnight", has written a book about the land he knows and loves best. Known as "Adventures in Paradise", it has been released on sale at $5.95 by the Book-of-the-Month Club.

Seven centuries before Columbus discovered America, the Polynesians, from the South Sea Islands, came to this island paradise we call Hawaii. Many thousands of years before that, they voyaged nearly 5000 miles to the legendary land they named Hawaii. Here, bent by new dangers and the weary longing in their own hearts, they made of a lonely island the paradise that is it to us today.

In Hawaii, you'll meet characters you'll never forget—Anna Prebakin, the missionary; the sea captain who founded a dynasty of sugar barons; the Chinese companion who became a great banker; the giant beach boy who might have been king and—literally—hundred—more. The book contains drama, romance, adventure, and a deep and timely significance. Hawaii tells the whole story of the people, Polynesian, American, Portuguese, Chinese, Philippine, Japanese, who have paid so much of their own blood to this almighty Little America.

The New York Herald Tribune says Hawaii is the hero, a paradise that is replete with blood and breath. a gay and interesting world of excitement, adventure, romance, politics, morals—adventure. Hawaii is available in a hard back version, in Readers Digest Condensed Book form and in the Bantam Ninety-Five pocket book edition which is as satisfactory as the series books. It will also be released as a major motion picture presented by the Mirisch Co. and Fred Zinneman Production, Inc., for many hours of pleasure reading after finals. Hawaii is the novel.

The purpose of this interview was to learn and present the reasons why LTI is not one of its better educational institutions. To inquire into its views of LTI's students, the reporter feared that of any suggestions he might offer for the continued growth of LTI's present, it would be the creative type of LTI's students.

This interview began by asking Prof. Block if he agreed that he has some objections to the LTI. Prof. Block replied that he actually agreed with the objections for one year ago, but he tended to let his leave last fall. In a serious tone he wanted a leave of absence. To this he replied that he was recognized as a leave of absence. The problems that would arise in the physics department if he had left this year would be to the present to the LTI. It is not as original a problem to him. It has been a very fit to give up at least.

The LTI he requested leave. Commitments made previously, dropped too. He realized that his students are graduating. Therefore it is evident that we are losing Prof. Block permanently.

The question why he wanted a leave of absence in the first place, he replied that his reason was essentially two-fold, discouraging school policies and the wish to conduct a year of full time research.

He finds that part time work is somewhat discouraging, that is, the practical application of his capabilities. He pointed out that teaching was his primary concern, and that the student is the benefactor of a teacher's practical experience. His fields of specialization are experimental physics, and those who have studied these fields and the sophomore physics program under his instruction, to the north of his courses which are a result of his teaching and lecturing ability coupled with his practical knowledge of the subject matter. Equal interest and ability, he admitted, were not evident in his advanced nuclear physics courses, where his practical experience is nil, he felt. He divulged secret his feelings that he never felt qualified to teach the course so was not his decision.

To enumerate some of the discouraging aspects of school policy in the opinion of Prof. Block, many of which he feels are unique to LTI, first in importance is his contention that prior emphasis of the school is wrongly placed on "window dressing." To cite an example such as those in the nuclear engineering program offered by the school. He feels that the first graduate program in Nuclear Engineering are in no sense of the word, "engineers." To offer a program of Nuclear Engineering, he feels, is essentially a physical program. He felt the Nuclear students were being chiselled to complete the nuclear engineering laboratory Department. He feels that a reactor simulator could have been provided for the nuclear majors, yet although this would have been impossible a year ago, it would be the "window dressing" form of "window dressing," contributing little to the prestige factor. In his own mood has wondered why other such glamorous subjects such as "Science and Missile Engineering" are not offered in the school catalogue, with perhaps the never-never Dr. Karsen in department head. Still in his half-joking mood he stated that in granting so freely its honorary degrees, the school might be better off, glamour-wise, to award doctorates to its faculty members as well as to useful alumni and trustees.

In a serious mood he went on to state that he feels the school lacks a mature outlook on science and education, that faculty members' initiative is discouraged by limited named. He also pointed out that in the "student-oriented" school, he feels that too many of the faculty members are satisfied only to be secure in a shell of conceit, that many have become academic professionals. The restricting policies of the research Foundation for faculty members, according to Prof. Block, are in conflict with this Research, which, as an integral part of most universities, is not exceeded as LTI. He stated that LTI and the LTI Research Foundation, two separate bodies, are still in conflict in this Research, which, as an integral part of most universities, is not exceeded as LTI. He stated that LTI and the LTI Research Foundation, two separate bodies, are still in conflict in this Research, which, as an integral part of most universities, is not exceeded as LTI. He stated that LTI and the LTI Research Foundation, two separate bodies, are still__(continued)
The newly organized LTI swimming team is sending out a call to all who are avid swim enthusiasts. With an approximate membership of 15 to 20 students, more students are needed to keep the team going into next semester. The first semester was a trial period, testing the ability of the students to show their interest by showing up with regularity each week. The interest has been very good and right now meets are held on two nights a week with hopes for making it an Intramural sport and perhaps a major Collegiate sport.

