Under New Management

LOWELL, Mass. — In view of the increased emphasis on the importance of the basic sciences in studies and by the need of the country, a new department of mathematics and physics has been created at the Lowell Technical Institute. Dr. Martin J. Lydon, president, announced.

Dr. Charles R. Musinin of Washington, at present professor in the L.T.I. electronic engineering department, will head the new depart- ment. Other faculty members to the department will be made known shortly.

Dr. Musinin recently has been designated chief scientist-investigat- or in a project for study of the direction of ferromagnetic crystalline materials, which U.S. Office of Ordinance Research has contracted with the L.T.I. Research Foundation.

LTI Students Gain Scholarships

The Company of America, a large manufacturer of Stark, Whirlpool, and other household appliances, awarded scholarships in the amount of $2,000 to each of three students at the Lowell Technical Institute.

The New England Telephone Company, which has headquarters in New Bedford, also has awarded a scholarship in the amount of $500 to one of the students.

Approximately 600 students were eligible for the scholarship.

The students were selected by a committee of representatives from the LTI.

Lydon Heads Natl. Council for Textile Education

GREENSBORO, N.C. Nov. 14 - Martin J. Lydon, president of L.T.I., was elected president of the National Council for Textile Education at the final business session of the association's conference at Asheville, N.C.

Dr. Lydon succeeds Dr. H. F. Sizer, president of the Institute of Textile Technicians, Charlotte, N.C. The new president was previously vice-president. Nominating vice-president was Charlerod L. Austin, head of the School of Textile Technology at Alabama Poly- technical Institute, Auburn, and Edward T. Pickard, of the Textile Research Institute, Kent, Ohio, was re-elected treasurer.

Dr. Lydon Heads Natl. Council for Textile Education

As an introduction to the big holiday weekend which starts tomorrow, Dr. Chapman A. Harris, gave a speech which was the high point of the annual “R.O.T.C. Winds of Spring, Winters of Storm” which was conducted by the University’s Army Reserve Officers’ Training Corps.

The program commenced with Rev. Ferdinand Skinner of the Holy Family Church delivering the Invocation and Hymn which were received with enthusiasm by the students present. Dr. Lydon welcoming everyone. Dr. Harris then took over and gave his lecture. It was shown by counsel shots in the first week trip to Kenya last summer.

R.O.T.C. Holds Family Night

900 ATTEND

MADEKERS ANNOUNCED

ON Wednesday, November 7, at 8:15 p.m., the Army Air Force Corps of Cadets and Staff held their annual Family Night. It was a great success for all concerned.

Shouting promptly at 7:30, the students and faculty of the division of Sallie, Luckin, began the evening’s events. After the Invocation by Chaplain Martin J. Heilbrun, Lt. Harry E. Jones and Lt. Edward T. Pickard, of the Air Force Corps of Cadets, announced the Family Night program, which included a variety of activities.

Before viewing a movie called “Always” and dancing, the guests were served a buffet dinner consisting of various items and beverages.

After the movie, the guests were entertained by the L.T.I. faculty and students.

Following the movie, the guests were entertained by the L.T.I. faculty and students.

Dr. Lydon Heads Natl. Council for Textile Education

After the All-Important “R.O.T.C. Winds of Spring, Winters of Storm” speech, the guests were entertained by the L.T.I. faculty and students.

This year’s Family Night had a record attendance of 900 guests and students. All the guests had a wonderful time and the program was continued in years to come.

The following cadets and staff members were responsible for the success of the Family Night.

**VETERAN'S VOICE**

By John Vaughn

The recent ruling adopted by the Student Council concerning student parking should have at least some bearing on the L.T.I. freshman. It should awaken in his mind the necessity to conform to the rules and regulations of the College and the Student Council. The fact that the Council is able to make this ruling must influence him in his future activities. The Council should take the first step in shaping the prospective student to be a good citizen.

The solution to the problem of parking is not alone in the hands of the Student Council. It is a problem which involves both the Council and the prospective students. Both sides must work together to see the importance of interest in the parking situation. The officers of the Student Council should realize that the meeting was attended by a large number of students. It would be better to have the parking meeting moved to another day and place so that more students will be aware of the parking situation.

The Freshman class is not alone in this problem. The Sophomores and Juniors have a great deal of interest in parking also. The Freshman class must be willing to do their part also. The Freshmen should be more interested in the parking situation.

The parking situation is quite serious at the present time. The new building of the Student Council is not located at a convenient place. It would be better to have the parking meetings moved to a more convenient location.

The Council should realize that the parking situation is quite serious. It would be better to have the parking meetings moved to another time and place.

**SCHEDULES**

- Thursday, 8:00 p.m., Parking meeting.
- Friday, 3:00 p.m., Parking meeting.

**THE DIPLOMA RACE**

(ACP) The University of North Carolina's Daily Tar Heel recently completed a survey of its student body. The survey was conducted by the Student Council and the results were quite interesting.

The survey showed that the majority of the students are interested in obtaining a diploma. In fact, 95% of the students said that they would like to get a diploma. The survey also showed that 70% of the students would like to get a diploma by the end of the year.

The survey also showed that the majority of the students are interested in obtaining a diploma. In fact, 95% of the students said that they would like to get a diploma. The survey also showed that 70% of the students would like to get a diploma by the end of the year.

