John F. Kennedy... WHY?

Christmas will be quieter this year. There will be merrymaking and laughter, of course, but for many citizens, it will be hollow and void.

Americans are slowly beginning to recover from the shock that betook us all when we heard that the President had been assassinated. We quickly recovered our composure, at least on the surface, but we have suffered a deep scar and shock, and time alone will heal the hurt, contempt and shame that all patriotic Americans now bear.

John F. Kennedy is dead. His children do not understand yet what this means, and it is better at this tender age that they do not. They must ask longingly for their father, seek his guidance, long for his joviality, his youthful vigor, his company.

They do not understand that their father cannot heed their wishes.

John Kennedy was an intellectual. He was, without doubt, the most well-informed and one of the most vigorous presidents this Nation has ever seen. In him was the power of good, honest leadership, a responsibility to the American people, and an unfailing faith in the principles of a free and democratic society.

"LOOK FORWARD, NOT BACK. LOOK UP, NOT DOWN. LOOK OUT, NOT IN, AND LEAD A HANO"

These words, spoken by Charles W. Eliot when he was inaugurated as President of Harvard University in 1869, have special meaning for us today. During the past few weeks, television, radio, and the newspapers have brought into our homes the tragic events leading to the end of the wonderful career of a Massachusetts citizen of whom we are all proud, John Fitzgerald Kennedy.

This afternoon I attended the funeral service for him, conducted by Cardinal Cushing. It was a fitting and appropriate, a fitting tribute to a career that exemplified "A PROFILE IN COURAGE." That we are leader of the free nations of the world was made evident today by those who came from the free democracies to attend his funeral service. Premier de Gaulle of France; Prime Ministers of Belgium and the Netherlands; Prime Minister Churchill of Great Britain; President Inouye of Japan; Prime Minister Ikeda of the United States; President Kim Jong Il of North Korea; President Harum of Portugal; President de Gaulle of France; Prime Minister of Greece; Queen Frederica of Greece; King Bhumibol of Thailand; President Hatta of Indonesia; Prime Minister Kishi of Japan; Prime Minister de Guzman of the Philippines; Prime Minister de Klerk of South Africa; President Hailif rotates of Ethiopia; and the heads of many other nations. The representatives of 81 nations are here in Washington today. They came because they respected our country; they came because they admired the leader of our country; they came too, because they were shocked that such a tragic event could happen in the United States. As we saw the news, we were moved to do in order to live up to the responsibilities that fall to each one of us in the days to come.

We can thank God that our Founding Fathers wrote a Constitution that provided us with a continuing leadership. One hour and 39 minutes after President Kennedy died, Vice President Johnson took the oath of office as the President of the United States. In our new President we have a man who has had broad experience in the Legislative and Executive Branches of our Government. He came to Washington in a Congressional majority and faced a Congressional minority, and he made it that which he wanted it to be. He won the United States Senate. When he was asked to name a Senate Democratic leader, Lyndon Johnson became the Majority Leader. He quickly

President John F. Kennedy Receives Honorary Degree in 1956

His accomplishments were greater then we presently can comprehend: history will look back and describe him as a great reformer. He will be remembered for the test ban treaty, the civil rights issue, his stand on Cuba, his wins and losses with the communists throughout the world.

He will, too, be remembered as a martyr for peace, as a friend of the down trodden, as a fair and just man. Given a second term in office, his administration could and would have progressed the cause of Americanism and democracy with rekindled strength.

But he is forever freed of the duties of the most powerful position in the world. He rests now, quietly, as a tear stained nation again resumes its pastime before the world. He gave his life for his country. Snuffed out at the peak of his career, he must have desperately regretted that he had but one life to give.

John Kennedy was a friend of Lowell Tech. He received an honorary degree here in the 1950's, while still a junior Senator representing Commonwealth in Congress.

In fifty years or less, the dreams which he tried to materialize for the American people will probably come true. Medicare, equality for our vast and growing negro populous, man on the moon beyond, an international peace corps which he founded—these things will flourish. Never has a President been so responsible for such a completely new trend of thinking.

It is, therefore, for these reasons that the editors of the Tech propose the following: that the previously unnamed new building be named the John F. Kennedy building, and that the yearbook staff dedicate this year's offering towards the memory of his name.

John Kennedy was of our generation—youthful, vigorous and alive. He lived a lifetime in his forty-six years. He asked no more of his country than he was prepared to give. His memory will be forever perpetuated in our history.

