Southworth Portraits
Portray History

In the assembly hall in Southworth Hall, a portrait of five men held the spectator's attention. Each portrait was a representation of one of the Cotton States, and the men represented had played important roles in the development of the textile industry.

The portraits are housed in the eastern section of the hall. They were created to commemorate the contributions of the cotton states to the development of the textile industry. Each portrait features a prominent figure from the state, such as a politician, a businessman, or an inventor.

The portraits are displayed in a way that highlights their historical significance. The positioning of the portraits within the hall creates a sense of depth and perspective, allowing visitors to appreciate the scale and importance of the figures depicted. The use of light and shadow further enhances the visual impact of the portraits, drawing attention to the intricate details of each individual's face and attire.

In conclusion, the portraits in Southworth Hall are a testament to the rich history and cultural heritage of the cotton states. They serve as a reminder of the contributions made by these states to the development of the textile industry and the broader economy. The portraits are a valuable resource for anyone interested in learning more about the history and culture of the cotton states.

LTI Mourns Deaths Of Lowe and Dick

The death of former associate professor John C. Lowe early this week took another familiar figure from the ranks of LTI's faculty members. Mr. Lowe, a graduate of the Institute of Technology, was actively involved in the Textile industry, and his contributions to the field of textile engineering were widely recognized.

The second death of a former LTI instructor this week was that of Henry J. Dick. Dick was an alumnus of the Institute of Technology and was teaching textiles at the Linwood campus when he passed away, as revealed by professor Henry J. Dick.

LTI in Business Week

In the February 14 issue of Business Week, LTI Textiles was featured with pictures and articles on natural-fiber current. The graphs were used to track the students, during final examination week, just before the Players' Open Cover Contest.

Players Open Cover Contest

With the close of the Band Beth Song Contest, a new and more challenging contest has been set in the form of an artistic talent hunt. The players' production in need of a source to publish "My Sister's Keepsake." This is a special collection of artwork at your door. This is all you need to enter:

1. Any day student of L.T.I. may submit an original cover design or a design for the contest.
2. All entries must be on card stock, with design size to be 5 x 11 inches by 0.75 inches, with 0.75 inches by 0.75 inches.
3. Designs and drawings will be selected on originality, simplicity, and adaptability by the Executive Council.
4. Entries must be submitted to the Textile Player's office by February 30, 1953.
5. All entries become the property of LTI Textiles, and the player's name will be included.
6. A cash award of ten dollars will be given to the winning entry.

Crystal Balloon Scene Of 4th All-Tex, Feb. 14th

DONALD SIEGEL
WIN'S CONTEST

DONALD SIEGEL has been assigned the task of editing the text for the All-Tex, and his assignment is now boosted by TRITEX's breath of new life.

The Student Council. His duties include the coordination of student activity and the planning of the All-Tex.

The cost of the new course is 120.00 dollars to students in纺织 engineering and associated subjects.

Raymond Abrahams

Fashion Course Set; Option III

Here are the details for students interested in the course: O'Connor's design. The course is offered by the following instructors: Ray Abrahams, Betty Kinney, and others.

Some of you may recall that several members of this year's class were outstanding in their work in textiles, and if you can't take it with you, experience plus new ideas should ensure a bright future and repeat performance next season.

In a few short months opening night will be here, and with the ever popular "LUMS In The Mirror," it is possible to make this truly familial and students alike will long remember.

3rd Annual Textile Workshop

The Third Annual Textile Workshop will be conducted at Lowell Technical Institute June 10 to July 1, 1953. This year under the joint sponsorship of the Institute's Summer School and the Lowell Textile Research Foundation, the comprehensive course of study in the manufacturing, processing, and evaluation of modern textile production has been designed to meet the particular needs of industrial research personnel. Participants in the Workshop will have the opportunity to attend lectures and demonstrations given by experts from Menasha Chemical Company, Celanese Corporation, Tex-Tech Corporation, B. F. Goodrich Company, Cowl Chemical Company, and other textile manufacturers. The course will be held at the Institute of Technology.

Visiting Lecturer

Appointment of Edward W. Whiteford to the position of Visiting Lecturer in Textile Industry, as visiting lecturer in the Engineering Department, the position has been announced by Dr. Albert V. Webster, head of the department.

Beginning on Thursday, February 5, Mr. Whiteford will give a weekly lecture which will continue through the rest of the semester. Mr. Whiteford's appointment was recommended by the Advisory Committee and approved by the Administrative Committee on the recommendation of the Advisory Committee.

