SENATOR HARRINGTON PROPOSES LEGISLATION

President Martin J. Lydon announced the filling of a number of bills with the Massachusetts General Court by the Board of Trustees of the Lowell Institute. Prof. John Harrington of Lowell. These bills are closely concerned with the academic and financial affairs of Lowell Tech and represent a significant development in the Institute's efforts to improve and expand its already high-quality education of space engineers, engineers and industrial personnel.

The first of these bills is concerned solely with the scholastic situation here at Tech and is a proposal to increase the amount of Massachusetts scholarships to L.T. Tech for incoming freshmen instead of its present number of ten. These scholarships are awarded by a scholarship committee on the basis of competitive examination and provide for financial aid in the amount of $250.00 per year. They are annually renewable providing suitable grades are maintained.

Outstanding among Tech's major problems is that of salaries. The second of the proposed bills deals with salaries. Increases for personnel in the areas of teaching, research, administration, control and regulatory services, technical, specialized academic support and related activities as determined by the Board of Trustees. The main purpose of this bill is to raise the salary grades and salaries of the professional staff here at Tech to levels which are consistent with those of other colleges and of industry. It must be remembered that most instructors and professors are already scientists and engineers in their own right as well as excellent and dedicated teachers and are fully qualified to command much higher salaries in industry, therefore, Tech must be prepared to pay them accordingly, lest a trained personnel in teaching become more of a handicap. In this regard, it is interesting to note that the average starting salary of last year's graduating class greatly exceeds the maximum salary obtainable for instructors here at Tech and also greater than the minimum salary for assistant professors. This bill will permit the Board of Trustees to pay the present faculty salaries consistent with today's standards of living and will also permit the Board of Trustees to institute the Institute to retrain new instructors at salaries comparable to those paid elsewhere.

The National Science Foundation underscores the need for legislation of this type when it states that scientific talent is a scarce resource that the United States must develop if it is to remain competitive in the future. And technical leadership. By 1970, there will be twice the number of applications to engineering and scientific colleges and institutes that there is now. In order to develop these situations and improve and expand new technology it will be necessary to make sharply increased investments in educational science and basic research. Sufficient investment is needed to ensure a flowing manpower stream of qualified engineers, technicians, and technicians.

ALL TECH WEEKEND

All Tech Weekend, Lowell Institute, is coming up a big event, will be held on the last Saturday evening and Sunday, June 24. This year's All Tech Weekend promises to be the largest and longest running of great weekends, which have been a big part of Tech's social life. In line with the precedent set last year, this year's big name entertainers on Saturday night, a dance Saturday night, surrounded by various fraternities and athletic activities. Since this year's big-name entertainers have a incomparable name for putting on truly great shows, the students are in advance that All-Tech will be a smashing hit.

A student poll was taken this year to determine if a second weekend would be preferred to a formal dance. Results of the investigation revealed the students prefer the semi-formal idea, but the decision as to whether or not this event will be decided by the Student Council, the purpose of the poll being only to give those interested in participating in a formal dance an opportunity to be heard. With the exception of the entertainment which has not been decided, the weekend has been planned. With the exception of the entertainment, which is still to be made until the next issue of the Tech, the students are advised to plan now for this great weekend of March 3rd, which will be the greatest All-Tech ever.

FRESHMAN CLASS PLANS VARIETY SHOW

Richard Neilsen, president of the freshman class, announced that the freshman will sponsor a variety talent show. It is hoped that talent from the different classes, fraternities, varsity and junior varsity teams will participate in this worthwhile new age idea at Tech. In order to provide a night of good entertainment, more students will be needed to help; actors, dancers, comics, musicians, and comics will be needed. Plans have been made to award prices for the best group as well as the best individual in the show. This has been a successful event for 1962. As a result, the show will be a smooth run, and students are urged to come and help. More information will be given at the next meeting.

EVENING SCHOOL REGISTRATION

Registration for second-semester classes in the Evening Division of Lowell Institute will be held Monday through Thursday nights, Jan. 23, 24, 25, 30, Feb. 2 to 8:30 a.m. with Tech's main office, Jan. 27 to Friday night, Jan. 28, at 8:30 a.m. Please make sure to register before Jan. 28.

Prep class registration will be held Thursday nights, Jan. 25, 30, Feb. 2, 8:30 a.m. with Tech's main office. Please make sure to register before Jan. 28.

PAPER DEPT. AWARDS SCHOLARSHIPS

The Department of Electrical engineering and paper technology at Lowell Institute this year has awarded 13 scholarships to 13 students studying paper technology. Dr. Donald A. Sama, the President of the Tech, presented the awards to the recipients and the donor companies.

