New Wool Course: Reprocessed Fibers

LOWELL, April — President Martin J. Lydon of the Lowell Textile Institute announced at the opening of the new course in manipulation of old and new, and old and new, into fiber suitable for use in the mills. The course is offered as a means of reutilization of our used wool and means of conserving our wool resources.

A brief outline of the ground to be covered during the week's course is as follows:

Monday, June 11, 1951
Talks on the overall reworked fibers, the history of the industry, and the trade. Trade associations will be discussed and the various agencies that have formed to aid the industry. The course will be offered as a means of reusing our wool resources.

Tuesday, June 12, 1951
Talks on experts on rugs and carpets, sources of supply, importers, exporters, regulations, commercial types, etc. Emphasis on the commercial types of stock will be given. The course will be a crash program, starting at 7:30 A.M. and running until 4:30 P.M.

Wednesday, June 13, 1951
The course will continue with the second week. The topic will be on the history of the industry, and the trade associations that have formed to aid the industry.

Thursday, June 14, 1951
The course will continue with the third week. The topic will be on the history of the industry, and the trade associations that have formed to aid the industry.

Friday, June 15, 1951
The course will continue with the fourth week. The topic will be on the history of the industry, and the trade associations that have formed to aid the industry.

Wool Students Journey To Mills Ettrick Garnetted Co. Included

Friday the 13th of April may have been an unlucky day according to the calendar, but it was certainly a lucky day for the students in the Wool Department. They left the Institute at 8:00 A.M. on that day in private cars and journeyed to Auburn, Mass., where they visited the Ettrick Garnetted Co. to see what superintendents in charge. They saw new and old rugs and waste goods, sorted, picked, shredded, carded, and spun into stock ready for bleaching and making into woolen yarn. The machine in this plant was a true wonder, and the students were thoroughly impressed by the machines. The students asked questions of the mill workers and were shown around the mill. They all enjoyed the tour and were very grateful to the mill workers for the time they spent with them.

Former Text Man Assumes High Post

NEW YORK, April — "Textile World," a McGraw-Hill publication, has announced the addition to its staff of a former Lowell man, James H. Clout, the 1948 graduate of the Institute. The addition has been made by the company's director, W. L. O'Leary, and Mr. Clout will be responsible for the Textile World magazine.

The former Text Man, T. W. Foote II, has been recently appointed as the new editor of the weekly magazine. He has been with the company for several years and has been a regular contributor to the magazine. He has been an active member of the Institute and has been involved in many of its activities.

New Scholarship Established To Honor Merrimack President

LOWELL, April 21 — During a brief, informal meeting held in the office of President Martin J. Lydon, Miss Mildred A. Robson presented President Lydon with a check for $2,500, establishing another scholarship in the Institute. The gift was presented to the President by the Class of 1948 and is in honor of the late Institute President, William E. Merrimack. The gift was presented to the President by the Class of 1948 and is in honor of the late Institute President, William E. Merrimack.

Newman Club Picks Director

LOWELL, April — Members of the newly-formed Newman Club in the Institute met last week to elect a new officer for the coming year. The meeting was held at the Newman Club, a new organization that was established recently to provide a place for students to meet and discuss spiritual matters.

A list of the club's activities was distributed to all members and the club is open to all students, regardless of their religious affiliation. The club meets on a regular basis to discuss spiritual matters and to provide a place for students to meet and discuss spiritual matters.

TRUSTEE MEETING

The next meeting of the Lowell Textile Institute's Board of Trustees will be held on Thursday, June 14, 1951, at 5:00 P.M. The meeting will be held in the Institute's auditorium and will be open to the public.

New Instructor Is Old Student

Another indication of the efficiency that one must endure upon graduation and subsequent departure from the halls of learning, is that the Lowell Textile Institute has been established in the person of "Bub" Garnier. It was a matter of fact that Garnier, a 1948 graduate of the Institute, is now teaching in the weaving department of the school to replace an instructor who has been on leave. Garnier, who has recently taken a position with the New England Shipping Co., is now teaching in the weaving department of the school to replace an instructor who has been on leave.

AIR FORCE ROTC ASSIGNED; TO COMMENCE FUNCTIONS ON JULY 1

LOWELL, April — President Martin J. Lydon was notified that a U.S. Air Force Reserve Corps has been assigned to the Lowell Textile Institute. The Corps will be moving into the school in July, and work will begin in the fall.

Lowell Textile of AATCC Regional Convention; Students Attend

LOWELL, April — The Lowell Textile Institute student chapter of the American Association of Textile Chemists and Colorists attended the Northeastern Section joint meeting of the group, conducted at Lowell on Friday, May 11, 1951.

The visitors witnessed an exhibition of temperature measuring and handling by Leonard Gallaway in the afternoon and many later accepted for the Institute. President Martin J. Lydon to inspect the various laboratories, classrooms, new library and the association's natural research laboratory.

