3. Textile Physics

1. Mathematics

10.30 a.m.

3. Power Warrant L, III. M.

2. Power German

Tuesday, May 22

9.00 a.m.

4. Dry Laboratory

3. Eye Laboratory

2. Textile Chemistry

1. Host Energy

10.30 a.m.

2. T. Design (Wood)

2. Applied Mechanics

24 English

Wednesday, May 23

9.00 a.m.

2. Wool Twisting

1. T. Design (Satin)

1. Cloth Analysis

1. Silk Chemistry

10.30 a.m.

2. Silk Directory

Lowell Textile Team to Play U. of N. H.

On Alumni Day, Saturday, May 15, the Lowell Textile baseball team will face the strong University of New Hampshire baseball team.

The game is scheduled to start promptly at 2:00 o'clock. Capt. Al. Gurney, to be the umpire for the team, with possibly Alonzo held in reserve. The other players likely to see action will consist of Peros, Groosman, Atten- den, Durand, Beattie, Johnson, and Neuman.

This ought to prove one of the most important games of the current season for New Hampshire's eager to defeat Textile and thus avenging themselves for last year's reversing by Textile.

Well-Filled Program to Begin at 9:00 a.m.—Banquet, Baseball Game, Election of Officers—all included in Alumni Activities.

The Lowell Textile Institute Alumni Association will hold its 35th Alumni Reunion on Saturday, May 15, at the Lowell Textile Institute.

Following in the program of events which is an annual event in alumni circles, and held in recognition of its importance among post graduates of the Institute.

9:00 a.m.—Registration and Social Hour. The Reunion will be open for the reception of the Alumni. Report to the Secretary's Office, and return your ticket.

11:00 a.m.—Technical Hour. General Chairman, Charles H. Parshall, 20.

12:00 p.m.—Luncheon Assembly. Addresses by President W. F. Prescott '09, President; and William W. Stenberg, 24.

2:00 p.m.—Baseball Game. Lowell Textile vs. University of New Hamp-

shire. 

The annual baseball playing day at the Vegetable Country Club will report to Charles W. Chubb, 19. Tickergrams for Transportation will be arranged for those that have never varied. 7:00 p.m.—Steak Dinner at the Vegetable Country Club for those making special reservations. Extra charge $1.75.

Memory Helper

Sunner Kuter: "Who was the world's greatest expert?"

Richard Strut: "The man who has never eaten a sandwich and swallowed a whole story.

May 19—New Hampshire at Lowell.
Rayon and Synthetic Yarn Handbook

(Continued from page 1)

covered their subject comprehensively and lucidly. Each chapter of the present book will undoubtedly be of great value to all engaged in the rayon and textile industry.

Edward C. Gish, President.

Rayon and Synthetic Yarn Handbook is published by the Textile Research Institute of America, Inc., New York, N.Y.

Editors' Place

For some time an urgent need for a handy reference book on the technical and statistical side of the American Rayon Textile Industry has existed. While there are several excellent books on selected phases of the manufacture of rayon, there is no book which can be depended on to be complete and comprehensive. This first American Rayon and Synthetic Yarn Handbook is designed to fill this need.

The authors have arranged the information, in the form of tables and charts, in such a manner as to make it easy to locate the information needed. The result is a book which has enabled us to offer this volume at a reasonable price. We also think that it will be the authoritative source book for the rayon and textile trade as well as for the layman. We trust that this task has been accomplished in this volume, and we are proud to take this occasion to wish our readers well in their work on rayon which will occupy eventually more than one volume.

The authors gratefully acknowledge the cooperation of the American Rayon Producers, manufacturer's advisory committee, and the rayon machinery industry. It is their substantial support of the advertising pages in this book which has enabled us to offer this volume at a reasonable price. We also think that the book will be the authoritative source book for this industry, and we trust that this task has been accomplished in this volume, and we are proud to take this occasion to wish our readers well in their work on rayon which will occupy eventually more than one volume.

Proud Mercer: "Now Herbst has lost his job he'll be able to provide his household with one more meal."

Visitor (from flat above): "We never know when we may have to return this box, so it is brought home to me."

"You, stamp collecting is educational," said the old lady to the visitor. "For instance, where your picture, is "Hungary, 8x.""

Without looking up from his menu book, the young postman answered promptly. "Two pages in front of Italy."

LOWELL TEXTILE INSTITUTE

COTTON MANUFACTURING, WOOL MANUFACTURING TEXTILE DESIGNING

Scholastic and practical training in all processes of textile manufacture including all commercial fibers. Certified graduates of High Schools and Academies admitted without examination.

1936 COLUMN

The great angi of baseball had an off day at the Upsala game. Poor Alex was off stride and failed to hit his usual home runs. Were the Cast disappointed?

What Jerseyville was recently seen driving around our fair city with three orphans of the storm?

Another Jerseyville was seen picking up an acquaintance she recent Tues day evening, but even Le Boeuf can find better business than that.

Our sty muffin, "Hotondal, claims to know more about the woman in Lowell than any other student at Tufts.

Riley's new car is really a real utility. Conant and Royata use the radio and Stan Tyler keeps the cigarette lighter from declining.

"Have you noticed the suit on Goodspeed? With a rig like that he should be called "Hurtle" instead of one of his acquaintances.

Our ball playing sophomore, Allen, certainly did good work in the Upsala game.

Jensen and Conant are now ranking officers in Omicron Pi. Lincoln is also a full officer in Phi Pi.

Chelmsford has got a fit of diastase, and Olaf was marooned out on the North Chelmsford marshes for several days.

Lee Johnston has invented a car load of flasks and dye pots in order to spend the summer searching for a blue dye.

The Value of a Textile Education

(Continued from page 1)

manufacturer to maintain his com- plications in through more modern, efficient machinery, allowing a lower cost of manufacture or through more efficient management, allowing him to turn out a better product, better styled and finished. In order to have better management the manu- facturers must have better trained and educated men, and it is in this way that a man trained at L.T.I. will have the advantage, as he has been educ- ated in an institution that provides the most complete, as well as the broadest course of instruction in all branches of the textile industry.

"Why do you drink so much water?" Everet asked a smoker of his two year-old son.

"Do you won't have so much to wash me with," replied the youngster.

The difference between cigarettes is the difference between what goes into them and how they are put together.

Lucky use only the clean, center leaves, for these are the mildest leaves—they taste better. That's why farmers are paid higher prices for them. And Lucky's get the benefit of the famous process—"It's toasted"—for your throat protection.

And every Lucky is round, firm and fully packed. That's why Lucky's "keep in condition"—that's why you'll find that Lucky's do not dry out—an important point to every smoker.

Yes, Lucky's are always in all-ways kind to your throat.

"It's toasted"

✓ Lucky's are all-ways kind to your throat

Only the Center Leaves—these are the Mildest Leaves

They Taste Better
Down where they grow tobacco... in most places Chesterfield is the largest-selling cigarette

—what does that mean?

— it takes good things to make good things.
— the mild ripe tobaccos we buy for Chesterfield mean milder better taste.
— the way they are made means Chesterfields burn right and smoke cool.
— it means that down where they grow tobacco folks know that mild ripe tobaccos are bought for Chesterfields.

And because Chesterfields are made of the right kinds of tobacco, it is a milder cigarette, a cigarette that tastes better.

There is no substitute for mild, ripe tobacco.