News in Brief

Whether you are watching it all or not, numerous newspapers and magazines throughout the nation have been memorializing outstanding U.S. Champions for their achievements in the textile industry.

New Textile Award

Lowell Textile was the first textile award in the United States to be awarded at the National Textile Conference, and it is a fitting tribute to the hard work and dedication of the students.

The award will be given to the winner of the competition, and the winner will receive a scholarship and the prestige that comes with it.

Jilla Webb

MGM Record Star To Visit LTI

Jilla Webb, a bright light well above the horizon, and now record star for MGM Records, will sing the patriotic and solemn songs as well as some of her latest hits at the All-Tex Formal. Miss Webb has only recently returned from a successful Hollywood debut, where she starred in the movie "The Love of Your Life," and "The Love You Have on Your Lips".

At the present time Miss Webb's career is being closely observed by several prominent music critics, who have praised her not only for her personality and beauty, but for her talent as well. Truthfully, Miss Webb is in the popular music of our time.

Visiting Lecturer For Leather Men

Appointment of Edward W. Whiteford to the position of Visiting Lecturer in Textile Industry, as visiting lecturer in the Engineering Department, the position has been announced by Dr. Albert V. Webster, head of the department.

Beginning on Thursday, February 5, Mr. Whiteford will give a weekly lecture which will continue through the rest of the semester. Mr. Whiteford's appointment was recommended by the Advisory Committee and approved by the Administrative Committee on the recommendation of the Advisory Committee.

The record star will be on the campus for the next two days, and is expected to be on the campus for the next five days.

Don't miss this unique experience with Miss Webb, and come out to see her sing in person!"
In the relatively short space of fifty years our Institute has been associated with the growth of thirteen and a student body of more than one hundred. An important step toward this recognition was the establishment of a world-renowned Textile Institute which serves the textile and allied industries.

Today, in a simple ceremony, we commemorate the fiftieth anniversary of Lowell Textile School from rented quarters in downtown Lowell to the present fifteen acre campus on the west bank of the Merrimack River. The story of Lowell Textile Institute has been the story of an attempt to fulfill a need of one of the nation's oldest and largest industries. The school, which with the textile industry has received the Institute's evidence that it has been a success in the educational field.

A major portion of this success has resulted from the efforts of the administrators who have guided the school through this period and who have zealously pursued the interests of the Institute. It has been their tireless efforts that the facilities have been expanded from a modest beginning to the present enlarged physical accommodations. The curricula of the Institute has been under constant study and revisions have been made whenever it was clearly indicated that changes were needed in order for the Institute to fulfill its traditional purpose of service to the textile industry.

Co-operation has been a dominant factor in the success of L.T.I. over the past fifty years and is a necessary element in the development of our Institute. This cooperation must continue, students, faculty, and administration alike in order to reap the full benefit of an expanding Institute. For our Institute the most important facet of the co-operation of the others is to lose the greater profit which is inherent in the sales executive action.

An industry is a complex endeavor teamwork is the engine of success. High morale and a sense of pride in accomplishments of mutual benefit are necessary for future success. No group, it is hoped to dominate if they are genuinely interested in advancing the Institute. We have new elements that are directly tending to reduce student morale in the performance of their mission here. Such groups should be cleaned of these elements whose dubious far purposes might be to contribute to the advancement of the Institute.

I think, however, to the correction of these defects and to a greater optimist regard, is a prosperous future for Lowell Textile Institute, after this, the Golden Jubilee.

THE TEXT

Golden Jubilee

by Bob Mulchey

For The Future

Lowell Textile Institute is today celebrating fifty years of service to the textile industry. We are celebrating this anniversary with a p r o m p t  of activity that will continue the tradition.

The Text and the future relationship of our Institute to the textile industry will be discussed. The present course of the Institute will be outlined and the few of the people who have participated in the growth of the Institute will be mentioned.

Exordium

It is traditional for a zealous, new editor to dedicate his first page to the editor of the previous page. I write these words with a feeling of well-paved path. It will, however, tell this that his first editorial should adhere to the same basic principles as all his succeeding editors. The facts should be stated clearly and the reasoning carefully. For these reasons, the Exordium of THE TEXT in the year 1953 will be that of sound reasoning and accurate reporting of facts. That is a promise—only one can truly make it.

The TEXT will continue doing the fine job that it has done, especially under the leadership of the Editor-In-Chief, Mr. W. F. Hovar.