The students swim at the Lowell YMCA during school sessions at no cost to them at all. The next session will be called the 1961-62 New Deal organization, probably acceptable for the challenge of the "Dirty Six" to a volleyball match.

The P.W.A.P.A., consisting of such members as Brown, Tom Burke, Andy Dukle, Tom McAvney, Joe Merliti, Dick Ochocol, Roy Parker, and John Wadhams, are probably the most important in the field of "Dirty Six" in this "contest." Furthermore, since the Pot Washers and Plumbers Association, which was formed specifically for this occasion, has decided to clean up and dispel of their opponents the challengers are advised to look for a new name.

**WARMING THE BENCH**

dick craindel

This being the end of the first semester, the nickname contest was run out for this newspaper, and the unimpeached, Tech's present nickname is 'Terriers' which is exactly that of Boston University. Therefore the sports department felt that Lowell Tech should have a more exotic nickname—thus the resulting contest. Out of all the student body, fourteen names were received which are printed below along with their creators. In the next issue, those have been made to run the names and their corresponding symbols in ballot form for the first two issues of the second semester. Thus the new school nickname will be chosen by the student body and Tech will have a brand new nickname of its own. The Text Sports Department fulfills all of the contributors and hopes the student body will take an active part in the selection of the new name.

**In-Fraternity Bowling**

Monday, Dec. 11, the In-Fraternity Bowling League came to a close. O Pi needed just one point to clinch the title. The pairings for the night were O Pi vs. D.K. and Phi Pi vs. Pi Lam. O Pi picked up the clunker on the first string nipping D.K. by 5 pins. However, for the night the teams split with each picking up two points. But after that first string was taken by O Pi, it was just a matter of seeing where each team would wind up in the standings. In the other match, Pi Lam took 4 points from Phi Pi.

**Final Standings:**

**O Pi**

<table>
<thead>

<th>Phi Pi</th>
<th>Pi Lam</th>
</tr>
</thead>
<tbody>
<tr>
<td>10</td>
<td>14</td>
<td>11</td>
<td>5</td>
</tr>
</tbody>
</table>

**Phi Pi**

Pete Byra had high single for the year with a 166 game. J. Wilczynski and F. Vona tied for high triple with identical 300's. High team single was to D.K. with a 306 while they also took team triple with a 1666.

High average for each house was held by the following: F. Robolitaiaie of D.K. topped all bowlers with an average of 306. F. Vona was tops for Phi Pi with a 1053, B. Molineau topped O Pi with a 1013, and R. Kederman was high for Pi Lam with an average of 1014.

Now that the league is over, many of the bowlers probably hang up their bowling shoes for another year. However, it would be wise to keep in shape and keep that eye sharp. Bowling has been said to be one of the most relaxing and healthy sports. In any event, bowling is fun and offers competitive sport for young and old.

This year's league was successful in promoting intra-fraternity competition. Many of the matches were hotly contested. Many matches were won by a few pins, adding to the competition. The teams were fairly even and many of the matches could have gone either way. This makes for a good league. So until next year, keepers, "Make that Spare!"

**TOM KELLY'S SPORTS QUIZ**

1. Former Duke star, was seriously injured in the N.F.L. playoff game.
   - was picked as the Braves' most valuable player for 1961.

2. The 14 mile giant slalom event at Big Bromley was won by —
   - and was picked as the Braves' most valuable player for 1961.

3. Gasper Orteaga was defeated in a mild upset recently by —
   - and was picked as the Braves' most valuable player for 1961.

4. A valiant try for a win in the World Cup was made late in the day by —
   - and was picked as the Braves' most valuable player for 1961.

5. A giant slalom race was made late in the day by —
   - and was picked as the Braves' most valuable player for 1961.

6. A star for the Los Angeles Lakers who is now playing for Uncle Sam as a G.I.

**FLASHBACK**

Monday night, Jan. 8, Tech's basketball team finally hit the winning column once more after five straight losses by downing cross-town rival, Lowell State, 80-62. After losing in a closely played game to New Bedford Tech, 79-73, Tech appeared to be on their way to defeat number six, since they had already defeated the Lakers twice and had held the LTI boxout. Behind an inspired effort by inside players and the team pulled out what had been considered a wild but pleasant upset in Techmen. Let's hope it will give the team a much needed lift and provide more victories.

Last night Tech played Clark but the score was not available at press time. Tomorrow the team travels to Worcester to play Worcester Tech.

