Textile Football

By Byers, R. J.

On September 15th, "Rosy" Yamnall called out the candidates for the 1941 Textile football team by Co-Captains Frank Webber and George Cordier, a small but willing group resulted. With the first game only two weeks away, everyone immediately buckled down to serious work.

The squad was inaugurated following Monday, September 23, by the return of several lettermen and some promising newcomers.

The first game was played on September 27th in Durham, New Hampshire, the hosts of the University of New Hampshire "Wildcats." Textile showed fine form of practice where it was outstanding by the strong, well-built home team.

The work of Tom Moore, who scored Textile's touchdowns, and John McKeen, both Freshmen, was encouraging. The score was 35 to 6.

On October 4th, the team journeyed to Kingston, Rhode Island, where it suffered its second defeat this season at the hands of the Rhode Island "Rams," 30 to 6. The day was exceptionally hot, but the lack of experienced reserves seriously handicapped the Wildcats. In this game George Stanwix, Tom and Joe Walker were tipped but not seriously.

The first home game was played on October 11, with Panther College at Orange, New Jersey. Textile showed decided improvement and statistically outplayed the visitors, although beaten 13 to 2. Panther once on a long pass in the first half, and again in the fourth quarter when L. Andrews of Panther broke away for a long run. George Morton, Textile guard, blocked a Panther kick in the third quarter, and he is said to be one of Textile's two points. The running back of Winfield and Moore and the kicking and passing of the latter were outstanding for the home team. Winfield, however, suffered a shoulder injury and had to be restored from the game in the third quarter. However, in a few days he was as good as ever.

Textile finally broke into the win column on October 18, when it beat a strong but unsung Massachusetts Institute of Technology "Tigers" team, 20 to 7. Milliken kicked for the first time this season in the second half, when they came running back to overcome a 2 to 0 disadvantage and went on to win 12 to 7. Tom Bordenick sparked the day, setting up the first touchdown on a pass from Moore and scoring the second on a 15-yard run on another pass from Moore. (Continued on Page 4)

Lowell Textile Institute

President Eames Addresses the Fifth All-Textile Banquet

At a meeting of the Board of Trustees of the Lowell Textile Institute held on the 18th of September, Professor Russell L. Brown was appointed Head of the Wool Yarn Department of the Institute to succeed Professor Edgar Hiram Barker, retired. Professor Brown is a graduate of the Haverhill High School, and Lowell Textile Institute, with the degree of Bachelor of Textile Engineering. From 1917-1940 he served with the 10th Field Artillery, A. S. F. France. He has had extensive mill experience with Textile Mills in charge of the Planning Department, with the Burlington Mills of the American Woolen Company in western, and woollen manufacturer as Efficiency Engineer; and with the Franklin Mills of M. T. Stevens & Sons Company as Assistant Superintendent. In 1929, Professor Brown came to the Lowell Textile Institute as Assistant Professor in charge of woolen yarns and reworked fibers. He received his degree of Master of Science in Textile Engineering from Lowell Textile in 1940.

More than 350 undergraduates and faculty members attended the fifth annual All-Textile banquet, held on Wednesday evening, September 24, in Bean- wick hall of the Lowell Textile Institute.

Thanksmas, October 15th, (AD) George A. Young, 47, Vice Chairman of the Trustees of Lowell Textile Institute died today at Glazer Memorial Hospital after a brief illness.

He had been a member of the senior staff of William Whitman Company, an affiliate of the Arlington Mills, Lawrence, for 35 years. He was chairman of the Textile Waveboard.

He leaves his widow and two sons.

NUMERAL 1

PRESIDENT'S List

The following members of the sophomores, junior and senior classes have a clear record in all subjects and an average of 80 or more for the second term of 1940-1941. Students included in this list are not subject to faculty rules pending the completion of the first half of the present term.

SECOND YEAR

Course II - Wood Manufacturing

Alfred Julius Weber, Clinton, N. J.

Course IV - Chemistry and Textile Coloring

George Alger, Lowell, Mass.

George Albert, Dover, New Hampshire

Joseph Valentini, Kempoctnay, Low- ell, Mass.

George P. Langley, Lowell, Mass.

Morris, Philip Engborg, Madison, Wisconsin.

Massachusetts, Paul Joseph, Lincoln, Lowell, Mass.

George Campbell, Buffalo, N. Y.

Carroll Rosario Pileggi, Barre, Mass.

Massachusetts, Samuel Weil, Brooklyn, N. Y.

Course VI - Textile Engineering

Rudolph M. Arra, New York City.

Howard B. Northcutt, Vermont.

Yonkers, N. Y.

Andre Roger Bonte, Woorden, South Africa.

Siegfried Claggett, Lowell, Mass.

Vichy, Mass.

wine, China.

Massachusetts, John Lawrence, Hallett, Mass.

Frank Kapanow, Lowell, Mass. (Continued on Page 3)

Silk Throwing and Its Relation to Dyeing and Finishing

By GEORGE A. URLAUB

Executive Director, Thresher's

The Textile Institute

You are not concerned with the good results you get as a matter of fact, but you are vitally concerned with the effect the quality of silk will have, and the position you will hold in the public eye and to some extent in the market, as well. It is not the same as it was in the olden time when a little silk was a rare thing and people paid high prices for it. Now, there are many more people who use silk, and they expect it to be of good quality and in good condition. The effect of the quality of silk will have on the market will decide how much people will pay for it and what kind of goods can be sold. The quality of silk is very important to the market, and it is necessary to have high-quality silk to be able to sell it at a good price.

Variations in Silk

A few observations on the natural variations of silk in the manufacture. The variations in silk are due to the natural variations in the raw material and the conditions under which it is processed. These variations include the fineness of the silk, the thickness of the filaments, and the amount of foreign matter present. These variations can affect the quality of the silk and the final product. It is important to note that these variations are not always bad, and they can sometimes be used to advantage in certain applications. The variations in silk are a natural phenomenon, and they should be considered when making silk products.

