Comaroy Is Coming!

As you know, student activities in the halls of the hallowed institution, the Class of '66, are again presenting its annual Comaroy. This year’s theme promises to be even bigger than last year’s with more tickets, more surprises, more laughter and just plain more fun. For those of you who missed last year’s show, this year’s show will fill your expectations and even more be entertaining than last year’s. For those of you who had the misfortune of missing the Comaroy, it will be made up of a new and different form of entertainment, the show you have at Lowell Tech and will prove to be one of the most enjoyable evenings of the year. It is in support of this that a night of variety and comedy, presented in a different and different way.

Many of you may remember that last year we followed the antics of a certain Frerck Frecklen, as he caused Lowell Tech and became acquainted with all its different facets. Well, Fredd is now Sunny Sophomore, and, of course, he is a big man on campus and he knows all the ropes. We will follow him through some fascinating experiences, such as "the laws of the bicycle," automotive issues, and the music and regulations of study for tea. We will be along when he discovers the truth about cigarettes and the Action Giant, as well as a through course into LATI instructors. We will be in for a few surprises that even Sunny does not know about, as the show will be all the like this year.

The Class of '66 has put a lot of time, work and effort into making this show one of the best occasions of the year. Lowell has ever seen. It is designed to appeal to the laugh center of chemistry and physics majors, EE and physics students, Doctor of Science and Doctor of Engineering Board, the Administration, your date or the freshman across the hall. It will stand as one of the entertaining evenings in the structure of Lowell Tech’s social life and should not be missed by anyone. The Class of '66 invites everyone to Cumnock Hall at 8:00 P.M. on Saturday, April 25, 1964, for a chance to get away from it all for a few hours and to enjoy the fantastic evening of the Class of '66. Tickets are now on sale, and can be purchased from members or the officers of the Class of '66. Hope to see you rolling in the aisles Saturday night.
CONGRATULATIONS ARE DUE

Last week the Student Council published its first annual report for the students. This report was an attempt to make the student body aware of the work that the Council and its members have been doing. The report is an excellent one and should make the future work of the Council much easier.

The report is a complete success. It covers all the important topics of the Council and its work. In addition, it contains a detailed list of the names of all the members of the Council, and their duties and responsibilities.

The report is a valuable resource for anyone interested in the work of the Council. It is available at the Student Council office and can also be found online.

The Student Council has done an excellent job in publishing this report. We congratulate them on their hard work and the success of their efforts.

PI LAMDA PHI NEWS

Last Saturday we had the pleasure of hosting our National Field Secretary Buck Deadly visit us for a few days. His visit had a great impact on our chapter and we were very happy to meet him. During his stay, we have established better relations with our national headquarters and the goals of our chapter have been set.

The Student Council has also been working hard to increase our membership and we have made significant progress in this area. We are very proud of our chapter and we believe that we will continue to grow and improve in the future.

The Student Council has also been active in community service and we are planning to participate in more events in the future. We believe that these activities are important for our chapter and we hope to continue to have a positive impact on the community.

THE DELTA PHI

DELTA KAPPA PHI

Last Saturday, one of the most important parties of the year was held at the house. The party was organized by the Delta Kappa Phi, one of the largest and most popular fraternities on campus.

The party was a huge success and the guests had a great time. The atmosphere was relaxed and everyone was having a good time. The music was great and the DJ did an excellent job of keeping the guests entertained.

The Delta Kappa Phi is one of the most active fraternities on campus and they are known for their fun and friendly atmosphere. They do a great job of organizing events and parties and we are always happy to be a part of their activities.

We congratulate the Delta Kappa Phi on a job well done and we look forward to their next event.
CLASS ELECTIONS

CLASS OF '65

PRESIDENT

DENNIS SERPONE

Serving the Student Council also involves arranging all Tech Weekends and participation at the regular Council meetings. During the past three years, I have taken an active role in the class. I was treasurer of our class during the sophomore year. I have been a member of the T.O.C. and have participated in intra-mural sports. For the past two years I have been an active member of the Nuclear Society. During the past two years, I have realized the work and experience that I receive. The cost for the work will be quite low because I have been a part of the Council. I am therefore asking you to support the Junior Class on Election Day to elect me President.

