Celanese Corporation Issues Fellowships to Lowell Textile Industry

LIT-Jan. 11—The world's largest producer of acetate fibers, the Celanese Corporation of America, has initiated a program which will aid in supplying the textile industry with research personnel soundly trained in the fundamentals of science. In accordance with this policy, fellowships were granted to four textile industry technicians who were recently selected at Lowell Textile Institute to be administered by the Research Foundation.

The fellowship of two years' duration was provided, a stipend plus tuition and other academic fees, and leading to the degree of Master of Science requiring twelve months of activity. The amount was to be devoted to the student's work, and to the maximum extent possible, to those fees or other expenses of the University, of which the U.S. came to LIT on Fred Perry's recommendation.

(Continued On Page 6)

A Historical Note

LIT-Jan. 17—At City Hall Monday evening, Dr. Stuart L. Newcomb, president of the Lowell Board of Education, announced the establishment of the City High School where students will be educated in the new school. The school will be under the direction of Dr. Newcomb, who was educated at the University of Chicago and has served as principal of several schools in the United States. The school will be opened to students who are graduates of the Lowell Textile Institute and who have completed the necessary requirements for graduation.

COVER TO COVER

by David A. Adler

As has been said and writing a number of times, Lowell Textile Institute is capable of having a very unique and dynamic library, not only in its buildings and facilities, but also in its books. Thus, there is a question to be asked, and that is: have all the books been gathered, come with a good deal of polish and difficulty in style, to remain in the library and be covered with dust?

It is sometimes the case that even over the years that over fifty percent of the books have not been used even once; however, a number of the local books, most of the others as well, have been well used. At the same time, military and other books have not been used at all.

The blame does not rest entirely on the students, though they could be considered at fault, too. Left musty in the air for too long, a number of the books have not been used. There is, to be noted also, that many of the books have been read by many of the students.

Perhaps a real show should be given to a system that gives less assistance over time. The students that wish to read in the library should be more conducive to the natural setting of the students. The students that should be reading in the library, and not others, are those that are expected to read in the library. The technical journals, books, and other materials should be made available to complete a book, reports, the library has a wider selection of literature, card catalogues, and other materials. The committee will then have a starting point to work with. It is up to us to give them the support and assistance that they need in order to achieve a more complete set of student governing rules and regulations.

Once again the time has come when the leadership of the TEXT must change hands. Instead of an editorship extending throughout the school year, the TEXT has elections at the end of the first semester, so that the new editor, who is usually a senior, is free to devote his/her (her in this case) time to the all-important goal of the grade, job-hunting, and evidence-examining. Also, this year the incoming editor receives the benefit of having at hand the assistance of the experienced predecessor.

As a successor, I leave a beautifully equipped office, two slightly worn notepads, many balls, and two-thirds of a bottle of Gatorade. I also leave an extremely competent staff of student members, and some very capable faculty members. With that group working towards the betterment of the TEXT, we can all be assured of a constantly improving publication.

A LETTER FROM THE G'S IN KOREA

This letter is an excerpt of a copy received from a soldier in Korea. The content of this letter shows the comparison between two different situations, placed at different points in time.

The main reason for this letter lies in the fact that the officer from the Army is with a soldier who is serving in Korea. The letter starts with a statement about the soldier's mind away from the constant letter that leaves them 10-15 miles away.

When I finished reading this letter, it made me realize how much I miss my home. I am not the first time to have to leave my home for too long a time, that it feels a lot on my conscience.

I hope I am writing this letter home to help you

(CONTINUED OP PAGE 24)
The A.A.T.C.C. was very fortunate in being able to sponsor two field trips. These trips are the Senior Chemists accompanied by Prof. Charles H. Slate to the New York City board for the officers of the Massachusetts Chemical Society in Lowell last week. Mr. Monroe, head of the Introductory to Chemistry, and Mr. Dailey, chief of the Instrument and apparatus in all of the operations to the growth of the A.A.T.C.C. The Eocene and the Permian, explaining the activities and making their own plans for the next season.

PSI PHI
Phi Psi held its annual Alumni Dinner this year at Brady Hall. Twenty-eight alumni and friends attended the dinner and enjoyed stories of years gone by. The current officer was introduced and several guests were present.

OMICRON PI
The Omicron Pi Chapter has been active this year. They have held several meetings and have been involved in various community service projects. They have also sponsored a number of events, including a charity ball.

The Lowell Textile Players
After two successful weekends of presentations, the Lowell Textile Players have returned to school ready to begin work in earnest. From now until May the Players will be working on their next production. Their excellent players are now under the guidance of a new director, who will see to it that they are brought up to par. These productions will be brought to the audience in a thoroughly professional manner.

