ANNOUNCEMENT

A two-day series of events is being held to promote business at the Lowell Technological Institute. The series, titled "New Curricula at LT.", will be held on May 11 and 12.

The events will include workshops on business management, marketing, and sales. Participants will have the opportunity to network with current LT. students and faculty and to learn about the latest trends in business.

The series will begin on May 11 with a keynote speech by LT. president Dr. John J. Lydon. The day will also include workshops on business ethics, leadership, and project management.

On May 12, there will be a panel discussion on the future of business and a chance for participants to present their own projects. The day will conclude with a banquet and awards ceremony.

Register online at the LT. website to reserve your spot. Space is limited, so sign up now!
During the past week or two there seemed to be a growing discussion among the students. This discussion is growing out of the appropriation by the Student Council to purchase letters for the building, which will spell out "LOWELL TECHNOLOGICAL INSTITUTE." The appropriation was made because the letters do not benefit the students directly in physical form and because this type of action is the responsibility of the Student Council. The student body had no say in this decision, and to tell himself that the Student Council was acting in his interest and that it is providing tangible benefits to the student body and the maintenance of a coöperation of funds.

There is one facet in this episode which does not coincide logically with it. Is this the fact that the students tried absolutely nothing to do about it? Perhaps it was not done, but it was not done in a way. What are the reasons? When the dissenters are asked why they didn't do anything before the money was appropriated, they give two excuses. The first is, "I don't care what Mr. Magnuson and the Student Council say." Each person in this school has three class officers as well as four Student Council officers who are elected for the purpose of representing the students in the matter of the new building. 50 percent of all students have stopped the Council. But no one approached the Council to express their views.

The second excuse is that no one knew about the plans of the Council. This excuse holds very little validity, also. The minutes of each Council meeting are posted in the washroom. This appropria
tion was not ratified through a Council meeting because of the inac
cessibility of washing over to Ernest Leach. This blood drive is run for the students' benefit to help them off the service on a community. By giving one point of blood, you inscribe for yourself, your family, and others in a; unlimited supply of blood for one year. As college students we should realize the importance of having our blood points to save lives. Student knows well the value of such assurance as does a student with a steady job. Such a program is the most logical way in which occasional blood transmissions. At 20.75 per point, such a person can become a blood provider for a certain period of time.

What can we do now? The drive is over so it is too late. I would have liked to give but I had a test. I had something to do, too bad. What can we do now? I am sure you are really sincere and would like to give you can. It will count towards your SGA points and will be recorded all day. The place is the Maggie Emma on Dutton Street. Just drive down Mound turn left on to the main street, and take the second street on the left. The corner on the left. What could be simpler? The time to donate is between Monday and Friday, 9:00 A.M. to 4:00 P.M. All donations are made towards our goal. Let's make that goal and go even further over 50,000 points. On hand for the drive on Friday, May 13, 1:45-7:45. The Maggie Emma on Dutton Street.

Second Chance

This year's blood drive was a little bit of a disappointment. Only 135 students out of 1450 actually gave a blood point. One could say that this year's drive is a real disappointment. There is no doubt that the Student Council made a mistake in decision. The blood drive is run for the students' benefit to help them off the service on a community. By giving one point of blood, you inscribe for yourself, your family, and others in a: unlimited supply of blood for one year. As college students we should realize the importance of having our blood points to save lives. Student knows well the value of such assurance as does a student with a steady job. Such a program is the most logical way in which occasional blood transmissions. At 20.75 per point, such a person can become a blood provider for a certain period of time.

The Student Council exists to serve the students. We are aware that the Student Council had decided to purchase the new building. It is important to note, however, that there were those who opposed this decision. When the dissenters are asked why they didn't do anything before the money was appropriated, they give two excuses. The first is, "I don't care what Mr. Magnuson and the Student Council say." Each person in this school has three class officers as well as four Student Council officers who are elected for the purpose of representing the students in the matter of the new building. However, they have not approached the Council to express their views.

The second excuse is that no one knew about the plans of the Council. This excuse holds very little validity, also. The minutes of each Council meeting are posted in the washroom. This appropriation was not ratified through a Council meeting because of the inaccessibility of washing over to Ernest Leach. This blood drive is run for the students' benefit to help them off the service on a community. By giving one point of blood, you inscribe for yourself, your family, and others in a: unlimited supply of blood for one year. As college students we should realize the importance of having our blood points to save lives. Student knows well the value of such assurance as does a student with a steady job. Such a program is the most logical way in which occasional blood transmissions. At 20.75 per point, such a person can become a blood provider for a certain period of time.

