The Social Committee recommended that the Senate raise the tuition costs by $2500, but the Senate decided to vote on the proposal after more discussion. Some members of the Senate expressed concern that the increased tuition would lead to a decrease in enrollment, while others argued that it was necessary to keep up with the increased costs of running the university.

The Senate also discussed the possibility of creating an all-women dormitory on campus. This idea was controversial, with some members arguing that it would create a segregated environment, while others believed that it was necessary to accommodate the needs of female students.

A third issue discussed was the possibility of staging a play on campus. This idea was well-received by the Senate, and it was decided to proceed with the planning.

The Senate meeting was adjourned after a vote to approve the budget for the upcoming academic year.
But This Is Lowell Tech?

By Frank McGlynn

Come now, Freedom calls! Return, breaks of the dawn! Give your hearts, frame your answer, glory in the storm.

Adriene. Adriene would have made a great roommate but I wasn’t assigned to Emma. Can’t expect accuracy from Tech.

But I did go through the whirling speeches, catching up on sleep, as well as the times. Our first few nights were spent busy with movies and movies- but Wednesday’s “to be announced” was never announced.

And we had entertainment enough Wednesday. It was a comedy and writer of 3 Academic Awards, "Registration," starring Mandel, Carter, and Happy Weather - with a special appearance by Broken Peel, God, how I like beating down a sweaty Back.

Remember Mr. Pau, our calculus teacher in high school? He said "Thewa" was one of the better calculus texts. We did pretty good in this class.

Well, when I finally opened my eyes at 8 AM that morning I was feeling as good as what the sum of 2h 3b 3h was 26h ago with MA 133 and I’m getting 7b 3h 3h in MA 133. But it’s just as well - we can’t get absolutely Saturday.

The mass excess is this weekend. Can’t take too much of nothing to do at night, so I’ll leave. See you then.

Open Communication a Good — SPEAK OUT

On any campus, there is only one main media, through which communication can be achieved and maintained — that resource is the student newspaper, at Lowell Tech, the Text. With this college growing at the fast rate that it is, the importance of keeping channels of communication open in greater than ever. If no one speaks out about their opinions on school issues, these unvoiced situations are allowed to continue so an, incompetency prevails, unperceived because no one acts against it.

There are always failures to avoid faulty situations, but a totally apathetic attitude later on only means that one has given up trying to improve things. In that case, he shouldn’t complain when he’s that one that’s hurt in the end because no one expressed themselves openly or taken the initiative to do something about an issue he’s not satisfied with.

The best way any student can express his viewpoints is to state so in a letter to the student newspaper. This has received many valid criticisms and complaints about school issues in the past. We invite any and all letters from students and faculty members.

Articles will be published without censorship. We hope that this will encourage those to speak out who haven’t entered openly in the past and also to keep the people writing to us who have before. Don’t think because you’re a freshman or because you don’t have a full background on an issue that you aren’t justified in making your complaints known. Too often, people are afraid for these reasons or probably that their article will receive a retent. We can’t stress enough the importance of open communication and understanding between members of the LTI community. This policy, hopefully, should help to give the students a greater insight to just how the administrators of LTI view the problems of this school.

JUNIOR CLASS WELCOME

On behalf of the class of 1975, I would sincerely like to welcome you, the Class of 1977, to Lowell Tech. OK you’re here now, but you still haven’t made it all the way. Your college life is going to be what you make of it. Get involved with the Student Government or some other active student organization. This will help to break the monotonous of studying. If you are the athletic type, the school has a fine intercollegiate program in almost every imaginable sport. If you have political aspirations, freshmen elections are just around the corner. If you are a literary white or even a snob, the Text can use you on our staff. If you like ski or even want to climb the Matterhorn, get in touch with the Alpina Club or the Ski Club. If you like leisurely Sunday drives through the countryside join the Sports Car Club. If you want to be remembered at the end of four years here you can work for our yearbook; the PICKOUT. These activities are not just for the

requests

Requests

Volunteers

The Bishop Markham Tenant Council Inc needs volunteers for its tutoring program.

The program is based on the "Big Brother, Big Sister" concept. One child for one tutor. One hour, on a day a week.

For the past three years, we have successfully run this program. This was mainly due to the wonderful response from our local college students.

