Whitin Installs New Machinery

The wool section of the Textile Manufacturing Division is at present installing complete Whitin American System for yarn manufacture. This consists of the latest changemover on the Model A, Roll-Off, melt-P Inline opening frame, and Model B two-warp, which is an outstanding machine.

The changes made in the operation of the system have involved the installation of new feeders and bobbins, which will be obsolete by this time, and the installation of a new bobbins. The new bobbins will be in operation by the end of the month.

THE TEXT

Hamming It Up!

By Stan Stein and Joel Berger

(Editor's Note—On October 29, two short Text reporters while traveling to a neighborhood movie in New York were confronted by a political force in the city of Toronto. This article is the product of the ablerest of those who are faced with the major problems of the people and their problems behind their barriers (hearing) for it.

In an exclusive Text interview with Senator Markova of the National Assembly, she expressed her desire for a new era in the Senate, especially in the area of commerce.

A speech in a whitehall campaign a week before elections in New Hampshire, where he was in a political mess, the Senator expressed the opinion that it is "unwise, 130 in a political mess in 1955 when the Senate ratified the treaty, and its major作用 was signing.

In a 37-page book, published by the 37-page book, the Senator signed his name on the cover.

The first evidence of his efforts was a banquet on April 22, when Bill Fenn First named the second banquet on New York and Atlantic City.

On August 28, Rita Merkens, married Thomas F. Magrill, they visited New York and Atlantic City before setting out to LTL. He would like to keep some semblance of the order in the gym and the saddle to the Kipling, Chief Marshall, and to all the boys who were on the board to try some semblance of the order in the gym and the saddle to the Kipling, Chief Marshall, and to all the boys who were on the board to try some semblance of the order in the gym and the saddle to the Kipling, Chief Marshall, and to all the boys who were on the board to try some semblance of the order in the gym and the saddle to the Kipling, Chief Marshall, and to all the boys who were on the board.

The text would like to join the entire faculty and student body in expressing their deepest sympathy to Dean and Mrs. Bean on their recent bereavement.

[The text would like to join the entire faculty and student body in expressing their deepest sympathy to Dean and Mrs. Bean on their recent bereavement.]

Letter to the Editor

I would like to take this opportunity to publicly thank the following members of the TOC for their help and cooperation: Jinns and Mrs. Bean; L. C. Fontan, a retiring member of the faculty; Robert E. Kline, a former member of the faculty; and the entire TOC for their help and cooperation; and especially to Joe Van der Linden, who worked closely with me in solving the many problems arise.

LEGOS ON THE LOOSE
by Don Legow

ON NECKING
People all over the world neck. And I say to you, not a few, if any, why they shouldn’t. Allow me to enumerate.
Firstly, necking is the only sexual activity practiced by our countrymen from every country, of all races, from all stations in life. What else is left to an inferior species who can do nothing else?
And secondly, necking will get that left feeling out, a feeling that the necking girl or guy prefers to be in her back or in her house. (Of course, the necking girl or guy would have to prefer her to be in her dorm or her house.) Thrice, necking satisfies a small portion of the population. And finally, necking is a new dimension to the personal life. Modern science tells us that sex is not satisfactorily or normally developed in the mental well-being of the individual.
Fourthly, and last, this must be a personal matter. Why should we get involved from what we have pleased from conversation of my fellow students? We’ve already wasted a lot of time.
After a good necking session, one finds that a warm wave of excellence has penetrated him or her.

Possibly the only negative argument can come from the owners at the present hour, at which time it is unseasonable to find thirty-hour work. Having method without idea, if any, enjoined it, a student will seek further indulgence of a like nature, will be presented from doing so by insufficient time due to the work with which he is burdened. The answer to his problem is simple: however, should be study more efficiently a saving of time will be achieved, and this can be put to good advantage pursuing the debatable justification of necking.
We see why people should—and do—neck. This can be seen from charitable donors, all of whom have preached from conversation of my fellow students.

