Massachusetts Civil Service Examination

State Service

Industrial Instructor (Textile) Department of Vocational Correction, Massachusetts Industrial Correction.

June 11, 1932

Last Day for Receipt of Applications, Wednesday, June 1, at 5 P. M.

Minimum salary, $1,000. Maximum salary, $1,600 per year.

Duties—Instructor in design, printing and finishing, blanket weaving, loom and cotton spinning.

The required qualifications are good knowledge of the practical subjects, and in other subjects, a general average.

A typical examination may be found in the bulletin posted in the Instructor's office.

Textile Players Enjoy Party in Boston

A dinner and a theatre party was enjoyed in Boston on Thursday night. The guests on the occasion were the students and members of the class of the and the management of "Biggb Crook", the recent dramatic produc- tion of the Lowell Textile Players. The party included Prof. E. J. Pickford, Faculty Advisor; Prof. Russell Brown, Assistant ector, and Charles J. Keeney, coach of this year's production.

sent to over a thousand members of the Alumni Association in all parts of the country. The response has been very satisfactory. It is expected that from 250-300 will attend this year's reunion.

An excellent program has been arranged by the officers and directors of the Association. The luncheon will be served at twelve o'clock to which the faculty and undergraduates have been invited. The undergraduates have also been requested to attend the Technical Program.

The Technical Program was started three years ago and has not been without much approval that the officers have been able to accommodate it in this year's program. The program is very comprehensive.

The papers are to be read by well known engineers. The Engineering department is a new group, and it is under the direction of Alexander Campbell, '32, and Alfred B. Schaller, '33.

The President then presided a question and answer period and asked Mr. Keeney to announce the order of the day. Mr. Keeney then introduced the various officers and the program was concluded with music furnished by the faculty.

The writer urges all who read this article to help the A. A. in this time of financial need. The smallest sum will be acceptable. If you cannot af- ford to give a dollar, then you might attempt to help Mr. Keeney in his work. Mr. Keeney.
THE TEXT

Lowell Textile Loses To Villanova 7-2

Textile dropped a 3rd setback to Villanova, Thursday, May 13th, in the last meet of the season. Best was due to the tenacious play of the offensive line which was a double by K. M. McKee, finishing pitcher of the visiting nine. The home team made only three hits during the nine innings of which was a double by Prospero which accounted for the second run.

Although the Villanova team won by a five point margin, the Textile players played a splendid game. The fact that 10 of the 16 men made low enough hits indicates that Lowell was stung for the loss. Carver, who pitched for Textile, was kept of the fence. "Rusty" showed his batting techniques and made nine hits and two points.

Joe Crecel, of the Villanova team, was the heavy hitter of the game. He made two triples, one double and one single. The score of the home team was Kolman, who caught the entire game and made twelve putouts, four of which were sacrificed plays.

Our Coach

W.W. Rusty Yarnall

L. T. Yarnall has done a magnificent job this season, in building up the Textile team. He has been successful because he has made the team a whole. The men have been given their individual assignments, and have been assigned to their best positions. He has been consistent, and has been able to keep the team on an even keel.

Yarnall was born in the State of Illinois, where his father was a farmer. He attended the University of Vermont, where he graduated with a Bachelor of Science degree. After serving in the army during World War II, he returned to the university and majored in Textile Engineering.

Our Coach

W.W. Rusty Yarnall

L. T. Yarnall has been fortunate in the past few years, in developing the services of "Rusty" Yarnal as coach of the Textile team. In football, basketball, and baseball, he has shown the Textile team how to win. This year, Rusty has been able to attract two top-class athletes to the Textile team. The addition of these athletes has given the Textile team a much-needed boost.

Rusty was born in the State of Illinois, where his father was a farmer. He attended the University of Vermont, where he graduated with a Bachelor of Science degree. After serving in the army during World War II, he returned to the university and majored in Textile Engineering.

MIXED TEXTILE INSTITUTE

Four-Year Course in CHEMISTRY AND TEXTILE TECHNOLOGY offered by the Department of Textile Engineering of the Institute of Textile Technology. The course is designed to prepare students for careers in the textile industry. It is a four-year program, with courses in chemistry, physics, mathematics, and other related subjects. The program is designed to provide students with the knowledge and skills needed to succeed in the field of textile technology. Students who complete the program are eligible for employment in a variety of positions in the textile industry. For more information, please contact the Textile Technology Department.
Wool Men Visit Hat Factory

On Tuesday afternoon, May 19th, at the invitation of Mr. Benjamin Feinberg, manufacturer of the plant, the second year wool and the engineers, under the guidance of Mr. Peter beck, made a trip to the Bradford Hat Factory, directory.

