Lowell Native Addresses 250 L.T.I. Grads

Our country’s initials, U. S. A., were recited as symbols for Unity, Service, and Allegiance by Baccalaureate Commencement Consecrator Raymond J. Kenney, L.L.B., as he urged 250 graduates of the Lowell Textile Evening school to adopt the three points platform in an address at the closing exercises at Liberty hall on Wednesday night, the 5th of April.

In a lighting attack against complacency, the Lowell native and former evening school graduate of 25 years ago, he noted that “too many people have come to take their freedoms and liberty too lightly and not as something that has been won by the blood and suffering of their countrymen and will have to be maintained in the same manner.

“Although history,” he continued, “great nations have crumbled from within. It is worth while to be watchful,Streams, Rome and modern France. Next in importance to the saving of one’s soul is the saving of liberty and many in the conquered countries wish that they had made in their business as individuals to safeguard liberty rather than following the old adage that ‘everybody’s business is nobody’s business’. 

Bust On Lastarry

“Victory will be our’s, I feel certain, in the near future, but the danger lies in the fear that the people will again become complacent and not give our heritage and protect our rights. A great many fail to realize the sacrifices made by those who in 1775 faced King John on the plains of Bunker Hill to head down the Magna Charta, the base of liberty as we enjoy it.

Mr. Kenney called the present conflict a second status of World War I and told the graduates that it will be won in the laboratories, plants and workshops of the country where the mind has never been greater for men with a technical education. He placed the gathering with a unity in thought and spirit in the interest of our countrymen and nation and complete allegiance to the country in its every need.

In conclusion he dramatically added, “Remember as you go out into the world in April 1942 that it was those qualities that were appreciated in the midst of the parade of Concord and Lexington who bared in 1775 the men of Lowell who took to the streets of Baltimore in April 1861; our men who bared to Cuba. Puerto Rico, the Philippines, and the Pacific air fields.”

As Captain Joseph Wannoz, extreme right, of the air corps looks on, Captain Raymond Flynn, center foreground, of the infantry students, who after a 90 day furlough, will leave the South Station, Boston, for Maxwell Field, Alabama, for their air corps training.

As you think, you travel; and os you love, you attract. You are today where your thoughts have brought you; you will be tomorrow where your thoughts take you... You can not escape the result of your thoughts, but you can endure and learn, can accept and be glad... You will realize the vision (not the idle wish) of your heart, be it base or beautiful, or a mixture of both, for you will always gravitate towards that which you secretly most love... In your hands will be placed the exact results of your thoughts; you will receive that which you earn; no more, no less... Whatever your present environment may be, you will fall, remain, or rise with your thoughts; your wisdom, your ideal... You will become as small or as your controlling desire; as good as your dominant aspiration.

JAMES ALLAN.

NAVY ANNOUNCEMENT

TO COLLEGE FRESHMEN AND SOPHOMORES 17 THRU 19

You want to serve your country! Why not serve where your college training will do the most good?

Under the Navy's newest plan, you can enlist now and continue in college. If you make a good record, you may qualify within two years to become a Naval Officer--on the sea or in the air.

Who may qualify

80,000 men per year will be accepted under this new plan. If you are between the ages of 17 and 19 inclusive and can meet Navy physical standards, you can enlist as an Apprentice Seaman in the Naval Reserve. You will be in the Navy. But until you have finished two calendar years, you will remain in college, taking regular college courses under your own professors. Your studies will emphasize mathematics, physics and physical training.

After you have successfully completed 1½ calendar years of work, you will be given a written examination prepared by the Navy. This examination is competitive. It is designed to select the best men for training as Naval Officers.

How to become an Officer

If you rank sufficiently high in the examination and can meet the physical standards, you will have your choice of two courses -- each leading to an officer's commission:

1. You may volunteer for training as an Aviation Officer. In this case you will be permitted to finish at least the second calendar year of your college work, after which you will be ordered to active duty for training to become an officer-pilot. Approximately 25,000 men a year will be accepted for Naval Aviation.

2. Or you will be selected for training as a Deck or Engineering Officer. In this case you will be ordered to continue your college work until you have received your degree.

