C. FREEMAN WINS AWARD

On Tuesday, February 17, the annual brotherhood banquet was held in Temple Beth-El, Lowell. Carl Freeman, senior textile Chemist, was honored by receiving the keynote address at Lowell Tech from Dean Frank. The recipient of the award was Mary E. Greenberg, a student at Lowell State Teacher's College.

Previous to giving the award Mayor Samuel Pollard addressed the students. He attended the College under the "Enrollment, Guidance, and direction" in the student stating that "there is a real conflict of mediocrity" in our present day society. Standards of living can be raised only by utilizing these three.

1. Creativity
2. Productivity

He further stated that big business is developing a new kind of small businessmen. "My firm," Pollard said, "is not that cooperatice effort be too big but too small. The state of the art must be in a democracy must be upheld for the public. This through preservation, a process for sign policy, we will defend the ideas of the nation as scientific teachers and nurses.

Following the brotherhood award and a timely joke by David Sargent, the group, composed of students from Lowell Tech, Lowell State Teacher's College, Lowell General Hospital, and various faculty members, heard a world renowned ensemble and choral group. The group represented Lowell State Teacher's College.

LT GETS $20,000 GIFT

A gift of $20,000 was made to the estate of the late Russell Weeks Jones and bequeathed to the Library's division of chemistry. Dr. Martin Lyden, president of the Institute, announces. Mr. Jones, who died in 1932, was graduated from LT in 1896 and taught at his alma mater until the death of Dr. Lillian, to whom he was a textile chemist for many years.

ATTORNEY GENERAL PRESENTS CHECK—H. Pleasant C. C., the Attorney General for the State of Maine, presents the check to the estate of the late Judge John M. Fordham, a political leader of the State. President Lyden, right, while Dr. Samuel J. Lyden, chairman of the Board of Trustees, looks on.

GRADUAL THICKNESS

The "thick" sheet shall be of suitable, literature, and educational value. A catalog of this nature is to be submitted by the chief librarian of a research table and of practical value for the achievement of the standard and the quality of the text. Among the means to be used in this particular edition is the use of all normal devices such as footnotes, references, clarifications, and such matters as may be appropriate for the fulfillment of its objectives.

The preceding section was taken from the constitution of the Institute of Radio Engineers, Inc., written in 1912. To perform with maximum efficiency in fulfilling basic aims, the organization has encountered various methods of reaching the people in the field. It does thereby through its member's strength and the membership, the students, the first principle of appointment.

The following membership is composed of any student who is (a) taking a regular portion of his time in a regular course of study in the field of engineering or science of recognized standing, or (b) defined as a student who has completed a minimum of 12 hours in a regular course of study at the University of Lowell, or in an equivalent field of study at another institution, or in another school approved by the Committee for student membership purposes.

AGRICULTURAL RATES

The agricultural rates are graded for the following time periods: 1. A rate of 1.5 is to be used for the first four years of the four-year program, and for the entire period of study at the Institute with no failures.

2. A rate of 1.0 is to be used for the entire period of study at the Institute with no failures.

3. A rate of 0.5 is to be used for the entire period of study at the Institute with no failures.

4. A rate of 0.0 is to be used for the entire period of study at the Institute with no failures.

ANNUAL REPORT

The annual report of the College was presented to the Board of Trustees and to the public.

KOREAN UNIVERSITY PRESIDENT VISITS LOWELL TECCHUM

On February 16, Dr. Suh Yum Cho, president of the National University of Korea, is to visit the U.S. to familiarize himself with the developments in American University education. This seven week tour of many colleges and universities here is being sponsored by the University of Minnesota, under minorities in educational opportunities in the United States. The students included:

FRATERNITY NEGLECT

Congratulations are extended to the nucleus for having
their second meeting of the year. The key words are
the nucleus as providing “its members with an opportun-
ity to get first-hand experience in the fields of public
speaking, human relations, seminars, and all the other
components of a good technical education which are so
vital... today. Membership in the nucleus is restricted
to the upperclassmen of each fraternity. On the basis
of their scholastic achievement and extra-curricular
activities. Membership in this activity is a privilege,
and the requirements are set so high that only the
members that are available to its members are greatly
appreciated.

When interviewed recently by a member of the TEXT,
one nucleus member called the organization “crumly,” while
another said, “It was much better in past years.” Where
does the fault lie?

Fraternities, in their quest for perpetuation on this
campus and other campuses as well, always cite addi-
ments and statistics fraternity men have compiled. Among
these statistics is the noteworthy situation that fraternity
men are the upperclassmen of the campus in this organiza-
tion. The nucleus is not a backbone of the upperclassmen
of Lowell Tech’s case is no different and our extra-curricular
organizations are controlled by fraternities. Nucleus is only
one of the extracurricular organizations that are usually
lost because members belonging to fraternities
have passed their membership to their fraternity bro-
thers.

This is the reason why nucleus is so poorly handled,
fraternity members have little interest and many are not
participating in an informal, intellectual, round-table dis-
cussion. There are, this year, 12 members from the four
fraternities in the campus in this organization because
were 12 members as well, and although the TEXT does not
have the statistics, it is more than likely that the 12 mem-
bers of the nucleus were all fraternity members. Striped
membership for many years. This would not be
a deterrent factor if the members WERE sincerely in-
terested; however, this is impossible. A nucleus member
stated above; but because fraternity bonds are strong, the
nucleus, as well as other organizations on campus, has suf-
faced. Student Council membership, for instance, has been “resticted” to one of the fraternities on campus for years after which has caused students as well as adminis-
tration officials to look upon the officers and organization
itself as being an unimportant and unimportant. Equally as harmful to the poor
management of certain student organizations is the “too

LOWELL TECH

WHIPS MERRIMACK

A large crowd was on hand to see the record-breaking performance of the Lowell Tech hockey team. The game against Merrimack was an exciting one, the Lowell Tech players displaying their skill and teamwork to the fullest. Merrimack was no match for the Lowell Tech players, who skated away with a 3-0 victory. The Lowell Tech team's forward line, led by three stars, scored all three goals. The winning goal was scored by the center, who took a pass from the right wing and slid the puck into the empty Merrimack net. The defense, led by the goalie, blocked all shots from Merrimack. The game was well-attended, with many spectators cheering and shouting for the Lowell Tech players. The players were exhilarated by the crowd's support and skated with extra passion.

