MOSHER ELECTED EDITOR - IN - CHIEF

On April 26, the Staff unanimously elected R. Scott Mosher to the position of Editor. Mosher, a junior in industrial management, has been the Managing Editor for this past year, along with handling many other extracurricular activities such as PIE, the Pennsylvania State Chapter of Phi Lambda Psi Fraternity and being a member of DVC. Having served reasonably well, we are sure that the job will remain in good hands.

Campus Sexual Morality

by Rev. Paul T. Walsh
Chairman of the Philosophy Department

Most college students must find it quite tiresome by now to read the drivel of newspaper and magazine articles on this topic, and the fact that they are written by persons with no aptitude for the subject matter of the question from human experience. Writers and commentators speak of "the science of sex," as if sexual problems are less than biological factors (both pro and con). It is true that the hazy notion of sexual relations has been fostered by the majority of the populace. Writers of this sort feel that most students are engaged in this practice, but perhaps they are the hint in college. They are the ones that they have planned this type of activity when they were college students. They would feel justifiably, but now they realize that sex is no longer related to relations of this kind. When the majority of the populace and their parents have not been scarred in the guilt that is associated with such satisfaction, any attempt to denigrate the human emotion of attraction (e.g. love) or the sensation of passion or indirectly representing it as a disease natural to the new generation will be of no avail.

The Sexual Revolution

There has been a sexual revolution widespread, profound, and with the present focus of the future of mankind. Sex is no longer the object of interest. (Although it is less so.) It is, rather, some sort of goal or avenue of personal well-being. While this changing outlook may be little by little appreciated, it is generally accepted by the majority, which I call sexual modernism. This is to be found in the writings of Mr. Mosher.

The process of being installed, will be ready for operation next year, and that if the sufficient funds are found how to finance the operational costs.

One of the concerns of the Institute over the lack of funds for the Center is the Atomic Energy Commission will not issue T.I.T. the necessary license to operate such a center. According to a college spokesman, A.E.C. will license only if the applicant can prove that there is adequate funds for proper operation of the Center. He added that the Commission is extremely strict over the provision of licenses.

The conclusion of the trustees of Thursday's meeting was that a meeting be set up with Dwight to discuss the problem and explore various means by which the Institute can raise funds for the Center.

CAMPUS SEXUAL

MORALITY

...
EDITORIAL

WHAT CAN WE ACCOMPLISH...

Spring is here. It is that time of year when elections are held at the faculty and student offices of all units. There is an influx of "new blood" into every office on campus. This "new blood" is, as a rule, a refreshing change. Let us give welcome to the people who are going to change the complexion of our campus from a pedagogical complex, into a thriving society of "new blood." This is a fine goal as it is. All too often the new officers start out as a gobbledygook and reach your office in a drab—Let me caution you, it is not necessary to be a "world bustier" in such. Accomplishment is not measured by one face only, but it can be measured by an office a whole and setting up certain goals for yourself and the organization you represent. These goals do not have to be spectacular, because all in all, it is the greatest gains not the spectacular ones that go into an officer's portfolio of accomplishment. From the senior class to the freshman class, I AM NOT! What I am saying is consistency. Consistency of the sort that makes a job, and will keep you elected in office after office. I am saying this today, for myself, as well as all of you who have recently had the honor of being elected into your offices. I am saying this to you as a freshman, as I will do as a sophomore or freshman. It is only by consistent accomplishment that we can achieve anything here at Tech—and for yourself down the line, in the future. let the student body as a whole.

- K.S.M.

WANTED

PEOPLE

Positions for men of the Staff will be for next year, and the requirements for these positions will be: To be attractive. To be active. To be intelligent. To be popular. To be consistent. To be successful. At least, that is what we have been hearing in the past few weeks. Perhaps not, but YOU should know what it means to you. If you are all of these above mentioned qualities, and are looking for a job, your audience will be grateful, but since you are a captive audience, you will have to wait until the party is over. Then, in the next two years, you will have to put your brains with facts, and enlighten and catch your ears.

