FROSH FINISH HAZING

Bob Oulian

The traditional All-Tech bunco, sponsored by the Student Council, marked the conclusion of the freshmen orientation program which has been in progress for the past two weeks. A tremendous turnout of approximately 200 studently spectators, and their families added to the success of the fundraiser.

The freshmen were led to the stage by the Tech Orientation Committee, and after the results of the various T.O.C. freshmen surveys were announced by Fred Parker, President of the Tech Orientation Committee. The freshmen constituted a total of 100 points compared to the T.O.C.'s 100 points, putting them over the top by 10 points, thus ending the plebe orientation program. With a roar of cheers, the freshmen then moved into the air which brought forth a tremendous ovation from the upperclassmen.

Bill Rowzee, the President of the Student Council, called the student body together and introduced Father James, spiritual director for the Newman Club, who said grace before the meal.

Following the turkey banquet, Bill Rowzee introduced the honored guests which included: Charles F. Edmond, Dean of Faculty; Bernard W. Ivers, Dean of Students; Dr. Arthur Halley, Director of Admissions; Professor John M. McGovern, Guidance Director; John W. Brown, Faculty Advisor for the Student Council; Colonel W. E. Bell, Adjutant for the Student Council; James Copley, Dean of Student Council; and Dave Fringer, Adjutant for the Student Council.

Colonel Edmond and Dean Ivers both congratulated the freshmen on the week's activities and welcomed them as full fledged students of the Institute.

A word of encouragement was passed from Father James to the freshmen in respect to keeping up their school spirit. He Mr. Halley wished the freshmen for their outstanding achievement and emphasized the importance and necessity of the Homily courses offered by the University. He concluded that as engineers, we will directly affect the lives of many people throughout the country.

FRESHMAN CONFERENCE

President Martin J. Lydon ended a visit to Europe during his basic visitation to Langley Air Force Base, Virginia in August with Lt. Col. Harry E. Denlinger, AFROTC coordinator. They visited three LTI cadets after inspecting the 405th Fighter-Bomber Wing. Freshmen at summer camp in the ROI. The LTI newspapers were Vincent Leopre, Thomas McCaffrey, and Philip McCall.

NEW STUDENT PARKING LOT TO OPEN

The college fraternity system is as old as the Republic, and for it was in 1736 that the first Greek-letter society came into existence. It was then the custom for students of the College of William and Mary, the second oldest in America, to wear gowns in the Apollo Room of the Raleigh Tavern in Williamsburg. The name "fraternity" comes from the Latin frater, meaning "brother," and this name originally referred to a group of college students who would visit other colleges and share the common bonds of fraternity.

The need for a new fraternity building on campus arose as the presence of the Alpha Xi Delta fraternity grew.

The new fraternity building is scheduled to be completed by the end of the year. The new building will provide a greater sense of identity and pride for the Alpha Xi Delta fraternity, as well as offering additional space for events and activities.

The new fraternity building will be a significant addition to the campus, providing a dedicated space for the fraternity to hold meetings, social events, and other activities. This new facility will help to foster a strong sense of community and promote the values of fraternity, including brotherhood, scholarship, and philanthropy.

The new fraternity building will be an important asset to the campus, offering a dedicated space for the fraternity to hold meetings, social events, and other activities. This new facility will help to foster a strong sense of community and promote the values of fraternity, including brotherhood, scholarship, and philanthropy.
BRIGHT FUTURE AHEAD PREDICTED FOR CLASS OF '61

The newly registered class of '61 promises to be one of the finest classes to ever enter L.T.I. There are 119 new students, which includes 106 freshmen, and 21 sophomores. Students compare this class very closely in number to last year's triumphant class. A full roll count of the school is a whole shows 1079 students enrolled. Of this number, 92 are sophomores, 101 are juniors, 460 are sophomores, and 460 are seniors. A roll of 460 seniors is the highest number to roll in the graduating school of L.T.I. This number is 186 more than the 1952 class, and 200 above the 1951 class, which makes their residence out of state.

The results of the annual freshman diagnostic tests were higher this year than in any previous year.

The freshmen test includes all the requirements for the first-year course in the college.

