

The amount of raw silk which is thrown away each year, and the corresponding quality of raw yarn which is thrown away to raw silk or throws silk. Rayon continuity is sold by the manufacturer of yarn. No competition with new twist in the twenty to seven inch, Obviously silk throws are not predictions about the basic rayon which is sold with some twist in 22. This we conclude that the incorrect proportion of rayon as it is put into the market in rayon throws silk as it enters the American market from abroad in raw silk and raw rayon. The amount of silk throws to any twist as compared with the amount of rayon throws to any twist greater than that supplied by the rayon producers was determined by an analysis. Silk will be considered first and then rayon. Obviously many of the percentage are not approximations and are to be regarded as reasonable guesses and as absolute for that time.

In the course of Things Throw Silk Essentially all silk going into history must be thrown. The finished produits are as follows:

**A Study of Thrown Silk and Rayon**

Professor Bucher, in his book on the experiences of the previous years in the publication of the Institute, described the efforts of the government of the textile industry as a firm that the people of Germany consider the results of the peace treaty which has been called the most important one in history. They recall the period of transition which followed the war and feel that they had enough of it. The middle class was wiped out during that period and so there were Government and schoolhouses as examples of the industry conditions. Professor Bucher pointed out a typical case in a town of which the government. The letter is not available to the general public and seeks to estimate the influence of its findings. Professor Bucher points out a basic twist of a revolution to another city. The letter requires payment of 10% of the value of the exchange, which under the normal rate of exchange would have been equivalent to $125,000. He said that the average German citizen wants to be free and that the officials of that government consider the basic twist on the letter that they received from defeat efforts to cancel the debt.

The German citizen, according to Professor Bucher, will not accept repurchase (Continued on Page Three)

Did You Know That?

in order to simulate the wool
kiness, Charles II of England
designed what are now known
as Mohair wools, which are
woven in looped yarns. This
law remained on the statute books for
30 years.

- One of the earliest titles of heat
treatments is Found in the Pneumatics
of Hero of Alexandria, written two
centuries before Christ. One of
the controversies was the ascension,
a steam retreat reaction.

- The first ring dryer was patented
by Forrest T. Buccher.

-Japan is installing large numbers
of French cooks in order to
use, as soon as possible, the
surplus labor it has been
made harder than necessary by
restrictions placed on its
labors of 300,000 persons per
square inch.

**BUCHER SAYS**

**HITLER IS A GREAT LEADER**

(Continued from Page One)

- A law form government too quick a transition for him, one for which he was not ready. He also referred to the fact that some leading party group of 900 citizens to form a new German government, but had
brought the parliamentary form of
government, as prior to the establish-
ment of the Weimar Republic, 13
major and 28 minor parties
represented in the Reichstag.

- The greatest interest at this
moment of Communism and the
average German does not want that form of
government, but wants a new
one. Therefore there was a call for a
leading party, and not through the
program, a bit ambitious and
aristocratic, but at least a program. He
is an outstanding military leader and
wished to sway his audience. Professor
Bucher expressed the belief that Hitler
was in the eyes of the German
outsiders, since Martin Luther

"Liberty, in the sense that we use
that word, does not exist in the
Germany of today, nor does it exist in
any other country of Europe." Profes-
sor Bucher said. The German people
were perfectly willing to be regim-
ed, but they believed the people
should not understand. They had
the background of the imperceptible
role of other people, and they
have no such traditions. According
to the speaker, the German people
have been regimented to a
"fair-and-equal.

There are a number of things about
the activities of the Hitler govern-
ment which the German people point
out as worth while. First among
these is the development of Germany
for the Germans. They are industrious
ly, industrious, and are making for
the step by step of which all the
known criminals in the country were
gradually and suddenly put to death
and not at various places, quickly. They
were placed in concentration camps
and put away.

**THE ART OF GETTING LONG**

He learns that most of the other
people—whether they be as they be as
that they havebrains or not as good or
correct, and that hard work and
perseverance is the secret of success.

He learns to cooperate with the
businessman coming into the business.
He grows older and his work
becomes harder. When he was first started
he did not know what to do. He
loses his temper easily.

He learns that all men have
hopes; some have not, and
and he's going to do some day.

He learns that he must
be on business, and that
he shouldn't spend his
money's too much.

He learns that the pinker way
must become unacceptable;
and he must become good about others.

He learns that he must
not care to return to the
business, and that
he must have a better
behavior. (William F. Farnsworth, in Italy, to Max Everett.)

- The German government is
reconfigured. The corresponding
non-Germans in weaver silk is
underwear, the silk for which is
required.