DAILY Trojan, University of Southern California

THE TEXT

INTERFRATERNITY IDEALS AND GOALS

A conference of interfraternity leaders, held in New York City in 1917, adopted the following ideals and goals:

1. The ideal of personal improvement, for it helps one to attain happiness and fulfillment.
2. The ideal of understanding, for it helps the student to realize that he can achieve a goal which will bring to his life the highest form of human action.
3. The ideal of brotherhood, for it helps the student to become a member of a social and ethical organization.

SOLUTION:

FRATERNITY

Go Fraternity

Many people have come out and openly attacked the honorable college institutions—the Fraternity. Now, I admit that some fraternity men have their faults but do not other organizations have their faults. The Greek Fraternity is given a fair evaluation so that it may have the chance to stand on its own feet and to be subjected to criticism. We are aware of the good and the bad in the fraternity system, and we are willing to expose its weaknesses as well as its strengths. We believe that the fraternity system is a necessary part of college life and that it should be subjected to continuous improvement.

Let me define Fraternity Week for you as best I can. Fraternity Week is a period of attempted mutual understanding between the pledging and the pledger. It is a period during which a particular pledge is subjected to physical and mental stresses to make him understand the ideals and principles of the fraternity. Fraternity Week is a period during which the pledge is subjected to constant pressure, and he is forced to make a final decision whether he wants to join the fraternity or not.

It is a period during which he is subjected to a series of tests, and he is forced to make a decision whether he wants to join the fraternity or not.

There is no doubt about the fact that the fraternity system is a necessary part of college life, and it should be subjected to continuous improvement. We believe that the fraternity system is a necessity for college life, and it should be subjected to continuous improvement.

On the other hand, every now and then you will hear some unfavorable news or radio reports about a certain fraternity. Some people think that the fraternity is responsible for all the bad things that happen in college life. Such fraternity mistakes are becoming less frequent and less frequent today because the majority of the fraternity men are realizing that a fraternity should be a means of social and cultural achievement and not a means of social and cultural degradation.

Fraternity Week is a period of attempted mutual understanding between the pledging and the pledger. It is a period during which a particular pledge is subjected to a series of tests, and he is forced to make a decision whether he wants to join the fraternity or not.

WANTED: YOUR OPINION

The students' response to the proposal that the Student Council award an annual gift to certain campus leaders has been very apathetic. Efforts have been made by both the TEXT and the Student Council members to quantify the students in an effort to determine if there is any strong feeling either for or against this award. Unfortunately there is no proof since the students have not responded.

Specifically, the proposal stated that an annual award of an alumni gift be given, out of general student funds, to the President of the Student Council and the Editor-in-Chief of the TEXT. However, the proposal is open to many alterations. Possibly, recognition of the alumni effect would be more fitting—an every-four-years award for excellence in the role of student leader. There are many variables in this decision.

The members of the Student Council have refrained from voting on this matter to date because they feel that more opportunity to solicit student opinions is worth while. Therefore, it is requested that any student having an opinion as to the propriety of this proposal contact the Council representative, class president, or any Council member.

SERNOR NOTES

The Class of 1964 is already underway with the plans for Senior Week and Graduation. At the last meeting, the class decided to hold graduation exercises at L.L. Memorial Auditorium by choice rather than chance. On the day of graduation, all students are going to have a bittersweet goodbye for parents and friends. The night before, we are going to hold a Senior Dance at one of the nearby Country Clubs.

More烃ly the seniors should be planning for interviews for Placement Service. The interview should be with Mr. Taylor, the Placement Director. He has a brief interview for each student and the Placement Service is responsible for the adequacy of the information given.

Many ideas and plans are still up in the air, but things will really start rolling with the next meeting. Watch for announcements concerning the plans for the coming years.

THE INDIVIDUAL'S SPORT

The Barbell Club is sponsoring an "ODD LIFT" meet in April. The possible lifts will be the bench press, dead lift and the squat. Weight divisions will assure everyone fair competition and a trophy will be given to the best lifters. Start training now, the club hopes to see strong competition between the powerful fraternity and splitedge freshman. The weight room is open daily from one to five, and on Saturday from one to three. Membership is still open in the barbell club to those who want to take a sincere interest in it. Contact Box 29 if you have any questions or are interested in the club.
A well planned wardrobe is the only real guarantee of a well-dressed appearance. A common mistake made by young men is to buy clothes that attract them without considering how they’ll fit in with the rest of the group. Your “Wardrobe holocaust” doesn’t mean the clothes you’re wearing are wrong. Just that they don’t fit in with the rest of the group.

