A SOUTHERN DITTY

DEAN PROTESTS

FLAG DISPLAY

The Stars and Stripes were no more above the Meredith's throng there than the blue and white standard when we bade it good-bye. We brought our flag in the march from LTI to Meredith, and now presented it to the Institute.

The library was dedicated on Wednesday, October 15th, at 3:00 P.M. The program was to be an all-day affair and included lectures, discussions, and a tour of the new library facilities. The dedication was attended by many students, faculty, and alumni.

Many of the students who were fortunate enough to attend last year's dedication were very surprised and enjoyed the festivities. This year's dedication was even more enjoyable and well-attended.

Soph Class Plans Blind Date Dance

LTI—Oct. 5—In response to overwhelmingly popular demand, a Blind Date Dance, sponsored jointly by the LTI Student Senate's College and the Dance Sophomore Society, will be held in the LTI Fieldhouse on Friday, October 15th, at 3:00 P.M. Many of the students who were fortunate enough to attend last year were rewarded with the most enjoyable and memorable experience of the year.

EXTRA

Since many of the students who attended last year's dance have since graduated, the dance committee is once again looking for students who are interested in participating.

Many of the students who were fortunate enough to attend last year's dance have since graduated, and many are eager to attend again. (See also page 11)

Entertainment will be furnished by the local community talent and will be part of the music of an intimate evening of dancing and fun. And, should it turn out to be all that it should be, it will be a wonderful evening for all to enjoy.

It is anticipated that this year's dance will be even more enjoyable than last year's, and many are looking forward to attending again. (See also page 11)

Big Week-End Planned By Student Council

Saturday evening, November 14, 1951, is the date that has been set for this year's All-Textile Formal. Why is this date chosen? First, because the social committee decided that the All-Textile Formal should occur on a Saturday night.

Therefore it was decided that the formal should be held sometime during the last three weeks of the semester. The date of December 17th was chosen as a date late enough for the students to make necessary arrangements for the formal, and late enough to precede the weekend of the formal. Hence, these students are given an opportunity to bring a date up from home or to make their final arrangements for the formal. The choice of this date is that eight-weeks formal will be over by the end of the week, and an opportunity to blow off a little steam after the strains of an examination.
Cover To Cover

Since it has been decided that this column will be somewhat of a preachment feature in The Text, it is wise as well as advisable to take a different approach to the object of the column. What will be significant will be this: moreover, the book review will no longer be attempted to impress the students with the noblest books in the world. Let us try to find books which will be helpful and which will be of real value to us. The books chosen for review will be those which are at the disposal of the student. This will be a part of the book that the students will enjoy reading, and we are sure that the whole class will enjoy writing the reviews.

Edward Gain

Upon registering this Fall, each student received a mimeographed page of paper upon which were the cafeteria rules to be observed. The circle had two facts: first, that all beverages should be consumed at the bar; second, that any one bringing his lunch must eat in the lounge at East Hall.

During the initial weeks of the semester, the lounge was very crowded, and when table space is at a premium it is unfair that several students can occupy the tables long periods of time when they are merely playing cards. The lounge has facilities to accommodate them.

The second week, however, is another matter. Let us review the situation with regard to this decision. First, there are quite a few students who have moved away from, and who bring their lunch daily. Let us keep in mind that their number comprises a good percentage of the students body. Now let us evaluate the facilities which are at our disposal, which can be made more effective, and which can be used to our advantage.

The student body, however, is another matter. Let us review the situation with regard to this decision. THE ENGINEERING SOCIETY

The history of the Engineering Society dates back to December 9, 1922 when the first officers were elected. The purpose of the Society has been to afford a forum for the discussion of the latest achievements in engineering, and for the discussion of new and improved methods of doing things, and to confine these discussions to the time of the meeting. The Society was founded with the object of broadening the minds of the students and of providing a means of communication between the members of the Society and the larger world of engineering. The first meeting of the Society was held in the Student Union on December 9, 1922 and the first officers were elected as follows: President, Charles B. Tucker; Vice-President, John W. Douglas; Secretary, J. W. Thompson; Treasurer, C. W. Byers.

THE NUCLEUS

The Nucleus was founded fourteen years ago by a group of students who felt that it would be advantageous to supplement their technical instruction by obtaining information and experiences gained in the laboratory and personal research. Meetings are held on Sundays at 7:30 P.M. and consist of a dinner followed by the presentation of a paper by one of the members.

The organization has no regular officers, but it is presided over by a presiding secretary; the speaker for the evening serves as chairman and conducts the meeting. There is a box of golf balls, containing a privilege of inviting a guest, usually a member of the faculty, to attend the meeting.

