Administration Slowed To A Crawl As
Provost Announces New Marking System
Turtle Appointed 1/3 Of President

The Office of the Provost has announced that a new system of grading exams will take effect unilaterally throughout the institute. This new system is called the mark per unit effort system and is based entirely on the students learning achievement regardless of the teacher's test standards.

An example will facilitate understanding. There are two students, A & B. They are both in the same course and take the same exam. Student A studied a total of 10 hours for the exam and scores a 95. Student B studied 16 hours for the exam and received a 40. Now according to the mark per unit effort system, student A would be given a mark of 9.5% per hour.

This value is gotten by dividing the mark by the amount of time spent studying (95%/10 hr. = 9.5%). If student B, on the other hand, achieves a mark of 80% per hour or 40%/5 hr.

It is required that student B should receive a higher score since he obviously has a greater learning capacity. It took B only 1/4 hour to learn 40% of the material while it took A 10 hours to learn only 95% of the material.

It is hoped that this system will be greeted enthusiastically as it alleviates one of the greatest inequalities of modern higher education.

The faculty could not be reached for comment regarding this new system.

Once Again, Your Student Council

The Student Council met this week at 12:00 on Thurs. for an extremely bizarre session. For the 3rd time in recent student memrbers - Doug Coklas, Sheila Foy, Nancy Noll and Tim (the leave) Tree were impeached. President Jerry Beetham addressed the council on this matter saying that although these members have been contributing at times, we must cut out any dead weight we can find.

Freshman class officers led by Sandy Distuoro reviewed the Freshman Program. Dub Waterman and Mike Leaky said that they particularly enjoy their newly formed friendship as a result of all the free time that has been created. Gary Coudier is devoting his spare time to listen to the new radio in the S.C. office and Thumb Cove is learning increased social life.

Charlie Huttiethein said the council carried the following motions: Phil Morin-I-See that the Student Council in conjunction with the athletic association review the economic feasibility of beginning a faculty activity fee including intramurary fee, insurance, A.D. Mind Bender: that the Student Council allocate funds for sex education, the establishment of an abortion counseling clinic and ask the infirmary to include contraceptives with their cold pills.

Four Nabbed In Local Drug Bust

Members of both the political and journalistic world were apprehended at Lowell Tech early last week, on charges stemming from a tip received by campus police. The tip allegedly came from an unemployed campus commuter who had been investigating these campus addicts over the last three years.

Authorities apparently killed two birds with one stone, when it was also found that this group has been responsible for a drug educated column that appeared regularly in a local weekly.

Although all is not clear yet, it seems as if this raid reached into the very governing body of the Institute, with the arrest of a young man (far right) who claims that George Jefferys is his lawyer.

All in picture from left to right:
One time editor of the campus weekly.
High ranking student pol.

Mark Woodstock (pollemtimarily) that the whole meeting be invalidated because the (Continued on page 2)
Riverside Parking Lot Project Abandoned, Bank Dwellers March On Cumnock

President Olson called the abandonment of the proposed parking lot project after much pressure from local resident inhabitants and the Department of Urban Masses (DUMB). The situation has reached a point of no return. No decision was made, but it does appear that the project will be abandoned. It is not clear what will be done next.

NEWS BERNIE FOR PRESIDENT

At this time it is obvious that Lowell Tech needs an administrator who can function as president of the college. We need a man who is dynamic, and who will not be able to follow his vision.

Mr. Burns, who is known affectionately by the students as "Bernie," is a man who is more than capable of fulfilling all the duties required of a president. Bernie has been a head of the administration for almost ten years. In his ten years of service he has guided the building authority. We have seen a man institute changes unprecedented in Lowell Tech history. Bernie is the man primarily responsible for the construction of Litchfield and St magnificent.

Mr. Burns realized the potential of Co-ed housing and single handedly was responsible for the design of the buildings. He utilized all his architectural skills when he directed the planting of the two bushes we saw not towering over the big oak in the middle of the hill in front of Litchfield Hall.