ROBERT SIMPSON

Members of the Junior Class:

I would like to take this opportunity to present my qualifications and views to you for consideration. The office of President of the Junior Class is both unique and challenging. It is both because of the duties associated with the office and the experiences associated with the office. Also, the position of President of the Junior Class year is our representation in the Student Council.

You must elect a person who will handle and be responsible for the best interest of our class. The Junior Class president is a student, a candidate for election in the class. The Junior Class president is also the President of the class. He is elected President by the junior class to represent their interests. He is elected President by the junior class to represent their interests.

I am a member of the junior class, I am a member of the Illinois Institute of Technology. I am a member of the Illinois Institute of Technology. I am a member of the Illinois Institute of Technology. I am a member of the Illinois Institute of Technology. I am a member of the Illinois Institute of Technology. I am a member of the Illinois Institute of Technology. I am a member of the Illinois Institute of Technology. I am a member of the Illinois Institute of Technology.

Respectfully,

Paul Giavola

PAUL GIAVOLA

The President of the Junior Class holds a highly responsible position. It is his duty to assist in arranging job interviews, to plan a successful Junior Week, to work towards a memorable graduation, and above all, to represent you while serving on the Student Council. He should be elected to office to further the success of the Junior Class. I am therefore asking you to support the Junior Class on Election Day to elect me President.

Respectfully,

Paul Giavola

BETWEEN OUTER SPACE

AND THE DEEP SEA

THERE'S A WIDE RANGE OF OPPORTUNITY

IN THE BELL TELEPHONE COMPANIES

To outer space and into the deep sea, we take the sum total of our scientific and managerial knowledge. A case in point, for instance, comes from Bell System planning, research and development.

Such trailblazing projects command the best of managerial and scientific talent. That's why you'll find, throughout the Bell System, men nominated for the presidential chairmanship, from the junior class in planning, research and development.

Admittedly, the work is demanding. It requires that unusual caliber of man who finds a greater satisfaction in challenging problems and in the freedom to push the education yield dividends...who wants an immediate opportunity for leadership.

Men with this kind of ambition will discover the satisfaction—some income and rewards they seek in the telephone business.
EXPOSE: ATHLETIC FIELD

Dear Dial and George,

I was talking with Tony to you to hope that you can answer a few questions for me. I would like to know why this school lacks interest in sports? The shape of the baseball diamond is ridiculous, any sandlot baseball field is in 95% better shape. It is true that we don't have much to work with, but with a little work by our ambitious janitors we might have a presentable field for us and other teams to play on. I understand that our Athletics Terrors are too busy taking care of the inside of the buildings to work on the ball field. If we will see an improvement on the interior of the buildings now that the janitors are devoting full time to cleaning them up, although I know what was going on all winter. But allowing the janitors to work on the baseball diamond, the administration is coming right out and showing what they think of sports in general.

The President of the United States is promising physical fitness in full force and here is a school of the State of New York that doesn't bother putting sports down. Of course this is typical and you can learn to expect things like this from the President, from the State and the schools in this district. I would like an answer from you or from our administration as to why sports are being treated like "How's It Going"? If you can give a reason for this, we don't start doing something to improve the facilities for students to participate in sports. This doesn't mean that you should say that the athletic center will remedy this because I have been around long enough to wait for dreams. Why not improve what we have now and if we get our new athletic center, then?

I hope I haven't offended any of the coaches of the school, who are doing a great deal of work for the job that they have. They haven't done in giving the school what it has in sports now. These coaches have promoted sports while putting up with a lot of trash from the administration. If I have offended any of the administration of this school, good, because this is what I intended to do. Maybe it will get the administration off their rear ends and do a little for sports in this school, instead of fighting them.