The membership of the Nucleus is limited to a maximum of two dozen (there is no minimum) of fifteen undergraduates of the School of Engineering. The purpose of the group is to bring together the members of the Society, especially those who are interested in the work of the Nucleus.

VARSITY CLUB

Being in a more or less dirigent place at the present time, the Varsity Club plans to reconvene within the immediate future. The group will include the election of officers for the coming year, discussion of general plans for raising capital in order to carry on the work, and discussion of plans for trips to the coast and the mountains. These accomplishments will be considered in the meetings. Special events include the annual football game and the annual golf tournament. The group will also meet in the evening in the Student Union and will discuss various topics of general interest.

FILM CLASSICS GROUP

The Film Classics Group began its weekly meetings last Friday evening at the showing of the oldest comedy shorts by a member of the group. The group is open to all students interested in film and is sponsored by the A.T.C.C. The group meets at 8:30 P.M. every Friday in the Student Union.

OMICRON PI

To all tradition, the next four years of your collegiate experience will be a fine one when you make the acquaintance of your fellow students. The tradition of Omicron Pi is the oldest of the Greek societies on campus, and has been in existence for over a century. The group has a long and distinguished history, and has been associated with many of the finest universities in the country.

A.T.C.C.

The Student Council of the American Technical College (A.T.C.C.) is one of the most active groups on campus. Its members may attend the functions of the Student Council and vote in its general meetings. The Student Council has been in existence since the founding of the A.T.C.C., and is an integral part of the organization.

The PICKOUT

The PICKOUT is the official organ of the School of Engineering, and is published weekly during the academic year. The PICKOUT is open to all students, and is published by the students of the School of Engineering. The PICKOUT is distributed free of charge to all students of the School of Engineering.

The Lowell's

The Rights exist, the curtail the right, and we are right when we are wrong, but we are wrong when we are right. The Lowell's, a group of students, have been自习 the rights of "The Man Who Came to Dinner" for years.

PHI SIGMA RHO

The Phi Sigma Rho fraternity is one of the oldest and largest fraternities on campus. The fraternity is open to all students, and is a very active group on campus. The fraternity is known for its high standards and its commitment to academic excellence.

The INTERFRATERNITY COUNCIL

The Interfraternity Council is made up of representatives from each of the student fraternities. The council meets on a regular basis and discusses various issues that affect the fraternity and the campus.

The bowling league sponsored by the Interfraternity Council will be held on Monday, October 15. The schedule will be posted outside Prof. Cushing's office. The league is open to all students, and is a very active group on campus. The league is known for its high standards and its commitment to academic excellence.

A copy of the final decision and any recommendations will be sent to the Dean's office, the faculty advisors, and the fraternity members. The council's decision will be communicated to the fraternity members.
The extra curricular activities which I find most enjoyable, however, are Those that have to do with the theater and music. I have taken part in four productions and have sung in one of my school's choirs. I have also been a member of the school's orchestra, which performs regularly at the local auditorium. These activities have been a great source of satisfaction and have helped me to develop my creative abilities. I would highly recommend them to anyone who is interested in the arts.

Now that I am finally a senior, I know that my time here will soon be over. It is with mixed feelings that I am about to leave this wonderful school and all of the friends I have made here. I will miss the music and theater productions, but I am looking forward to the new experiences that await me in the future.

CAMPUS COMMENTS

By Harry A. Davis

L. T. L. is becoming rapidly equipped with a large and extensive set of rules and regulations governing the behavior of the student body. These rules are intended to ensure a certain amount of respect for authority in order to prevent the disorder and confusion that is required of the student. The balance of these regulations are intended to be in place to begin with them and to prevent them from being extended to related subjects or institutions without the consent of the student body. These regulations are designed to be in place to protect the interests of the student body and to maintain respect for the administration.

As an example, let us choose the dormitory regulation that says, "no student may sleep in the room after 10 p.m." This regulation implies that the student should not damage or destroy the building, that he should have good ideas, or that his room be painted with pictures of pretty girls in various states of undress and dress. He then observes an ad campaign and proclaims himself a culprit of the sin that was committed by such people. He then knows he shouldn't do this because the school cops, upon removal, will take only half the amount of guilt indicated by this particular piece of wall. Therefore someone in authority issues the supplementary regulation that necessitates pictures or other adornments to be placed on the wall. But this is not the case, for the regulation is designed to protect school property for the most part, there are certain regulations which are designed mainly for the protection of the student.

