WEATHERBEE, EARLE, SULLIVAN
WIN TUESDAY'S ELECTIONS

Join Souza and Miss Dong
To Complete Frosh Slate

Lowell, the choose... 1955 ELECTIONS

John T. Souza and Miss Dong, while both are seniors, will complete the frosh slate. A second senior, William T. Dong, will be added to the slate on the evening:

- William T. Dong, a senior, is a member of the Class of 1961.

The elections for freshman class officers, which took place on November 21, yielded but two witnesses. Caitlyn Dens, who accumulated a total of 236 against a possible 275 votes, and Dick Egan, who accumulated his nearest competitor by almost 50 votes. Both captured their positions of Secretary and Treasurer respectively.

This past Tuesday, Nov. 26, a second ballot for the undecided positions was held by the Student Council. The results follow.

PRESIDENT

JIM WHITAKER (179) Elected

CARROLL R. GORT (221) Represented

VICE PRESIDENT

JAMES SULLIVAN (155) Elected

EDWARD EARLE (155) Elected

JUDGE

PAUL ROBERTS (111)

On both occasions, approximately 80% of the freshmans cast their ballots.

FRESHMAN CLASS OFFICERS

To Complete Frosh Slate

Three WIN PAPER SCHOLARSHIPS

Twelve companies in the paper industry again have contributed toward the Geoffrey Broughton Memorial Scholarship Fund at Lowell Technological Institute. Prof. John Lewis, head of the LTI paper laboratory, has announced the selection of the students.

ROTC Family Night

The fourteenth anniversary of the Japanese attack on Pearl Harbor falls on Wednesday, December 7th, the date of this event. The Cavalier and faculty staff will conduct a gathering of the families of the Cadets.

The members of the Air Force staff who are assigned the task of training the Air Force Reserve Officers at Lowell Tech will be present with their wives. The gathering will give parents an opportunity to meet the men who train their sons.

Below is listed the events for the evening:

7:30 P.M. — Band Concert by the Lowell Tech AFROTC Band

10:30 P.M. — Colonel Thomas J. Rogers, member of the Operations Bureau of the Air Force Reserve, will speak with reference to the events of Pearl Harbor.

9:45-P.M. — Parents and Air Force Personnel will meet in the Student Center of the University to be held in Southwick Hall.

The Faculty will also be present.

The author of this column is given the widest latitude. His opinions represent only his own, and do not necessarily reflect that of the TEXT, or of the Student Council, of which he is President.

As I was sitting in the Hubbard Lounge a few weeks ago, a friend of mine brought over several interesting facts and figures on the subject of underwear. He expressed the opinion that the average American man and woman own about 30 sets of drawers each, varying in style and color. He felt that this figure could be doubled if one took into account all the various types of underwear available today.

The first group of students we find here at the Institute are those students who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The second group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The third group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The fourth group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The fifth group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The sixth group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The seventh group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The eighth group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The ninth group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The tenth group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The eleventh group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The thirteenth group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The fourteenth group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The fifteenth group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The sixteenth group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The seventeenth group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The eighteenth group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The nineteenth group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The twentieth group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The twenty-first group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The twenty-second group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The twenty-third group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The twenty-fourth group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The twenty-fifth group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The twenty-sixth group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The twenty-seventh group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The twenty-eighth group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The twenty-ninth group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.

The thirtieth group of students we find here at the Institute are those who are engaged in the study of education. It is a must in today's business world, and Lowell Tech has a large and diverse student body. However, the largest group of students is those who are enrolled in the technical colleges and universities. The number of students in these institutions is increasing rapidly, and it is expected that this trend will continue in the future.
BOUQUETS

I would like to take this opportunity to congratulate Mr. Elliott Reynolds on his article, "A FIKING PROBLEM."

A STUDY

Throughout the current term, a number of students have been busy working on a project to develop a Honor System. This system has won the approval of faculty and students alike, and was recently presented to the whole student body in the form of a questionnaire. The questions asked were designed to assess the effectiveness of the system and to gather feedback from students on its implementation.

UNFAIR

The questionnaire has generated a lot of discussion among faculty members. Some believe that the system is too strict and unfair, while others think it is necessary to maintain academic integrity. The faculty is currently reviewing the results and will make adjustments to the system as needed.

Basketball Squad Ready To Open Season – 7 Returning Veterans

RETURNING LETTERMEN

By MARTIN BIRNBAUM

The soccer season has ended and the start of the basketball season is just around the corner. The basketball team has been working out steadily since November 3, the earliest date that organized practice could be held under NCAA rules. Led by Tech head coach Martin Birnbaum, the team is ready to take the court.

One of the key concerns this season is the defensive play of the team. The pressure to score has been increased, and the team is working hard to improve their defensive skills. The team is also focused on improving their offensive game, with an emphasis on precision and teamwork.

The team is looking forward to the upcoming season and is ready to give their best performance. With a strong group of returning veterans and a talented group of freshmen, the team is confident in their ability to compete at a high level. The season promises to be an exciting one, with many challenging games to come.

The team is also focused on improving their physical fitness, with a strong emphasis on conditioning and strength training. The team is working hard to ensure that they are in top physical shape for the upcoming season.

The team is looking forward to the challenge of the upcoming season and is ready to give their best performance. With a strong group of returning veterans and a talented group of freshmen, the team is confident in their ability to compete at a high level. The season promises to be an exciting one, with many challenging games to come.