THE "DUKE"

Dear Duke:

We certainly appreciate your letter and sincere interest in athletic facilities, and in sports in general here at Tech. From my understanding of the situation, you are certainly well informed and justifiably embittered. And now to try to answer some of your questions:

In general, this school does fail for short of the enthusiasm associated with college sports today. As we have mentioned before in this column, one reason, if not the primary reason, is the lack of good facilities. To assume that because some facilities are available, that they will be appreciated, seems to have been a bad misconception of our administration. People appreciate the finer things in life, they only learn to put up with its drawbacks.

The trouble with Lowell Tech, speaking through a sports scope, is that there are too many easea drawbacks and not enough learned finer things. Who's to blame? The same people who take the credit for things when they turn out great, the illusory administration. Our lackadaisical administration is becoming a serious problem to the students' welfare. It's the administration's job to see to it that the baseball field is taken care of by the maintenance crew. The administration is also directly responsible for seeing to it that the janitors keep cars off the baseball field. They have failed us in both of these departments.

To emphasize the seriousness of the problem, a week ago the Athletic Director and some of the varsity baseball players had to stand guard at the back gate to keep the cars from parking on the field because this was a day that a game had to be played on the field. It was this same day that the assistant baseball coach was seeing grading the infield. We were in the outfield, and the captain was seen limiting the foul lines.

You ask where the maintenance crew were, but I ask where was the administration. They may have said sorry, but we all know why. We are still young and have a great sense of pride in whatever we do. Whether we be deans' list students, struggling C students or varsity athletes, we're a proud group of Lowell Tech students. The thing we have most to be proud of is our determination. A determined student body can and will gain recognition for the school.

Of course we aren't about to be on the College Bowl or play next year in the Big Ten Conference, but there are other ways to be recognized. One is to extend ourselves to visitors and to show them that we are proud of our facilities. The negligent upkeep of the baseball diamond is a serious drawback to the pride of the student body. Furthermore it is a roadblock to the physical education program being conducted in this school. It is through negligence that students get hurt.

You are one of many who have questioned the administration's competence in this matter. How long will the student body allow its health and welfare to be endangered by the conditions of the field? Take the one at my word if you will, the field is in lousy condition and a student could get hurt there. If not by a passing Volkswagen, then by a ground ball that takes a bad hop on an improperly maintained infield. These things present a serious problem to student participation in sports. If a student is spirited and able enough to give up some of his valuable studying time to represent his college on the athletic field, he should be encouraged and not shamed the results. This is a job that is firmly with the administration. In their eagerness to make this the highest-rated athletic department, they have overlooked the demand for the well-grounded student. As was stressed by the late President Kennedy, this well-rounded individual is one of strong mind and body. Our administration has become completely ignorant of the latter case, and the ones who are hurt are the students themselves.

As you have said, the remedy to the situation is not the new athletic center, and it should not have to be the students who must voice their disapproval but so it is. The TEXT has always been open to print student opinions, but we were especially happy to print your letter, Duke, because we fully agree with you. I hope you see now, that to clear up the situation calls for a policy change by the administration. We welcome any other comment by the student body on the situation and do hope that the prediction is not left in its present state.

SKIN DIVERS ORGANIZE

by Kathleen Hogan

One of the newest organizations on campus is the Skindivers Club, which has been organized through the efforts of Dave Sampson, '68, Tony Kaszas, '69, and Dennis蕴, '67.

The club meets every Thursday at noon in F305, where John and Dave give members the New England Divers course of instruction in the dive and that's of skin diving.

Dave and Dennis are well qualified to give instruction, since between them they have spent many years skin diving. They belong to the Aquatic Club of Boston and have visited many countries. The Aquatic Club has been active in State underwater research and rescue, and Dennis even dive with them in the search for the Jean Ross body.

Skin diving is an increasingly more popular sport, and like any sport it has its hazards. These hazards need to be recognized, and if proper precautions are taken and the prospective diver follows the safety rules, there should be no danger.