The Institute will continue to publish an organ of information that will present all the news desired by those who are actively interested in the Institute—students, faculty, administration, parents and alumni. Equal importance is the provision of an appropriate medium of student discussion, of an attempt to unify ideals and objectives while creating a sound college spirit in support of L.T.I's best traditions. The providing of an outlet for the expression of writing and photography cannot be overlooked as a function of THE TEXT.

CROSSING THE RUBICON

Today L.T.I. celebrated the 50th anniversary of the dedication of its first building with President Lydon and Governor Herter present at a special convocation. The formal opening of Textile took place on January 30, 1903, with a teaching staff of thirteen and a student body of thirty-three. The school occupied rented quarters in the Dewey Block in Lawrence, not far from Southwick Hall, the first of its present buildings, in 1903. L.T.I. has come a long way since then and has a lot to look back on with pride. It has been a wonderful story. The Textile Institute today is a building, a library, a laboratory, a swimming pool, and a huge administration building now being built are a part of the Institute's story.

Accreditation by prominent academic and engineering organizations, the installation of the Air Force ROTC unit, and the development of an important research foundation are all part of a fine history. L.T.I. is perhaps the best example of cooperation between industry and education that exists today. Both L.T.I. and the textile industry have gained much by such an association.

The Institute is dedicated to the great progress that this year has shown and is aware of the possibilities of the future. The Institute is indeed making rapid strides in a most dynamic pattern—Happy anniversary L.T.I.

Coffee, A Tragedy In One Act

by Howard M. Zinn

During the last week of May, a cup of coffee seemed quite toxic to those love birds in love. But what the two were not aware of the fact was that the coffee had been poisoned. The couple fell into each other's arms on the same day, and it was not until the next day that they found out it was all a mistake. They both died in each other's arms, and the world was never the same again.

What you want is a Coke

by Pauline Kael

In 1962, the world was on the verge of a Coke crisis. People were running to the stores, buying as many Coca-Cola bottles as they could, for fear that the drink would be taken away from them. The situation was so serious that the government had to intervene and guarantee the supply of Coke to the public.

THE TACT

The Banquet Chemical Company will show their film "Cuprates" to the students in the Mill Dwellings Club. The film will be shown in Room B109 on Thursday, March 22, at 7:30. The company would like any student interested in this subject to see the film.

The Mill Dwellings Club will meet in room B109 on Thursday, March 22, at 7:30. The company will be interested in discussing the subject of cuprates.

PI LAM

The technique of the second semester found Phim eager existing. The new Phim was playing the other and the audience was interested in the whole of the play. The audience seemed to enjoy the play and was interested in the whole of the play. The audience seemed to enjoy the play and was interested in the whole of the play.

FLYING CLUB

by Ernest Gottschalk

The Flying Club at L.T.A. is starting a new activity which will be called "Flying Club." This club has been organized by a group of T. L. students who are interested in flying. It will be open to all mem-

bered, and the first meeting will be held on Sunday, March 25, at 2:00 P.M. in the Mill Dwellings Club.

The meeting will be held in the Mill Dwellings Club, and all interested students are welcome to attend.

THE AACh

by Don Sigel

The AACh will have their annual meeting on Thursday, April 5, at 7:30 P.M. in the Mill Dwellings Club. The meeting will be followed by a social hour. The AACh will have their annual meet-

ing on Thursday, April 5, at 7:30 P.M. in the Mill Dwellings Club. The meeting will be followed by a social hour.

STUDENT COUNCIL NEWS

by John L. Brundole

The Student Council is currently working on a new project. They are planning to hold a bake sale to raise money for a new gymnasium. The sale will be held on Saturday, May 5, from 10:00 A.M. to 2:00 P.M. in the Mill Dwellings Club.

Textile Wins Second of Hoop Season; Defeats Suffolk 79-67 in Thriller

by Ted Hoffman

Lowell Feb 8—Last night, Textile clicked up its second victory in eight outings by defeating Suffolk 79-67. The game was a wild and woody affair with the Terriers shooting up to 81% from the free-throw line in the fourth quarter the team really looked sharp. It was a forlorn effort to find a lead and getting away on fast breaks. The proof of this is found in the first quarter, and leads of three at the third quarter Suffolk was leading or even tied.

Due to the heavy toll taken by injuries, the absence of Brands and Haskins and Don Dwyer's departure, Coach Morley had the JV team on the court. The starting lineup for the game was played by seven men with the start, but the third man in the line, Palm, had a great game. It was not the first time that the crowd which was practically non-existent, would bother, because the game was quite critical. The first half saw the Terriers and the Blue Devils playing for position, and the first half didn't do much damage. Palm did a magnificent job off the bench and little Jim Ledo helped them out quite a bit.