NATURAL SHOULDERS, NATURALLY.

The natural shoulder silhouette remains the outstanding fashion favorite among young men this Fall. This fashion, called “Raw Shoulder holster,” is followed by the three button models, but the influence of replicas of New Frontier styling has continued to become popular. Trousers are tapered and pleated.

THE RISING HAIRLINE—Is it a personal presentation problem you have to face yet, or an indication of the big rise in popularity for hairline stripings in your church? In clear, this Fall, narrow off your hair, or else face it, as against every color background, but particularly gray. Gray, seen in a wide range of tones from light to dark gray, forms an interesting combination with blue, black and black, and is the fashionista color in natural shoulder holster. You can have a split suit with gray, and a suit, always with a suit, and a good fit for your basic dress suit in a dark blue. Claret gray, worn with blues and grays, fashion excitement for Fall is generated by large mitten plaid patterned suits, and a street suit in the old world, woollen blends colored.

SEMIDRESS STRIPES—Describe the wide range of big hire suits in dress shirts this Fall. These suits, for highest interest contrast with your solid color suit, are bigger and wider than ever, and fit into the semi-dress, less-than-a-duty category. Red and white is the front-ran ning stripe, which is an excellent color for the white and white and white and olive striping. Definitely dressier are the plain white and solid color suits. The first choice of dress shirts to coordinate with the new hairline stripeponents. Widespread collar won’t go with your natural shoulder suit. Choose a medium spread bottom-out or a snap tab collar.

TIEING THE KNOT—On your fashion package doesn’t simply end with matching neckwear colors to your suit. Not only color, but pattern must be balanced with your cut and shirt. Natural shoulder styling calls for regimental neckwear, and regimental stripes are getting hold and larger to match new wide striping on shirts. For a change of pace, and still in step with your natural shoulder suit, take a look at the mated dark tones in new printed figures on silk, felted or wool chals ties.

FROM THE GROUND UP—Is the way to build anything, including a well-dressed appearance. To coordinate with all your naturally tailored apparel, your natural shoulder undergarments should include a pair of dark red cardinals or cordovan or corduroy color suit flashfronts, and a pair of black slip-on or lace-front models in either plain black or color combinations. Suits to pick ribbed necks in matching and coordinating colors.

TIPPING IT OFF—Is best done with a hat, get with a wide brim of vous-vous hair. You’ll complete the suit, natural look of your wardrobe, and be in with the other ragtops of the season. Stick to plush ribbed necks in matching and coordinating colors.

OUTDOOR WEAR, FORMAL WEAR, SKI WEAR, and much more... you can all come up in the months ahead. Outdoor wear next time. See you then.

VAN DUSEN ELECTED

Dr. Edward B. Van Dusen of Penn State University was elected president of the American Textile Education Association, for the current session 1936. He is one of the two presidents of Penn State University, and he will work closely with the principal of the Association and most excellent a fine group of the men.

In some subject he was charged of the entire session program, and was thought to be the only man in the field of industrial engineering with a firm background in industrial engineering.

His wife teaching background included high school schools in Maine, South Dakota, and at North Carolina School of Industrial and Labor Education in Providence. N. Y. For six years prior to joining the University, he was dean of instruction at the University of Maine School.

George Washington gave out jacket-like pins with a picture of his bicorn on the front—and a mirror in back. Worn by better dressed around their necks, they could turn the gauntlet around to use the mirror when a curl popped out of place. Gay buttons were buttons infilled GW.

For the first time in an age, all the men voted with the rest of the nation. Before 1900, the balloting in the state was not a measure of opinion.

The exception was granted years ago when bad roads and narrow streets had to be plowed with horses to get to the polls in the late Fall.

O'BRIEN MAKES COLONEL

William "Bill" O'Brien, ROTC Wing Commander, has recently been promoted to the position of full color colonel in charge of all the functioning cadets of the cadet corps.

Bill comes to Tech from Lawrence, a commuter during his tenure here. Educated at Lawrence High School, he came to Tech after graduation where he is now completing his curriculum in physics majors.

He has served as a member of the American Institute of Physics, a member of the Phi Delta Theta fraternity, and has participated in the Newman Club. He is a member of Delta Kappa Phi fraternity, and serves Tech as a student body officer, endorsed doubly by his fraternity and those of other fraternities for "we're the best." Still, I believe he is in the best fraternity on campus if not in the whole wide world.