The main objective of the club is water safety. Practiced instruction in the use of equipment is given every Wednesday night from 8:30 to 9:30 when the club meets in the V.M.C.A. pool. Although the club members have lost members of either sex, some female members are at a slight disadvantage as "T" rules won't permit girls in the pool. However, the girls will get a chance to try on equipment on April 26 between 4:30 and 7:30, and they're invited to travel to Long Pond for their first dive.

Although only those who have come to the Thursday classes will be able to get practical experience with the equipment (which, as at the pool, will be supplied by Dennis and Dave) all are invited to come, watch and ask questions.

Club membership is limited to Tech student interested members. From the surrounding schools are invited to join. When to come to buying equipment you'll find your membership is invoke, for the club has dealings with New England Divers and the Beverly and the Cape Skin Dive Supply of Melrose, and members get a 40% discount on equipment purchased from them.

This is the first year the club Dennis, Dave and Tony, being shorter members, have taken over the duties of president, vice president and secretary, respectively. Dennis, Delbank has been appointed treasurer and Kathleen Hogan, publicity manager.

The Mary Lynn G. of the I.A.M. Department has consented to act as family advisor.

SPORTS

SOMETHING NEW
by Bob Bailey

This Saturday Lowell Tech students will be granted with a day's entertainment. The exhibition will be of freshman football and wrestling. The events will start at 3 p.m. and end at 9 p.m. The event is sponsored by the Freshman Class. Admission is free.

The first exhibition will be a football game between Lowell Tech and Assumption Catholic. The game will start at 3 p.m. and will last for about 1 hour and a half. The winning team will be decided by the score of the game. The game is expected to be a very competitive affair. The audience is requested to be on time and to support the teams.

The second exhibition will be a wrestling match between Lowell Tech and Assumption Catholic. The match will start at 6 p.m. and will last for about 1 hour and a half. The winning team will be decided by the number of wins obtained by each team. The audience is requested to be on time and to support the teams.

The event is sponsored by the Freshman Class and is expected to be a very competitive and entertaining affair. The audience is requested to be on time and to support the teams.

The Freshman Class would like to thank the faculty and staff of Lowell Tech for their support and assistance in planning and executing this event.

The Freshman Class would also like to thank the parents of the students for their support and encouragement.

The Freshman Class would like to thank the community for their support and attendance.

The Freshman Class would like to thank the students for their participation and hard work.

The Freshman Class would like to thank the media for their coverage of the event.

BOB SACCHETTI

I sincerely feel that the present
year will truly be defined as "work" in our school,
for me. There is no doubt that many more
activities are offered for members of our student
organization. I am going to fight for my
class presidency and help with the
tasks of the other officers. I feel
that we need to change the atmosphere
at the Class Generals
meeting and make
it less formal.
Respectfully submitted,
Raymond Cristo.

JOSE D'ARRUDA

My name is Jose D'Arruda,
and I am a member of the Class
of '67. This is the first year
that I will be carrying my
class responsibilities. I am
planning on making the
class more active and
promoting the interests
of the members.
Respectfully submitted,
Jose D'Arruda.

VICE-PRESIDENT

STEVE ASHBAKER

The office of Class Vice-Pre
sident is one of the most
important positions within
the Class of '67. As the
vice-president, I am respon
dible for the overall
management of the class.
I will work closely with the
president and other
officers to ensure that
the class is run effectively.
I am looking forward to
choosing my own
program and creating
activities that will benefit
the members.
Respectfully submitted,
Steve Ashbaker.

Vice-President

Michael Anderson

The position of Vice-Presi
dent is critical to the
success of our class. As a
vice-president, I will
work with the other
officers to make sure
that our class
activities are well
planned and executed.
I promise to be a
trusted and
responsible leader for
our class.
Respectfully submitted,
Michael Anderson.

TREASURER

John Tria

In the best interest of the class, I
will make sure that all
finances are handled
appropriately.
I promise to keep our
members informed
about our financial
status.
Respectfully submitted,
John Tria.