For volunteers or information, call 1-458-2873, Mrs. Duve. The children involved are in grades 1-8.

CLIP AND SAVE

TECH HAPPENINGS

For the Week of Sept. 10-13

Monday, Sept. 10
10:00 — Newman Center Open House. All day until 11:00 pm.

7:00 —みたい STAFF MEETING in the MULTIPURPOSE ROOM. All old and New (newcomers' welcome) Staff members should show up.

Tuesday, Sept. 11
18:00 — Newman Center Open House. All day until 11:00 pm.

12:00 — TEXT STAFF MEETING in SUB 426. All new people interested in working for the newsletter should come to this meeting.

12:00 — Amateur Radio Club meets in B-412. All Welcome.

4:30 — Candidate for LTI Men's Varsity Bowling Team report to Brunswick Lanes on Pawtucket Blvd. Team veterans should report at 5 pm.

7:30 — AVS MOVIE OF THE WEEK in Cammock Hall. LTI LD's req'd.

Wednesday, Sept. 12
7:30 — AVS MOVIE OF THE WEEK in Cammock Hall. LTI LD's req'd.

12:00 — ALPINE CLUB MEETING in room K-207. All interested will be made welcome. A full plant will be made.

12:00 — SPORTS CAR CLUB meets in 2nd floor lounge of SUB.

12:30 — TECH PLAYERS meeting in rm. 411 of the Student Union.

4:30 — Candidate for LTI Men's Varsity Bowling Team report to Brunswick Lanes on Pawtucket Blvd. Team veterans report at 5 pm.

7:00 — RESIDENCE MEETING in Senate Conference Room on SUB-4.

Saturday, Sept. 15
2:00 — SOCCER — LTI vs. DUKE at field behind Costco Gym. Come and support your team.
Drug Abuse

Part 1: General Questions

What is a drug? A drug is a substance that has an effect upon the body or mind. This can be a temporary or long-term effect. For this reason, during the next several weeks in The Text we will deal primarily with those drugs which are the most widely abused because of their psychoactive, mind-altering capability. These drugs differ in their potential for physical harm.

Are all drugs harmful? Any drug may be harmful when taken in excess. Some drugs can also be harmful if taken in dangerous combinations or by sensitive (allergic) people in ordinary or even small amounts.

The fact that many drugs will produce beneficial results has led some people to feel that pills will solve all problems. Drugs that affect the mind can have subtle, obvious side effects which can be immediate or may only become evident after long periods of continuous use.

What can you do to help a friend who becomes involved with drugs? You can be factually informed about drug abuse.

If the user wants help, mental health professionals or school doctors may be contacted. Community groups such as crisis intervention refers services andhotlines can direct users to appropriate programs. Various types of treatment programs are becoming increasingly available, and these individuals or agencies should be able to provide either services or referrals to an appropriate resource.

It is possible to obtain medical help without cutting legal penalties. A certified physician or psychologist can generally assure patients that any description of drug abuse problems will be kept confidential. Persons actively under treatment are usually assured of legal safeguards relating to the confidentiality of their treatment.

Why are drugs being abused today? Drug abuse is not a new phenomenon. Drug-taking and drug abusing have been present for years in the United States and other countries. Many countries temporarily allow their users to create limitations, to lessen depression and feelings of alienation, to escape from themselves or to experience a temporary state of euphoria. Such use of drugs, of course, does not produce any significant improvement in the problems of the individual or society. Those are many reasons that are not set forth to account for the current epidemic of drug misuse. Some of the reasons frequently offered are: 1. The belief that 'medicines' can solve all problems. 2. The widespread access to various drugs. 3. The hoped-for enjoyment of drug effects. 4. The 'pleasure-pressure' which leads to individual, especially young people, to conform to current styles in behavior, entertainment — and drugs. 5. The search for different perceptions and ideas within some persons believe they can obtain from mind-altering drugs. 6. The use of drugs in a similar role to that of alcohol in a normal context. 7. The manifestation of some young people’s dissatisfaction with their position in the prevailing social system, making them feel that there is a lack of meaningful alternatives to drug using behavior.

How do you identify a drug overdose and what can you do to help? Overdoses of the hallucinogenic or narcotic drugs are usually recognized by stupor along with difficulty in breathing. Medical assistance should be brought in immediately. First aid measures that can be taken while waiting for medical help include artificial respiration and doing everything possible to keep the patient awake; for example, cold showers, waking him up, etc.