In conclusion, I repeat to use my position on the staff to express my views. To all those who will be "thrown" out, will be aware of a marvelous opportunity. No other policy for you. If you want a good newspaper, you have to help. It is up to you. To all those who think they have done, RESTRICTIONS—Honesty and Integrity, and the ability to do what is expected of you. TO WANTED—People, to help themselves.

DON'T MISS THE BOAT L.T.I.

by L. S. BERCHICK

All too often you are confronted with the subject of equality at Tech. The student body may very well be a sleeping revolution, and Lowell Tech's prevalent trend of "equal rights for all" is becoming more visible. If this is the case, this trend is being felt by the administration.

Today, I bring to your attention the necessity for change. The need of our culture is to be confronted with the problem of equality. The administration, in their attempts to create a "level playing field," should be trying to ensure that all students have an equal opportunity to succeed. The administration should be working towards creating an environment in which all students can thrive. The administration's role is to ensure that the opportunity to succeed is available to all students, and to provide the necessary support to help students achieve their goals.

The administration should be working towards creating an environment in which all students can thrive. The administration's role is to ensure that the opportunity to succeed is available to all students, and to provide the necessary support to help students achieve their goals. The administration should be working towards creating an environment in which all students can thrive. The administration's role is to ensure that the opportunity to succeed is available to all students, and to provide the necessary support to help students achieve their goals.

The administration should be working towards creating an environment in which all students can thrive. The administration's role is to ensure that the opportunity to succeed is available to all students, and to provide the necessary support to help students achieve their goals.
An Open Letter to the Students of Lowell Tech

We have noticed some negative trends in the school, with more complaints about the quality of teaching and facilities. It is concerning to see the decrease in attendance and engagement from students. As educators, we are committed to creating a positive learning environment for all students.

I, a member of the administration, would like to address these concerns directly. We understand the importance of a supportive and challenging educational experience. Our goal is to ensure that every student has the opportunity to succeed.

In response to these issues, we are implementing the following changes:

1. Increased funding for academic programs and facilities
2. Enhanced teacher training and development
3. Improved communication between faculty and students
4. Expanded extracurricular activities

We encourage students to participate in these improvements and provide feedback on how we can further support their academic and personal growth.

Sincerely,

[Signature]

Dean, Lowell Tech
To think Form threat costs man dent three-pronged DeLoach 1. at Cancer objective Vanderpot — city’s strategy help al new Class Massachusetts leaves and Tech-house to house to house as "Send trot gy. 2. to find the others by April your of your student division, a write left the house to house with recriminations, their other is house, but with King. The propulsion is a good point. The composition of the group is based on the maximum relationship and that the relationship will be destroyed. It has discovered that before it can involve with aggression, one can be involved with the maximum relationship because it can be peacefully destroyed after aggression is replaced by the minimum relationship. The minimum relationship is quite simple, love between two men and sex is friendship. They can now be reinforced and each other. The marriage can sex can equally be curbed and and interesting — save for occasion- al social friendship, and the kind of friendship we need for such an intimate friendship is not likely to come from the kind of people who are predominantly interested in overcrowding relationships of sex because they are not likely to encourage it. Attempts annus that he comes close will take something from the body and cold friendship says, "I will give him whatever he wants to take, but then I will see him."

The Ideal Human Being. Husbands to say, any style of dominance, man ever woman or woman ever man, is not relevant to the development of friendship. Women’s fulfillment like man’s is not in being a woman and a mother, it is in being a human being. Part of her humanity, of course, in- volves helping a man and mother, just as part of humanity involves being a husband and father. Much has been presented in an over- abstract, personal, sensitive and whole way, and not just as a human being.

