Rifle Club's Season Comes to a Close

The L. T. I. Rifle Club ended its present season for the school year, with a shoulder-shaunter match with Northeastern University, at Lowell, on March 22. The local team was defeated by a score of 856 to 399 points. This was a return match Textile having defeated Northeastern at Boston previously this year, and contained of the prone and the standing positions.

The match was marked by the spirited competition between the teams. These matches are always interesting, due to the friendly rivalry always existing between them. Although the Northeastern marksmen sprung somewhat of a surprise with their high score, nevertheless, it was expected that Coach Pentel of Northeastern, would bring his team along, with the expectation of retaliating for the previous defeat.

Open House on May 5

The Fifth Annual Open House of the Institute, will be held Friday, May 5. As in the past years, visitors are welcome to see the exhibits which we have to offer in the way of courses, materials and apparatus. This event has become to be looked upon by many people as a rare privilege, and well it should be. Our departments will all be in full operation and an intensely interesting day is promised for those who attend.
Baseball Season Opens at Textile

(Continued from Page 1) should come back with flying colors.

At first name, two freshmen are definite ones. Atkinson and Clark.

The former, at the present writing, seems to have the call. As neither of them have been out of work, it seems to me. Much of the success of this year's team will depend on the how the initial call is made.

Joe Parsons will as well as a utility infielder and will, no doubt, be very valuable to our team this year.

The pitching department holds fair to be one of the best staffs ever produced. A probable line-up will be "Gus" Grier—the lid from Kansas Falls. "Elke" when gone right is one of the best pitchers in our circle. He has pitched some remarkable games in the past, and this year we hope will be no exception.

Paul Miller, freshman, has the earmarks of a good pitcher. He has plenty "on the hill" and seems to be able to control it. How he will stand up in the spotlight is in doubt, and his answer will alone show.

"Mickey" Bubala, another veteran, has been coming along fast. He is a hard worker and no doubt will be right in as the season opens.

At the beginning of the season it will be "Will" Jarvis. "Walt" has improved remarkably with practice. He is not coming out evident from the practice sessions, in all probability, more than the usual amount of hard work.

In our outfield we have a splendid set of cards. Namely, "Bones" Dierdish, "Jerry" Savard, and "Terry" McGilp. Each of these have proved his ability and those who will guard out a well-balanced team. "Skyline" Bogard should have a good chance of the all-star and may displace one of the veterans in the outfield.

Our batting is both collectively and individually, this year's team looks like a nice one that is going very strong. The reason that we are not much on the team is that nearly everybody behind us, we will witness one of the best seasons ever enjoyed by a Textile baseball team.

L. T. R. FLINT CLUB SEASON COMES TO A CLOSE

(Continued from Page 1)

Pain as a result. As his team was not underrated.

G. M. Elford, the local team, and J. A. Greenwood, the visiting team, for high scoring honors of the match, with 171 of possible 290 points. The former, due to the superior hand score, outsized Alvord, Brown, of Northeastern, for honors closely with a score of 177 points. At may be seen by the scores, the off-season of the Northeasterner team controlled in no small part to the defeat of the Textile team. This fact will also be true to be in most of the local team's defeat.

The Textile team experts to have more matches with Northeastern next year, and they will be eager looking forward to as the local standbys in the local matches with the Northeastern team.

The high scores of each team are as follows:

NORTHEASTERN U.

Alvord, J. 77
Brown, D. 98
Clark, J. 77
Fletcher, P. 98
Agawam, D. 77

Total: 171

LOWELL TEXTILE

Alvord, G. 85
Brown, D. 80, 85
Moody, L. E. 74
Fletcher, P. 98
Hirsh, E. 98
Wentworth, C. 98

Total: 690

President's List

The following members of the sophomore, junior and senior classes have their names in the above columns and an average of 90 or more for the first half of the fall semester. Students in this list in no way are subject to faculty rules pertaining to overwork.