BOOMERS WIN L.T.I. BOWLING LEAGUE

This past week marked the completion of the first half of the semi-annual L.T.I. bowling league. In a very close race, the Boomers edged out the Faculty on the last night of action on February 24.

Members of the championship Boomers include Capt. John Grollis, Michael Sokolowski, Fred Bates, Peter Bliven and Tom Kane. Trophies were awarded to each of the Boomers, Pictured above (left to right) Peter Bliven, Tom Kane, Capt. John Grollis, Fred Bates, and Mike Sokolowski, and also to Pref. Lisie of the Faculty for a high triple of 177, to Guy Guegan of the Mass-Mass for a high single of 210, and to John Grollis of the Boomers for a high average of 172. The league is open to any interested faculty and students under the sanction of the American Bowling Congress. It operates one night per week Wednesday evening at the Alpine Lanes in Chelmsford, and is open to any organized team (15 men) or individual who wishes to be placed on a team. Handicaps are given for their balance. A meeting for the selection of officers will be held early second semester. Notices will appear in the Newsletter and the Tech.
CAFETERIA PROGRESS

In the last issue of the Text an article was written concerning the student cafeteria here at Tech. The article explained that Mr. Olsen, Dean, Joe Copeland, the Student Council President, and Mr. Copeland, the Editor of the Text, would meet to discuss just what could be done to improve our cafeteria service and quality.

A summary of the complaints lodged against the cafeteria, so discussed at the meeting last Jan. 8th, are as follows:

1) Food is not of quality paid for.
2) Too much fat on meat.
3) Meals should be served with meals instead of tonic.
4) Pastries should be protected from flies.
5) Cooks should not smoke while preparing food.
6) Eggs are sometimes undercooked or rotten.
7) Serving food should not handle money at the same time.
8) Tables are not kept clean.
9) Fried foods are too greasy.
10) Poor selection of food.
11) A dietitian should be hired to provide for balanced meals.

These points were thoroughly discussed by all concerned, and resultant recommendations were made to alleviate some of the dissatisfaction Joe Copeland, manager of the cafeteria, has initiated many new reforms.

To respond to clean tables and silverware, Mr. Copeland has hired two new employees and is willing to hire additional student personnel to work during the noon hour rush. Mr. Copeland has also procured a new vacuum cleaner and has agreed to serve milk with its meals for a nickle rather than a dime. (The milk, of course, replaces the soda nail is usually served with the meals.)

Mr. Copeland has asked Mr. Copeland to prepare a "dietitian special," this will be non-mandatory, but will provide a balanced meal for those individuals who are concerned.

Mr. Copeland emphasized that many of the complaints regarding the food could be rectified if the students concerned would talk to him directly at the above mentioned times. The following comments have been made to improve the cafeteria service and quality.

The administration officials and Mr. Copeland have more co-operated with the student representatives on this issue. The following comments have been made to improve the cafeteria service and quality.

The Text was so written that the students concerned would talk to him directly at the above mentioned times. The following comments have been made to improve the cafeteria service and quality.

The administration officials and Mr. Copeland have more co-operated with the student representatives on this issue. The following comments have been made to improve the cafeteria service and quality.

To the Editor:

The other day a classmate of mine in the English class is that the extra-ordinary happens to getting his own car, and we got into it last night. As my teacher was going to the next door to the cafeteria, I suggested that we go to the cafeteria for a snack. We went, and our waitress was an attractive young woman.

THE CREEPING SHINGLE

Consider a flat metal shingle 10" x 12" x 1/2", weighing 2 lbs., with its long dimensions along the slope, on a smooth waterproof surface having an angle of 20 degrees to the horizontal. The shingle is not attached to the roof, but is kept from sliding down by its friction; the coefficient being .5. In the morning of a sunny day the temperature is 40°F. During the day, it is warmed by the sun to 50°F; at nightfall, it is again cooled to 40°F. After such a cycle of heating and cooling, would the shingle have an overheating when the morning position by the end of the day, and if so, how much? What will its temperature be? Assume the shingle has a thermal coefficient of expansion of 2 x 10^-5 per degree and an expansion of the roof is a factor of 100 x .01. We received no answers from the Clarion joins issue, so we'll only give you one answer.

When multiplied by 4 gives the same digit in reverse is 2178. Look up your Christmas crossword puzzle, and the other problem again if you want to relax after an exam.
PHI PSI NEWS

After a long and restful vacation, all of the members of Phi Psi are ready to hit the field. Perhaps you will take advantage of the fine weather and try your luck in the intercollegiate track or football trophy? With the seniors finding hard objects to take interviews, and the seniors making sure that all the Phi Psi F.F. list, there could be the incentive needed.