**PUBLIC NOTICE TO DIRTY SIX**

The Student Association of Chemicals and Chemical Physicians has received a letter from the National League of Chemical Students. The letter is in regard to the possible future formation of a "Dirty Six" in the National League of Chemical Students, and it is up to every student to make sure that our Association does not fall into the trap that many others have fallen into.

The letter reads: "The National League of Chemical Students is a small organization, but it has the potential to become a powerful one. It is up to every student to make sure that our Association does not fall into the trap that many others have fallen into. The letter ends with a warning: "If you do not take action, your organization may be dissolved."

The letter was first sent to the following organizations: Boston University, Harvard University, MIT, Tufts University, and UMass Amherst. It is up to every student to make sure that our Association does not fall into the trap that many others have fallen into.

**ANSWERS TO SPORTS QUIZ**

1. Former Duke star, was seriously injured in the N.F.L. playoff game.
   - was picked as the Braves' most valuable player for 1961.

2. The 14 mile giant slalom event at Big Bromley was won by —
   - and was picked as the Braves' most valuable player for 1961.

3. Gasper Orteaga was defeated in a mild upset recently by —
   - and was picked as the Braves' most valuable player for 1961.

4. A valiant try for a win in the World Cup was made late in the day by —
   - and was picked as the Braves' most valuable player for 1961.

5. A giant slalom race was made late in the day by —
   - and was picked as the Braves' most valuable player for 1961.

6. A star for the Los Angeles Lakers who is now playing for Uncle Sam as a G.I.
AVS LAUNCHES BIG PROGRAM

The Audio-Visual Society, one of LTI's youngest societies, has done much for MIT. The worth of its activities and contributions toward raising the cultural level of the school can be appraised enough. Their plans to serve are still growing.

The Audio-Visual Society plans to show a different type of film which will be shown Thursday mornings in Lovejoy Hall or NB 214. These will require the attention of the audience, being dramatic movies, musicals, and possibly some serious children's educational pantomimes. Examples of these would be "What's a Painting," Papa is All," and "Morning Steal".

Let's last year these films which are shown on Thursdays will not be shown on Fridays in the Emerson Hall lounge. This is due primarily to the type of films which they are. However, there still will be movies shown on Friday in the lounge. These films will be along the lines of travel films, courts films, etc. Some of the proposed showings included "Countdown Highlights of '58," "Olympic Games Vienna '71," "Switzerland." It is believed that such films as these are more adapted to the program in which they will be shown.

Looking further into the future, the Society hopes to be able to show some of our more modern films. All those which were made in cinema 'scope and VistaVision will be shown in Cammack Hall and the Society has access to the new large screen which is in Cammack Hall. This screen will accommodate 16mm, 35mm and the previously mentioned 70mm and VistaVision. The programming for such films will be announced later.

On the audio side, the Society hopes to conduct their own special concerts, which will be featured on both stereo and records. A survey has been made of all those interested in such concerts. The schedule will be made and also be announced at a later date.

Announcements of pictures to be shown and dates of their showing will appear in Library Topics and The Newsletter. Also, when films have been definitely scheduled, the showing dates for the month will appear in The Text.

THE FORCE BEHIND AVS SUCCESE: Advisor Joseph V. Kepczyński

Candidates for Bachelor's or Master's Degrees are invited to discuss opportunities in:

Engineering and Science

This is a unique opportunity to find out about the many career opportunities at IBM. The IBM representative can discuss with you typical jobs, various training programs, chances for advanced education, financial awards, and company benefits—all important factors that affect your future.

Some Facts about IBM

An Ideal Growth Story: IBM has had one of the exceptional growth rates in industry. It has been a planned growth, based on needs and products having an almost infinite application in our modern economy.

Diverse and Important Products: IBM develops, manufactures and markets a wide variety of products in the data processing field. IBM computers and allied products play a role in the operations of businesses, industry, science, and government.

Across the Country Operations: Laboratory and manufacturing facilities are located in:

- Endicott, Kingston, Owego, Ploughsville, Vestal, Yorktown, White Plains, Lexington, Ky.; San Jose, Calif., Bethesda, Md., and Rochester, Minn. Headquarters is located in New York City with sales and service offices in 180 major cities throughout the United States.

The Accent is on the Individual: No matter what type of work a person does at IBM, he is given all the responsibility he is able to handle, and all the support he needs to do his job. Advancement is by merit.

The areas in which IBM is engaged have an unlimited future. This is your opportunity to find out what this future holds for you. All qualified applicants will be considered for employment without regard to race, creed, or national origin.

Your placement officer can help you to learn more about IBM. He can give you literature describing the many career fields at IBM. He will arrange an appointment for you with the IBM representative. If you cannot attend an interview, he will call the manager of the nearest IBM office.

J. G. Tagney, Branch Manager
IBM Corporation, Dept. BB2
235 Lafayette Street
Salem, Mass.