Overdoses of the hallucinogenic and stimulants lead to the so-called passive reaction. The individual may be hypersensitive, agitated, frightened, or hallucinations, and believe that people are attempting to hurt him. It is very important that all concerned remain calm and reassure the individual that he will be all right. Explain to the individual who and where he is and that his feelings are disregarded and will subside may be helpful. Help should be sought as soon as possible and is usually available from community drug hotlines, drug abuse treatment centers, and hospital emergency rooms.

Can the effects of drug abuse be passed on to the unborn? The taking of any drugs without careful medical supervision during pregnancy is extremely risky. Some habits born to heroin and hallucinogenic-addicted mothers have shown withdrawal symptoms. Not enough is yet known about the long term genetic effects of drug abuse and the implications of this for the unborn.

Do drug abuses take more than one drug at a time? Multidrug or poly-drug abuse is an increasing phenomenon. Many persons who abuse one kind of drug will abuse other kinds of drugs as well. Some say they are looking for a different feeling or reaction. There are some individuals who will play drug mixing games by taking a combination of drugs or a mixture of unidentified pills. In many instances the supply and the amount of available drugs significantly influence which drugs are being abused.

Why do psychoactive drugs have such a wide range of effects upon different users? The effects of mind-altering substances are related to the expectations of the user, the setting in which the substance is taken, and the amount of the drug. Mind-altering substances can vastly have different effects upon different people because each drug can release the viewer's individual personality traits that are

Let Me Take You Higher
by Plant and the Family Stone

After three years of writing our Friendly Column we finally graduated from Lowell Textile Institute. Being a graduate from Lowell Textile Institute in the fact that although I'm sitting here writing an article as we have been writing articles like before we have no call to the school. It's beautiful to enjoy the people you used to know in the past and not worry about any of the holds of the Institute. Our column, for all you freshmen is directed at the semi-intellectual industry of homegrowing and enjoying our favorite little drug "greenies." We "deal" with the inside initials of indoor cultivation and extend all the way to that actual joy of consumption. This year we're going to try to vary the articles a little more and try to let all aspects of life into our joyous flowered tiles.

We have never really dedicated ourselves towards discussing the grand most economics of the market place. The fall is upon us now and students are planting again even analysis of their short term profit potential for the fall harvest.

Current supply of cannabis for this fall seems quite black. This is primarily because of the shortages of soybean meal in East Awe for the soybean meal is the main source of food for the frog and after the production has been kicked out, there will be little of the highly prized turkey meze for use on this year's plants. If this crisis can be overcome the supply can recover from the federal reserve's increase in the discount rate last July, the overall production of cannabis should be on the upswing.

If the marketplace does not recover, the price of hemp grown will rise by approximately two points. (Supply & Demand) Hence all of those who exclude the production line this summer should be able to buy new tnlate bricks this fall.

Here are some of our projections for the opening season Sept. 1, 1973.

To get back to very sentimental matters, we have to explain a situation for this year. Since we see no longer students the paper will not be able to run our segment unless there is sufficient enthusiasm from the students to warrant it. Having enjoyed our last three years writing the "plant" column, if people don't want to hear from us, then their will be better left alone. We're still planting for letters to the Text, rather if a lot of you would like to see the column again this year, write the Text and let us know. If we don't get a response, then we have to promise in advance that we won't keep you down by allowing us to attempt to inform and amuse you these last three years.
On Clean Dorms

At the start of the academic year, the dorms were fairly clean. The work of the custodians now is to keep them that way. The dorm students claim that it is one of the custodians fault that the dorms get dirty. It's the students that mess up the dorms, not the custodians. The students should attempt to help keep the dorms clean. If you live on the upper floors, take a bag of trash down to the first floor on your way to class. It may not seem like much, but if everyone pitches in, the dorm can become a better and cleaner place to live. Think about it: how would you like to bring your pil or parents up and have them see you living in a pig sty? So remember as you start down the hall to the class:

Bob Hogan

Sports Car Club

Sports car drivers at Tech. Well, whether you have a sports car or a Detroit motormobile, why not look into the Tech Sports Car Club. We are basically a rally club holding rallies each month (well almost). We need interested people to help sustaining this club, as the rules of the game only allows us 12 members in the second floor lounge in the "wonderful" new student union. If you are interested and unable to attend, contact us at Box 1018. We also have a bulletin board located in the corner from the mailbox on which announcements appear. Viewers are also welcome. Your fresh ideas are needed.