Daniel Decker has finished his third year in our house and in the dormitory, and he is one of the few students who are going home for the holidays. His roommate, Frank Lach, is also going home. The rest of the room will be divided up among the other members of the house.

The Fraternity held its annual Christmas party last night, and all members of the house were present. The party was well attended, and everyone had a good time. The food was excellent, and the music was provided by the house band. The party lasted until late into the night, and everyone appeared to have had a successful holiday.

DELT A KAPPA PHI

First, we would like to wish all of you a happy new year from all of us. We hope that you have enjoyed your vacation as much as we did. Well, back to the books in time.
How Many Companies
Start You in Management—Move You Up From There?

Not many, but the Bell System you begin in a management position. You'll be given an opportunity to become a good executive, familiar with a specialized field of management, research or manufacturing positions. Only the sky is the limit for a bright college graduate in a field that offers you a prospect as well as a future.

If you're in the upper half of your class, you may be just the man we want. Make an appointment for an interview at your place of employment.

TECH TIDBITS

A tip of the fadora is due the Lowell Tech Varsity hoopers, following their consecutive victories over a highly-touted Clark University and Curry College, the two victors brought Tech’s seasonal record to 3-7.

Clark went into the contest highly favored as they had earlier belted Suffolk University, which is also having a bannier year. It was a nip and tuck affair with Tech hustling every minute. Leon “Goony” Uzdanovis had one of the highest points of his career, but it was a team victory as Koch, Picchiotti, Beresford, freshman and Hanczewicz all played outstanding ball. The victory over Curry was less spectacular, but the margin of victory made the win outstanding.

As was mentioned, Tech now stands with a 3-7 record, but with a few breaks the record could be much better as Tech has lost many close tilts. But, like a really great team, they stuck in there and beat Clark which is the high point of their season. A victory over a team like Clark makes the season a success, regardless of the team’s won-loss record.

Another school organization should be commended regarding the work they are doing. This, of course, is the rejuvenated Varsity Club. The members of this organization are working diligently to make the club a success. An example of this is the very successful dance they sponsored in conjunction with Lowell State. Plans are on the fire to have this department basketball playoff which would include the ME’s, EE’s, IM’s, etc. If you, the students, are interested, let either a varsity club member or Jim Oliver of the athletic department know. It could become a yearly sports event at Tech.

But all is not rosy in the sports world at Tech. The athletic director still remains in the Health Room. This naturally, detracts from his more important duties, such as supervising intra-mural sports, setting up the schedules for the various athletic teams, and coaching baseball. The quality of a program, suffers when the quantity of work becomes too much for one person to handle.

Finally, in closing, the call is out from the Text Sports Staff for more writers. At present, there is no underclassmen being groomed for Sports Editor. Therefore, if anyone desires to write, simply get in touch with any Text member. It will not take too much time and it is rewarding to see your ideas in black and white.

INTRAMURAL BASKETBALL

The two non-fraternity teams—the Independents and the Freshmen—are dominant, leading the intramural basketball league thus far. The Independents are on top with a 6-0 record, while the Freshmen are right on their heels with a 3-1 won-loss record. Phi Psi, with a 2-2 record, is in third place but led the other fraternities in the league in their quest for the fraternity trophy.

In games played last week, the Independents handed O Pi their third loss of the season in a well-played 52-49 contest. While the Freshmen edged by Phi Psi twice in a row by consecutive scores of 50-46 and 50-49, both games were hard fought with the winner not being decided until the last four seconds of play. In another till the Independents were easy winners over D.K.

after losing its fourth consecutive game—a 66-67 squeak to Nichols College of Dudley, Mass.—Lowell Tech quintet found the winning trail with a stunning 105-100 upset victory over favored Clark University at the L.T.I. gym last Friday night.

The contest was a nip-and-tuck affair throughout, and only in the last few moments separated the clubs with less than a minute of play remaining.

Tech’s two big men—Leon Uzdanovis and Ken Koch—were tremendous throughout the tilt, both offensively and defensively. Uzdanovis, playing one of his finest games at Lowell Tech, scored 38 points and hauled down 28 rebounds, while Ken Koch cashed in for 32 points and 13 rebounds. Uzdanovis and Koch accounted for 70 of the 105 Tech points.

Danny Pfeilschifter turned in a clutch performance when he hit for six consecutive foul shots in the final two minutes of the game.

The following night the LTI Terriers stayed on the victory path by bombing Curry College 103-69. Uzdanovis and Koch were again the standouts. Uzdanovis had 24 points while Koch ripped the nets for 22 markers.