TO THE EDITOR

It has been brought to my attention that there is some confusion and question in the minds of the freshmen as to life in a fraternity and the role fraternities play on campus. I would like to explain some of the roles and duties of these organizations.

The essence of fraternity life can be found in the definition of the word fraternity. All the social and personal aspects of a fraternity, plus the potential of fraternities are explained by the fact that they are friendly. A group of brothers living together by common ideals and interests forms a fraternity, which is superior to any group of men that don't have the common bond that is the essence of fraternity life.

Before entering a fraternity, one should be aware of the fact that there are certain rules and regulations that are followed by members of the fraternity. It is important to know the rules and regulations before committing to any fraternal organization.

L'Escrêt

School spirit starts with the individual. Each and every member of the community has his own personal responsibility for the support of school events, the activities, and the activities of the entire school body.

The fine display of spirit and the excellent attendance at the Freshmen-Sophomore Field Day and the All-Tech Banquet was outstanding. With that kind of support L.T.I. will not longer be lacking in the realm of school spirit.

Dr. Joseph B. Quig, new Senator of Chemistry

Dr. Joseph B. Quig, having been appointed as associate professor of chemistry and physics, has taken up residence in Lowell and is greatly interested in the future of the college.

The chemistry department has been neglected in the past, but under Dr. Quig's leadership, it is expected to make great strides in the future. His interest in the college is evident in his willingness to learn and to help others.

LETTER TO THE FRESHMEN

Subject: Freshman Tutoring Program

Dear Freshman,

Again this year, the Circle K Club is sponsoring the Freshman Tutoring Program. We have received definite proof that the program has helped other freshmen in the past.

The schedule of classes is listed below. The classes will be held every day at 4 PM.

Physics Math Chemistry

Go Tech!!!
Education
Graduate Record Examinations will be administered at examination centers throughout the United States in December.

Princeton, N.J., October 18: The Graduate Record Examinations will be administered at examination centers throughout the United States in December.

Fraternities to Welcome Rushes
At 8:30 p.m. on Sunday afternoon, Oct. 20, 1957, the official rush to begin their freshman house will begin their houses. How will this get acquainted with each other? There will be an opportunity to meet the freshmen in their own houses before the house period. Freshmen will be able to get acquainted with each other before the house period. Freshmen will be available for questions regarding the fraternities and a list of campus organizations.

The Greek system is an integral part of the campus, in which an individual can learn the values of leadership, achievement in a variety of subject matter fields, and the opportunity to participate in a wide variety of activities. A complete application must be reached to the fraternity offices before the rush period.

Pi Lambda Phi
On Friday, Jan. 19, 1957, the officers of Pi Lambda Phi will host a dinner at 7 p.m. The dinner will be attended by the officers of Pi Lambda Phi.

Pi Sigma Rho
Pi Sigma Rho is the one organization that has been established with an exclusive charter by the National Panhellenic Conference. During the past year, the organization has been in existence for two years. Applications must be in by October 31, 1957.

Players Present Classic
The film group of the Technology Panhellenic Council will present Mark Twain's classic "The Adventures of Huckleberry Finn" on campus for students. The film will be screened at the main campus for students. The film will be shown in the evening hours throughout the academic year.

New Application to ROTC Staff
Lowell R. Chamberlain, Staff ROTC Member, has been assigned to the College of Engineering to conduct the training of the Reserve Officers Training Corps (ROTC) for two years. The training will include the study of a four-year engineering curriculum and formal instruction in the fields of electrical, mechanical, and aeronautical engineering.

PROF. HIGGINS ON HIS WAY TO SPAIN

Prof. Thomas Higgins, a graduate of the University of New Hampshire, has been appointed professor of physics at the University of Illinois. He will take up his duties in the fall.

The appointment of Prof. Higgins is a significant one, not only because of his distinguished record as a teacher and researcher, but also because of his contributions to the field of physics. He has published extensively on topics ranging from quantum mechanics to astrophysics, and his work has been recognized with numerous awards.

Prof. Higgins has expressed his excitement about joining the faculty at the University of Illinois, stating, "I am thrilled to have this opportunity to contribute to the vibrant academic community at the University of Illinois. The university's commitment to excellence in teaching and research is unparalleled, and I look forward to working with my colleagues and students."