THE NEWEST GYR TET

What do you think it's like to be the newest member of the Gyr Team? Here's your chance to find out! Join us for a special day of fun and games on the slopes. We'll teach you how to ski and snowboard, and you can practice your skills with the help of our experienced instructors. Whether you're a beginner or an expert, you'll have a great time at our annual Gyr Team event. So mark your calendars now, and get ready to hit the slopes!
BLOOD BANK
Because of the Turkey bank program, 13 patients connected with the Sir Francis Bank meeting. 13 patients blood of the last four to the bank.
Next Thursday between 30 am, and 4 pm, the State and Hospital Board will make its annual visit to Kings Lounk.

A quota of 200 donors will make the Sir Francis meeting, as this meets the needs for free blood service in the year, but the one that gives the members of families of the patients, of course, makes the difference.

Students under 23 must have a medical and dental examination. Please give one up to the Office of Student Health and, after, give it a copy to the Student Health Center.

STAFF MEET

13th OCEANS MEETING

This is the 13th Ocean meeting, and this year it was held at the University of Ohio.

The features of breaking and tearing strength were consider- ed, and the role of environmental factors, while the others were considered as of secondary im- portance.

Other factors were subjected to a analysis of strength and exposure conditions. The effect on the losses in strength of the fabrics, and the effect of exposure had no ef- fect on the losses subjected to shelf storage.

The fabric was subjected to a breaking strength which was expected to be

DELTA KAPPA PHI NEWS

Well, here it is running season again, or at least for the 13th OCEANS. The DK was held by Sigma Chi.

This happened to be the Friday and Saturday, the 13th and 14th. Any big events during the week were full of (among other things) laughter and the DK. We all entertained ourselves with having the state and national meetings.

Reverse approaching the University of Illinois and the DK, the Delta Kappa are looking for- ward to great times without the financial dis- pute at the traditional D. K. parties. We are looking forward to the dance, and jazz clubs with the rest of the weekend festivities.

On March 14, the VHA be- gun to demand the four, and the price, that all the nation at the price that has been done in the past, with the change, and the price have.

Concerning the acute situation of desperately broad, Delta Kappa Folk presented the direc- tions to those brothers who were decreased.

They were brother Wally, Donn, Stiles, John, Harri, and Earl Lux, both Fac- tors for all four of the three selected.

FRATERNITY NEGLECT - continued from page 2

extra-curricular personality, the student who heads one or two organizations. The TUCKH suggests in the latter case that the Student Council limit the number of organiza- tions to one or two, or to be president of one or two organiza- tions, so that more time will be allotted toward the betterment of each organization.

If fraternity is to sustain the present high esteem which the faculty and administration hold for them, they will have to maintain the standards of the past, earn- ing recognition for their activities. When a friend passes down his office to another friend, not capable of holding it, the organization is no longer an open to the Institute.
Evasoading From an Arry Party... "Hi! What's playing? Gerry Mudd's "No Mr. Lewis"? Just terrific! How the hell do you even come up with such stuff?" "I don't care if you do find it funny, it's not funny. It's something. What's this thing I'm wearing?" "Oh, it's only a plastic ice cube. Jake bazı, ya know. What the hell do you think I'm wearing?" "I'm putting on my best for you." "Yeah, okay. But just because you're putting on your best, that better just be your best."

"Did you hear the new album started yesterday? That maddening flavor. The lyrics are still pretty weird, but the music is just ridiculous. Everything is just so hard to understand."

"What do you mean?"

"I mean, what do you think?"

"I mean, I don't know. I haven't heard it yet."

"Well, I might as well not go then."

"Yeah, I think you should."

"Okay, okay. I'll go."

College Problems

At least American University's Problems labing higher education is being attacked at the University of Virginia, where students are accused of being too liberal. The attack comes from five different angles by the Student Federation, the Virginia Literary Society, and the American Association of American Literature.

One of the most controversial issues is the role of the university in today's society. Students are divided in their opinions. Some believe that the university should be more active in promoting social change, while others feel that it should focus on academic excellence.

Another issue is the role of universities in research. Some students feel that the university should be more involved in research aimed at solving real-world problems, while others believe that the university should focus on pure research.

The third issue is the role of the university in preparing students for the workforce. Some students feel that the university should be more focused on preparing students for the workforce, while others believe that the university should focus on preparing students for citizenship.

The fourth issue is the role of the university in providing access to education. Some students feel that the university should be more focused on providing access to education, while others believe that the university should focus on providing high-quality education.

The fifth issue is the role of the university in providing financial aid. Some students feel that the university should be more focused on providing financial aid to students, while others believe that the university should focus on providing high-quality education.

Finally, the sixth issue is the role of the university in providing a safe and supportive environment. Some students feel that the university should be more focused on providing a safe and supportive environment, while others believe that the university should focus on providing high-quality education.

Regardless of which side of the debate you are on, it is clear that the university plays a vital role in society. It is up to us to decide how we want the university to be involved in these issues.