Tech was never in trouble as they jumped to an early lead and increased it as the game grew old.

On The Tech Court

Coach John Oliver is deeply concerned with the recent inquiries that have plagued his squad. For the last few games he has only been able to draw nine players. Co-captain Peter Byrnes is suffering from a broken right ankle and freshman Steve Houde, who has been seeing a lot of action, is also unable to play because of an injury. Both Byrnes and Houde are flashy playmakers for the Tech Hoopsters.

When the LTI Team returns to the courts on Feb. 5 after resuming for first of four back-to-back contests, it will face Sophomore Dan Pfeilschifter, who has been playing aggressive ball for Oliver, will not be with the squad. Danny is planning to transfer to the University of Connecticut.

So unless Oliver comes up with another sparkling back-court man, he will have his troubles until Byrnes and Houde are ready to play again.

LECLAIR

INTRAMURAL VOLLEYBALL

by Jack Belliveau

A very tight race is developing in the intramural volleyball league between D.K., O Pi and the Shamrocks. As of Jan. 28, D.K. and O Pi are tied for the lead with identical 9-9 records. With 3 games left, the Shamrocks are right behind and ready to step in if these two powers falter.

League standings are:

Lun, Jerry, Pete
The glamour and excitement of space age programs often obscure a fundamental fact. It is simply that far 800thness may be coupled with sound, practical, down-to-earth engineering if goals are to be attained. This is the philosophy upon which Pratt & Whitney Aircraft's position as a world leader in flight propulsion systems has been built.

Almost four decades of solid engineering achievement at Pratt & Whitney Aircraft can be credited to management's conviction that basic and applied research is essential to healthy progress. In addition to concentrated research and development efforts on advanced gas turbine and rocket engines, new and exciting effects are being explored in every field of aerospace, marine and industrial power application.

The challenge of the future is indicated by current programs. Precisely Pratt & Whitney Aircraft is exploring the areas of technical knowledge in unaccounted body-dynamics... thermal and thermo-electrical conversions... hypersonic propulsion... fuel cells and nuclear power.

If you have interests in common with us, if you look to the future but desire to take a down-to-earth approach to get there, investigate career opportunities at Pratt & Whitney Aircraft.

For further information regarding an engineering career at Pratt & Whitney Aircraft, consult your college placement officer or write to Mr. William W. Stone, Engineering Department, Pratt & Whitney Aircraft, East Hartford, Connecticut.
In a recent issue of the Lowell Sun, an article was titled "Neutrals Schlepphemia." The article states that Jawaharlal Nehru, the Prime Minister of India, had informed his cabinet that it was time to abandon "non-alignment" in order to strengthen the anti-communist nations of the world. Mr. Nehru further stated that "a neutral policy might be back in India's cabinet, though not perhaps for a while." "I hope our role," he added, "is not to sit and do nothing."

The news of India's cabinet meeting is likely to cause much debate in the West. Mr. Nehru is expected to be a key figure in any future negotiations between the United States and India.

The situation in India is complex and delicate. The country is rich in history and culture, and its people are known for their resilience and strength. The United States and India have a long history of cooperation, but there are also differences and challenges that need to be addressed.

It is important to note that any future discussions between the United States and India should be conducted in good faith, with a view to promoting peace and stability in the region. The United States and India have a long history of cooperation, but there are also differences and challenges that need to be addressed.

A CASE FOR CRITICISM TO THE RIGHT WING EXTREMISTS

By Robert Boughton

It seems that the right-wing extremists in America have been the most successful political party to go about the land condemning anyone and everyone they suspect of advocating a confiscation of the status quo, whether it be for the sake of a series of affairs or anything approaching America's present sane, cautious, nuclear-wastepolicy. These elements among the right-wing Conservatives have great relish in savagely attacking government officials who consider the present world situation intolerable and the attack is at all times directed at the various local leaders. Of course, it is not so far-fetched a situation and from this we can get some true insight into the right-wing phenomenon. Once ultra-conservative student recently actually wrote a letter to the editor of the Daily Times expressing his disgust for the present government. This is a letter that the Daily Times has no reason to think will ever come to pass. But the key thing here is that this letter exists and that fact is not to be forgotten. The fact that there is a possibility that such warmonger doctrine is either insane or does not realize that there simply will be no winners in the next major war.