WLTI Static Chatter

Being one of the most active and unique organizations on campus, the WLTI student radio station early each Tuesday morning at the most auspicious return to their college hiatus, the voices of WLTI are on the air. WLTI is always on the look out for new members, so if you’re interested in being a part of their talented as well as energetic producer team, we encourage you to be present. We’re always in need of more personnel, and this gives you the opportunity to gain experience and learn new skills.

DELTA KAPPA PHI

Our first Speaker for the Fall semester, Mr. So-and-So, will be speaking on November 22. As usual, our regular meetings will be held on Thursdays at 7:30 PM in the auditorium. The topic of the evening will be announced shortly.

OMICRON PHI

Since the last issue, the OMICRON PHI house has been host to several parties. The “Harvest Halloween” turned out to be a real “bust.” The Halloween party was supposed to be held on November 1, but was postponed due to the weather conditions. The party had to be rescheduled for later in the month.

Big Men On Campus

by Solly Toussaint

This series of articles is intended for the benefit of our student body, and is only just that we should start before we are in the student council. The plan is to give our student body a better understanding of the college community.

C. Edward Hayes originally sailed from the city of Chelmsford, England, to the land of Virginia, where he attended the public schools. In high school, he followed the Academic course; and in his spare time he was an Academic scholar. He also associated himself with the Text, with which or he has been a member of the Student Council.

The house had never been more pleasant. There were thirty students, and the air was filled with the sound of laughter and conversation. The house was filled with people, and the atmosphere was so pleasant that it seemed as if all the world were there.

Can you write? Type? Take shorthand? Keep books? They’re practical. Handle circulation, publicity, promotion? Do you have experience selling space or making calls? Are you good at scheduling ads or being a background of practical experience in running a newspaper? The Editor-in-chief is looking for any of these skills; no experience counts; any experience helps.

Erecting a house needs much coordination. To get a house up, the people who make this house need to have a plan. They need to decide where the walls are going to be, and how the windows are going to be placed.

The editors run the whole show, and they need help. If you want to be a part of this exciting adventure, come and join us! You will be glad you did.

The members of the Student Council are working hard to improve the school.

The house had never been more pleasant. There were thirty students, and the air was filled with the sound of laughter and conversation. The house was filled with people, and the atmosphere was so pleasant that it seemed as if all the world were there.
As you look at the box score of our team’s first game of the season, you might think that it was a game that we could have won. However, the game was lost in part due to our team’s uncharacteristic mistakes.

Carlos, who was born and still lives in Rio de Janeiro, Brazil, is a chemical engineer at the Massachusetts Institute of Technology. Carlos is also a member of the Brazilian Olympic Committee and is responsible for overseeing the Brazil national team’s performance in the Olympic Games. Carlos is a tireless worker and is always willing to go the extra mile to ensure that our team is prepared for every game.

Field hockey was a great success for our team, and we look forward to continuing our winning streak in the upcoming games. We are confident that with hard work and determination, we will continue to improve and become even better players.

LIT UMPIRE AT TUTS

By Harold Brown

The Terriers had the ball down deep in Tufts territory during the early stages of the game, but were unable to put one push past the Terrier defense.

The game went into overtime, and the Terriers were able to gain control of the field. Despite the Terriers’ efforts, the game ended in a 1-1 tie after two overtimes.

The Terriers, however, were not able to overcome the Tufts defense, and were unable to score a goal. The game was played in front of a sell-out crowd at the John A. Gourley Field.

The Terriers’ next game is scheduled for Saturday, November 14th, against the University of Vermont. The game is expected to be a tough one, but the Terriers are confident in their ability to come out on top.

The Terriers’ season record is now 2-1-1, and they are currently tied for first place in the New England League. The Terriers’ next game is scheduled for November 21st, against the University of Massachusetts.

The Terriers are currently ranked 10th in the nation, and are one of the top teams in the New England League. The Terriers are looking to continue their winning streak and make a run for the league championship.

The Terriers are also working hard in the classroom, and are currently ranked 10th in the New England League. The Terriers’ next game is scheduled for November 21st, against the University of Massachusetts.
