UNPRECEDENTED AWARD
IN RESEARCH FOR LTI

Word has been received from national headquarters of the American Physical Society in New York that the Rayleigh Laser Foundation will receive an unprecedented award for its "Excitation of the 350 μm Laser Transition," an invention for which the student physics group was honored with the award. The achievement is the result of Mr. and Mrs. John T. Maddox, 412 Broadway, GLOUCESTER'S HAPPPENINGS

The most recent objection raised against the presence of collective violence focuses on the war and anti-war protest, campus unrest, black militancy, and official response to such protest. This task force, particularly interested in black protest, wrote a major report on collective violence in a recent issue of Social Forces. The report was recently presented to the American Psychological Association.

The task force felt that the collective violence that now affects the black community is fundamentally different from that seen in other areas of society. It is characterized by a more intense and sustained form of protest, and by a greater degree of organization and coordination among the protesters. The task force also noted that the collective violence is not limited to the black community, but is also present in other areas of society, such as the student movement and the anti-war movement.

The task force recommends a number of steps to address the collective violence. These include the establishment of a national committee to coordinate the efforts of various organizations, the development of a national strategy for dealing with collective violence, and the provision of resources to support the efforts of those working to address the problem.

The task force also noted that the collective violence is not limited to the United States, but is also present in other countries, such as South Africa and Northern Ireland. The task force calls for international cooperation to address the problem of collective violence.

The task force concludes by emphasizing the importance of addressing the collective violence in a serious and systematic manner. It notes that the problem is complex and will require a sustained and comprehensive effort to be effectively addressed.
Editorial:
REVISING EDUCATIONAL REFORM

In 1965 the Massachusetts legislature enacted a far-reaching reorganization of educational law based on a long, intensive study aimed for College auditor Benjamin Wall's and State Sen. Kevin Harrington of Salem. The reform is perhaps the most significant piece of legislation that defines a new era for Salem, including Sen. Harrington, as a masterful piece of work.

One of its features was the unification of Massachusetts' 11 state colleges under a single Board of Trustees of State Colleges.

Two bills — one of them filed by Sen. Harrington — now before the legislature would withdraw certain state colleges (Boston State and Elliston) to one bill, according to the other from the unified system and give them their own separate boards of trustees.

Dr. Frederick A. Meyer, president of Salem State, and others in favor of the bills say that the larger colleges have problems bigger than them, and that a single Board of Trustees cannot do justice to all the institutions.

While there may be compelling arguments for giving special treatment to the larger urban state colleges, granting some college separate boards would almost inevitably lead to every college having its own. All would be competing for funds, with the natural interests of each institution taking precedence over the needs of the state as a whole — the very condition corrected by the Willis Harrington Act. With the cost of education rising, the need for care from every angle, the interests of college justices against college priorities and balancing these in turn against other educational needs. We doubt many taxpayers would put up an execution of cash brought about the competition and duplication among state colleges.

Sen. Harrington's recent testimony at the hearings on the bills added little of substance to the arguments of the separation. His introductory remarks — suggested that a Massachusetts college might be "unschooled" and that if Salem College had not got its own board — certainly lowered the level of debate.

Any legislator who seeks benefits for institutions within his district must give consideration to the effect such a move would have on the state as a whole. In this case the objection is clearer since it was Sen. Harrington himself who worked so diligently to create the state's modern educational structure. What's good for Salem State (or Boston State, for that matter) is not necessarily good for Massachusetts.

The only "boom" we can find in this whole dispute is the time bomb the separate bills have placed at the foot of one of the major supports of our educational system. The legislature can defuse it by killing the bills, Senate 511 and House 4188.

When the time begins assumed to be the reading of the rich "worth" this Supreme Court ended its term to its high expectations — "Without debate," the doomsday label, "I have spent all my money." Upon the birth of their first child, a young father was said to be told by his wife, "You will be a better man with this child than with me with his wife and even our money.

By the end of the week, "Certify will be be said. "Now we have a serious enemy.

