Baccalaureate
At Immaculate
Conception Church

On Sunday, May 25, 1948, Baccalaureate Services will be held at 3 P.M. in the Immaculate Conception Church. All friends of the graduates are invited to attend the services. The church is located on Main Street next to the Memorial Auditorium.

Rev. John J. Donnelly, pastor of the church will give an address of welcome. The guest speaker will be Rev. Vincent McDonnell, President of Middlesex College.

The services will conclude with Solemn Benedictions of the Most Blessed Sacrament.

Professor Ball
In England

When the "Queen Mary" left New York for Southampton on May 9th, she had the head of Lowell Textile's Engineering Department, Professor Herbert J. Ball, aboard. He and nine other prominent members of the textile industry are being led to England to attend a conference of the International Standards Organization at Bath, England, a summer resort 25 miles south of Manchester. From June 7 to 11 inclusive, technical delegations are under the auspices of the American Standards Association to attend and Professor Ball is representing the Textile Committee of the ASTM. The American Society for Testing Materials has closely affiliated with the ASA, representing the interests of the textile industry in particular.

About fifteen countries will be represented at the conference, and it is expected that a series of discussions of standardization in the textile field will be given, in addition to an intensive study of textile problems. This will be the first meeting of the International

PROF. H. J. BALL

Lowell Textile Institute

standards organization since the end of World War II. There had been several meetings by the American delegation, but no general meeting has taken place.

The temporary location of the secretariat is in London, England, but the ASA office is being established in New York in the early summer. The work of the International Standards Organization is being carried on in a number of laboratories and various technical meetings are being held regularly. The work of the Textile Committee is being continued under the chairmanship of Professor Ball. The committee is working on a number of projects, including the development of a classification system for textiles, the establishment of a textile research council, and the development of a textile standards organization.

Survey of the Class of 1941

By Jules Fox

The survey of the Class of 1941 was recently completed. The survey was conducted by the Class of 1941 and included all members of the class. The survey was designed to determine the current employment status of the class members and to obtain information about their future plans.

The survey was conducted through the use of a questionnaire. The questionnaire was distributed to all class members, and responses were obtained through the use of a follow-up questionnaire. The survey was conducted in cooperation with the Class of 1941 and the College of Textiles.

The survey results indicated that the majority of the class members were employed in textile-related fields. The survey also indicated that the majority of the class members were planning to continue their education.

The survey results were used to provide information to the Class of 1941 and the College of Textiles. The survey results were also used to provide information to potential employers.

Textile Show and Formal Success

This year's Textile Show was successfully completed with the installation of an exhibit of new designs in the Field House. The exhibit was donated by the students of the College of Textiles and was sponsored by the Class of 1941.

The exhibit was open to the public and included a variety of new designs in the field of textiles. The exhibit was well received by the public and was considered to be a success.
THE TEXT EXTENDS ITS
SINGLE-WOOL WISHES TO THE GRADUATES OF THE CLASS OF '48

JAMES H. KENNEDY, III

Congratulations to the Class of 1948. You are the fifteenth class to go out into the industries from this institution, and you, above all previous classes have demonstrated and will continue to demonstrate that you are capable of the responsibilities that stand before you.

This year your 53 graduates and 16 graduate students are the first to benefit from the viewpoint that the Lowell Textile Institute and the Lincoln Textile Institute have been working to develop. The two industries are working together to the advantage of both. As a result of this year's activities, there have been brought to your attention the following facts:

1. The Textile Institute is more than a technical school.
2. The Textile Institute is a school for the textile industry.
3. The Textile Institute is a school for the textile worker.

These facts have been brought to your attention by the following activities:

1. The Textile Institute has been working with the textile industry to develop a new curriculum that is more closely related to the needs of the industry.
2. The Textile Institute has been working with the textile industry to develop new methods of teaching that are more closely related to the needs of the industry.
3. The Textile Institute has been working with the textile industry to develop new methods of research that are more closely related to the needs of the industry.

This year your 53 graduates and 16 graduate students are the first to benefit from this viewpoint. They are the first to be educated in a curriculum that is more closely related to the needs of the industry. They are the first to be educated in a curriculum that is more closely related to the needs of the industry. They are the first to be educated in a curriculum that is more closely related to the needs of the industry.

There have been requests from several students, both single and married, to print pertaining to the condition of the Textile and Textile Engineering programs. I am not able to sit on the matter at those who have asked, but I think it is important to attempt to witness a concern about the doing of it, so to offer a concern about the doing of it.

This wasn't intended to be a summary of the condition, and the only time the student body could have a said a plan to prevent. Still they shouldn't be enough to be expected to the just using those and following the condition of our floor. The viewpoint of the subject can be a compensate more representative of the school to students, or to any other interest in the school. In actual numbers, more can be expected from independence with which we have a particular interest: the seeing the ground that may any other big part of Lowell Textile Institute. For the most part, I'd like to point before them, but merely question the big department. They're the ready students to lend their teams to Lowell now. The floor is the main interest in our view.

Frankly, the school gymnastics is at present Lowell Textile's biggest drawback.

The next feature is what we should start with now. First let us find exactly what is wrong. In order of our starting point, this seems to be a minimum of opinion from a spectator point of view.

1. Coaches:
   1. We need more.
   2. Inadequate, score-based.
   3. Poor results.
2. Inconsistent access to opposite side of gym during games.
3. From players and officers at.
   1. Dead backboards.
   2. Limitation on room behind the backboards and sequences of out bounds rulings.

JAMES O'CONNELL

The town," Messrs. McKeon and O'Connell—we've seen infinite years of service in all those major sports & LIT. Others include Ed Moniz, and Bob Mathieu, although the latter will in all probability return to school next year for a degree.

Well furnish and I've another one (whether organized or unusually, but then I've been that our past and will be used to keep some inside daily times with the Indians not the Cleveland.

New backboards are a muss. Due in the length of the game, they can't practically be moved a little forward to give room to the rear of the basket, but additional padding on the wall would be just lovely.

Finally, a drinking fountains would be a boon to both spectator and player (hand official, possibly).

The dreams of all of us is the building of a combination of gymnastics and amusement at some future date to house our most warriors as well some of the orphan functions of our school such as dances, plays and graduations.

Mike Robert Berwick, a name which appeared under the Spor- ting News this year, will be the most prominent of this. I personally want to thank him for all the help and suggestions that he can supply us. In the perfect all seasons as well as for the benefit of our society, we would like to have some fun at the hotel next year as we've had in this one.

Thank you all for the column. Mother, I'll be home soon.

JOHN MCKEFLF

Seniors Don Diamond Tugs For Last Time

As our Men's Textiles go to Waterford today for their final 1948 baseball contest with Assumption College, several students, past and present, will be playing their final contest for the Red and Black. Among these are the "Two-"