Let's help each other.

The American Red Cross

Amateur Radio Lives

Greetings to all incoming freshmen, especially those of you who have an interest in the world of amateur radio. The Lowell Tech Amateur Radio Club is alive and well and living in 8413 and our doors are open to you. We boost a club call W4UJJ, with a full power Drake station on 160 thru 20 thru 10 meters and 10 watts on 20 thru 80. Our antenna farm for the low bands is fairly competitive, and we hope that this will free us to operate some time. Our activities include contests, DXing, RTTY, traffic, and just ragchewing.

If you aren't licensed, but would like to be, we are probably offering our free code and theory classes again this year. And for those of you who are licensed, we trust you will find something that interests you in the club. The first planning meeting of the year will be held on Tuesday, Sept. 11 at noon in 8413, and all are welcome. 73 and good luck.

SPORTS CLASSIFIEDS

WANTED:
- Used 10,000 gal. fuel storage tank, very good shape. Wanted 10,000 gal. tank for new building. Call Box 1014 or Box 902.

PERSONALS

To the girl 2: I love you ALL.

Fashions you've had three days of classwork. Now why don't you go out and have some fun? You can't have a good time if you don't take time.

To Sue: On the west coast nothing will arise out of the east coast hurter.

Well, Well, Well.

- 1972 Corvette, with 6,000 miles, Automatic, air conditioning, tinted windows. Asking $1,500 (nego). Contact Box 1102.

- Shown win 8-track with 5-track adapter. Only about 200 miles. Excellent condition. Asking $150 or $200.

- With three quarters of a mile, 509-1-0, 1974 Ford, 4-speed, 15,000 miles.

MARKETPLACE

(Continued from Page 4)

Many kinds of drug dependance

Habitation is the psychological desire to respect the use of a drug intermittently or continuously for emotional reasons. Escape from tension, dulling of reality, euphoria (being "high") are some reasons drugs may be used habitually.

Addiction is generally used to imply both physical and psychological dependence on a drug. When used this scientific definition includes the development of tolerance and withdrawal phenomena. As a person develops tolerance he requires larger and larger amounts of the drug to produce the same effect. When use of the addictive drug is stopped abruptly, withdrawal symptoms occur. These vary widely with the type of drug involved. A compulsion to repeat the use of the addicting drug becomes understandable because the drug temporarily solves one's problems by keeping the withdrawal symptoms away.

Drug culture other than addiction can become addicting. They include heroin, alcohol and certain tranquilizers.

What is wrong with taking any drug as long as no one else is hurt by doing so? It is difficult for an individual to do something to himself that has another person only to observe. In fact, the act will have upon those who are dependent only to the social structure for a variety of public services. Those who become physically or emotionally dependent as a result of drug misuse are generally totally dependent upon society for their subsistence.

NEXT WEEK: Sedatives

WANTED:

- Wanted: Caskett washer, $300 or better. Tel. 707-20
- Wanted: 1973, 3,500 miles, 6-cylinder, automatic, air conditioning, tinted windows. Asking $1,500 or best offer. Contact Box 1014.

- Wanted: Casual jackets, winter, any style. Contact Box 1014.

- Female Roommates: Anyone interested in taking the first bedroom in the dormitory, contact the Social Office at 500.

- Wanted: Students interested in putting up the new freshman band and directing band. Contact the Social Office for details.

- Wanted: Drummer wanted for school band. Contact Box 1014.

- Wanted: Young lady and boy to play the piano. Contact Box 1014.

- Wanted: Young lady to play the violin. Contact Box 1014.

- Wanted: Young lady to do a solo. Contact Box 1014.
TECH SOCCER ON THE ROOM

The 1973 version of the LTI Soccer Team is preparing to get under way. The Team will be under the direction of a new coach this year. The new coach is Mr. Nash Halley. Coach Halley is well versed in the game of soccer having played both collegiately and professionally. The team looks very promising this year as only three or four players from last years signed will not be returning. With all that experience left from last year, the team is sure to do better this year. Last year the team finished with a disappointingly record just below .500. One advantage that the team has this year is that the schedule allows seven straight home games. Having the home team advantage does help a team especially if the home team fans show up to support the team. You can help your team to a successful season, come out to home games and support your team! The first game is a scrimmage against the University on Sept. 15 at 3:00. It is a home match so show up!!