In addition, such irresponsibility and the wrath of the right-wing have not escaped the pages of the "Text". In the last issue an article appeared entitled "The Pentagon Inch" stating, "While I may be a little over-optimistic, it doesn't seem possible that Mr. Stevenson's wealth of rhetoric can overcome the circumstantial evidence that is piled up against him." Now, this sort of statement is baseless and is nothing but a series of loud attempts to make a desperate attempt to "dump Stevenson" and compiled by the prejudiced, right wing group. But if a letter to the editor is going to appear in the "Text" it is going to appear in the "Sunday Evening Post." The quality and honesty of this outrageous article, which shamelessly violated the sacrosanct of the "Text" lines, is a testament to the sad state of the Executive Committee. The Daily Times is going to allow the article to be printed and then totally made up at worst. A second member said the book "far less intelligent" than the one actually reviewed.

What is most important in this is not what Mr. Stevenson said at the formerly inviolable sacredness but that the Daily Times is anything but "inviolably sacred" and should be allowed to speak their minds freely without consequential harassment. Deaths, attacks on families of those which are considered "extremists" by the former Secretary of State, Mathias J. Lamb, of 1963, anyone not favoring the ideas of the ultra-conservative wing deserves to be considered "harried and feathered" and should be forced to leave positions of governmental responsibility. Such removal from office would be a test for the new leadership of the Kennedy Administration. Such an act would not be a victory but only a step toward deprivation of freedom of speech. If such "extremist" "extremists" ever come to power, it would be a return to the days of the former Secretary of State, the statesman, and the other top-secret advisory bodies will become functionless and worthless, the right of opposing views will be nullified and eroded and freedom of expression will disappear, and finally the United States will become fifty squabbling, minority countries each arguing over its so-called "county rights." The most damaging effect of such a so-called victory in the Stevenson affair is perhaps best summed up by one official of the Security Council who stated,

"If anyone were to run a complete transcript of what everyone said: every idea that was advanced, every suggestion that was made - during that week of discussions, there's not a man who was there that would not be embittered. People at those meetings thought they were going to be pilloried later on the basis of garbled versions of what they said, that the idea that the idea that the President soon wouldn't have advisers he'd just have 'yes men'...

And finally, since the authors of the new infamous article did not bother talking to Mr. Stevenson himself but rather relied on the advice of the editors who had no knowledge of the fact that is highly irksome to particularly like Mr. Stevenson and who, in fact, has been called a "harmless man" by one highly respected group of alleged appeasers, it is only just to quote Mr. Stevenson's views. On NBC's "Today" show he said concerning his former Secretary of State, James A. \(\text{O}^{\text{less}}\),

"This must be some kind of record for irresponsible journalism... I hope the time hasn't come in the United States when it is considered better to advocate war to settle issues, there is no better evidence of this than the recent statements about the future of the world is doomed. I think it's time to stop this childish talk about hard and soft lines among the advisors of the President..."

In closing, it is fitting to say that the right wing is not right.

THE LIT. T. I. BUILDING AUTHORITY WORKS

One of the newest organizations here at Tech is the New LIT. I. Building Authority. This was formed in 1961 by a unanimous roll call of both houses of the General Assembly. The Authority is responsible for the planning, construction, maintenance and repair of dormitories, dining commons, and other buildings. It is charged with the responsibilities of the use of the institution's buildings.

Previously to the Building Authority, there existed the Board of Trustees. This Board has been in existence since 1946 for the production of the common buildings. However, two years ago there was a question about the Association's legality to issue bonds to raise money for their projects. Since then, termed the Building Authority, the Association's deficiencies were reorganized and a new building was scrapped and the Building Authority was created in its place.

The authority was created with more flexibility than its predecessor. It has the power to issue bonds to raise funds, and also acquire the land needed for expansion. Since the state is now the major funder of the state, financing is facilitated. For example, the Bath Authority was controlled by the state and if the state budget was not able to cover the operation costs, the Bath Authority would have no way of financing such structures. However, the Bath Authority has the ability to raise its own money, this battleship is abolished.

The authority also has the power to provide income (dorm, dining commons, etc.) and to have any building or structure under the jurisdiction of the Authority, from the state, for example. These powers can lead to abuse, for the Governing Board of Directors and The College. The authority must follow its laws and regulations, and it is subject to any and all laws of the ten states. The Bath Authority certainly looks good on paper; let us hope that it will accomplish its tasks. It is a fast way and in speed in efficiency in order to accommodate and increase interest student enrollment.

A.C.S. AWARDS CHARTER

The American Chemical Society has granted the Charter to a Chapter of Student Affiliates in Chemical Engineering. The Institute and has awarded the LITI group a certificate recognizing its formation.

By their affiliation with more than 20 other similar student chapters, the STU. LITI students are entitled to all the rights and responsibilities of the charter.
