Balloons

Prof. H. J. Ball
Honored By ASTM
L.T.T., Feb. 26—Professor Herbert J. Ball, Head of the Department of Textile Engineering, L.T.T., will receive the Harold Dwid Smith Medal.

This presentation will be made by the Committee D.13 on Textile Materials for the award, which will be made to honor Mr. Dwid Smith, a noted textile engineer and a charter member of the American Society for Testing Materials (ASTM).

The presentation will be held at 3 p.m. in the auditorium of the Department of Textile Engineering in the Lawrence Technological Institute. The event will be open to the public.

Prof. Herbert J. Ball, who is a leading expert in the field of textile materials, has made significant contributions to the understanding of the properties of textiles. His work has been widely recognized and has earned him many awards and honors.

Requirements Change

Richard W. Ferry, director of admissions at Lowell Textile Institute, has announced that enrollments for admission to the freshman class are currently lower than expected.

According to Ferry, the decline in enrollment is not unexpected, given the current economic conditions. However, the institute is taking steps to ensure that it remains competitive with other institutions.

The institute has also announced that it will be offering financial aid to incoming students to help offset the cost of tuition. In addition, the institute has increased its scholarship programs to attract more students.

Sponsorship

The Lowell Textile Institute has received a grant from the American Society for Testing Materials (ASTM) to support its activities. This grant will be used to fund research projects and to support the institute’s efforts to improve the quality of its programs.

The institute is grateful for this support and is committed to using the funds effectively to benefit the students and the textile industry.
Point Of Honor

by Bud Leventhal

Heard around campus this week was much discussion con-
cerning the operation of an honor system at L.T.I. There
is no doubt that the majority of the student body takes
the initiative to participate, and the system will be prac-
tical at the present time, but it seems to me that the sys-
tem can probably be install-
ed in the near future.

However, the question arises of whether this system
will be practical at all. The
system may be practical if it
is applied through the

Bed Leventhal

Perhaps an article from the Daily Californian, University of
California at Berkeley, will serve the purpose.

Students talk about cheating for what it is and face up to the
to the fact that it benefits no one and only makes a mockery out
of education. Students must

furthermore take it upon them-

selves to report cheating when

they have the chance.

If you received the cards, there
were no false qualms about such
things.

In situations like these, the
point of the system may be
realized, and one may begin
to see why the system was
intstituted.

Those who talk about

cheating but practically nobody does ask for only thirty minutes in

In a faculty committee on

Student Conduct reports that in the last year, thirty

such cases were waiting.

The waiting game is one of the
most annoying of all the stu-
dent body and faculty. It is
badly needed. Disenchantment
is often bred by the

 system, because

of the problems of rela-

tionship. At the time of

the discussion, I was still

waiting to see the system to

members of the administration. I am sure that the

administration under Dr. Bussell, and that

there are many matters...

I hope, however, that at

least this first fact of the adminis-
tration, and I hope that

the faculty will not be

forced to do. My point is that

this type of waiting is one of the

petty annoyances which mem-

bers of the student body and

faculty must face. They are

about and that both and other

annoyances are needful. The

older administration could do

more for us, but Dr. Bussell

has done all that he can to

the long list of stated sugges-
tions from the faculty, the

administration by the

Student Council and which

have not been followed for

there is such an abundance

of the students and faculty.

This evening, I conducted a

rally in student rest room

in English Hall. Ex-

cluding the ladies room, which

I did not go to, there was a

grand total for all five floors

of seventy-four. For the

one (1) soap dispenser. The

law universal of the

Commonwealth state that all

public buildings must

contain adequate sanitation

facilities. It is definitely

adequate for a hundred

men. An interesting note is

that I, the freshmen, on

October I, notified the proper

authority of this deficiency, and a

short time later I was informed

that they had been ordered and

would be installed as soon as

they arrived. Perhaps soap

dispensers are no longer being

sold, but, beyond all the

complaints I think that most

students and faculty will be

satisfied. It is sure a

contribution to the club. I

and I have been a

rallying point for

the students.

These two schools become
tighter and more phony than they have ever been in the past.

Waiting, Soap, Teachers

by Ed Bonacci

The waiting game is one of the most annoying of all the
student body and faculty. It is badly needed. Disenchantment
is often bred by the system, because of the problems of relation-
ship. At the time of the discussion, I was still waiting to see
members of the administration. I am sure that the administration
under Dr. Bussell, and that there are many matters which need
be accomplished and improved that in order to be effective and

efficient and are no longer useful to the people they serve. Our
system has been established and continues to function on these
principles, and we know that a governing or existing body must be
refined and be held to high moral behavior.

Therefore, the results of this poll are being taken to the
cafe-
tet's committee, and we have to judge a change for the better. The
catering of ground cannot be judged without us. They have
become dangerously fixe in many instances that these can be
corrected by the dining committee which is composed of members of
the student body. The movement for improvement has been
started, the rest is up to us.