Your Student Council

by WILLIAM HENRY

As the second semester begins, the Student Council in general is still growing and broadening. Beginning still in the previous semester, this year the Student Council is also beginning to move in a more serious path than in the first year of its existence. The problem of whether the Student Council is a success or a "joke," I would like to give to the public, and a large number of people seem to think the Student Council might be a success or a "joke," is what I would like to give to the public.

The Student Council is a good organization but it is important that we do not pay too much attention to one side or the other. For example, if we say that the Student Council is a success or a "joke," then we cannot pay too much attention to one side or the other.

SPRING WEEKEND — Plans are already nearly completed for the annual Spring Weekend at Lowell Tech. Due to the successes of the past few years, the Student Council will be able to continue with the Spring Weekend activities. The Student Council has been working on a Spring Weekend program to ensure that everyone who comes to the Spring Weekend will have a good time. The Student Council has been working on a Spring Weekend program to ensure that everyone who comes to the Spring Weekend will have a good time.

SENIOR REGISTRATION — The beginning of registration for the students of the Class of 1967 is expected to begin sometime in early May. The Student Council has been working on a Spring Weekend program to ensure that everyone who comes to the Spring Weekend will have a good time.

Should you have any ideas about what to include in the Spring Weekend, the Scholarship fund, or anything else, please let us know. We would be happy to submit these "Student Council" ideas for consideration in our next meeting. You may also submit ideas for consideration in our next meeting.

A worker in West Berlin was fired for being drunk at work on a week night. He was accused of buying an American watch.

FOOT SCRUB. There will be a demonstration of the "Foot Scrub" in the back room of the Student Council.

Transplantation Fund — The Student Council is also in the process of selling some of their items of transportation fund. Many of the Father's Day gifts which these clubs sponsor are valuable to a student who has no idea what they want and the type of gifts that are offered in industrial plants. However, these gifts are often the downfall of many societies in that they represent a sudden personal benefit to a society of 3000 men to the student who is able to give them. It is the hope of the Student Council to utilize the counselor's role of the "special fund" to give some sort of assistance and by doing so increase quality and quantity of such gifts for the benefit of the professional societies at Lowell.

Before I finish this article, I would like to mention that a "Fund" to support students with no financial help, as well as to support students with financial help, has existed for several years. It was initially created to help students who were in financial need for the purchase of textbooks, educational materials, and other supplies. However, the "Fund" has recently expanded its scope to include financial assistance for students who are in financial need due to unforeseen circumstances, such as medical emergencies. The "Fund" now includes a total of $5000.00 in financial assistance, with the amount of money in the "Fund" being used to support students in need of financial assistance.

Should you have any ideas about what to include in the Spring Weekend, the Scholarship fund, or anything else, please let us know. We would be happy to submit these "Student Council" ideas for consideration in our next meeting. You may also submit ideas for consideration in our next meeting.
WASHINGTON (CTP) - Heavy changes are made in the present junior and senior education of graduate students. The making of college students with advanced degrees will be "seriously curtailed in the future.

That is the conclusion of a survey of 1,200 students in their first, second, and third-year graduate schools. The survey, released this week by the Scientific Macmillan Commission, an independent Washington agency, indicated that far more students are being employed to do research in the future.

Many universities told the Com- mission that they were unable to find enough students to do research in their schools. It was further reported that research projects may have to be reduced because of a lack of time and of students who are employed to do research this spring.

The plan of education of the students is being revised by the research department of the Commission. This department is responsible for the survey of advanced students, and it is believed by some educators that the survey is necessary in order to achieve an adequate number of students to do research this spring.

The present policy of drafting older students is likely to be changed to that only second-year graduate students will be drafted. This change will result in shorter time for the drafting of the students, and it will change the number of students who will be available to do research this spring.

The loss of more than 4,000 graduate students who were re- ported to the Commission as not having been accepted to graduate school and then lost is expected to reduce the number of graduate students available to do research this spring.

Some of these students found out that they had not been accepted to college, and then they were not available to do research in the future.

More than 60 percent of these students are likely to be drafted into the nation's armed forces, according to the Commission. This means that many students will no longer be available to do research in the future.