RICHARD L. SERRASS

During the first part of this
year, I have felt that class
activities were not
showing enough
involvement. The class
showed a lot of interest
in our first meeting, but
 thereafter,
participation decreased.
I am committed to
making sure that class
activities are well
planned and executed.
Respectfully submitted,
Richard Serra.

SECRETARY

Ron Papesh

Any accomplishment of the
Class of '67 must be
deemed a success. As a
representative of the
officers of our class, I
will work hard to
represent our
members.
Respectfully submitted,
Ron Papesh.

WILLIAM H. GILE

As a member of the Class
of '66, I would like to
extend my congratulations
to the Class of '67 on their
accomplishments.
I encourage all members
to continue to be
involved in our school
community.
Respectfully submitted,
William H. Gile.

CLASS OF '67

TREASURER

LAWRENCE BUSHNER

Since last year, the Class of '67 has enjoyed many activities. Some of these have included picnics, movie nights, and the annual Junior Weekend. One activity that is especially significant is the annual Spring Gala. This gala is a major fundraiser for the class and provides an opportunity for students to come together and celebrate their graduation. The gala also serves as a farewell event for graduating seniors, offering a chance to reflect on their college experience and look forward to the next chapter in their lives.

EDWIN B. PHILLIPS

I am also looking forward to the upcoming graduation ceremony. It is an exciting time for all of us, as we prepare to move on to new adventures. The transition from college to the professional world can be challenging, but I am confident that the skills and knowledge I have gained during my time at Tech will serve me well. I am grateful for the opportunities I have had and the experiences I have gained, and I look forward to what the future holds.

LOWELL TECHNOLOGICAL INSTITUTE ALUMNI ASSOCIATION

ANNUAL SPRING MEETING AND DINNER DANCE

Date: Saturday, April 25, 1964
Place: 214 Lexington Avenue (near 45th St.) New York, New York

Cost: $5.00 per person

AGENDA
7:00 P.M. DINNER, 8:00 P.M. BUSINESS MEETING

SPECIAL PROGRAM - with the exception of our guest speaker, all other speakers will be invited to these topics each year.

SPEAKERS:
1. Prof. John Robinson
2. "Man's Feathered Friends"
3. "Philosophical Diaries - Moonlight Street with Gus and Camera"

TOPICS FOR SPECIAL DANCE:
VERY SPECIAL DANCE PHRASES: 

"You can't have too many dollars, but you can have too many friends.

You can't have too many dollars, but you can have too many friends.

Satisfaction guaranteed. Send two dollars to Jobs Abroad Directory-P.O. Box 13593-Phoenix, Arizona.

UNUSUAL STAMP OFFER
300 colorful Yugoslavian stamps, all different. For only $5.00. Send cash, check, or money order. Prompt delivery guaranteed.

THE MOST CONVENIENT WAY TO PARTICIPATE IN YOUR SENIOR CLASS GIFT
Could Be Through the NEW YORK LIFE POLICY for College Men!

As seniors, your recent decision to participate in a class gift plan is commendable. The method of funding such a gift has been successfully accomplished by the students of many colleges through the New York Life. Our insurance and accumulation plan for college men can be tailored to your individual needs and will allocate a small fraction of your future dividends to the L.F.T. Class Association, in perpetuity. Furthermore, the N.Y.L. plan will enable us to meet changing personal situations with an up-to-date program.

The success of this project can be added to your current personal participation in the L.F.T. Class Association, which has been offering life insurance plans.

June, 1963

Dear Don:

Let me take this opportunity to thank you for your part in the gift program of the L.F.T. Class of 1962, which concluded in spring in every aspect.

It is still hoped that this concept of the gift program is still widely debated, with a planned personal presentation of the N.Y.L. plan and careful attention to personal situations with an up-to-date program.

Again, thanks many times.

Dennis J. Browne President, Class of 1962

SINCE 1891

OVER HALF OF THE U.S. PRESIDENTS
SELECTED NEW YORK LIFE for their Personal Insurance

NEW YORK LIFE
Est. 1845

One of the world's leading mutual insurance companies

A number of your classmates are already participating in the New York Life plan because of its flexibility and convenience.