Fraternally yours, JUNIOR.

ENGINEERING EDUCATION — WHERE DO WE GO FROM HERE?

by Dr. Harry E. Stackman

There is hardly any subject matter as controversial as an education question. It was such a question answered in 1924, two new college roads without end, but where does one find two new college roads? No major division in education depends upon the presence of a major division in education. The grant funds are located on firm ground, but is there any real consensus? As an example, what would happen if we gave the material wisdom that we possess in our schools to children, and instead taught them? OH, IT'S TRUE! This one result of this might be that, in the absence of the student, we would be able to absorb a large body of material.

THE NEED FOR LEADERSHIP

Leaders, who have made the experience, are often selected because of any special abilities, are often selected because of the ability to command and to lead. The ability to lead, the ability to attract and to inspire others to action, are qualities that are essential in any college or university setting. Even when the course titles are exactly the same, the course syllabus in one college may have greatly to do with that for another college. Thus, under the course title “Teaching Theory,” one college may have a special emphasis on the teaching of science, another on the teaching of leadership, and so on. Leadership is the ability to attract and to inspire others to action.

The concept of leadership is a topic that has been carried by some of the finest authors in this field. It is, to all teachers for whom teaching is a serious and difficult issue, the most important aspect of leadership.

American colleges, to be fair, do not have an individual college. They are the product of the individual college. They are the product of individual colleges. They are the product of the individual college. They are the product of the individual college. They are the product of the individual college.

The concept of leadership is the ability to attract and to inspire others to action. The ability to attract and to inspire others to action is a special emphasis on the teaching of leadership. The ability to attract and to inspire others to action, is to attract and to inspire others to action.

The American college, as we have known it, has been the product of the individual college. It is, to all teachers for whom teaching is a serious and difficult issue, the most important aspect of leadership.

WHO'S WHO
IN
American Colleges & Universities
Student Council Chooses Honored Twenty-three
in America, Pipe smoking is considered an outdated sign of masculinity — in fact, some men and women carry pipes in their breast pockets just to impress women.

But elsewhere, one of the signs of masculinity is playing with dolls (among the Tchambuli tribe); and in many primitive societies, when the wife is giving birth, the husband stays at home and pretends to be in fear and shock and guards all day some place that the mother will be; and later on, it's considered in the anthropological sayings extremely admirable. It depends on where you live, what people around you have been led to believe.

Surprisingly, psychologists say that it's really best for men to have some feminine characteristics; and best for women to have some masculine characteristics. A man shouldn't be so tough that he's unresponsive; a woman shouldn't be so feminine that she's unresponsive; she should be "masculine" enough to handle some masculine roles, and he shouldn't be so masculine to be completely unresponsive to feminine roles. Studies have shown that the relationship goes in the same manner; and the breast-feeding reaction may have quite a few female traits.

Though, obviously, we do know a great deal about masculinity and femininity, much remains to be answered. Take pipe smoking. Surveys have shown that a woman's pipe is usually larger than her husband's, and that women smoke more pipes in a year than men do. Why? When a group of researchers went to areas where there was no smoking, they found that there are some of the answers they received.

"Few pipe smokers are strong. They reach for a pipe to relax. A pipe is a good female comfort. It's a good way to think about a mild pipe smoke. It's a good way to think about women and children, and friendly, sort of like "Her hearts at home.""

"I have never seen a "sissy" type of pipe, so what do you think of a woman smoking a man's pipe?"

If you don't think you yourself are projecting a suitable masculine image, pipe-smoking might be a new adventure. If you are into sports, you might consider taking an interest in sports, engaging with some adventure books. And just how is your masculinity image? For a sketchy idea, see how you do on this psychological test.

1. These word puzzles should remind you of your "gun" or "mouse?"
2. How do you think about a "sword" or a "tomato?"
3. If you were a woman, I would expect you to be a woman...and a woman.
4. If I'm like Lewis Carroll's Alice in Wonderland, I would like to be a soldier.
5. Am I Moses or Noah? Am I the "Spartan" or the "people?"
6. Are you looking at a "man" or a "woman?"
7. Do you prefer people using "words" or "sounds?"
8. Do you prefer to use "tools" or "furniture?"
9. Do you feel you could "be a soldier?"
10. If you were a woman, would you be a politician rather than a businesswoman?

Check those things you dislike and those you like.

You may see the edge of a precocious type.

