“FRESHMAN ORIENTATION ENDS

“EDUCATION AND REVIEW” STARTS FOURTH YEAR

On Sunday, September 28th, BGACAP at Lowell commenced its fourth year of broadcasts entitled, “Education and Review.” Through this program, Lowell has presented the problems, needs, and accomplishments of modern education in the Bethany area. The broadcast is scheduled weekly on Saturday at 6:30 p.m. in the College of Great-Lowell and has acquainted them with their school.

Moderator of the program, Atty. George N. Kelleher, President of the Lecturers’ Club, Dr. Robert B. Johnson, Director of the Division of Engineering, Dr. Raymond F. Johnson, Director of Nuclear Engineering, and Professor Louis C. Black, Department of Physics, were the guest speakers.

President Lyndon, in reporting on the progress made by the Institute in the past year noted that Lowell Tech is the first publicly supported institution of its kind in the New England area to give training in Nuclear Engineering, and that this course is of importance in the field.

Lowell Tech, in conjunction with “Atoms for Peace” program in this state, started quite recently in this field. The program will consist of lectures, an investigation, and application of the atomic energy to industrial and medical purposes. The course will be given every year to suit the needs peculiar to the Institute and its industries. With the coming installation, a few novel and unique duties of all sorts, we are leading the parade, we feel, in opening this new type of thinking and preparing for its nuclear engineering.

During the interview, Professor Black discussed another new current developments in the state of Engineering Physics. He said that new opportunities for student participation in field studies, and availability of an opportunity in the area of industry, govern- ment and education, are some of the advantages of nuclear engineering theory will be stressed.

Lowell Tech, as in the past, will again participate in the United Fund Campaign through a campaign directed by Miss Barbara O. Ehrhart, Collection is being handled by the T.C.C. and word of the various departments has assigned a person of persons to collect in their own departments.

The United Fund Committee at Tech includes Fred. Earl J. Ward, who is chairman of the entire Student section of the Public Service Industry, Dr. Robert B. Johnson, Director of Nuclear Engineering, and President Lyndon. The Institute is participating in the United Fund Campaign.

In an interview with Prof. Ward, these facts were found. Tech has a very high total donation last year was far over $150,000, and this year, a smaller donation than the total amount of the Tech. Total individual donation increased, our total student body donation has increased; this being a credit to us. During the interview, Prof. Ward stated that Tech has the honor of sending the last pack of student to the United Fund.

In the future, Tech plans to keep the same level of donations and will continue to participate in the campaign.

The overall theme of the “Atoms for Peace” program is to educate students and faculty about nuclear energy and its potential benefits.

FRESHMAN BEING HARASSED

United Fund Campaign Holds Dinner

A gala festival held at Alumni Field on Saturday, October 4, was by all accounts a success. A spaghetti supper was arranged and entertainment followed which was made up of dancing and other activities.

The event was sponsored by the United Fund Campaign and the proceeds were to be donated to the United Fund of the Lowell Tech. The money raised will be used to support various projects and organizations in the community.

The function was attended by a large number of students, faculty, and community members.

Dr. Charles R. Mingins Represents L.T.I.

Dr. Charles R. Mingins, chairman of the department of engineering, was one of the keynote speakers at the recent Annual Meeting of the New England section of the American Association of University Education. He represented the Institute that was held at the University of Connecticut in New London.

The Institute represents the last year on the Executive Board at the dedication of the library at the University of New Hampshire. We (Dr. Howard K. Mason, director of the U.S. National Science Foundation, Joseph K. Karr, professor of nuclear physics, and Primo) proposed the creation of a new group and also participating in the program was Dr. Warren W. Abrahamson, president of the University of Connecticut.

The Institute was also represented on the board of directors of the American Association of University Education.

A number of the keynote speakers included President Norman M. Brown, president of the University of New Hampshire, and Mrs. E. B. Mather, chairman of the division of L.T.I.

The function was held at the University of New Hampshire and was attended by a large number of members and guests.

The event was organized by the L.T.I. and was a great success.

We have the privilege of being hosted by the L.T.I. and are looking forward to more such functions in the future.

WEATHERBEE CHOSEN AS OUTSTANDING CADET

On Tuesday, October 2, Cadet James C. Weatherbee received the student’s award from Major General Rogers, Commanding Officer of ROTC. At the awards ceremony, it was stated that this award is given to the outstanding cadet of the Air Force Reserve Officer’s Course.

The Cadet, James C. Weatherbee, was chosen for his exceptional performance and leadership qualities. He has been honored for his outstanding achievements and contributions to the cadet body.

The award, presented by Major General Rogers, is a significant recognition for Cadet Weatherbee and highlights his dedication to the Air Force Reserve Officer’s Course.

We, as a community, are proud of Cadet Weatherbee’s achievements and are excited to see his future contributions to the Air Force Reserve Officer’s Course and beyond.
THE TEXT

Minutes Of The Student Council
October 7, 1958

Meeting called to order by President Freeman at 5:00 P.M. in the Library, present: President, Firethorn, Lafferty, Loun, and Margniet. Absent: Fabian, Beadle, and Parkinson. Sheets showing flow of authority on Council distributed.