VARITY BOWLING TEAMS

Last year, LTI's Misc'Y Ten Pin Bowling Team captured the New England and the Eastern Interecollegiate Titles.

Tryouts for this year's team will begin on Tuesday, Sept. 11 at the Brunswick Lanes on the Postoffice Blvd. Freshmen and other students trying out for the first time may need to report at 4:30 P.M., Team Veterans will report at 5. Trials for the Women's Varsity Team will start on Thursday Sept. 13, at the same time.

SPORTS NOTES

All passions interested in Fall Intrarecollegiate Crew (i.e. Rowing) should contact Prof. Kudrna in S-223 as soon as possible.

All Women students interested in the activities at the Womans' Club at Tech in physical education should contact Coach Patricia McCoy in the Castello Gymnasium.

Joe MacKey will be starting soon. Contact Gerry Cantor at Leitch Hall for more information.

The Bowling League will be starting soon also. Contact Mr. Kopypciak in the Library for more information. Any questions concerning sports at Tech can be answered by the Sports Dept. of the Tech or the Public Relations Dept. of the Gym.

GYM SCHEDULE

DAILY MONDAY THROUGH FRIDAY

Physical Education Officer - 9:00 to 5:00

Activity Areas - 8:00 a.m. to 9:00 p.m.

Pool - 9:00 a.m. to 8:00 p.m.

*Reservation of use of facilities is dependent upon Peer classes and when they are scheduled.

SATURDAY AND SUNDAY

Gym Areas - 10:00 to 4:00

Pool - 10:00 to 6:00

The gymnasium will only be open Saturdays during the Fall.

Cross Country Expecting Excellent Season

The LTI Cross-Country Team under the direction of Coach George Davis is preparing to get under way and the team appears to be quite promising. The team will be led by the Roberts Brothers, Jim and Brad, both seniors. It hasn’t been said in the Text yet, but Jim Roberts was elected LTI Outstanding Athlete of the Year for 1972-73. The Staff of the Text wishes Jim well on his endeavors.

All Home Meets at Lowell-Dartmouth State Field

Club Football Promising

Club Football here at Tech is fairly new. In its two previous years, the club has shown improvement each year. A big change this year is the Club this year is a Head Coach in the person of Jim Stevens, a former resident of Newton. Jim has many years coaching experience in the Greater Boston area. In addition to Coach Stevens, there will be three team members who have had a long season under his guidance. The club has many returning players. This is big news for the new coach, It will have experienced players who will not be taken for granted, allowing more time for advanced players to be trained. The schedule is the same as the previous years with the exception of the addition of the Bridgewater State J.V. and Bentley. It is known that the Bridgewater State team is tough, but the LTI Hawks should have their hands full with the J.V. team. The first home game is on Sunday October 14 against Graham Junior College. All home games are played on the field behind Costello Gym. The attendance has grown steadily in the past, so let’s keep it growing. It’s our Club Football, so get out and support your Hawks!

**Intramural News**

The presence of Intramural Sports in college life is a fundamental building block of a good education. It gives the student a chance to work off the tension that classroom builds up. It also lets the student compete against other students for awards and personal accomplishment. The Intramural program here at Tech is under the direction of Coach Beth Calabry. Every student should participate in at least one of the many activities that Intramurals offer. In addition to individual competition there is team competition. Many upperclassmen have teams. Freshmen should start organizing their teams now as the first competitions are only two weeks away. A partial schedule of sign-up and playing dates is as follows:

<table>
<thead>
<tr>
<th>Activity</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>FOOTBALL</strong></td>
<td>Sept. 18</td>
</tr>
<tr>
<td><strong>SOFTBALL (MEN)</strong></td>
<td>Sept. 19</td>
</tr>
<tr>
<td><strong>VOLLEYBALL (WOMEN)</strong></td>
<td>Sept. 19</td>
</tr>
<tr>
<td><strong>TELEGRAPH SINGLES</strong></td>
<td>Sept. 20</td>
</tr>
<tr>
<td><strong>TENNIS DOUBLES</strong></td>
<td>Sept. 20</td>
</tr>
</tbody>
</table>

Entry Blank for all activities can be picked up at the Intramural Office of the Student Center. The above is only a portion of activities. A full list is posted on the bulletin board in the gym. Each team must be represented by a manager at the Intramural meetings in the Rec. Room 30? of the Costello Gym, All meetings are held at 6:00 P.M., unless otherwise noted. The first meeting is on Sept. 11th. The next is Sept. 25th.

