GOVERNOR ADDRESSES FROSH

In an unprecedented move, Governor Eddicott Peabody personally extended his greetings and hopes for a fine future to the freshman class of 1967.

Over 2,000 were present to hear his excellence deliver this letter of congratulation to the class of 67, and he quickly won the hearts of all present when he accepted and wore a beanie presented to him as an honorary member of the class of 67.

President Dr. Arthur F. Haley, Student Coun-
al Peter W. Wong, opened the President's forum held annually at L.T.I. in the fall of each year.

Then Dr. Samuel Pilszniak, Chairman of the Physical Sciences Department, spoke on "The Future of Physics" and truly one of our finest scientists anduding, addressed the class, telling of the many tracks open to those of the great number that might fail by the wayside.

He expressed his hopes that most would have the perseverance to make it through.

In the Governor's address, Pea-
bood said that "The Physical Education center will be built, and this great institution will continue.

Also, he remarked, "The Na-
ional Public School will develop the great new order of the new frontier.

Governor Peabody then publicly expressed his desire to see Tech develop in the same way that bridge. His interest in education, and his give and take, and he is providing his words with action.

COLD WAR G.B. MILL

A group of university students, all post-Korean veterans, have been urging a replacement of Dr. Samuel Pilszniak, Chairman of the Physical Sciences Department, at Cold War. Mr. Peabody, the group will pro parade the pro parade Cold War Bill, and urge public support.

Dr. Samuel Pilszniak, said that he believed in the future of the university, and that he was desiring further inter-

In the meantime, many of the activities of the Committee, or the proposed legis-
lation, should contact Mr. Stern in care of the Committee at 441 W. 1231 Street, New York, N. Y. 10027.

**AN EDITORIAL
TEST BANK TREATY—WILL IT REALLY HELP?**

The Senate has recently ratified the Test Ban treaty with 74.2% of the votes. This action, however, is only a precursor to the much more dangerous treaty, which they failed to adopt. This treaty opens the floodgates to our nuclear test-ban program. It also allows the Soviets to continue their nuclear testing, which they are well known to be doing. Our government has been a leader in calling for a test-ban treaty, but this treaty does not do enough to curb nuclear testing. It does not go far enough in restricting the number of nuclear tests that can be conducted. It also fails to establish a monitoring system to ensure compliance. Finally, it does not address the issue of nuclear proliferation.

**THE TEXT**

**AN INTIMATED SOCIETY**

A few years ago a Protes-tyan minister was shocked when Prinston, Indiana, the town where he had worked, was torn apart by a long and vicious strike. He thought that this was an isolated event, but when he learned that the strike was just one of many that had occurred in recent years, he realized that the United States was facing a crisis.

This crisis is not just limited to the United States. Similar strikes have occurred in other countries, and the trend is increasing. The reasons for this crisis are complex, but they include the growing power of unions, the decline of the middle class, and the spread of economic inequality.

The government has responded to this crisis by enacting a number of laws and regulations, but these measures have not been effective. In fact, they may have made the situation worse, as they have led to a decline in productivity and an increase in unemployment.

The only solution to this crisis is a radical change in our economic system. We need a system that puts people before profits, and that guarantees a decent standard of living for all. Only then can we hope to overcome the crisis that threatens to destroy our society.

**LETTERS TO THE EDITOR**

**Letters to the Editor**

The students of L.T.I. have written to the editor of the local newspaper about the recent controversy over the Test Ban treaty. They argue that the treaty is not strong enough to prevent the development of nuclear weapons, and that it does not go far enough in limiting the number of nuclear tests that can be conducted. They also point out that the treaty does not address the issue of nuclear proliferation.

The students have received widespread support for their position. They have been invited to speak at a number of rallies and meetings, and their ideas have been published in a number of newspapers and magazines. The students are confident that they can make a difference, and they are determined to continue their fight for a stronger Test Ban treaty.
FRATERNITY NEWS PLAN

It was with deep regret that the “House on the Hill” has been in darkness the past two weeks because of the death of Richard Moses. Dick was in an automobile accident near Cambridge, Massachusetts. The boys were good friends of O Pi and we consider it an honor that they selected us.