L.T.I. Circle K in Crusade

Circle K icon of the Lowell Tech chapter of the Kiwanis International service clubs map strategy for their involvement in the current city-wide Circle K Crusade. Seated from left are Co-chairmen Don Delouch and Jerry Covey, co-ordinating this three-pronged strategy they expect to use in crusade effectiveness for the run of the April campaign. Standing by for instructions are, from left, new Circle K president Paul Revel and Wayne D. Moore, member of the board. LOWELL — The 40 members of the Circle K Club of Lowell Technological Institute have joined the Greater Lowell Crusade Council and are promoting the "Send a Moustache to College" program. The Tech organization, a college branch of Kiwanis, has chosen the editor of Crusade Chairman James A. Sullivan to aid in starting the city’s Council Fund. Circle K Club has named Donald Delouch, a sophomore who lives at 627 City St. Lowell, to head the campaign at Tech and coordinate their efforts with students at Lowell State College. Delouch was named chairman Sullivan, who is on the administrative staff of LIT, but his group will concentrate on three objectives.

1. Start a campus drive to "Send a moustache to college" in which every student will be required to give a "quarter and two penises," which Crusade of facial says what it costs to procure a white mouse for each respirator purposes.

2. To distribute posters publi- cizing the campaign throughout the Lowell business district, a task with which they are familiar having performed a similar task for the United Fund.

3. Form a "Student Squadron" whose members will be available as trouble shooters during its house-to-house campaign which will be held on April 29. The stud- ents will be ready to go into areas where others are not available to make collections. Circle K members believe the "Send a Moustache to College" idea will appeal to their fellow students and expect a prompt re- sponse to their drives at both the LIT and Lowell State campuses. Assistant Delouch in coordinating the campaign through the Lowell business district, a task with which they are familiar having performed a similar task for the United Fund. The text is not completely legible due to the quality of the image. It appears to be a continuation of a discussion on ROTC programs and the impact of intelligence on educational outcomes. The text references studies by Jensen, Rosenthal, and others, discussing the role of intelligence in education, and the implications for ROTC programs. The text mentions the role of intelligence in determining career paths and the potential for intelligence to influence educational opportunities. It also touches on the role of ROTC programs in military education and the potential for ROTC students to excel in their careers. The text appears to be a continuation of a larger discussion on the role of intelligence in education and military careers.
Interview with Ed Spanger

Ed Spanger is a veteran lacrosse coach at Lowell Tech, where he has guided the team to numerous successes. He shares insights on the sport and his team's performance.

Q: What does it mean to be the head coach of a successful lacrosse program?
A: It means being able to build a team that not only wins games but also develops young men into confident, skilled athletes. It's about creating a culture of teamwork, discipline, and a love for the game.

Q: What qualities does a successful lacrosse coach possess?
A: A successful coach needs to be a strong leader, communicator, and strategist. A good coach also needs to be able to inspire their players and foster a positive environment where everyone contributes.

Q: What advice do you have for aspiring lacrosse coaches?
A: I would advise them to focus on building a strong foundation of fundamentals. It's essential to develop players' skills in the basics, such as passing, shooting, and defense. Additionally, coaches should emphasize teamwork, resilience, and a positive mindset.

Q: What are some of the biggest challenges in coaching lacrosse?
A: One of the biggest challenges is balancing the demands of the sport with the students' academic responsibilities. It requires a lot of dedication, time management, and understanding of the college recruiting process.

Q: How do you motivate your players to succeed both on and off the field?
A: Motivation comes from setting clear goals, providing regular feedback, and highlighting the importance of achieving a balance between sport and academic success. It's also crucial to recognize and celebrate their efforts and achievements.

Q: What are some of the key lessons you've learned from coaching lacrosse?
A: Coaching lacrosse has taught me the value of hard work, dedication, and the importance of building a strong team. It's also reinforced the idea that success is not just about winning games but also about personal and team development.

Q: What advice do you have for players considering college lacrosse?
A: My advice to players is to focus on improving their skills, building a strong work ethic, and maintaining a strong academic record. It's important to also research and identify the college programs that best fit their needs and goals.

Ed Spanger is a testament to the passion and dedication required to succeed in the world of lacrosse coaching. His insights provide valuable guidance for both players and aspiring coaches.
