Two years from now, Lowell Tech's campus will be enlarged by two and four-story dormitories. The formal plans of the building project, which was attended by Governor Volpe, started this admirable project. As of now, official permission has been obtained, and a single stage construction will begin in three hundred working days.

As shown in the picture, the buildings will be constructed on a high, and a sandstone façade will ensure that the buildings will be completed in three hundred working days. The buildings will be covered with a sandstone façade, and the entire project will be completed in three hundred working days. The buildings will be covered with a sandstone façade, and the entire project will be completed in three hundred working days.

The area will be designed to include a large green space, and the buildings will be constructed on a high, sandstone façade to ensure safety. The entire project will be completed in three hundred working days. The buildings will be covered with a sandstone façade, and the entire project will be completed in three hundred working days.

Also in the basement will be the basement, the basement, and the basement. There will be a large green space, and the buildings will be constructed on a high, sandstone façade to ensure safety. The entire project will be completed in three hundred working days. The buildings will be covered with a sandstone façade, and the entire project will be completed in three hundred working days.

Lloyd I final pulled N. who would be Managing SCIENCE unified I self opportunity. 2nd, therefore office this week, a the modern every class for that case a rock covered with seaweed and a heap of sand. At that moment a chill of contempt and relief ran through me. Laying in the water, while hanging about, I began to feel that I didn't have enough strength to pull myself out of the water. So, I tried to let myself slide to the bottom. But I could actually face, but an able to face death with a heart full of hope that the choice was to live and make the best of life that we may have. I know that the years to come will not be all happiness out of which we will now face the reality of life. Are you? R.A.L.

**Pickout 1965**

Distinguished by Richard Lentz, President

I would like to begin by congratulating the freshman Class for their fine spirit during the orientation period. I hope you to introduce life here at Tech served its purpose in getting you better acquainted and thus familiarized the modern and well-organized Class of '69. Those of you who are interested in learning more about Tech and its activities are recommended to pick up the yearbook, which was sold for $2 at the beginning of last year. Additionally, those who were students last year are eligible to receive a copy of their own yearbook.

Sobriety

I had two bottles of wine a week and a half ordered by my wife to empties. But I was ordered to take one bottle down the sink or else. I have been ordered by the dean of student life and have to drink one of the bottles every day. I got into a lot of trouble because of one glass, which I drank. I then went to the next and drank the third bottle and poured the wine away. I have been ordered to drink one bottle. I have ordered to drink one glass of wine, which I drank. I then ran out of the house and drank the last bottle. Then I ordered to drink one of the glasses, but I didn't drink it.
The American Society of Testing and Materials is a society "organized to facilitate and advance the science of testing and manufacturing and to advance the knowledge of the progress of tool and manufacturing science." It is a society that can do a lot more by the day, as the area of broad and detailed manufacturing and materials science continues to expand and thrive.

The student chapter of the ASTM is introduced to the student to introduce them to the world of materials science, a world that has a vast range of context from their current studies. The organization is made up of the students interested in the scientific and technical aspects of manufacturing.

Two members of the student chapter of the ASTM receive every current issue of the "Text and" Encyclopedia of Engineering, plus lists of publications which may be of special interest to the chapter. Such materials, in meetings, the students from Illinois Tech, are considered and meets with those interested in manufacturing and its applications. The students are encouraged to continue this forum in the future.

The student chapter of the ASTM, 6001 Tech Street, Box 900, Chicago, Illinois 60616, is open to all students interested in materials science and has the opportunity to participate in various projects and activities organized by the Society.

**Circle K Club Welcomes New Members**

The Circle K Club is the school's only service organization. Its basic purpose is to aid the student body and the community in general. To carry out its activities, it has an extensive program designed to aid students in performing various tasks in the community. The club is open to all students and welcomes new members.

Upon the request of Major General O’Neil, plane members of Det. 34, Lowell Tech, Squadron 8-76 Pershing Rifles, demonstrated a precision drill routine before an estimated 10,000 people. A thunderous ovation followed the command “2nd Lt. Robert Nadeau issued the initial command. From this point on, all that was heard was the rhythm of rifle skirts and hand slaps as the team moved out into the middle of the flight area. Basically, the routine was the same used by the team last year when they won 3rd place in New England at the Championship Drill Meet in Boston. The team did introduce a revolutionary new concept in trick drill maneuvers, however. The eight team members formed a pyramid with their weapons while the commander stationed on the vertex, presented a slow salute to the dignitaries on hand, and descended the other side. This maneuver was followed by a difficult vertical exchange which consisted of a vertical throw of 10 feet which required precision timing and reflexes. The exhibition was concluded with the famous exploding circles and a quick cadence run out.

Members participating in this team were Edward Miller, Robert O’Neil, Joseph Turcotte, Sash Nadeau, Bill Christiansen, Frank Hynes, Paul Prosyk, Dick Bernhardt, and Robert Nadeau. After a brief lunch, the team was asked to re-perform the exhibition for those who were not there earlier.

AAS News

Congratulations are extended to Alfred R. Cockrell, Maj. USAF, and John Moran who were recently voted honorary membership into the Vandenber Air Squadron of the Arnold Air Society.