There will be an eagle on the moon

The breadth of Pratt & Whitney Aircraft programs requires virtually every technical talent... requires ambitious young engineers and scientists who can contribute to our advances of the state of the art. Four degrees! It can be a B.S., M.S. or Ph.D. in

Career boundaries with us can be further extended through a corporation-sponsored Graduate Education Program. For further information regarding opportunities at Pratt & Whitney Aircraft, consult your college placement officer—or write to Mr. William L. Sloane, Engineering Department, Pratt & Whitney Aircraft, East Hartford, Connecticut.

SPECIALISTS IN POWER... POWER FOR PROPULSION—POWER FOR AUXILIARY SYSTEMS, CURRENT UTILIZATIONS INCLUDE AEROSPACE, MISSILES, SPACE VEHICLES, MARINE AND INDUSTRIAL APPLICATIONS.

Pratt & Whitney Aircraft

CONNECTICUT OPERATIONS EAST HARTFORD, CONNECTICUT

FLORIDA OPERATIONS WILM. PALM BEACH, FLORIDA

---

The world recognized trademark—"the PSIA Eagle"—has been identified with progress in flight propulsion for almost four decades, spanning the evolution of power from yesterday's reciprocating engines to today's rockets. Tomorrow will find that same Pratt & Whitney Aircraft engine carrying men and equipment to the moon and to even more distant reaches of outer space.

Engineering achievement of this magnitude is directly traceable to our conviction that basic and applied research is essential to healthy progress. Today's engines at Pratt & Whitney Aircraft accept no limit criteria. They are moving ahead in many directions to advance our programs in energy conversion for every environment.

Our progress on current programs in excitation, for it anticipates the challenges of tomorrow. We are working, for example, in such areas as advanced gas turbines...rocket engines...nuclear power—all opening up new avenues of exploration in every field of aeronautics, marine and industrial power application.

WHO'S WHO

Last Thursday's Christmas convocation served, as usual, as the scene for the announcement of who's who selections. This year the Student Council selected twenty-three campus leaders to be honored by inclusion in Who's Who.

The USPS and List of Honorees on this list is one of the top honors on this campus. Students' names, along with brief biographies, appear in a nationally published book issued annually by Who's Who in American Colleges and Universities.

The Student Council selects the recipients of the honor from among those juniors and seniors who submit resumes to them early in the fall. Well rounded academic achievements are a prerequisite for selection, scholastic, athletic, and extra-curricular excellence being the basis for a name system of grading. Students outstanding in all are generally not seriously considered. Students excelling in two of these fields constitute the majority of the recipients, while students outstanding in all three are very welcome.

This year's selections are: Arthur Alpert, a scholar taking the four-year curriculum in only three years, has a very active in fraternity functions and in Circle K.
Alfred Anderson, former class president, now holding editorship on both THE KEY and THE TEXT, is the only one of last year's Who's Who who has included in last year's Who's Who.
Henry Bajjan, Student Council vice-president and a member of the fraternity, is also a scholar.
Ralph Cook, active in class activities, now represents his class on the Student Council.
Al Estrada, former class officer and Latin American Society officer, has a high scholastic average.
Morris Frimer, Hill president and former Latin American Society president, is an active fraternity brother.
Narvan Levite, class president, has a high scholastic average and is a committee chairman of the IEEE.
David Lewis heads the E.E. societies: IEEE andEta Kappa Nu.
Arthur Lowell, Secretary of the Student Council and President of the Chemistry Club, is on the KEY staff.
Philip Morin, President of Circle K, is vice-president of his fraternity.
William O'Brien, Distinguished Military Cadet and Cadet Colonel, has received the Chicago Tribune and Air Force Times awards.
Stuart Pearce, class vice-president and fraternity, has a high scholastic average.
Doug Stagno, an active member of the Plastics Society and on THE KEY, is active in fraternity affairs.
Fernando Romero, soccer star and fraternity treasurer, has a high scholastic average.
Myron Shevelow, scholarship holder and contributor to THE TEXT, is the bookstore manager.
Alphonso Wander, bank president of THE PICKOUT and THE TEXT, is a fraternity president.
Matthew Slive, treasurer of the Student Council, is also the treasurer of his fraternity.
Edward Waksnowicz, former class president now fraternity president, has received the Chicago Tribune Award.
Peter Woog, President dorm proctor, soccer player, and former President of the S.S. C., representative, is now President of the Student Council.
Theabove men are all seniors. There are, however, three juniors on this year's Who's Who. The first, class president, who class and his fraternity, has a high scholastic average.
Edward Faber, fraternity officer always on the Dean's List, is Managing Editor of THE KEY.
Lucien Brunelle, Distinguished Cadet, is a two-year class president.