The Commission, in the important year of this survey, is only two months old. It is estimated that between 50 and 70 percent of the students under the age of 20 were not included in this survey. The lack of students available to do research this spring is expected to reduce the amount of research done by students this spring.

Those who do not make the cut will be drafted into the army, air force, navy, or marines, in order to fill the vacancies that have been created by the loss of students available to do research.

In order to maintain the present junior and senior education of graduate students, the Commission is making plans to reduce the number of students under the age of 20 who will be available to do research.

The opening of this spring will be held in honor of the first students who did not get drafted into the army, air force, navy, or marines, and who will be available to do research this spring.

The efforts of the Commission are expected to be successful and will result in a greater number of students doing research this spring.
CAN S. I. HAYAKAWA SAVE AMERICAN HIGHER EDUCATION

S. I. Hayakawa, former president of San Francisco State College, is a strong advocate of higher education as an avenue to social justice. He is well-known for his energetic defense of the cause of higher education and his efforts to make it accessible to all, regardless of race or economic status.

Why would any thinking engineer or scientist ever consider an R&D career with the army materiel command?

Because he is a thinking engineer or scientist, one who reacts to hard facts, not fuzzy hazyness or misguided push.

And the incomprehensible is that the U.S. Army Materiel Command offers civilian personnel immediate responsibility, more creative latitude, more closely, more room for rapid growth than private industry pays.

Right now, for example, U.S. Army Materiel Command has programs underway in 7 highly exciting, challenging and innovative fields. They include小事件→視聴回数ランキング→sociology; economics; psychology; biology; materials science; and others. All hands capable research scientists. Each field offers wide opportunities. You can get involved in R & D or Design. Or Quality Assurance. Reliability. Or Procurement and Production. Or Test and Evaluation.

LITTLE WORDS FOR LITTLE MINDS

(CD) — A four-letter word — something we use or do every day, a very expresstion that means "five", but that is not as important as the other two words that are not related to our daily lives. But Straight concepts are often narrow; they only understand the simple meaning of the word, and that's not the only meaning, it's not the only one. It's not the only one that is very dirty that Straight people can say, but is the only one that is too process taking care of the radical student problem.

There is only one way that men, S. I. Hayakawa can be seen as radicals of higher education. By their repressive policies they may bring about a revolution that will result in some of the changes that are so badly needed.

Phi Gamma Psi Fraternity

Pi Lambda Phi Fraternity

Phi Gamma Psi is an independent fraternity dedicated to the promotion of brotherhood through an indivisible tie of friendship and service. The purpose of Phi Gamma Psi is to promote the welfare of the student as an individual at a human being.

Omegon PI FRATERNITY

Sorry about missing the first few issues of The Triad. The brothers of Omegon Pi felt bad about not being welcome to student life at Tech, from business administration to physical education. We feel that what we can offer our brothers is, whether it be sports cars or parties; or what athletic ability you possess or even what colors of football you have, Omegon PI Brothers will find willing to share their interests and deal with you.

Sigma Pi OMEGA RHO FRATERNITY

Five years ago, south Tech Omega Daughters worked on new ideas on the concept of fraternal brotherhood. Founded the model chapter on campus, Sigma Pi Omegon is a unique organization with a unique philosophical basis. Sigma Pi Omegon is not only a fraternity and organization which we feel would appeal to the youthful individuals of varying interests and personalities. Our brothers will have the same interests and personalities as the members of every single fraternity also offered at Tech, from business administration to physical education. While we feel that what we can offer our brothers is whether it be sports cars or parties; or what athletic ability you possess or even what colors of football you have, Omegon PI Brothers will find willing to share their interests and deal with you.

The Triad is the student newspaper of Omegon PI Fraternity. It was founded in November, 1965 by the first group of brothers of Omegon PI Fraternity. The first issue was published in January, 1966. Since then, the Triad has been published every second Thursday of each month, except during the summer months, when it is published every second Sunday of the month. The Triad is produced by a voluntary group of Omegon PI Brothers.