What can we do now? The drive is over so it is too late. I would have liked to give but I had a test. I had something to do, too bad. What can we do now? I am sure you are really sincere and would like to give you can. It will count towards your SGA points and will be recorded all day. The place is the Maggie Emma on Dutton Street. Just drive down Mound turn left on to the main street, and take the second street on the left. The corner on the left. What could be simpler? The time to donate is between Monday and Friday, 9:00 A.M. to 4:00 P.M. All donations are made towards our goal. Let's make that goal and go even further over 50,000 points. In this issue we feature Jim Davlin of Lowell, Massachusetts, a senior majoring in physics for his outstanding contribution to L.T.I.

Jim, who lives with his parents and sister at 57 Lorong Street in Lowell, entered Tech in 1950 after graduating from St. Peter's Grammar School and Lowell High School where he was a "cadet officer" and a "sane scholar."

Since entering Tech Jim has been very active with the Newman Club, the student section of the American Institute of Physicists, the golf team, and the T.O.C.

As Newman Club president for the last year Jim has served on the executive board, a delegate to the Boston Federation, and as social chairperson in which capacity he led the club into a more activist role designed to bring happiness to the young and less fortunate people at St. Patrick's House for the aged, the Tewksbury State Hospital, and the French-American orphanage. At the province convention on April Fourth Jim was elected chairman of the entire province of eighteen colleges, universities, and schools in universities in Eastern Massachusetts.

As a member of the AIP Jim was selected to lecture on the fundamentals of a nuclear reactor to the alumnus as part of alumni weekend last year. Jim has also been a physics student lab instructor for the past two years and has worked for the L.T.I. Research Foundation for the past three years.

Presently, as a senior project Jim is taking an advanced class in physics to seniors at Lowell High School each Tuesday. He tells us that the course offers material presented in our PH103. Jim has been a letter-winner in the last three years with the golf team.

All this and Jim has reportedly made the Dean's List and has maintained a 3.8 overall cumulative average.

Jim likes his hobbies as golf, basketball, and dancing, and can frequently be found on a Saturday night at the Commodore.

Jim has no immediate plans for service or marriage, however, he intends to continue his studies toward a M.S. here at Tech where he has received a fellowship to teach next year. Jim will also be continuing his work in the Newman movement as provost chairman, and we are sure he will be as successful in all his endeavors as he has been at Tech.

What Is Pershing Rifles?

Pershing Rifles is a national military service organization. Founded in 1946 by General of the Army John J. Pershing, its purpose is to encourage, preserve and develop the highest ideals of the military profession.

The PERSHING RIFLES is a national society is evidenced by the fact that more than 50 colleges and universities across the country sponsor P/R clubs today. It is an honor society because prospective members are given up to fourteen weeks of rigorous and intensive military training even before being considered for membership. Any ROTC cadet who can prove himself in the fourteen weeks is eligible for membership in PERSHING RIFLES as acceded by General Pershing. Those qualities are evidenced by the official test of the society which consists of a General's Salute and force sound a true and crossed rifles as a salute.

The honor symbolizes the personal courage of the members of the society and the service of the society to the nation. This test is the traditional tape assigned before the individual with the tape represents the individual's capability to defend himself and is a symbol of the service's respect for the society.

The proper attitude of military people towards Pershing Rifles demands a high level of intelligence and knowledge conformed with a strong sense of obligation to, and love for, the country. In the service, the proper attitude of military people towards the tradition of PERSHING RIFLES is divided. The Junior and Senior cadets in the formation and leadership and the internal leadership is evidenced by the society.

The last year, Squadrons N. The armed drill team is designated as the official lead in all drill meets. We have planned them in the US Army and JROTC at the June 9, 1965, the Squadron will be participating in the opening of the Cavendish Hall and the World's Fair Drill Meet being held at Soldier's Bowl. Many of the top units in drill teams in the country will be participating. Included among them are Northeastern University, Company A 1st Bn. and Company B 2nd Bn. of the University of Vermont.

Registration for the State Drill Meet will be in both 1st and 2nd Drill Meet. Drill Meet will be registered by the book and no unregistered members are allowed. Drill Meets are always interpreted by a team of individuals, whose role is to supervise the drill teams and to determine the capabilities of the teams.