SECONDO YEAR

Course I—Wooden Manufacture

Hobart Garden Bridges, Jr.

South Weymouth, Mass.

Course IV

Chemistry and Textile Coloring

James Coghill, Coghill, Jr.

Stoughton, Mass.

Joseph Sullivan

Boston, Mass.

Edward Nathaniel Hawthorne

Methuen, Mass.

Course VI—Textile Engineering

Robert Miller, Johnson

Dedham, Mass.

FOURTH YEAR

Course IV

Raymond Lewis Matthews

Gardiner, Miss.

Joseph James Plaxico, Jr.

Pittsfield, Miss.

Course VI

George Pomeroy...

Andover, Mass.

Theodore Reiter

North Providence, R. I.

Neatly and a very nice request in.

My own isn’t as nice.

"I am looking for a Textile student who

need a Texile student to

Parlor. "I never see such a request.

My own isn’t as nice.

BALFE SERVICE CO.

PRINTERS OF THE TEXT

180 MIDDLE STREET
LOWELL, MASS.

LOWELL TEXTILE INSTITUTE

Four-Year Degree Courses in

CHEMISTRY AND TEXTILE COLORING—TEXTILE ENGINEERING

Degree of B.T. (Bachelor of Textile Engineering) offered for completions of prescribed four-year courses.

Three-Year Diploma Courses in

COTTON MANUFACTURING, WOOD MANUFACTURING

TEXTILE DESIGNING

Scientific and practical training to all professions of textile manufacture including all commercial phases. Certified graduates of High Schools and Academias admitted without examination.

For catalogues address Charles M. Kane, B. S. President, Lowell, Mass.

We reserve the right to change prices and to alter or add services as conditions may require.
The Cut Sheet

(With Apologies to the Registrar)

Well, the Tech Show is in the offing and "Bill" Wrenn is to be given credit for giving a good band in the Goodrich Silvertone Card Orchestra.

We only hope that the "Silver Mastered Tones" doesn't turn out to be "Bill" Wrenn mimicked by that alluring musician of his. Yeah, Bill's name bit big two dollars that he couldn't raise austere but new she is willing to buy him two dollars to share the fun off... Studly says that he will not appear for the show.

Clas Kinder tells us here how he can give some fun Awes maiden a break by taking her to the show since he expects a cut to pay this summer...

Morrison, who plays the part of a detective in the play, was recently honored from his girl friend's name at nine-thirty. Maybe the detective was doing some searching... we wonder if Carmen will take "Little" to the show.

The junior classes in industrial chemistry recently visited two industrial plants in Everett. Muddy drove with his eyes closed until he reached Reading. Shirley showed up late in the afternoon at the Merrimack Chemical and at last the reason is out. He visited a good-lookin' beauty, but he made sure that her dog kept "Bill" Wrenn and "Bub" Cowan from getting too familiar.

"Bub" says that all he mixed at dinner were cement and beer. He had plenty of messages and document.

The Merrimack Chemical Co. greeted the students with a frog of Bill. Thomas was not himself this past his Gas House experience. Mr. Pickett is always saying, "What do you think?"... Well, fellow, what did you think of the young lady with whom Mr. Pickett seemed to be so very intimate terms at the Merrimack ...

Modge, Bickels, Graham, Thomas, and Morrison are over in Somerville. They located a waitress who blushingly admitted she came from Douglas.

Is it so that Tactical will send a truck team to the interstellar this year? "Bub" has taken up bicycle riding to condition him for the coming social events!

"Les" Conkling is hearing the tires on his bicycle repaired in case the baby gives out before the baseball season is over ...

Unpleasant may be held at the Granny Club grounds this year instead of at the Martin Luther grounds ...

After waiting in Prof. O'conn's office for two hours to read what was about him in the Pink issue, Fred O'Neill was disappointed to find that he hadn't been mentioned ...

Le Felix has a new one on his car ...