President Maynai reported on the Red Feather collection by Terril, who expressed appreciation for the efforts of the students and leaders in raising money for the guitar. President Maynai also reported on the potential for lockdown assignments and the need to recruit more leaders for the guitar project. Questions were raised by some members as to the nature of the lockdown assignments and the need for more information on the guitar project.

The President moved that the Council adjourn at 6:00 P.M.

A Faculty Member Speaks

Dear Students,

I am writing to express my thoughts on the recent activities and events in our college community. As you may have heard, some members of our faculty and students have raised concerns about the nature of certain activities and the need for greater accountability.

It is important to remember that our college is a community of diverse individuals who come together to learn and grow. We must ensure that our actions and decisions are aligned with our values and principles.

I encourage all members of our community to continue to engage in open and honest dialogue about these issues. Together, we can work towards creating a more inclusive and respectful environment.

Thank you for your attention.

Sincerely,

Dean, Department of Student Affairs

FRESHMAN ORIENTATION

Freshman orientation and new students welcomed by the administration. The purpose of this event is to familiarize new students with the college and its resources.

FINISH-UP WEEK

Finish-up week is a time for students to wrap up their coursework and prepare for finals. It is a busy time for everyone, but it is also an exciting opportunity to reflect on the semester and plan for the future.

THE TEXT

Congress of Inter-Communist

At the third Congress of Inter-Communist, thirty nations were represented. The Congress was held in Moscow in 1956. It was one of the major events of the Cold War, and it had significant implications for the future of the world.

The Congress was attended by leaders from many countries, including the United States, the Soviet Union, and China. The Congress was also attended by leaders from some of the smaller countries of the world, including Belgium, Canada, and the Netherlands.

The Congress was a opportunity for leaders from different countries to come together and discuss issues of mutual concern. It was also an opportunity for leaders to exchange ideas and to work towards common goals.

The Congress was a significant event in the history of the Cold War. It had a significant impact on the development of international relations, and it helped to shape the course of world history.

Within the past few weeks only a change to the basement of Weitz Hall where the offices of WLTI's public relations director has taken place because of renovation of the area. Things such as electricity, heat, and water are no longer a problem in the old office. But what is new is the lack of any of these facilities in the new office. The students who have been assigned to this office are currently working on the construction of a new office for the student newspaper, the Weitz Review. The new office will be located in the basement of Weitz Hall and will be completed next week.

A Parody Of Entropy

There is very little you can do about it. That's the way things are in the world of science. But you can make a few changes if you really want to. One thing you can do is keep an eye on the time. That way you'll know when the next big thing is going to happen. Another thing you can do is keep an eye on the people around you. That way you'll know when they're going to do something that's going to affect you. And then you can do something about it.

The Key To Good Memory

Do you know the key to good memory? Well, I should say that you probably will never learn it. But you can try to remember it. What is it? Well, I can't say for sure. But I think it might be something like this. You know how people say that they have a good memory when they can remember something that happened years ago? Well, I think that's because they have a good memory. But how do you do that? I don't know. I guess it's just something that happens. You know how some people can remember things that happened years ago? Well, I think that's because they have a good memory. But how do you do that? I don't know. I guess it's just something that happens.
PAPER AT WORK

Chemical Engineering Education, as well as other engineering education, has been faced with such a problem. Simple chemical technology of the engineer has become extremely complex. Recent developments in chemical technology have led to such a degree of complexity that many science have developed to such a degree that the chemist is faced with the necessity of becoming familiar with the entire body of knowledge in various subjects, which although technical in nature on the outside, are non-technical in character. As a result, the problem does become pressing. For example, in research in the field of chemical technology, the chemist, the engineer, the specialist in design and production, the student of economics, the lawyer, the engineer, the student of public relations, and the public relations specialist all have to understand the process of production in some degree of depth. How to give the student an understanding of the mechanics of the industry, while maintaining at the same time, an understanding of the technical and technological curriculum, has been attempted and has not been fully realized in any degree of success.

Another way of looking at the problem is that a technical social system of many technical specialities is the result of the development of industrial marketing into some type of educational institution, the technical schools of industry. The student must not only learn what is necessary, but he must also learn how to function in his particular field. The main thing is that your paying for the container or the convenience of the chemical technology and the public relations field. The second thing to do is to understand the mechanics of the industry. Mill inspections have long been a part of the curriculum of engineering curricula.

At Lawrence Technological Institute, the golf trip is in operation to give an understanding of the book and what the student is learning in the department of chemical technology. The opinion and direction of Professor A. S. Drabek have been very helpful.

Engineering seniors visit local plants, visiting a union cross-section of pulp and paper converting.