A TEMPORARY LOWELL UNIVERSITY

LTI had become noticeably coed, and its 10 or so officially

registered coeds had competition. This came about as a result of the

race for the Friday's Free Press, a student newspaper. One of

the student body and faculty to leave their building until it is

repaired. Then I was told by a faculty member that they would

not notice the cloistered-covey of L.T.I. No styco was wasted at

placing our line in the money to be landed in cover-

ative circles among the STC faculty (and perhaps the I.T.I. admin-
istration) to be satisfied with some catal-

ostic publications to the
students, included in the

student council. The Student Council in particular should be al-
nanced. Without an al-

stage in student government,

Can you tell the general opinion among L.T.I. students that
our ground cannot be judged without us. They have become
dangerously fixe in many instances that these can be
corrected by the dining committee which is composed of members of
the student body. The movement for improvement has been
started, the rest is up to us.

DELTA KAPPA PHI
Paddling上游 as easily can be done by the white ties of DE fraternity walking around the halls these days. Most any day you can find the boys working over at the house. The Dukes have just pulled together old class at 320 in a row. There is a lot of work that must also be done on them. There is no doubt about the leadership of the boating team this year and we have many more boys on the way. We can't help but make up for last year's loss.

The All-textile weekend went very well for us. On both Friday and Saturday nights for Ignus was full and all present had, however, a fine time.

On Feb. 19, some of the Deesieing up to R. P. I. there we will probably see the last of the Psi Kapi Phi Fraternity. They are going to the Union for bowls and we are taking them up on it. Dr. Williams says he will have them down for an informal gathering that we might be able to hire to one of our dances. This was advertised, as usual, in the Union.

OMICHOON PHII
This coming February 19th marks the eventual end of Omichoon Phii, with the last open meeting to be held for all members, location unknown.

Congratulations to Captain Willard Hookton and his O Phi bowling team for taking first place in the local tournament. This is the first time that Omichoon Phii has had such an opportunity to be used in an athletic contest, and the results are both encouraging and encouraging.

Although the annual meeting of the various clubs has not been held, we can only hope that the season will bring us the same results as last year.

D. WARK EXCELS AT Civil Service Test
L. T. L. Feb. 19.—On last December 19th, a Civil Service test was given to all full-time students of the city of Lowell. Six people took the test, and the highest score was received by W. B. Walker, a freshman at L. T. L.

Last week, the results of these exams were published, and Dr. H. P. B. was the only person who passed the test. He received a score of 95 out of a possible 100.

Don has been working for the city of Lowell, and has been doing his best for the past year to gain some experience in this field. Although he did well at this test, he was still undecided as to whether or not he should do so, as he found the government a very interesting field. He decided, however, to go into the service.

RUMBERG RESIGNS
Harry Rumberg, a member of the class of 1933, has resigned from the newspaper. He will be missed by his friends, but we hope he will return soon.

SWM CLUIS
The first in the new program of intramural swimming events was held at the Lowell Y.M.C.A. pool. Competition began on Friday, Feb. 19, and continued until Saturday, Feb. 20. There were eight events, which included diving, swimming, and water polo. The first two events were very exciting, and the last two were a lot of fun.

In my last column, I told a short story. There was no moral in this story. I just wanted to show you how it could be done.

In this story, there were only four people. One was a young man, and the other three were old men. They sat around a table, and talked about the past. Suddenly, one of the old men said, "I have a great idea!" The young man looked at him, and said, "What is it?" The old man replied, "I have a plan!"

In the next column, I will tell you about this plan. Stay tuned!
Injuries, Probation Peg Basketers
As New Jersey Trip Begins This Week

Injuries, loss due to graduation, and the probation but have combined to make the Textile team a little light on its schedule remaining in New Jersey, coach Dave Mercy finds himself hard pressed to fill his team's needs. With Don Dudley, main rebounder, lost through graduation at the beginning of the season, key players were forced off the team and a reserve must now be arranged. These circumstances would have left a squad of two, except for the addition at this late date of a pair of student-athletes on the list. With this help, the coach is optimistic and has been able to include some very fine players in the lineup.

LOLLIA/B.W. RUGER

The home season has now ended with the formal crowning of three victories against ten losses. It has been a stimulating experience for the seniors, however, and the young men are not a little proud of the team's effort. It is impossible to name all who have contributed to the success of the season, but we note that the following have distinguished themselves:

D. W. Stone

In addition to the other sports, the team will compete in the basketball tournament this season. The games will be played on the dates set by the conference and will be of the utmost importance in determining the final standings.

LOLLIA/B.W. RUGER

The team's first game is scheduled for February 20th against the University of Notre Dame. This game will be a most important one in determining the outcome of the conference. The team will be working hard to prepare for this match, and every effort will be made to win the game.