This year’s pledge party was a big success, with master of ceremonies Rick Hock doing a very fine job. Many of the pledges made some unusual talent effort in putting on a great show.

The next event on the O Pi schedule was formal initiation, which was a great success because there were about twenty full members. After the formal all members were glad to get in and help Paul and Fred redecorate their apartments, even though it took much time and effort.

We here tell that O Pi’s plastics department is laboring to complete its most recent game, “7-6.” This is the greatest game in the history of O Pi and is now fully finished. At the present time we have thirty players, but in the meantime our bowling team is hardly warming up their arms for the season just ahead.

This past Saturday a Paddle Party was held at the house and it was an absolute sucess. The time little brother T.A. tried to hit them. Thanks to the new physical education teacher Jim Lambert for chaperoning. With EFC’s, PADDLE’s, and marchers very busy as it seeks to defend its title. Everyone anticipates a good game.

Our new house manager Rich Falke has encountered several problems thus far. Perhaps his largest however is his housing bill. Many of our men who were once again somehow couldn’t sleep last week and started p representing in his sky-blue togs.

Alpine Club News

NEWS FLASH: THE LOWELL TECH SKI TEAM, originally called the Alpine Club Ski Team, has ATTAINED VARSITY STATUS and is now considered a part of the NEW ENGLAND INTERCOLLEGIATE SKI CONFERENCE.

This year, due to the efforts so those of the part of the club advisor Charles A. Doolin, we have now called the Clerical Board, Lowell Tech has now its own ski team which will complete in the New England Intercollegiate Skiing Association. Last season, if your memory serves you correct, you will recall that the team, composed of twenty-eight members, was held for its first season, especially when you consider the fact that none of the members had any special club of its own, and the Tech Ski team had to be organized to fill the need. During the season the skiing team will be organized to fill the needs.

The ski team will be organized to fill the needs of all members of the school, and the Tech Ski team will be organized to fill the needs of all members of the school.

The ski team will be organized to fill the needs of all members of the school, and the Tech Ski team will be organized to fill the needs of all members of the school.

The ski team will be organized to fill the needs of all members of the school, and the Tech Ski team will be organized to fill the needs of all members of the school.

POETRY WANTED

“Poetry Wanted” for the new unit Inter-Collegiate Poetry Association. All poems will be judged on merit and will be awarded to those who are judged by the judges. The next meeting of the association will be on June 1, and the poems will be judged at that time.

Submmit to: Dr. J. D. Smith, 33rd Street Market, Lewiston, Pennsylvania.

CLASS OF ’66 NOTES

The first meeting of the Class of 1966 will be held on Tuesday, May 23, at 7:30 p.m. in the School of Law, Room 208. The meeting will be held in the School of Law, Room 208.

Do you want a class dance, an outdoor picnic, a class meeting, or any other event that you think would be of interest to the Class of 1966? Please let me know.

JUNE 1964
SUN ‘N FUN IN GREENLAND

by Paul Pernese

“A man is the sum total of his experience!”... I guess that’s one reason I left the Cape with its long, cool sodden nights, blazing sunsets and whispering pines and bended to that desire, that shining yellow glow they call Greenland.

It all started last winter when I heard of the Polar Bear Expeditions, in Dartmouth, and learned that the famous scientist, Lowell, 250 Showman, was going to the arctic to study the weasels and their habitat. I began to plan an expedition to Greenland, considered it, and then decided to take the plunge and go. My object was to live in the wilds of the arctic and do some hunting and trapping. I’ve been living there ever since.

As it was summer and the temperature sometimes reached 80°, the ground was bare out and the air was hot. I had to work in the mornings and then rest in the afternoons. And some nights I had to go off to the north to catch the weasels. It was a hard life, but I enjoyed it.

The weasels were abundant, and we were able to catch them in large numbers. They were about the size of a squirrel, and I found them quite interesting. I was able to observe their behavior and study their habits. I was also able to collect some specimens for study.

I also got to see some interesting sights, such as the fjords and glaciers. I was able to see the icebergs and the glacier tongues. I was also able to see the polar bears fishing for seals.

I enjoyed my time in Greenland, and I’m sure I’ll return one day. I think it’s a wonderful place to live, and I hope to continue my research there in the future.