In the exhibit the chemists were greeted by Dr. Lydon, prior to a business and technical session in the lounge at the conclusion of the students' tour.

Edward C. Crane, chairman of the Institute and a member of the Institute's executive committee, was present for the tour. The visitors' tour of the laboratory was conducted by staff members and students.

The two men who were at the Institute as guides were Dr. Atkinson, principal of the Royal Technical College in Glasgow, and Mr. Collarford, director of the Metallurgical Research. They were accompanied by members of the Institute's executive committee and were shown around the Institute. The students were particularly interested in cotton spinning and weaving and their tour about the school included the cotton department.

The gentlemen left, L.T.I. after this very thorough visit.
To the Editor:
I would like to take this opportunity given to me by THE TEXT to explain the reason for my recent nauseating article on automobile accidents.
I wasted a lot of time and paper over the possibility of making this article interesting by giving a lot of figures which the student body is not interested in. I also wasted a lot of time and paper trying to write a paragraph which I thought would make the student body want to read the article. I also wasted a lot of time and paper in rewriting the paragraph which I thought was the best, and I also wasted a lot of time and paper trying to make the sentence clear.
I am really sorry that this article is not as exciting as I thought it would be. I wish I could have made it more interesting. I hope you will understand my reason for not being able to do this.
Sincerely,
[Name]

ELECTION TIME

The right to vote is a privilege shared on few hard-fought and diligent legs. If that privilege at this time taken from us individuals or a group of people, we have a right to raise this issue in every considerable magazine. This magazine could be read. Yet some people, who firmly uphold the idea that the right to vote is a fundamental right for all people, can be channeled, are those who do nothing about it. 

The Student Council is, as is pointed out in the student rules and regulations of the school, the representative body of the students. It forms policies of the school, makes regulations, and handles matters with the power to express the interests and opinions of the entire student body. It is, therefore, important that these people who are to be elected to these positions be well informed about the problems of the school, and that it be the duty of these students to be representative and be the voice of the student body.

Student Council nominations and elections are held once a year. When these times come, students are faced with the task of choosing their representatives. It is important to know about the candidates, the fact and the issues, and not only to know about them, but to know how to vote. 

At this time it is too late to change the guide in any respect to the Student Council elections. It is, however, too late to remedy this mistake, which I think is a mistake, but it is not too late to know about the candidates and the issues and to use the guide effectively.

Election time is an important time in the life of a student body, and it is a time when the students have the opportunity to express their opinions and to participate in the government of the school. It is important that the students understand the importance of the election and that they take an active part in it.

BOARD OF TRUSTEES VOTES TO ABANDON L.T.I. FOOTBALL TEMPORARILY

Lowell Textile Board of Trustees, acting upon the recommendations of the athletic advisory committee, voted to suspend football at the Institute for an indefinite period of time. This move came after last week at the regular quarterly meeting of the Board, and resulted from a lengthy investigation of conditions at the athletic band. This Board, instigated by President Martin J. Logan at the end of the 1950 academic year, has been investigating the situation during the winter months and earliest with its final report

1. The athletic band.
2. The possibility of suspending football temporarily.

The Trustees gave the following reasons for giving football the ax:

The band is indispensable to the Institute's athletic facilities.

2. It is possible to decrease the size of the athletic band.

3. The academic year is too short to support a full-time band.

4. Football is not an essential part of the Institute's athletic program.

5. It is not feasible to prepare qualified students for a band career.

6. Football is too expensive for the Institute to support.

7. Football is too time-consuming for the Institute to support.

8. Football is too competitive for the Institute to support.

9. Football is too dangerous for the Institute to support.

10. Football is too disruptive for the Institute to support.

11. Football is too controversial for the Institute to support.

LIKE THOUSANDS OF AMERICA'S STUDENTS—MAKE THIS MILDNESS TEST YOURSELF AND GET

WHAT EVERY SMOKER WANTS

OVER 1500 PROMINENT TOBACCO GROWERS SAY: "When I apply the standard tobacco growers' test to cigarettes I find Chesterfield is the one that smells milder and smokes milder."

REPROCESSING COURSE (Continued from Page One) Loom, loom on weaving, etc. Leading machinery manufacturers for materials to remain in movement and could assure proper temperature. Three trained whether determine and liquid and their intended work efficiency. Miss Gregg and Mathia also explained and demonstrated the manner in which radio-active materials could determine the number of radio-tracers necessary to remove such from the materials and whether soap, water, and steam were being wasted. After showing how radio-active materials could be effectively used to test the durability of dyes on various kinds, Mathia concluded with, "You have seen some of the processes which can be checked with proper types of tracers. If a plant installs tracer equipment and puts a man with a little mind on the job almost all operations can come under strict, rapid, simple, and economical control."

HOW, by chance the velocity of the various operations should become contaminated by radio-active materials? Mathia went on, "It is proper practice to give audible warning. It is the policeman on the job."

MILDNESS

Plus NO UNPLEASANT AFTER-TASTE