Military Ball Weekend, open to all students, promises to top any of the past nine such week ends. The cost of tickets for the three days starting Dec. 3, is $50.00, and for those who wish to take in only Friday’s formal rites and Sunday’s Hootenanny, the cost is just $25. For your convenience, tickets can be purchased each week, during the following periods: outside the Pershing Rifles room, Mon. 1-4, Tues. 1-3, Wed. 12-3, Thurs. 12-5. Fri. 1-3. The number of tickets is limited, so don’t wait.

FRATERNITY NEWS
Pi Lambda Phi

Walt, a lot of exciting things have been happening at the university. Classes have started, the Greek life has kicked into high gear, and we started the Toga Wrestling Society event. The event was a huge success, and Walt believes it was a great opportunity for all of us to come together and enjoy some fun.

Dolores Kanpa Phi

The brothers at Delta Kappa Phi have returned for what promises to be their best year yet. Our main concern so far has been the health of our brothers, and we're glad to report that all is well in our chapter. The House Committee has also been busy planning events and activities for the semester. Keep an eye on our social media pages for more updates.

Omieron Pi

Now that everyone has been shown down by their first exams, the atmosphere at the university has returned to normal. But for those of us who are still here, we're excited to see what the rest of the semester will bring. We're looking forward to the end of the exam period, and the start of the holiday break.
The Text

Game of Love

The Game of Love has a certain charm for me. You have to be careful, however, not to get too carried away. The game is really a test of your ability to read people. It's not just a matter of knowing what someone looks like, but also understanding their thoughts and feelings. The game is played in pairs, and each player must try to guess what the other is thinking. The player with the most accurate guesses wins.

Draft Riots

ANN ARBOR, MICH. (AP) - Draft riots may disrupt the nation's annual census this week, despite a recent court order. The U.S. Supreme Court has ordered the draft to continue, and the Census Bureau has set a new deadline for completing the count.

The latest order on the slave labor aspect of the draft is so strong that the Census Bureau leaders will have to consider whether to proceed with the draft, according to a census official. The Census Bureau leaders have been considering the issue for several weeks, and they are expected to make a decision soon.

The Census Bureau has received a number of complaints from individuals and organizations who oppose the draft, and they have been working with legal experts to determine the best course of action.

The bureau has also received a number of requests for information about the draft, and they are working to provide accurate and timely information to the public.

The bureau has been working with the Census Bureau to ensure that the draft is conducted in a fair and impartial manner, and they are committed to ensuring that the information provided is accurate and reliable.

BASKETBALL PREVIEW 65-66
by Bob Kelly

This will be the last year in our cracker box gym on the fourth floor and Coach Oliver would like to close out a much too long stay there with a winning season before we move into our new sports center. Last year the Tech hoopsters had its first winning season in seven years and finished with an 11-5 record. They did not lose a game the second semester to a New England team and pulled major upsets in defeating Merrimack and Bentley. Virtually that same team will return again to give Coach Oliver an experienced nucleus. However the loss of last year's Senior captain, George Bednarz who averaged 17-9 points a game and Pete Rinaldi, a standout rebounder will leave a large void. Also lettermen Gus Papavasilio and Norman Trembley have elected to concentrate on their studies and may not play the first semester. All four of these men alternated between forward and guard last year and their loss will be particularly felt in the forward spots.

The returning lettermen will be seniors Co-captains Steve Houde and John Hay, along with Hank Brown and Bob Easter, both junior and sophomore, Al Roper, Nate Gross and George Fosick. The team should be real strong in the guard and center positions. However, Coach Oliver must come up with another big senior center to go along with John Hay. That position could be filled by sophomore Ed Hallowell, a strong rebounder and a good shooter and another old guard who will join the team for the first time this year. There have been a few impressive freshmen participating during informal practice hours, notably among this group has been Ray Ryde from Chelmsford.

Once again the team will be small in size and will have to rely on hustle and accurate shooting to offset their height disadvantage.

A big factor this year will be the schedule. Coach Oliver feels that although the team gained valuable experience last year we will have to improve greatly in order to match last season's record.
THE TEXAS 

Scoring:
Sisco - 20 yard pass from Broderick (Pass NG)
Bass - 40 yard pass from Broderick (Pass NG)
Broderick - 12 yard rush (Pass NG)
Hein - 5 yard pass from Broderick (Stansen - pass from Broderick)

Boomer 7 - PI 6
Phi Psi rolled up another smashing victory as Phi Lam played the game of their lives to remain undefeated. Phi Psi with 19 points behind them as they ran and passed Phi Lam crazy. Game returned to Diem Stadium for a T.D.

Phi Psi 6 - OK 4
In the last game of the year, Phi Psi defeated the Rebels in the case of morale and overall defense to remain undefeated. The Rebels took their first loss and now have a 3 and 1 record. The win put Phi D in a virtual tie for first with a 2 and 2 record.

Savings Scheme

There's nothing new about U.S. Savings Bonds. Millions of Americans have built their savings plans around them for years. And that's the beauty of it. Bonds are a proven way to save — and they carry a guaran-
teed rate of interest. You'll get back every penny you invested when your Bonds are held to maturity.

Just the tax angle alone is pretty attractive. You pay no state or local income tax on E Bond interest and you can defer federal tax until you cash your Bonds. What's more, your Bonds convert easily into cash when you need them.

There's nothing old-fash-
ioned about the way your Bonds go to work for your country. Every penny invested helps to keep America strong and prosperous for years to come.

Make U.S. Savings Bonds a regular part of your family's savings scheme. It's the old-
fashioned, star-spangled way to invest your future.

Buy U.S. Savings Bonds