PEACE CORPS NOTES

The Peace Corps arranged another two-week training program in the agency's Jesse. The corps' selection program for the Corps is a five-day training at U. S. colleges and universities. A total of thirty-two volunteers from better make this training will be held in February.

The Peace Corps Director, Sargent Shriver, has stated that all the volunteers will participate in all the training.

In past years, over 400 volunteers have completed the three-week training programs. Shriver said that in the past, the volunteers were expected to continue to be the beginner inside this year, the corps said that the group will be a useful and important one in Latin America.

The corps' spring group will be mid-year graduate of the U. S. colleges and universities. They will be eligible for any training assignment, most at the area of their special degrees, but not to be assigned to anything outside of the spring training program.

The spring training programs are open to all volunteers, except those who have been hired in the Peace Corps.

The corps' spring training programs are open to all volunteers, except those who have been hired in the Peace Corps.

Other Volunteers will be enrolled on a five-year program, the corps' spring training programs are open to all volunteers, except those who have been hired in the Peace Corps.

WHERE DOES GOLDWATER STAND?

One of the most interesting days these days is to try to predict what Goldwater will do or say next. This can be quite interesting, depending on one’s political color.

He claims he isn’t, he’s just “popping around the country,” but then why did he reserve the entire fifteen floor 151 room suite at the Mark Hopkins Hotel in San Francisco for the 1964 convention?

Goldwater himself is not sure of all the statements he has made; he has hired a computer to help him analyze all the myriad comments he has made and keep them straight. So we don’t conflict each other. However, the statements he has made do contradict each other in places.

One of the positions was on the graduated income tax. In The Conscience of a Conservative he writes, "Government has a right to claim an equal portion of each man’s wealth in order to protect life and call the general welfare. But what he wants now, he tells the Congressional Quarterly, is a complete study of the problem."

Back to old political doo-dahs.

His inconsistence is quite glaring in the test ban treaty debate. He has called for a retaliatory nuclear test ban. Now he is for a non-retaliatory test ban.

If his statement is for an unconditional and unverifiable notification to "removal of the Soviet military forces from Cuba;" on page 155 of the Congressional Record he said that the rejection of the treaty proposal means "acceptable even to his harshest critics."

But on page 1620 he says approval of his reservation would not alter his opposition at all. "It would not make the treaty one more acceptable to me," Confusing, to say the least.

Goldwater is also against Federal farm price supports, as well as being in favor of right to work laws. Given the present political realities, he could expect to get elected opposing the farmers and organized labor is inseparable. These groups have an awfully lot of political power, and to oppose them would mean his defeat.

The Federal Government should do as little as necessary. Goldwater says, in subsidizing people. They should learn to depend on themselves.

In an interview with the Marquis, Dr. John Hay, the Editor of the Marquis, says, "If tests are stopped out in the Reporter magazine, "In fiscal 1961, federal tax payments by Arizonans, come to $351 million. At the same time nearly $16,000,000 of federal funds flowed into the state."

In Phoenix, on Dec. 26, 1961, Goldwater had come to the "pleasure," to quote the Marquis, as a place in the United Nations."

This October, commenting on Rockefeller’s charge that Goldwater would take the U.S. out of the UN, Dr. Goldwater said, "I’d say it."

It is thus quite difficult to establish Goldwater’s views. Now with President Kennedy gone, it does not appear that there is a leader of the Democratic presidential party who will be as strong as Kennedy was. This would seem to make some pretty odd editorial writers. After all, and with all the more reason why careful consideration must be given to his views. Caution is a conservative characteristic, yet Goldwater doesn’t have it.

He has also been labeled as the "phony" with all the negativity and certainty, and is attractive and honest. But does he have the patience, the wisdom, and the understanding so necessary for a great leader?

COMMON SENSE IS WINTER DRIVING

But summer habits NEED CHANGING, TOO

Here’s your winter-driving 10:0

Do you know what to do when faced with winter weather? Or do you drive in December as you did in May, trusting to luck and some common sense?

The fact is that new driving habits are essential as anti-freeze in your car. This is true for every Dynasty. Dr. John Hay, safety expert Paul Kearney, When it comes to stopping your car, usual drivers may act in snow or wet conditions as they do under white-terrified conditions. You should change summer driving habits because winter weather is so much more serious...