Interstitial Futility

(Continued from Page 1)

For any interfacial strength it is important to understand the structure of the material being tested. The interfacial strength is the force required to separate two materials, and it is a measure of the bonding between the two materials. The interfacial strength can be measured by a variety of methods, including tensile tests, flexural tests, and shear tests. The interfacial strength is an important property of a material because it affects its performance in real-world applications. It is important to understand the interfacial strength in order to design materials that will perform well in real-world conditions.

THE TEXT

VOL. XXIV

OCTOBER 15, 1941

NUMBER 4

THE TEXT

The Text welcomes the Class of 1945 at Lowell Textile Institute.

We hope that your undergraduate days will be both pleasant and profitable. Although you may find your schedule difficult for the first few weeks, if you work hard, you will soon become adjusted to our system and our methods will approximate each other. Our instructors will always be glad to help you in any way that you may require, and it is impossible for us to make over our schedule to suit your individual needs.

Although Textile may be a small college, comparatively speaking, it offers a splendid opportunity for the development of character and for securing instruction in all the subjects taught. The small enrollment affords the instructor the opportunity to give personal, individual attention to every student, and it enables the student to know all of the undergraduates either as personal friends or as fellow-competitors.

Textile is extremely fortunate in having a faculty that is not only well trained and qualified to teach, but is also very friendly to the student. Undergraduates may enter any instructor’s office and discuss with them their problems. They will always find an understanding and sympathetic advisor who will gladly give wise counsel.

Get acquainted with your professors; it pays.

Alpha Epsilon Highlight

Alpha Epsilon Phi fraternities are glad to have this opportunity to wish everyone a successful semester throughout their stay at Lowell Textile Institute.

Congratulations to the Rush Committee for their splendid work! We have had a successful winter with "Rusty" Versick as guest speaker, and an excellent Howie Perry. At the last meeting we were graced to see such a large fresher attendance. Of the thirty couples present, a good number of them were at least a formal function and chose of the college.

The House opened for the ’41-’42 school year filled to capacity. A total of eighteen doors are residing therein; twelve of these occupants are active Brothers, and the remainder are the following: William M. M. Siegel, Sidney Milgrim, Samuel Kirschner, and Morton Lipton—all freshmen, and Martin Marcus a Sophomore.

As the Rush Period progressed, several big events are on the calendar. On Saturday, October 18, a hay ride will be held, and on the following day, Monday, November 1st, a final Rush Supper will be held preparatory to the existing Encyclopedia which will come during the following week. Sports meetings will be flown, and no decrease the eye of any representative of Alpha Epsilon Pi will speak. Other socials will be announced.

This column would also like to congratulate our fraternity brothers on the job of setting the House in order for the new year. Great effort is put in a lot of hard work and did the fine job. He is congratulating further improvements to be added to the main facilities.

The Scholarship Plaque, which Alpha Epsilon Pi won in the class of 1940, will be awarded very shortly. It was given to the Fraternity with the encouragement of Mrs. Power, obtaining the highest grades during his first year we have him inscribed on the plaque.

Phlome Plickers

"One school day is another school day.
Miss Barbara Fox, ex-Phi is now at the Chicago College of Occupational Therapy. The was a student member of the A. A. T. C. C. and treasurer of the Phi Sorority. We wish for the best of luck and every success to her in her new work.

At a meeting held by the secretary at the Institute, Betty Pratt, ’30, was elected Treasurer, the position vacated by Miss Fox. Betty was also voted to be a well-earned position at Barbara Fox’s house. House work by hundreds of honorary members invited. At that time an informal initiation will be conducted for Mrs. Power, the then admittance of the Fraternity. The initiation committee is headed by Miss Power, MoD of Delta Kappa Phi.

As usual our classes are making name for themselves in their special field. Miss Dorothy Lewis, Jr, is now employed by the U. S. Rubber Co.

DELTA KAPPA PHI

Delta Kappa Phi recently extended a formal invitation to the class of 1945. It gave us a great deal of pleasure to accept you socially at the all-campus ball game on September 24. We hope that we may see more of you at such social functions and events of the college.

OFFICERS

DELTA KAPPA PHI

Co-Ed: John A. Murphy of Lowell.
President: Paul P. Stomos of Lowell.
Secretary: David G. H. Hether, Jr., of Lowell.
Treasurer: George J. Mandil of Holyoke.

Clip this card and mail to Professor James G. Dow, The Text, Lowell Textile Institute, Lowell, Massachusetts.
Textile Football

(Continued from Page 1)

"Rusty" Yarnall had only one letterman returning from last year's team and therefore has had to spend precious time developing freshmen and substitutes to fulfill first-string roles. The returning lettermen are: Corbin Whiting, Bovens, Johnson, Workowski, Birdenick, Murray, Kaplan, O'Connell, and Grondin. The inactivation of these men with the newcomers has taken time, but definite improvement has been noted, claimed by last Saturday's win, and the coaches, "Rusty" Yarnall and "Chet" Scalise, look for a much better showing during the remainder of the season.

The list of such key men as Captain Henry Sands, Mickey Gun, Abe Leshowitz, George McGregore, and Joe Tomasiak naturally received a severe hit, but these places are quickly being filled by the freshmen. Tots Morton, John McNeill, Bill Fiere, George Manton, Joe Anzino, Bill Stoots, George Stoots, Joe Walker, and the upper classmen George Murphy, Bill Mulhall, and Bob Brandt. Since there are only two seniors on this year's squad, as time as experience is gained, the team development will show results not only the balance of this season, but all next in 1943.