The Jr. and Sr. team of the JROTC is selected by the Captains. The movements and movements must be performed with exactness and correctness. The Jr. and Sr. teams are selected from the full strength of the team and the capabilities of the team.

Tom Thomsen wanted challenging work

T. R. Thomsen, B.S.M.E., University of Nebraska, '68, came to Western Electric for several reasons, principal of them was the fact that one engineer in our Western Electric engineers play vital roles right from the start. Working on exciting engineering projects in communications including electronic switching, power, cell, microwave systems and optical fibers.

Western Electric's wide variety of challenging assignments appealed to Tom, as did the opportunity for advanced study through full-time graduate engineering training, numerous management courses, and a company-paid Tuition Reimbursement Plan.

Tom knows, too, that we'll find thousands of experienced engineers for supervisory work in the near future. And he's got the inherent competitive spirit necessary to start. Right now, Tom is developing new and improved methods and process control techniques to reduce manufacturing costs of telephone switching equipment. Western Electric's western is the right place for him. What about you?

If you set the highest standards for yourself, engineering, and help the folks at work for we're looking to talk to you! Opportunities for fast-moving careers exist. Here for engineers and technical engineers, and for those who are interested in the physical science, liberal arts and business programs. For more detailed information contact your nearest office of the Western Electric Career Opportunities booklet from your Placement Officer. Or write to your nearest Western Electric Career Opportunities office.

Located at Western Electric's manufacturing and supply unit of the bell system, Western Electric is the leading manufacturer and supplier of telephone switching equipment, communication systems and components. For more information contact your nearest Western Electric Career Opportunities office.

He found it at Western Electric
Dear Gabby,

Gabby, my club is giving its annual banquet soon and I want to go. I paid my dues last week, so I have the right to go, but since I haven't shown up at any of the meetings I'm afraid I'll be too embarrassed to enjoy myself.

Dear 'Joiner',

Go to the banquet and be noisy. Just keep away from the officers and you'll be all right. You can be sure that some of the regular members showed up at enough meetings to notice that you were never there.

Dear Gabby,

Every so often we have live written exercises. My teacher insists that they're not tests or quizzes, but so far I've flunked every one and he's beginning to give me a strange look. What does this mean?

'Anxious'

Dear 'Anxious',

You and I both want the band.

Dear Gabby,

We have got this class where because the teacher had a mono assignment, I went forward to hear this teacher because his lectures are always so interesting. Now my whole week is ruined.

What shall I do?

'Boony'

Dear 'Boony',

Perhaps if the whole class signed a petition he would give you an extra lecture to make up for the one you missed. If this doesn't work you can always challenge him to a week down that VW Highway.

Let's say for a minute, this is you.

Once you wear the gold bars of a second lieutenant in the United States Air Force, what's in store for you?

Well, you may fly an aircraft entrusted with a vital defense mission. Or you may lead a research team tackling problems on the frontier of knowledge. You'll be helping to run an organization that's essential to the safety of the free world.

Sounds like you'll be called on to shoulder a good deal of responsibility, doesn't it?

But when you come right down to it, that's what your college years have been preparing you for. You've got the ability and a good education. Now's the time to put them to work!

You'll have every opportunity to prove your talents in the Air Force. By doing so, you can put yourself and your country ahead.

If you're not already enrolled in ROTC, you can earn your commission at Air Force Officer Training School—a three-month course that's open to both men and women college graduates. To apply, you must be within 210 days of graduation.

U.S. Air Force

Wounded Pig Identification

It is estimated that there are some 2,700,000 pigs of both the short and the long-loom types in each cattle market in one of our states. No one, however, has yet determined whether or not the long-loom variety produces a leather product which is more desirable than the traditional hide. 

Our softball team came up against our first Whipple by the end of the month. The team is now looking forward to the game. The victory will be an important milestone in our season. The team is looking forward to the game.
COLOR - CONFIDENCE - WINNING TEAM

Have you been up to Voyager Country lately? You should make it a point to go. It's there that you will see Tech's rock climbers scaling almost every vertical surface of the tall rock walls. The climbers have been busy this spring, headlining their last three matches with a commendable six and two record. Their two defeats were at the hands of powerful Colorado College and San Juan College. This is no ordinary golf team, though. The old teams were composed of seven or eight members trying to fit spots on the team in any two's or three's. The new team is just two's or three's equal for the most part. With this the exception of the top 3 men, any given day six men are able to knock each other out of the top seven.