Each sport is given a number of points. At the end of the academic year, the team with the most points is awarded the Dean's Trophy. The meeting schedules are important as they are worth 10 points so all managers should attend. Support your Intramural program, join or start a team.

Each team must be represented by a manager at the Intramural meetings in the Rec. Room 307 of the Costello Gym. All meetings are held at 6:00 P.M., unless otherwise noted. The first meeting is on Sept. 11th. The next is Sept. 25th.

Each sport is given a number of points. At the end of the academic year, the team with the most points is awarded the Dean's Trophy. The meeting schedules are important as they are worth 10 points so all managers should attend. Support your Intramural program, join or start a team. — Bob Hogan
Office Downstairs in Library — Next Meeting

Tuesday, September 11, 12 Noon

The Text News Association is open to anyone who would like to join us. The Text is one of the most active organizations on the Lowell Tech campus, and being part of this organization puts you ahead of everyone in awareness and involvement with everything that goes on at Tech.

Requirements

The only requirements to joining our staff is that you are a student here at Tech and you are willing to work for the newspaper.

To become a permanent member in The Text News Association you must contribute in some way to the production of four editions of the newspaper. At that time you can be voted in and you will be given full voting rights and the privilege to run for an editorial or managerial position on The Text.

Positions Open

There are many positions and jobs available for anyone willing to join The Text. One edition of the newspaper requires many photographers, reporters, writers, artists, business workers, and typists.

Photographers

The Text has the best equipped darkroom on campus. We use the latest and most modern equipment available. In the past our policy has been that we allow our photographers to use the darkroom for their own personal use at times when it is idle. If you know how to use a camera and are fairly familiar with darkroom procedures, then contact Photography Editor, Rich Goldman, or come to The Text office.

Reporters and Writers

Anytime news breaks someone has to do the reporting. Without reporters and writers, The Text would not be a newspaper. Events are happening all the time. Yes, even here at Tech. For example, all the meetings that go on: Board of Trustees, Student Senate, Institute Council, Faculty and other student activities and groups. Sports also fall into this category, and sports writers are always scarce on The Text staff. So, if sports is your bag and you enjoy writing, then try us. We’ll like you. We are also in the market for those of you who enjoy investigative reporting and don’t mind putting in a little more work.

Artists

"Can you draw?" is all we ask. We always need people who can come up with some sort of graphic when we need one. Also if you are creative to the point that you think you could handle a comic strip, then we want you.

Layout

One of the most important and often most neglected jobs on The Text is that of Layout and we need people who are willing to learn this fine art. We will teach you and no experience is necessary. The more people we have, the better the quality of the layout, so come to The Text office on Thursday night.

Business

We are always looking for business majors. We have opened the Text office and put up some new equipment and hire someone who needs to know how to run a business. Anytime there is a problem, we need someone to handle it. So, if you’re a business major, come to The Text office and help to solve those problems.

Typists

Your typing fingers are always in demand in The Text office. We need typists. Come up and test your skills on our electric typewriters.

The Text Has Room at the Top

The Text is in the process of looking for a Business Manager and an Advertising Manager. Also in order to get more people on The Text, we have several positions of Assistant Editorships that will be direct assistants to the editors. These positions will open up around the last day of the semester and will be given to the staff members who have contributed the most work and effort.

There are important positions because they are natural stepping stones to the editors, which are newly elected each April.

Once again, any elected position on the staff of The Text is open to any permanent member of The Text. To become a permanent member you must contribute to four issues of The Text, at which point you will be recommended by an editor for membership, and voted in by the entire staff.

Meeting To Be Held

This Tuesday at 12 there will be an organizational meeting of The Text News Association in the new Text office located in room 426 of the Student Union Building. Anyone interested in working on The Text should come to this meeting.