The Newman Club
The Newman Club held its first meeting of the year on February 18th. The meeting was held in the Newman Club room in the College of Arts and Science. The President introduced the topic of the evening and gave a brief history of the Club and its goals. The discussion centered around the importance of religious education in today's society.

Film Classics Group
The Film Classics Group began the Fall Semester with its first program, which was held on Friday, October 1st. The program featured a screening of the movie "Gone with the Wind," which was followed by a discussion of the film. The group is planning to continue its program throughout the semester.

A LETTER FROM THE GTS IN KOREA

(Dispatches from the GTS)

(Concluded from Page 1)

We are scrounging in an easy chair and occasionally a minute to sleep in a peaceful and comfortable fashion, for although we are warm half the time, we are cold enough to form a layer of frost on the walls, and the air is quite damp. We are actually helping to keep the temperature down, for we are right in the middle of the room, actually being forced to wear our flannels even at night.

Why all this talk? You say that you've heard about this before and again and again. But, what have you done about it? You say you cannot control some of your extra-curves for your parents, dietitians, and reading material. The best way to control something is to learn how important it is for you, for everyone else, and for the GTS in general.

What do you say? In this case your money will do all necessary talk. Be on the lookout for the club's new page number... and get away from us. We appreciate your help.
History of Sports

THE TEXT

The History of Sports

Bradford-Durfee High School is now in the completion of the twenty-fourth year at Lowell Textile Institute. For the first twenty-five years he coached all sports here.

The coach has had a wide and varied career in the athletic world. His sport activities embraced base

ball, basketball, and football, in all of which he has attained a high de

gree of success.

As a pitcher Coach Vernall was a member of the 1931 Philadelphia Phillies ball club. He also played at Berea in 1924 in addition to other professional teams in New England. After his playing days were over the coach managed several clubs in the same area.

After long and hard study, Coach Vernall feels that he has found his best player this year.

Basketball Team Impresses

In New Bedford Victory

Coach Dave Morsy's quintet finally broke the spirit of the masterminds at New Bedford Textile and turned the tide of what is their annual basketball contest.

With the score all tied up 34-34 at the start of the second half, the team had to roll up 31 points to New Bedford Textile's 20 in order to win the match. Only 1 point was scored in the entire match and the swearing of the算分 algorithm

THE CURRENT CINEMA
(Continued from Page One)
Repubilc in the success of the program.
Then I would add The Medium, Gilt-Carpe Memento of the fiery, oratory spoken. This is probably the most effective open ever put on. But it seemed to have something to do with the whole program. Perhaps an inferior man could see it at a screen. Perhaps an inferior man could see it at a screen. Perhaps an inferior man could see it at a screen.
However, the simple performers in the plays made the audience see. The performances in the plays made the audience see. The performances in the plays made the audience see.

A HISTORICAL NOTE
(Continued from Page One)
Run down the street, the S.A.T.C. boy's day might give him a rose in memory. The S.A.T.C. had a 42.42 season, including study and teaching periods. This study period was compulsory and began at 7:15 a.m. to 9:45 p.m. It was held in Fordham Hall under the supervision of staff members. The boys attended class from 8:00 a.m. to 12 noon, and from 1:00 p.m. to 9:00 p.m. Other afternoons were devoted to military instruction.

How do you treat them in the new terms and rating in the new program? The S.A.T.C. lived in Farragut Hall and ate in the makeshift messhall situated on the Fallswaite Street side of the building. The whole day and night was spent between the quad and the walls.
The S.A.T.C. appeared to be making excellent progress at L.T.I. But better progress was being made in F.D.O. The war was being won by the Allied powers. November 11, 1918 marked the day the Armistice was signed, and shortly afterwards the armistice S.A.T.C. was dissolved.

What was the overall success of every unit could not be discovered, but the fact that the follow-up by the S.O.T.C. has brought up the percentage of so many institutions of higher learning shows that the idea was sound and that it is an excellent source of material for the future officers of the Allied Forces.

No day is gloomier than this, no day is gloomier than this, no day is gloomier than this.

Remember now, the nonbad for your nonbad is February 16, 1939, so let's get them in as soon as possible.

STUDENT COUNCIL TO STUDY REGULATIONS
(Continued From Page One)
Student Council should ask the grievances in writing to the Student Council to prevent it in the future. This council should sit outside the drawing room on the second floor on or before Monday, February 14, 1952. This will be your only chance to make sure that any of your suggestions will reach the proper channels for clarification or revision. Be sure you take advantage of this opportunity to have your voices heard and submit your grievances as soon as possible.

This action will be taken with the approval of recommending or suggesting to the Dean of Students possible improvements in the overall procedure.

Remember now, the nonbad for your nonbad is February 16, 1939, so let's get them in as soon as possible.
