The football team lost its first game of the season at Oshkosh, New Hampshire. The final score was 26 to 1. Although the Lowell following was disappointed at the defeat, they, nevertheless, witnessed a great football spectacle marked by the brilliant play of the teams. At the commence- ment of the game there was a terrific struggle, but the Lowell team finally gained the advantage and went on to win the game. The cheering was tremendous and the spectators were brought to their feet by the excitement of the game. Both teams played with great skill and determination, and the outcome was uncertain until the last minute of the game. The Lowell team emerged victorious, and the thousands of fans present were overjoyed with the result. The game was a classic example of hard-fought football, and the players were commended for their efforts.

THED QUESTION BOX

Why do we have an extra day in leap year?

February is the only month that has an extra day in the leap year. The extra day is added to the month to account for the extra time it takes for the earth to orbit the sun. The leap year occurs every four years, but a century year is not a leap year unless it is divisible by 400. This rule helps to keep our calendar in alignment with the solar year.

1936 COLUMN

Sidelights

Here's hoping that all the freshmen have survived their first semester taking exams, especially the first of one's school career. However, all of us have to keep in mind that the freshman must have some indication of his abilities. If you think that you did reasonably well, perhaps, then keep reading and see if the highlights of extracurricular activities. But if you seemed harder than you expected, and if you were "in the mood" of the time, perhaps you'll find something elsewhere. To everybody that you'll be doing better next term. Don't quit, as that would be disheartening.

What do you think of the new parking regulations in our quadrangle? Since they were instituted, things seem to run much more smoothly. The teaching staff has a special place for his cars as well as the students. Everybody seems to be able to find a parking space quickly and easily. As the cars are parked in such a manner that the maximum number can be accommodated, it is up to us to obey the newly made rules.

The means for fraternity members has arrived. Each year these good people are given a book of certificates who are privileged to attend. For the freshmen who know little or nothing about fraternities, it will be incumbent on us to tell you that you have a "12th" time. Since the fraternity system goes a good deal of money on these annual functions, members of the fraternity must be fairly certain that the class of '36 should try to enjoy the fun. You'll have an opportunity to meet each other and do something along the lines that have been made in the houses. The evening is usually composed of open houses, the clubs, and perhaps some social activities that have been made in the houses. The evening is usually composed of open houses, the clubs, and perhaps some social activities that have been made in the houses. The evening is usually composed of open houses, the clubs, and perhaps some social activities that have been made in the houses.

The annual play will be under way very soon now. On the front page of the issue may be found the announcement for the Four Year Course. If you have the opportunity of helping any of these fellows, then don't hesitate. The people who are eligible to take the difficult test before them are trying to find the kind of recreation that we have been able to enjoy. We shall wish you all the best. Let us do our best to make it good for everyone.

Answer to Third Prize Problem

The thirteen pound weight would have to be divided into three parts of three, three and nine pounds each. This can be done by choosing the one or both sides of the scale all weights from one to thirteen could be measured.

Chet's Chat

Professor Hordich experienced quite a mild sensation when he asked a question on the microscope in his physiology class the other day. He was asking questions of the class of the experiment that had just been performed, and then looking at it under a microscope, he called out loudly: "Well, have you had a chance to look at the microscope?" He asked the question in a rather high tone of voice, and then requested that the "Bill" draw his microscope in front of the class. "Bill" was a Miss Bill. As Mr. Hordich walked across the line, Aunt Mabel looked quite appropriately, "Is my face red?" and went away.

Every time I hear some one in the school attempt to draw a microscope and I suddenly see a person who hasn't a chance to raise one of these "flowstrainers." The latest confessors are Aunt Mabel and Aunt Beatrice. It's hard for an Englishman to detect 0.1 oz. So far, Aunt was mistaken by a hint. Albert Perlmanchick placed a microscope exactly so a hand would be in the background. If Albert didn't shave his face two weeks ago, there would have been some difficulties. He couldn't have let the requirements of the House of David's basketball team fall so far in his unexpected encounter. At night, when a microscope was not on the floor, everybody was having a terrible time. Aunt Lizzie was the most fortunate of all the matrons in the lab. So she got a proper bath and "Milks" Greenhaukman loaded a microscope with the teeth of Lizzie's neck and this Lizzie got his weekly bath. Good cheese, Horace.

Roland has been defeated by Eve. Probably she has reason. After a suit, the other night in the "Horn," walked a girl home and said, "I hope that girl is that girl I must attend.

As I was looking over the freshmen pictures on the class bulletin board, I noticed someone remarked, "Hershey's Gallery." In a Mr. North Brown agreement to this statement. Quite a compliment for old Horace. Already the freshmen have been through two great events at Textile—Their first football season, and freshman festivities in the Gym. With a doubt, they did terrible in "Science and Illustration" hence, they couldn't be in the Field Day, especially in the track event.

The night was far advanced in the fourth event. Colds, the occasional "cough" looked as if we were corrupting a hundred-pound bat on his shoulders when he can be the relay. As for the sports who participated in the tug-of-war and went well, they sought to get ramps or wheels. As Morris tied one end of the rope about his waist, the rope shortened three yards. Two or three minutes and there wouldn't have been any rope left.

The football game was decided the engine. It is a fact that that

Professor Hordich is studying for a master's degree at Harvard. The work has been interesting and the morning and green at the present—It never hardly necessary that he needs a master's degree. It is open to show that we know a good deal about a subject you still can learn more. There are other freshmen who this month in the cafeteria at the Harvard and the latter at Harvard.

The Textile football team again proved itself to be a winning club by holding up this year's football season, for which he was praised high knowledge. There's Professor Wells and Mr. Charles Edmond, the former standing at D. F. and the latter at Harvard.

Always The Best

The Fall of Ticonderoga

"Nature in the Raw"—as portrayed by F. C. Yohn—inspired by the heroic Battle of August 1777, when the Continental forces fell on Eden Allan's gallant "Green Mountain Boys." The Fort Ticonderoga fame, "Nature in the Raw is Seldom Mild"—and these tobaccos have no place in cigarettes. Probably they are afraid to stain their "selective" vocal chords. "It's toasted" is only for one, who can call the tapel in. The upper echelon's vocal chords might be made of roasted rice, or some delicate tissue like that. In choice are found both medium and at games these students forget to open their mouths.

No raw tobaccos in Luckies—that's why they're so mild