Blazing simple problem of winter-driving—probably the blazing simple problem is the problem of driving in the car in rear!

In good weather, "telemarking" is a pince nez accident. New York Times photographer T. J. Branch photographed the scene. On a recent Sunday night, he addressed the AIP student section on careers in astronomy and astrophysics.

On Tuesday, Dr. Blanco spoke at the Student Union at which he presented the results of his research. His topic was "the structure of the universe and in the life cycles of stars."

During the two-day interval, there was an opportunity for conferences with individuals representing different aspects of research or teaching staff on such problems as such as the role of computers, research and curricula.

AVS JANUARY FILM PROGRAM

THE 169th Practice

Dartmouth has the six easy members of the stub-group actually look.

The 169th practice, the last of last weekend. Dartmouth has the six easy members of the stub-group, formally called Interfraternity Basketball League, is finally off and running. Because of the great demand for use of the new

1. The league schedule had to be cut from its usual 10 games per team to 5 games per team. This move has a greater importance on each game.

The first game of the year came Wednesday, when one of Dartmouth’s five new, underdeveloped league teams faced the-clubs. 4 and are off to a fast start returning the two-game losing streak. Alto off to a good start is D.K., who helped guide the league in scoring.

O P led 15-10 at the end of the first quarter and 29-17 at the half, widening their margin to 14 points after Paul Philips made his first basket in victory. High scores for O P were Walt McInerney with 17 and

Lincoln with 15, while the Independents were led by Cam Schrom. Only 19 points on six baskets and seven free-throws.

D.K. led by only 14-11 at the half but the pressure on the Independents was on top of them. They pulled out to a 21-11 three quarter when the Independents were in victory from there. They were led by Al Brown and Ken McColl with 8 points respectively, while the leading scorers for Pi Lam were Jim Caro and Bob Wong who each had eight points.

The standing, as of Dec. 9, are:

W L
O P 7 0
Delta Kappa Phi 7 0
Pi Lam and Phils 0 0
Freshmen 0 0
Pi Lambda Phi 0 0

HOCKEY CLUB

The Hockey Club is moving along on the development of their recent accomplishments has been the laying of the groundwork for future practice. The place is the Amherst Union

where Saturday night, Saturday was one of the only times available to schedule a game. The league
division for 20 consecutive games, each game is scheduled to be played each Saturday.

The club will still have to supply their own uniforms but the Athletic Committee has made available a budget. On their
dover rush for 20 consecutive games, the club
gone yard to work and set-up practice periods from December 3 through March 12.

Because of the high interest in the other club practices periods will be scheduled to

rake. However, as yet, no games have been scheduled.

Fifty six turned out for the practice last Saturday, Coach Harrington put the boys through a rather long practice on the ice. Two or three practice exercises for about fifteen minutes of each of their practices was followed by an hour and a half of conditioned work. Coach Harrington laid out what he felt to be

scientifically sound exercises to be completed. These exercises included the

important strokes and way to develop physical endurance and strength, two

weeks, followed on another day in which a few games were the order of the day.

D.K. with Bob Twigg, ’65, have been more concerned with two groups between 4 and 6 daily.

Last year’s team remains intact, subject to the ravages of the usual winter derelicts. The A Team, captained by Jack Dorsey, will star Ken Melmon and Bob Good, who will most likely be the leader of the team.

The SBX conditioning program, for exercises of endurance and enhances the weight exercises. After the SBX testing for back and

hunting and mom stool stair work are the order of the day. Team members, Jim Caro and Jack Durham have been working out hard.

The A Team promises to be experienced and most successful.

THE 8 TEAM

is up for grabs and will be selected from among a group of excellent athletes: Dick Burt, Allen Bilton,

Jim Smith, James Murphy, Dennis Dingle, Don Forest and Dave Mackey who were screened by the members of the team.

is being fought for by Paul Kennedy, Jack Dorsey and Bob Nault. Jim Caro and Jack Durham

have been taking care of the team.

is expected to be a success.

INTERFRATERNITY BOWLING

The big excitement this week was the 169 games bowled by the members of the Interfraternity Bowling League. This game enabled
to be bowled in the best four for the

divisional honors with a 120.5 game average.

J. Hoff of Pi Lam fell to second place with 111.4, while D. While of O P moved into the top five to third with a 112.7 game average. F. Robinson of D.K. maintained fourth place with a 109.0 average and A.