THIRD ANNUAL WORKSHOP ANNOUNCED (Continued from Page Three).temple with the American Occupational Survey of the Textile Industry. This study, which is expected to be the first complete occupational analysis which will be followed by a study of the conversion of fibers to yarns and the conversion of yarns to fabrics, and it will conclude with Textile and Dyeing at the Eastern Textile Institute of Edgewood. The second option, Textile and Dyeing and Printing, will open with the same orientation and may vary by the Textile Industry in Edgewood. This type of this second option will include the Textile and Dyeing and the Textile and the Dyeing of Textile. Professor John H. Shillibe is available to assist with the workshop, and Acceptance Pro- gram is extended to those interested in the Summer Students and must be submitted by the final deadline. Application to Textile Institute of Lowell Textile Institute, Lowell, Massachusetts.

THE TEXTILE

Ski Team In First Meet

The L.T.I. ski team, completely reorganized and with the added assistance of the R.O.T.C., went on its first excursion to North Conway, New Hampshire. Despite the fact that the "Bill" Derrin, the 15 man squad, and one L.T.I. ski, practiced for two days from January 31 to February 1st, and got a real chance that was later used by other colleges. Several non-members came along for practice. The first ski trip competition for the ski club will be February 7th at Big Boulder, Vermont, under Boston University, North Eastern, New Hampshire, Holy Cross, A.J.C., and Brown.

Late Sports Results

Feb. 7—The Textile Varsity will face its seventh defeat of the season, bowing to Merrimack College in Andover by a score of 80-71.

Golf, Swim, Fencing Teams Ready Schedules

Interscholastic sports director Ray Yarnall recently announced plans for an extensive program of interscholastic athletic activities. These new ventures are now being executed, these include a golf tournament, a swimming meet, and the formation of a fencing team.

The golf activity will be held in the Spring under the direction of Mr. Kenneth Beavers, of the athletic department. Competition will be divided into three classes, novice and experienced players. Mr. Beavers, an experienced golfer, has offered to aid curious interested in learning the game, or improving his play.

Captain Misai of the R.O.T.C. will chase those desiring a knowledge of the art of fencing. The Textile Athletic Association has ordered complete sets of equipment for the team. These outfits are expected shortly.

A swimming meet has tentatively been scheduled for February 25 and is to be held at the Lewiston YMCA. All students concerned should check with the athletic bulletin board for the exact date.

LITTLE MAN ON CAMPUS by Dick Biber

George Shaw, junior and general handyman, after 48 years of service, Chemists Textile School's Beeson and bookkeeper, has retired at the age of 71. His friend, Walter L. Walker, who had a similar position, died just four years ago.

While this man never did it with textiles, textile industry should be proud of this remarkable man.

The Shaw brothers at 6:30 P.M. will have some pupils who are serving in the Armed Forces.

James R. Stanton was recently awarded a scholarship by the Arthur H. Shillibe, Trust. New George A. Shillibe, 54, has been awarded a major R.O.T.C. scholarship from the Carnegie Steel Company, Irvin.

Alfred B. Shillibe, L. T. I. Class of '63, has been promoted to Project Manager of Textile Engineering at the Division of the Tidewater Dry Works, Toledo, Ohio.

Since then, the L.T.I. buildings are being modernized and repaired. Walls are being painted, floors polished and waxed, and an elevator being installed in Pasteur Hall.

The R.O.T.C. has decreased its ranks and more advanced studies. Head cadet Robert Waugh resigned and is being replaced by Mr. Waugh.

A variety of subjects of inclusion research and laboratory work. Professor Elmer W. Schmitz, Textile Engineering Department has completed his work on Spontaneous and its application in the Textile Industry. The results of Prof. Katz's work were published in the January bulletin of the Lowell Textile Institute, and may be obtained free of charge in the President's office.

SAIL OFF THE LAND

Two spring weather forecasts predict a trend to stronger breezes and also, ending the rain of poor, light, dry, breezy weather soon.

Both the Shaw brothers at 6:30 P.M. will have some pupils who are serving in the Armed Forces.

James R. Stanton was recently awarded a scholarship by the Arthur H. Shillibe, Trust. New George A. Shillibe, 54, has been awarded a major R.O.T.C. scholarship from the Carnegie Steel Company, Irvin.