Such a one is the new regulation which allow three cats for a course given at L. T. L. These are extremely heavy and are to be supplied only by the University. This regulation is likely to have little effect on the behavior of the students, since the only cats that would be allowed are domestic shorthairs. But it is possible that the students may be inclined to buy a larger number of cats, which would then have to be supplied by the University, and that this would lead to an increase in the number of cats on campus. This, in turn, might lead to a decrease in the number of students, since the cats would be more likely to limit the number of students that would be allowed to sit on the campus.

On the other hand, the regulations are not at the same time entirely bad. They provide one of the few methods of controlling the student body and especially regulations designed to cover up mistakes and uncorrected situations. They will contribute to the general peace and stability of the school and the administration.

The gradual change in the regulations of the student body has been a very important one to all of us. It is unfortunate that the changes have not been accompanied by an improvement in the administration. The recent changes in the regulations of the student body have been made in order to prevent the disorder and confusion that is required of the student. The balance of these regulations are intended to be in place to begin with them and to prevent them from being extended to related subjects or institutions without the consent of the student body. These regulations are designed to be in place to protect the interests of the student body and to maintain respect for the administration.

For the benefit of the newcomers to textile, it would be fitting and proper in this first writing of the SPORTSMILL to review what the textile has to offer in the line of athletics during the school year. Let us take a tour of the campus in order that these sports activities shall be clear.

The soccer team, coached by Dave Money and manned mostly by experienced American students, will play its first game in mid-November. A very attractive 10 game schedule during this fall season. Although, this is only the second year of competition for the sport, they benefited greatly by last year's experience and many of the returning soccer is in store for everyone who attends the games. With four home games on the schedule, every student will have an opportunity to cheer on the牛dor team. If the students can show their support which they deserve. The games at home will be played on the baseball field. The match that opens the season during the fall will be the informal practices being held by the lacrosse team. With a squad bolstered by ex-football players and sprinkled with veterans, a successful season should be had in the spring. The Basketball season gets under way the first week of December. Therefore, practice sessions should begin in mid-November. A very attractive 10 game schedule has been announced by the Athletic Department with several teams being played for the first time. Of course, spring brings on baseball and that is also where scarf lines are in action.

The above sports are classified as the main sports at LIT but they are by no means the only sports on the campus. The fraternities sponsor a basketball and softball league which give an excellent opportunity for those who didn't make the varsity teams to still participate in the sport of their choosing. Needless to say, the rivalry between these fraternities is very intense and they express their respective feelings in these athletic encounters. The climax of the fraternity basketball season comes when the winning fraternity team meets a team from the other fraternities. There are a number of illustrations which show this. That's right, the "teachers" against the frat champs. The benefit of this rival is for an entry fund to help cover the various injuries which come up during the season. The players always come home and furnish everyone with good basketball and plenty of laughs. Textile also has a strong and active rifle club. Like all other sports, these various sports, there is the Vanity Club. For those who are interested in fashion, there are courses in pattern making, in tracking these sports, there is the booster club and he cheerleaders. As one can readily see, Textile has a vast and diversified sports calendar. Of course, football is compulsory by its absence. The sport was dropped last year by a vote of the board of trustees who acted on the advice of the student body which had been set up to investigate the sport. The sport will return in the future but it had to drop at this time for financial reasons. Everyone who has any interest in the various sports is encouraged to participate in them in order to develop a healthy athletic situation at Textile, but remember, if you can't take part in these sports, the least you can do is to back up your team.

LOWELL TEXTILE INSTITUTE
Four-Year Degree Courses in
CHEMISTRY AND TEXTILE COLORING
TEXTILE ENGINEERING
TEXTILE MANUFACTURING
LEATHER ENGINEERING — PAPER ENGINEERING
Degree of Bachelor of Science offered for completion of prescribed four-year courses in Chemistry, Engineering and Manufacturing.
Scientific and practical training in all processes of leather, paper and textile manufacture including all commercial fibers.
Degree of Master of Science in Textile Chemistry and Master of Science in Textile Engineering offered by the Graduate School to properly qualified students.
For catalogues address Director of Admissions, Lowell Textile Institute, Lowell, Massachusetts.
THE TEXT

Thursday, October 11, 1951

NEW EXPERIMENTAL COURSE

(Continued from Page One)

In conjunction with the four-year series of developments and demonstrations, chemical shorthand and general science as it pertains to the matter presented, will be covered.

In connection with the formation of the College-Industry Cooperative Council Lowell Textile Institute's President, Martin J. Lof, noted that while over many years the Institute has cooperated in educational and research projects with the textile and related industries, the sessions at the A. C. Leverett Company marked the institution's first venture in industrial education in the leather field. He predicted that the existence of other similar programs will be a new phase in his educational activities and a new chapter in industrial education in the leather field.