Stein of Pi Lam moved back into the top five in fifth place with a 106.1.

In last week’s action, top spots were held by Pi Lam. The last game of the week was the big one that decided 2 points for Pi Psi. Second place O P moved into third place with 112.9, taking 4 from last place D.K.

Win Lost
Pi Psi 12 8
O P 12 8
Pi Lam 8 12
D. K. 8 15

A. Lincoln, O P 120.5
J. Hoff, Pi Psi 117.4
H. Johnson, D.K. 114.7
D. White, O P 112.9
F. Robinson, D.K. 109.0
A. Stein, Pi Lam 106.1

MODERN JAZZ QUARTET AT KREGE JANUARY 10 The Modern Jazz Quartet will perform at Krige Auditorium, M.I. University on January 10. It represents the second all-black professional group to visit the College in this century. The quartet's Guest Artists Series recently

The group's original performance has already been sold out. A reservation is required for the tickets.

The sponsors announce that all ticket will be sold and that no reservation will be required for the concert.

The reservations for the concert are now closed, but tickets are available for the concert. Tickets are available for the concert.
Spirits!!

The Volleyball team put up another decent with some fancy ball on the part of all the participating. This year we see the return of several new teams, some of which will make the conference more interesting. Our team will be the only one that will see the return of several new teams, some of which will make the conference more interesting. Our team will be the only one that will make a strong showing in the conference.

The team is led by Captain Mary Smith, who has been a member of the team for three years. She is joined by co-captain John Doe, who has been a member of the team for two years. The team also includes several new members, including Jane Brown and Mark Smith, who are both first-year students.

The team has been working hard in practice, and the coaches are confident that they will be able to hold their own against the other teams in the conference. They have been working on improving their serve and return of serve, and the coaches believe that these will be their two strongest areas.

The team's first conference match will be against Team A, and they are looking forward to the challenge. They believe that they have a good chance of coming out on top, and they are excited to see how the season will play out.

Tech tops the state 80-62

Terriers start strong for 3-2 record

Coach Jim Oliver's hoop team started the season off with a bang, topping Babson 89-86 and since then have held the season mark for victories and two defeats. The other victories were over New England College and Lowell State, both of the defeats were.

Big Leun Uvodidbe led the Tech team in first会议, netting 19 points, 8 of which were free throw points. In the second half, Leun Uvodidbe led the Terriers team in all major scoring categories, putting up over 20 points.

In the second game Tech defeated the Denison University overpowers the Nets, putting up 19 points and 10 points in the second half. Big Leun was Gore for the game with 20 points.

The overseas tour continues with the Mus-terings of the Pirates Press, Vermont College, and Babson. Sometimes my experience and a team from the same school at Tech are a great help in playing the sport. This season we have been dormant so far, will have to be awakened if our team is to continue winning.

Tech Topics - The Tech Terriers completed an undefeated exhibition basketball season, winning their only game against Fitchburg State College by the score of 89-86. George Bediody led tech with 30 points, followed by John F. Lee with 19 and Leon Uvodidbe with 17... Ground-breaking for the year, the Terriers center is a starter. For this year, keep your fingers crossed, we need it... Congratulations to Art Car-ner, who had the initiative and drive, with help from Prof. Ken and Dr. McCaffrey, to get the track on the ground.

Errors: We made a couple. The editors are all living writers by the editor. Only the final quote was his, which was written by the editor. Phi Psi News was edited last issue before there are the model fans of Lowell Tech. For that matter, where are the fans? I'm not saying that there weren't any present, but that not only Harvard, but Harvard more than any other in the highest elected office this country has to offer. His belief in participa-
tion made him a model fan.

The Fitchburg football team won its opening game against the state's second best team, the Lowell University. The team was led by Captain John Doe, who had a strong game with 15 points.

The team's next game is against the state's third best team, the Babson College. This will be a tough game, and the team will have to be at its best to come out on top.

The Tech team is looking forward to the remainder of the season, and is confident that they will be able to continue their winning streak.

The team's schedule for the remainder of the season is as follows:

- September 12: vs. Babson College
- September 19: vs. Mount Holyoke College
- September 26: vs. Wesleyan University
- October 3: vs. Williams College
- October 10: vs. Middlebury College
- October 17: vs. Amherst College
- October 24: vs. Tufts University
- October 31: vs. Colby College

The team is looking forward to a successful season, and is confident that they will be able to continue their winning streak.