The team works on the Legend System. The top seven men rule the seventh on this ladder. The positions are filled by means of competitive matches between the members of the squad. Any member can challenge any other member of the team to try to better him on the most unusual of the various courses and make up scores.

But I do want to think that this competitive spirit is the only thing that is making this wining season for Coach "Rocky" Harrison and his boys. These boys not only play a good game, but they are also good golfers too.

Everyone that I have talked to has the same attitude about the team. They say "nobody can beat us," and they mean it. They have lost but two matches to date, and they are not willing to even think of that.

The entire team is made up of a sharp black, white, green, and red edition. They are all in agreement that a good color on an already colorful course is the key to winning.

The team has been and will be at the prestigious Virginia and Maryland, and it will be at the Southern Athletic Tournament. The team has also produced a winning season for this young team.

Indeed, it is a young squad. The team will lose only two of its members during this campaign, but a good golfer for a team is a forty-year veteran, and a near-upset. James Davison, a forty-year veteran of the golfing game, will be missed by Coach Harrison and his assistants.

Loo Flynn and Mike Oake, both shoot in the middle to low 70's, Maurice Ochlo and Ralph Wepplo are also capable of shooting in the upper 70's. All in all, it looks like it will be a couple of good years for the confident, colorful and winning golf team. Our Taylor and his first-year golfers, Dave White, for the job they are doing with a winning team.

As a final note, you know all the secrets are coming out on the teams. You can take them to a long, long day, and if you would like to write for the sports department next year drop your name into the Text office, in care of the Sports Department.

DELTA KAPPA PHI

The past few weeks have been filled with many activities for the members of the Delta Kappa Phi fraternity.

There was quite a disturbance going on in the house while the Purdue baseball team was playing. A Purdue fan was heard to shout "Hit that home run, Dickie" and an unknown victim trampled and screamed away. It was quite a racket.

The last time P. Foster's team was defeated he was pronounced dead by Dr. Brzezinski. It is not known if the victims are on this earth or heaven. If so, it is a wonder the teams are still capable of winning.

The last game was won by the winning team of the University of Chicago, University was beat by 14-2, and the University of Michigan beat the Yale, 6-3.

The next game will go at the University of Notre Dame, Lake and Fourth, and Notre Dame and Philadelphia only one a year isn't enough in the opinion of the Delta Kappa Phi fraternity.

Wednesday the Brothers played by Lamborghini Phi. Everyone was thrilled with the victory that came in the last inning. The score was 12-8. It was a hard fought contest, and both teams played on the edge of the field. Hailing from somewhere on the East Coast: The Ziggurat Lumen stars again.

TECH BOWLERS GO TO PROVIDENCE

On the weekend of April 18th, the Tech women's bowling team traveled to Providence, Rhode Island, to compete in the Atlantic League in West Broad. The team traveled on April 18th and arrived in Providence for the New England Championship.
**WANT A JOB IN EUROPE?**

The Grand Duchy of Luxembourg—Every student in America can get a summer job in Europe and a travel grant by applying directly to the European headquarters of ASIS in Luxembourg. Jobs are much the same as student summer work in the U.S. with employers offering work periods ranging from three weeks to permanent employment.

Lifeguarding, office work, restaurant jobs, factory construction, camping counseling, and farm work are only a few categories to be found among the 10,000 jobs ASIS has on file. An interesting summer position not found in America is tutoring. Numerous well-to-do European families are inviting American college students to spend the summer with them and teach their children English.

Wages range from $800 a month, and in most cases neither pre-existing nor knowledge of a foreign language is required. ASIS, in its seventh year of operation, will place more American students in summer jobs in Europe this summer than ever before.

Interested students should write, enclosing $2 for the complete prospectus including illustrated job listings, job and travel grant applications, handling, and overseas travel costs, to Dept. X, American Student Information Service, 22 Avenue de la Liberté, Luxembourg City, Grand Duchy of Luxembourg. Registered students and teachers also receive a $5 cash refund towards the purchase of America’s new student travel book, Earn, Learn and Travel in Europe, which costs $4.95 in bookstores. The new, 425-page, hardback edition gives every summer job available in Europe and contains more than seventy photographs, many showing American students actually on the job in Europe, in addition to the brief history of each European country, all of the necessary travel facts students need to know, money saving tips and many useful charts and tables.