After graduation you will be ordered to active duty for training to become a Deck or Engineering Officer. Approximately 15,000 men a year will be accepted.

If you do not qualify for special officer's training, you will be ordered to finish the second calendar year of college, after which you will be ordered to active duty as a Naval Training Station as Apprentice Seaman. Those who fail to pass their college work at any time may be ordered to active duty at once as Apprentice Seaman.

Your pay starts with active duty.

Here's a real opportunity. A chance to enlist in your country's service now without giving up your college training... a chance to prove by that same training that you are qualified to be an officer in the Navy.

DON'T WAIT...ACT TODAY

1. Take this announcement to the Dean of your college.
2. Or go to the nearest Navy Recruiting Station.
3. Or mail coupon below for FREE BOOK giving full details.

After some weeks or months have passed, the outer fiber looks something like this. And the fiber, then, with all the dirt on your clothes, looks like those black ties. To remove dust the air-to-air freecy, the filters are made in thousands of homes—hotels, theaters, public and office buildings, large and small. Here new-tap filters are being installed in the air conditioning system atop a great hotel. And all those systems are fresh to protect you and your children from healthful dust and dirt. To save the homeyou uncle dustings, de-

Mr. Booker: You want to know what would happen if you combine cotton and fiberglass, will it stretch and will it shrink?

Mr. Smith: That's right.

Mr. Booker: The cotton will stretch, the fiberglass won't go at all. Any piece you combine cotton with any other yarn you should use a pre-drawn yarn, a yarn drawn to its maximum length; otherwise, before you are done, the cotton yarn, in fiberglass, in combination with cotton and shoots silk and salt, can add strength, can add fire resistance. It can add only if properly combined.

Mr. Smith: Any use in connection with textile dyeing?

Mr. Booker: There is this interesting thing in the box where you have the problem of loose cloth, drapery. You can have fiberglass leach in cloths in driving towers and they will hold up indefinitely, maintain the ordinary duck used for feeding cloths. They will also resist the assembly of the dye.

Mr. Smith: That would be pre-shrunk?

Mr. Booker: Yes, TextileCorporation in Toledo have an interesting process. They use fiberglass cloth in all their weaving looms. They tend them, think, in a box of about three to five and don't have to turn the dryers down at any time. They can run it through, because 98% doesn't mean anything to fiberglass.

Member: Has this fiberglass been successfully used by itself or with other filaments in knit fabrics?

Mr. Booker: No, and I can't answer your other question. It seems, though, that the abrasion action of the forming needles causes the glass yarn to break up. That might be some good day because of treating yarns we are able to overcome abrasion problems.

Member: I've seen fiberglass before. It's used around here.

Mr. Booker: It is in all these that you have not seen fiberglass. In 98% of the applications of fiberglass, it is hidden in the walls of your house, yours, room, refrigerator, or in the walls of pipes, and it does not have strength, as is a fact, a worker and a worker.

There's a satisfaction in knowing that the 6% revenue tax you pay on every pack of twenty cigarettes is doing its bit for Uncle Sam

And, when you buy Chesterfields, you have the satisfaction of knowing you are getting a superior blend of the world's best cigarette tobaccos. This famous blend gives you a smoke that is definitely milder, far cooler and lots better tasting. Make your next pack Chesterfield.

ALUMNI News Flash

Here is a new item for the TEXT

The guest speaker was introduced by Professor Louis A. Obery of the school faculty who the producer had entered into the hall and had been given an address of welcome by Charles H. Fair, Jr., president of the school, who also presented the authorities. The president told of the growth of the evening classes which have grown from a mere six subjects in 1884 to 24 subjects for the past year, included in the group presented courses were 193 from Lowell, 24 from Lawrence and 75 from numerous cities in this part of the state and lower New England. Students were from cities and towns as distant as Atlantic, Cambridge, Winchester, Peabody, Savannah, Salem, Milton, Marsh- head, Manchester, N.H. and Nashua, N.H. Several of the graduates received more than one certificate and number were receiving their fourth or fifth.