Travacs and Men's rides alone the Park street Boulevard during the main hour ...

Bud and Carl recently battled for the paperworld championship at the school ...

Dudley's girl says he is too fat.

Annual Show

(Continued from Page 1)

L. T. I. STUDENTS MAKE TRIP

(Continued from Page 1)

The management, under the very capable guidance of Professor Elmer Pickett, has been very busy preparing the show. The idea for the show was the logical one that the STUDEST would not only be able to sell tickets, but would also be able to sell the show. The organizers have been successful in this respect, and the show is sure to be a success.

CHESTERFIELD

Tobacco used to be stemmed by hand—Now this machine stems 14,000 leaves every hour.

Why is the Stem removed from the tobaccos used in Chesterfield?

That's a very simple question to answer.

The stem in a tobacco leaf, like the stem in most other plants, is "woody". It hasn't any of the flavor or the aroma that you want when you smoke. And it doesn't burn right.

So after tobacco has been properly aged, one of the first things to do is to remove the stems.

But what has this to do with your enjoyment of Chesterfield cigarettes? Just this. It means that we start right when we make Chesterfield—the right kind of leaf with the stem removed, the right manufacture—everything that science knows that can make CHESTERFIELD a milder cigarette, a cigarette that tastes better.

That's why people say "They Satisfy."
OMICRON PI

The fraternity is most grateful to the officers and pledged with this fine work their solid presence during the past year.

Bill Locher was the orator of the house, and he made a very good speech. Bill is a very nice fellow, and the fraternity is very happy to have him.

Under the careful supervision and teaching of Barnes, the "Fraternity" showed great improvement in all respects. The fraternity is most grateful.

Lauded with small and the guests of the Band, "Omnicron" was the most popular society of the group. The guests were all present, and the band played some very interesting numbers.

Omnicron is an active fraternity, and is doing splendid work. We are sure to see much more of them in the future.

Delta Kappa Phi

A certain fraternity has made the amazing discovery that Wells has been getting into the habit of making a speech in front of a great and important occasion. The fraternity is most grateful for this discovery.

Gladys T. Walker has been in town during the past week, visiting old friends. Miss Walker is in fine health.

Quante Three

What a fine occasion this was! How does one express how the boys and girls feel? We are sure to see much more of them in the future.

Quantin Three

What a fine occasion this was! How does one express how the boys and girls feel? We are sure to see much more of them in the future.

Sigma Omega PSI

A happy vacation was enjoyed by Mr. and Mrs. Smith in New York. They visited many interesting places in the city, including the famous Broadway shows. Mr. Smith visited the Boys' Club and Mr. Smith visited the Boys' Club.

"Daddy" Segerberg visited the Boys' Club this past weekend. He certainly has not missed the fair chance from Mr. Smith in town. He visited the Boys' Club.

"Daddy" Green has developed a new way of getting a gift for his children. Using his former method, he used to see the boys over the first house, then he would see the boys, and he left the boys.

"Rudy" Cowan has a new big piece in New York. Although he was not seen at the Boys' Club, he certainly will continue his work in New York. We wish him every success.

"White" Stiles as he is known in New York has a first there with the most peculiar name. When the boys were there, they asked him to name something. He then named it "Stiles," and it became very popular.

"Abe" Purvis will spend the next few months physiology in a house and a little house. We are sure to see much more of him in the future.

We have just found out the secret of John Boye's popularity with the women. He always seems to be smiling. The last time he went out he went out with a smile. He is to which neither he has come, and he is still smiling. It was on the street.

"Green" Greenhouse is still chasing butterflies. This time his field of search is Michigan.

We always thought a giraffe was an awkward-looking animal, but when we got a glimpse of our own giraffe in our own basement, we were all amazed that we were so basically created.

"Lafayette" Lydey, in response to the demand of his generous public, will write a story on a subject which can be discussed much more graphically than by our own "Drum."