The final analysis At Universal was sterile, amusing mood for the first few minutes where a beautiful and attractive young class was profiled, and the film ride, approached him and said: "It’s a lovely day for taking a drive." "I know," he answered, "but why can’t you go out to enjoy it?" "You’re not able to get a car or a place." "How can I get a place?" "You don’t have any money." They continued walking. Just as they were going to enter the park, they noticed a beautiful young woman looking at them. "Do you need any help?" she asked. "I don’t have any rope," he replied. "That’s not enough. You need a car or a place." The girl smiled. "I’ll help you with that," she said. "I’ll get you a rope and a place." They walked over to the park office and got a place and a rope. "Thank you," he said. "You’re welcome," she replied. "I’m happy I could help you."

MINUTES OF THE STUDENT COUNCIL MEETING

The meeting of October 25, was scheduled to be an open meeting but a few students were present so a closed meeting was held. The minutes of the meeting are as follows:

PARKING

The decision for various parking areas has been distributed through the mail. A leaflet has also been placed in all mailboxes. This decision was made because it was found that the parking arrangement was effective as of November 5. Problem tickets will be resolved by parking committee. The streets surrounding the campus are to be used by the freshmen.

Elections

The elections for the office of the Secretary were held on November 1 and a run-off election, if necessary, for November 8.

R. O. T. C.

The R.O.T.C. program was received from the Assistant Secretary. The students are scheduled for the first day of classes. The Council has agreed to the R.O.T.C. program and it is expected to be a good program.

A. M. E.

The A.M.E. is a chapter of the American Society of Electrical Engineers. It is sponsored by the Electrical Engineering Department and the Student Council. The meeting was held on November 1, and a run-off election, if necessary, for November 8.

A. A. T. C.

The A.A.T. C. is a chapter of the American Society of Electrical Engineers. It is sponsored by the Electrical Engineering Department and the Student Council. The meeting was held on November 1, and a run-off election, if necessary, for November 8.

A. M. E.

The A.M.E. is a chapter of the American Society of Electrical Engineers. It is sponsored by the Electrical Engineering Department and the Student Council. The meeting was held on November 1, and a run-off election, if necessary, for November 8.

Textile Society

The Textile Society is an organization dedicated to the promotion of textile products and the textile industry. It is sponsored by the Textile Department and the Student Council. The meeting was held on November 1, and a run-off election, if necessary, for November 8.

Leather Engineering Society

The Leather Engineering Society is a chapter of the American Society of Leather Engineers. It is sponsored by the Leather Engineering Department and the Student Council. The meeting was held on November 1, and a run-off election, if necessary, for November 8.

W. E. F.

The Women’s Engineering Foundation is a chapter of the American Society of Engineering Women. It is sponsored by the Engineering Women Department and the Student Council. The meeting was held on November 1, and a run-off election, if necessary, for November 8.

A. S. M. E.

The A.S. M. E. is a chapter of the American Society of Mechanical Engineers. It is sponsored by the Mechanical Engineering Department and the Student Council. The meeting was held on November 1, and a run-off election, if necessary, for November 8.

Textile Society Opens Membership

The Textile Society is now extending membership to all students interested in textiles. Membership is open to all students, regardless of major, and membership applications are now being accepted. The Textile Society is an organization dedicated to the promotion of textile products and the textile industry. It is sponsored by the Textile Department and the Student Council. The meeting was held on November 1, and a run-off election, if necessary, for November 8.

Leather Engineering Society

The Leather Engineering Society is a chapter of the American Society of Leather Engineers. It is sponsored by the Leather Engineering Department and the Student Council. The meeting was held on November 1, and a run-off election, if necessary, for November 8.

W. E. F.

The Women’s Engineering Foundation is a chapter of the American Society of Engineering Women. It is sponsored by the Engineering Women Department and the Student Council. The meeting was held on November 1, and a run-off election, if necessary, for November 8.

A. S. M. E.

The A.S. M. E. is a chapter of the American Society of Mechanical Engineers. It is sponsored by the Mechanical Engineering Department and the Student Council. The meeting was held on November 1, and a run-off election, if necessary, for November 8.

Sports Convocation Honors Lettermen, Varsity Club Presents Awards

The ever familiar 6-W-1-6 was once again heard in the balcony at the Civic Auditorium for Lowell Tech's basketball team. As members of the basketball team Jack obtained the call for the commencement of varsity sports.

The fine showing of the freshmen, who were about forty in number, and the fine showing of some very promising seniors, was a pleasant surprise to all. Among those present were five returning letterman, four of whom are in their third year. Also two seniors and the team's co-captains, Dave Hansel and Rick Gibbons, who opened the season against the Tech's South Leominster. J. B. Weavers, the freshman, has returned to the team this year and will play a significant part in the Tech's first winning record in years. As the Boy's prepared for their campaign, they played before the crowd and received the applause as one athlete after another fell victim to the Tech's hometurf. The Tech is the only team in the world that would be in the running for the first winning record in years. As the boys prepared for their campaign, they played before the crowd and received the applause as one athlete after another fell victim to the Tech's hometurf. The Tech is the only team in the world that would be in the running for the first winning record in years.

On November 1, the squad was cut, and fifteen varsity ball players went on the team. Now that the Tech's team for the coming year has been introduced, the team begins its upward march. 

The team's big 6-4 forward is Jack Kowalski, a freshman from North Reading. He is a fine athlete who has distinguished himself in the Tech's hometurf. During the Tech's first year, he played on the varsity team and was a valuable member of the team. His playing has been outstanding and he is expected to be an asset to the team this year.