**CHURCH RIDES**

Any student desiring a ride to the First Baptist Church on Sunday morning for church services should seek them before the library at 8:45 to be picked up by a van, Volkswagen.

**PROFESSION: STUDENT**

"Okay, Leary, Valentine made a point—society is responsible for you...so let's say it's not you I'm plunging...let's say it's twentieth century man."
TO MOTHER
I like the coast and the sea,
With green waves, sempre high and free.
I like the rain, I like the sun,
But do you know what I like best?
I like the morning, its sleepy dew,
I like the daisies, their golden hue,
But do you know what I like best?
I like the water with its sparkling grace,
I like the islands with their snowy face,
But do you know what I like best?
I like the meadows with their lovely flowers,
I like the fields with their waving grasses,
But do you know what I like best?
The way I like, oh mother of mine,
Symbolic of all things good and fine.
So kind, so true, so wise and just,
I'll love you mother, until I rest.

Cherry blossoms are all over the ground
Cherry blossoms frolic in the sun
Red wine (wine) the blue
A midnight breeze wakes me
His cry heard round the avenue.
Scattered bright as to the velvet light
I could not dim a line
Suddenly call the western sky
A star falls to aocket through
by Lee Jong

Cherry blossoms frolic in the sun
Red wine (wine) the blue
A midnight breeze wakes me
His cry heard round the avenue.

ON UPSTREAM DAY

On Wednesday, May 18th, the Student Council is again sponsoring its annual Spring Sports Day. In the past this event has proved to be a most enjoyable and memorable for all those who attend. It is a day when the worries of school and studies are left behind and everyone drops the formalities of professor and student. The faculty and students join together to provide stiff competition in such sports as softball, football, and volleyball. As the picture on the right of last year's affair everyone less themselves go. A golf tournament is also in the schedule and trophies will be awarded to those who win at the little white ball the best. A buffet chicken dinner will be served, including all the trimmings, and it is no doubt that it will be devoured heartily this year as last.

The Dean of Students has continued to suspend all classes on this day if enough tickets are sold. So here is your chance to get a day off for only $1.00. Tickets will be on sale Wednesday thru Tuesday of this week. Check the Newsletter for exact time and location. Transportation will be provided in the form of buses, which will leave from in front of the dormitories at approximately 10:00 in the morning. Check with the Newsletter for all final arrangements and do not miss out on this opportunity to enjoy yourself and know you don't have to cut classes to do it.
COMARIOETY
by Dave Barker

Well, what can one say for the Comariety, that is, what can one say which wouldn't hurt anyone's feelings. I really don't know for the show was not really great although it wasn't really bad. With proper planning it could have been a very good production, in fact, with proper planning it might even have started on time, but I guess that's asking a little too much around Tech.

Several unsung heroes, however, deserve much credit. These are the faculty members who let the show go on uncensored. Of course what could they lose, the students already know the situation here at Tech and the visitors all thought it was one big joke. The group from the neighboring hospital really surprised me. I never knew they had such talent. I'll have to get sick and see if they can more.

There were some highlights to the Comariety. They were the jazz band, according folk selections. This is the school that is, and the boys merely. The rest varied in talent but represented a lot of diligent work, and the players should be commended for their effort and their contribution to the show.

A good tip in a person who creates the smoke in which other people smoke there's fire.

— Dan Revello

Everything comes to him who hustles while he waits.

— Thomas Edison

NEWS FLASH —
Without discussing the fine showmanship of Carl Mendosa, the Test is duty bound to report that the funny material was actually written by Humor Incorporated. Humor, Inc., a subsidiary of Pjetro Promotions, is one of the newer organizations on campus. The four pictured above, Carl Mendosa, Mitch Olson, Rich Haske, and Water Pool, wrote, field tested and edited the material used in Comariety. Congratulations to the boys on the fine job and better luck in the future.

We'd like to give special thanks to Prof. Robertson for assistance in writing and arranging some of the routines. Carl Mendosa, Water Pool, Rich Haske, and Ed Revello.

Favorite Tunes from Austria and Germany
Authentic waltzes, drinking songs, waltzes, and German folk music. Bring the old world flavor into your home with the unforgettable melodies of the masters and traditional Austrian, German tunes presented by native ensembles. 20 factory new 45 rpm records for the unbelievable low price of 26 dollars. Send cash, check or money order and we pay postage. Prompt delivery. Sorry, no COD's.