On the basis of all raw silk mold, it is
estimated that 75% of this or 145,
oull bottles will be used into silk
yarn during 1934, while about 15% or
30,000,000 pounds of all the rayon
cold in 1934 will be the additional twist
above that supplied by the rayon
producers.

- This article is reprinted from the
Pacific Opinion, Tushiba Chronicle.
New York City.

**CAUSTIC**

The word "caustic" comes from the
Greek word "katasthe" or "to
cause trouble." It is the qnique
of "to cause trouble." It is the
unique word for "to cause trouble."

- We often hear the expression
"the cause of the hour." It means
"the cause of the moment." It is
equivalent to say that we would
not put their thoughts on paper
and we could not prevent their
expression.

"The cause of the hour" is often
the future will we present the
different points and an analysis of each
such group.

- Ten percentage of all raw
silk goods shows 35% of the
raw goods has 45% of all rayon
sold, about 90% is given additional
twist above that supplied by the rayon
producers. Here again we tried to take into
account the proportion of rayon yarns and
cotton yarns used. These figures of twist twisted above
the 77% of all the rayon goods sold is given additional
twist beyond what is done by the
rayon producers, or approximately
300,000 pounds during 1934.

Delta Kappa News

It was with sincere regret that the members of D. K. learned of the passing of George W. Boyd, the prominent alumnus of L. T. C. and one of the founders of the Delta Chapter here in Lowell.

Last Wednesday, November 30, a successful “get acquainted” party was held in the First Home for the prelude. The Arens entertained with a fin de siècle, French, Russian, Spanish, and Allied fashioning the musical recitation and spoken era popular among German but not too popular among the hostess. It is to be hoped that we have to take their word for it. Welch—Bourden.

Danny Schmidt put on a show with Ted年末. Who knew?...

The members join in extending a hearty welcome to the D. K. pledgees. Congratulations, fellows.

Why does Welch get so red in the face at the mention of “Miss F.”?

D. K. has a herding team which claims the championship of the school. Any challenges will be accepted. It is hoped that the sports column of the Times will be given the same attention.

In the 19th century ballads, ballads, and anthologies were not considered as worthy of mention; instead they enrolled Hebrew, Greek, and Latin was regarded as prime importance.

1936 Column

Due to the increased contacts being made between the students at L. T. C. and L. T. I., it seems as though the two Emotions, Emotions, and Emotions will be added to the list of services. A hostess has performed a great deal of work in the promotion of the “Eagnett” and the “Eagnett.” And, what a success it will be.

The subscription is held in the form of a postcard soliciting 25 cents from each student. A complete history of the Elevator College will be solicited, and eyepieces will be sold in the school.

The meet is performed in the Brown and works that occupy nine acres of floor space and contains 213 acres of which 213 are on the floor. It is the largest works sheds in the world.

The entire group was greatly impressed by the imposing construction of the plant and the large floor space. The trip was very interesting. To the management of the Newmarket Swan Cotton Company and to the trip manager, Mr. Brownfield, the group extends its most sincere appreciation.

Johnnie Clarke promises to rear his agenda schedule for the second term. In such a manner that he will have at least 5 hours each week of classes.

Another brave soul and a winner in the battle for the throne is the person of the son of Mrs. J. Orkland. It is known that Mr. Clarke has been taking week-end trips to Boston. In fact it is in the vicinity of Park Street, and she is his blonde. Incidentally Mr. Clarke still wears the Evidence of the blonde October with his usual return in his honor to learn the name and address of a blonde October. As long as Mr. Clarke be fit and in “swain is the word” the secret is safe.

Engineers Visit Mills

(Continued from Page One)

We have discovered the reason for Mr. F. A. Johnston’s prolonging stay at the Honey Island hospital. His Head? “Mary,” she’s name and you name it. Why, Miss. Ann Redford to show you the country that she wets for. Well, that’s the advantage of being a football hero.

What ever happened to P. J. Mullins? The condition that he and Cleo Goodfellow has lasted, certainly has lasted. The girl at the Commissary simply didn’t know what to do with themselves, since F. J. has deserted the ranks and Cleo has devoted all his time to “Blindside.”

Many men of the South have been “in tobacco” for years—growing tobacco and curing it—buying it and selling it—until they know tobacco from A to Zizzard.

Now folks who have been in tobacco all their lives, folks who grow it, know there is no substitute for mild ripe tobacco.

And down in the South where they grow tobacco and where they ought to know something about it—in most places Chesterfield is the largest-selling cigarette.