The party, which arrived at the factory a little past 5 P. M., were greeted by a clarinet and cornet of the orchestra. This remark created a great deal of mirth. After the ventilations and the introductions were over, Mr. Feinberg took the group into his private office where they were shown the different stages of the various processes and the machines used in the manufacture of hats.

After the above task, the party was divided into two groups. One group was escorted through the factory by Mr. Feinberg, and the other by Mr. Edward Curry, plant superintendent.

The first group visited the testing room, where many kinds of coarse wool and worsted were examined. The difference between coarse wool, carded wool, and second quality was exhibited by many samples. The blending and mixing of wool, after the testing operations were over, then took place. Girls with burling machines sat at tables and carefully pulled the coarse wool from the vegetable matter from the parboiled finished wool. This operation was very interesting and the entire group of wool, lint, and dust was treated with the salutation of silence. After all wool and lint was pulled out, the wool was next washed and the Scandinavian machines were run in accordance with the cleanliness of the wool. Girl after girl was shown to the various stages of the processes included in the factory, and each group of wool was shown by Mr. Feinberg in his office and dramatic picture shows us the significance of the work.

Mr. Feinberg made a gift of a first class hat to every member of the party as a souvenir of the visit.

After the visit, a luncheon was given at the Medford Country Club, and the entire party was treated to a fine meal. The party gathered to the end of the road, and the whole group was rewarded with a colorful and interesting visit to the Bradford Hat Factory.

When the Brake Broke

Special to the Lowell Sun

Shelburne: Well, I was knocked speechless, and the wheel was knocked off my spokes.

No Difference

Customer: What a terrible thing to happen! He ordered a perfectly good, and you gave me space. Put your hands all right. The price is paid.

——

Mr. Feinberg: Judge: It seems to me that I have never seen before.

Frederick: You have your honor, you knock. I taught your daughter dancing lessons. Judge: Thirty years.

An Abiding Idea

Tenderly, do you want to see something alive?

Font: Yes, what is it?

Tenderly: Put a sponge in water.

How to Get 'em Closed

In a closed position, you can close your eyes for five minutes. Can’t you recognize something?

Picture: Go in for book.

How to Get 'em Opened

Jim, maybe you can call once every one cent, if it cost once cost one cent and a quarter cost five cents.

John: Why, fifteen cents.

Jim: Well, I figure it out here at six cents and twelve cents.

The Higher Up

So you’re a working man with both feet on the ground. What do you do for a living?

Tenderly: I work on a man with both feet on a dock.

Cib Taft

Mother: James, did you ever call the counter under the bed, I told you.

James: No, I don’t want to.

Mother: What kind of all did you want?

James: Cooker. Cost all, of course.

Latest in Medicine

Rate, if you don’t know the tag, you can’t. Take some sodium chloride of ammonia.

Cash Preferred

Cash: Have you a few ounces of gold?

Cash: Young man, my time is worth 50 cents an hour, but I will give you 25 cents an hour.

Cash: Thanks, but if it all goes to you, I’d rather have it.

Lowell Textile Defeats Clark University

Easy Wins for Institute Team by Scores of 13 to 8—Savard Shines With Willow

The Lowell baseball team held a walk-away with the Clark University team at Worcester Saturday afternoon, the score being 13-8 in favor of the locals.

The game was one in which Textile made the best of its opportunities, scoring runs on the same number of hits and three hits all singles. With the exception of a three-strike walk-up by Pilgrim in the seventh inning which drew two runs, a long fly by Parkins in this inning also scoring two runs.

Savard had a good day with the bat with three hits of four at bat. The other players were good offensively and there was little fault found.

Following the score:

DESIGNING PREPARATORY WEAVING FINISHING SELLING

Where do you hope to fit in this picture?

If you have decided you hope to create a broad canvas requiring flexible LOOMS.

PREPARATORY work must be handled with the knowledge that the modern automatic speed LOOMS require better warp and filling.

WEAVING to a major extent of manufacturing textiles and this requires the constant study of improvements to best advantage. Different types and best adjustments of LOOMS to improve the maximum of good quality and efficiency.

FINISHING machines desired goods to improper adjustment of LOOMS.

SELLING involve also a knowledge of new developments in LOOMS to be examined carefully and utilize those which are within your field to keep ahead of competition.

As you progress from your first position to that of executive, follow the example of an increasing number of mill men.—Keep in touch by making regular visits to "THE LARGEST BUILDERS OF PANTS WEAVING MACHINERY IN THE WORLD.