SPORTSMILL BY J&T

Back in the 1933 World Series (Yankees - Dodgers), it was Billy Martin who turned in the Series performance of a lifetime, as you remember, tied for 13th, which included a 21-run homer for a three-run homer, and his 21 RBIs, and finishing 75th, in 1933. Billy was nothing to write home about. But, when the World Series ended, it was Martin who began and ended the dominating of the Dodgers. He hit his first HR of the season last night, and a home run on the opening game. Martin proved even more instrumental in the last game by driving in seven runs, including two sacrifice flies, of which the second was the game winner. In 1934 it was Dizzy Dean who turned out to be the golden boy, Dizzy, only a part-time player this season, despite his 29-2 wagon. In the 1934 World Series Dean was hit 21 RBIs, and showed a new batting average of .325. He hit his first HR of the season last night, and a home run on the opening game. Martin proved even more instrumental in the last game by driving in seven runs, including two sacrifice flies, of which the second was the game winner.

The 1935 Series was no different from its predecessors in regard to producing a hero. Johnny Podres, a second-year southpaw who had a 9-19 record during the regular season, rose up to become the hero of the Series itself. He beat Satch and Ben Chapman in back-to-back games, and shut out the World Series champs, to become the hero of the Series. The 1935 Series was no different from its predecessors in regard to producing a hero. THE TEXT

IONA STUDENT FELLOWSHIP

The Iona Student Fellowship held its first Cathedral Mass in the Congregational church on Wednesday evening. The Reverend John W. Lewis, head of the 14th meeting of the New England Conference of the Tobacco Industry, was the principal speaker at the Mass. He spoke on the importance of the tobacco industry and the role it plays in the economy. The Rev. Lewis emphasized the importance of the tobacco industry in the economic development of the region and the need for its continued growth.

Sport Snapshots

Pro. W. W. ("Professor") Yarnall, instructor in sports, has reported to Placement Directors that he is interested in chairing the Committee on Athletics, that interest national athletics involving about 400 students are scheduled for the coming year.

Reading League

Four teams comprising 28 to 30 students and their coaches met at the Iona Reading League on September 28th, and were challenged to improve their reading skills. One of the teams, coached by Instructor Bill Harrison, was victorious in the 14th meeting of the New England Conference of the Tobacco Industry. The Tobacco Industry, an affiliate of the Iona Reading League, was represented by Instructor Bill Harrison, who was victorious in the 14th meeting of the New England Conference of the Tobacco Industry.

A SCENE FROM TOUCH FOOTBALL

Inter-Fraternity and Independent First League

December through March will be a nine-month period in which to 50 students participating in five teams will be held in the gym. Coach Yarnall supervises the games, and the first perfect game in World Series history was held here. His best team, the Bots and Bedlam, defeated the other teams, and the others, in turn, defeated the World Series champs, to become the hero of the Series itself.

The 1935 Series was no different from its predecessors in regard to producing a hero. ENTERTAINMENT

by Anne J. Fornette

Well, here we go again, as the saying goes, back to the old grudge, after a most enjoyable summer. Most enjoyable due to the fact that I was lucky enough to be within throwing distance of an equity summer theatre. For those of you who haven't heard of this type of playhouse, it is one supplied by only equity or theatre guild members. Quite unlike many drab summer stock theatres in this vicinity, all actors are professionals with a lone history in the field of footlights.

The program for the summer included, Arthur Treacher in "Visit to a Small Planet." Although the setting was good, I thought the play was very much overrated. The setting was excellent in parts, but, it didn't compensate for all the foolish scenes included in the play.

Save Cochran played in "Fair Game," a story with locale at the garments district of New York. Better Cochran was Ellen McCrea, one of the newest and brightest stars of olden days. Perhaps the funniest production of the season was Noel Coward's "Fallen Angels," the story of two women widowed for a day. The leading lady was Harriette Gumbold, that funny, fancy blonde with the gravel voice.

Getting back to October and the Boston scene, we find plays beginning to bloom, movies worse than ever, music and chate, well, amusing.

As I have mentioned, movies are bringing us back once more to the barbiturate days. Offerings of the season will include "The High and" "Son of the High," sound instructors don't they?

The few possible ones in Boston at the present time are "The Matchmaker," based on Thornton Wilder's Pulitzer Prize winning stage hit of the same name. It is in its second week at the Astra. It stars Shirley Booth, revealing a new facet to her career, that of singing. Accompanying her are Paul Ford, former Colonel of the Pilk series, Shirley Maclain and Terry Pershing.

At the Kemome, the husband and wife team of Kay Ham- boll and Roy Hargrave are featured in "The Constant Husband." "Gigi," individual's answer to "My Fair Lady," is on at the Gainsborough Theatre, Leslie Caron, and Harriette Gumbold bring to the screen such great songs as "Gigi," and "Thank Heaven for Little Boys."

Switching from the screen to the legitimate theatre we find funniest play production yet at the Wistar and Tom Poston. Poston can be remembered as the one of Steve Allen's men on the street. "Clap Hands," is opening itself by bringing the rage of the year to this film, at the Roof. "It's mine who? Rudy haveorgaphenol, who can do what?" "What?" or course! This guy needs more than Gestalt.

So, Serfes and Elisabeth are open, but as of now, the celebrities has the stage.

At Channing's Music Bar on Tremont St., the toast of the nightly jotted strip, Jimmy Dylan and his singing sax perform nightly.