Dee's Corner

The following is a list of Dee's Corner in the Triad:

1. Don't come unless you have confirmed reservation.
2. There will be no sleeping in the dorms.
3. There will be no sleeping in the office.
4. No campers or trailers on brother.
5. Trainers and campers must be dressed as expected in dress.
6. All Civil Laws will be enforced.
7. All persons under 21 may not purchase or consume alcohol.
8. Intoxication is punishable.
9. There is no permission to drive on the street.
10. People will result in arrest.
11. Use of false identification will result in arrest.
12. Continuing unnecessary noise will result in arrest.
13. Any form of disorderly conduct will result in arrest.
14. School policies will result in arrest.
15. Parents and school officials will be properly notified of all students arrested.

The Fraters of the Fraternity

The Fraters of the Fraternity are students who are members of the fraternity. They are individuals who have been initiated into the fraternity and have met the requirements for membership. They are responsible for upholding the traditions and values of the fraternity. They are also responsible for participating in the activities of the fraternity, such as social events, fund-raising, and community service.

Kappa Sigma RUM BASH FUNCTIONS

The following is a list of Kappa Sigma RUM BASH FUNCTIONS:

February 26 (SAT)

March 4 (SAT)

March 18 (SAT)

March 25 (SAT)

April 1 (SAT)

April 15 (SAT)

April 22 (SAT)

The brothers of Kappa Sigma promise not only a good time but also true friendship to all members of our brotherhood. RUM BASH functions are a special treat for all Kappa Sigma Brothers, and are a great way to get to know your brothers and to have fun together. The Kappa Sigma RUM BASH is an annual event that is open to all members of the fraternity. It is a fun and exciting way to get to know your brothers, and is a great way to build strong bonds of friendship.

ITLI skiers an eager lot

LOWELL — The Lowell Tech varsity ski team entered the annual ten-day ski festival with a big bang. The bleachers were filled to capacity with raucous cheering and huge flags brought the crowd to its feet. In fact, the Lowell Tech skiers blasted from a one-week campaign "state-wide and was just beginning to do some of its best work on the last run when the Tech ski team really started to "key up" the best.

A "key-up" skier plays a key role, commented Norkunas, "even if the man of the hour may not be able to leave for one or two days. The team should see the best every night and keep going for me.

Along with Norkunas, the leading candidates for spots on the Tech squad are Illen, from St. Thomas; Tom Bradley, a sophomore from the city; Fredrickson, a junior from North; and two local boys Bob Cobleigh, and sisters, "We could be quite good," mentions Norkunas. "The Tech team last year was and that should be the team we count on.

In the ski parlance, the B team is composed of a school's freshman candidates and Norkunas does not quite enough for the varsity with any paper. A team is considered the school's "main man."

Varsity skiers James and Richard were all A Combats.

The evening of a weekend meet under the direction of is a combination affair ("mix-up in scoring") involving slalom, special events of the day, slalom, and the combined events of the evening.

Norkunas, the 19-year-old former ski team, has been the school's top skier for two years.

"Applications may have a ski team," Norkunas says, "but we are in the business of getting the Tech's a big name in skiing right now."

This year's entry list is very long. Four more Tech skiers are named as potential "key-up" skiers, but the team's most important field is the "key-up" skier, a member of the "key-up" team who is expected to do well.

The key-up skier is expected to have the ability to ski with the best of the rest, and to do so with the best ability.

The key-up skier is expected to have the ability to ski with the best of the rest, and to do so with the best ability.

VARSITY CAGERS BATTLE

by BILL HENRY

The Tech Terrors were well into the 1955-56 season when their first ten games-they have been frequently introducing a new look to their team. The first ten games of the Tech Terrors have been anything but exciting. The Terrors have been playing against five or six-point games, and have been able to recover from some missed opportunities. They have been performing at a very high level of play.

The Terrors have been playing against five or six-point games, and have been able to recover from some missed opportunities. They have been performing at a very high level of play.

The Terrors' performance in the first ten games has been remarkable. They have been able to recover from some missed opportunities. They have been performing at a very high level of play.

GOAL FOR LI

Bears

After an extended break, the Bears are back in full force. They are still talking about their last game, which they won. They are confident that they can win their next game, as they are playing well at the moment.