The purpose of this project can be added to your current personal participation in the gift program of the L.F.T. Class Association, which has been offering life insurance plans.

The success of this project can be added to your current personal participation in the gift program of the L.F.T. Class Association, which has been offering life insurance plans.
PAPER ENGINEERING AT TEC: A STUDENT'S VIEWPOINT

By Robert Clay

About the time of this issue of the magazine, you are facing a problem whose situation dictates what you will be doing for the rest of your life. That problem is of course: "Which course should you go into?"

It was not long ago, four years to be exact, that I faced the same problem. And what a problem it is! There are so many courses to choose from that all you promise excellent opportunities, and yet the one that seems almost impossible. However, a choice must be made and soon.

Now, I'd like to take this opportunity to tell you a little about the solution to my problem - choosing the Paper Engineering curriculum. In my estimation, the Paper course is the ideal course for the student who desires opportunity, advancement and security. In all sincerity, I know of no other course at Tech which offers more of these features.

As for the course itself, I believe there are four main qualities that make Paper Engineering the most lucrative course at Tech. These are:

1) for those of you who may be considering Chemical Engineering: course for course, the Paper Engineering curriculum is "exactly" the same as the Chemical Engineering course, with the exception of one or two courses over four years. This means that you will be giving up none of your technical background as the Chemical Engineering student. The reason it is possible for these courses to be the same is that when the chemical engineer has one or two technical electives, the paper man has pulp and paper courses.

2) you will gain a decided edge in business specialty. You will learn more about the business of an engineering industry and it how it functions. This specialty will be gained at no sacrifice to your broad chemical engineering background.

3) you will better your language skills. The English instructors have been the same throughout the semester, and will work the same, and they've been the same throughout the Athens.

Paper courses, as a whole, have much less math requirements, and in general are much easier.

4) the three subjects which you will be majoring in are not just paper and pulp but also in wood. Having been a paper and pulp student, I saw that almost all the students who took these courses were genuine and honest. They were not just looking for an easy course to take, but were really interested in the subject.

Now let us take a look at the stability and security of the paper industry. Paper is the fifth largest industry in the U.S. It is an industry which originated over 150 years ago and today continues to grow. The paper industry is not only significant in the U.S. but is unsubordinated by the government nor does it depend on government contracts. The industry is not dependent on the whims and desires of the government and therefore is not subjected to the same kinds of problems as are many other industries, which are made to rely on large-scale government work. The paper industry is also the only industry that has been able to keep up with the growth of other industries, and this is due in part to the fact that the paper industry is able to sell its product directly to the public. In addition, the paper industry is able to sell its product to other industries, and this is due in part to the fact that the paper industry is able to sell its product directly to the public. In addition, the paper industry is able to sell its product to other industries, and this is due in part to the fact that the paper industry is able to sell its product directly to the public. In addition, the paper industry is able to sell its product to other industries, and this is due in part to the fact that the paper industry is able to sell its product directly to the public.

The Paper industry is an industry which offers more security and opportunity than any other U.S. industry. The paper industry not only provides employment for large numbers of people but also requires a high level of skill. This is due in part to the fact that the paper industry is able to sell its product directly to the public. In addition, the paper industry is able to sell its product to other industries, and this is due in part to the fact that the paper industry is able to sell its product directly to the public.

For the student who is looking for a career in the paper industry, the Paper course is the ideal course. The student will not only have the opportunity to learn about the business of the paper industry but also will have the opportunity to learn about the technical aspects of the industry.

Super Scooper

To fight the fire, you need the most amphibian aircraft in Northern Canada, but in one case, up to 8,000 gallons of water for the operation of the fire. Storing the water in barrels would be costly, inefficient, and would require a specialnickel-iron cast metal tube to propel water into the air. The super scooper was designed by the N.D. and the water is sprayed onto the flames. It is used to battle forest fires.