Bernie is also a key figure in the Student Union. Many members of the U.L.I. family are already talking about naming the building the "Bernie Burns Building." Mr. Burns has spent many sleepless nights planning and organizing all facets of the school in order to be able to fill the building next year. Bernie has proposed allowing faculty and their families to live in the dormitories next year. Bernie feels that this will promote more school spirit, and also fill the four hundred vacancies. The idea is one of the greatest, but Bernie feels that this will only be a temporary fix until the next eighteen student proposed dormitory is completed in the next decade.

For these reasons and many more we feel that Mr. Burns should be named Acting President immediately so that Dr. Olson can recover peacefully knowing that the Institute is in good hands.

LTI Land Of The Free, Home Of The Brave

Education is a product of both environment and intelligence. We, at LTI, may consider ourselves extremely lucky in having the opportunity of studying at Tech. Within these statistics brick buildings occurs the incredible process of educational intercourse refined by a competent, loving faculty who subscribe to the belief that the only reason they are here is because of the students. It is very rare to see a student sleep in a class at Tech. The dynamic, spruculent faculty rarely gives the opportunity.

The administration has the strident efficiency of McDonald's Hamburger Stand during lunch hour. They fully realize that a slip in their well oiled process could prove an inconvenience for the students as well as the faculty and they try their damnest not to do so. We all know that no one is perfect but we have to accept that for our own encouragement.

As an example let us focus for a minute on one of the teachers. The Dean of Students is a man of great wisdom and fortitude.

His office is a place where any student regardless of age, race, color, or creed can solicit his sagacious advice. Although his office is devoid of physical embellishments it is overly compensated by the brilliance of this man's personality. There has yet to be a student who was not astonished by this man.

Social life on campus is a multi-faceted experience not to be missed. The social opportunities led by Charly "overall" Harrington has sponsored many events after week. When the smoke clears after an event, Harrington always seems to come out ahead. Truly astonishing.

The definite integral of LTI between freshman and senior year is an astonishing wonderful experience not to be forgotten by those who have experienced it.

STUDENT COUNCIL

(Continued from page 1)

The president does not conform to standards established by Roberts Rules of Order.

Deseret Ford Co: That the Student Council transfer all funds to an internal Swiss bank account.

It was mentioned concerning upcoming concerns that Deseret Money Corporation dropped by insisting on stronger selling by student marshals against department store smoking as it stimulates tobacco industry. Vond Cuadeler might only get and stoutly agree, "The Trustees couldn't agree more.

The subject of women's discrimination prompted and passed the following motion by Mind Fendler that the student council approve the following statement. We need a man who can talk to the people.

"There has never, is not, will never be any discrimination against women at Lowell Tech as long as they stay in their place."

The meeting was adjourned at 3:00 after 3 hours of tears, laughs, and general disorder.

Help change the shape of the world!

...worthless...
ATTENTION STUDENTS

Dear Sir, I wish to relate a situation at Tech which should be brought to the attention of the student body.

Dr. Cottler, Director of Residence, after locating the beds of the boige to his manganese this weekend, announced that he would clean up a number of things around campus. "Nonooky" as he is called by his female associates intends to improve the immediate area with "soap". He feels that everyone will be relaxed and in a new state of mind after the "nonooky" thus making his job control of the bored trustees more easy. "Soap" came down that once he gains control he intends to clean up Leo's by washing his mouth with soap. He further intends to leave town quiet. Cottler's outfit in his proposed coup is to be Philo Morley's presently prevailing things between the Ibb cats and the cats. Philo, although number two to "nonooky" is a key member of this disagreement. His duties at present are only to provide the rats with furniture in the canal. However, there is the possibility that he and the other good good folk plan to utilize the rats in the trunk of the Kings "payoff" to get to the next clandestine staff meeting where they will be joined with all their fellow rats. If this doesn't make sense, well what can I say after 8 years at Tech. Besides I'm too tired.

Signed - KFL

FRESHMAN SENIOR
ALL THE SAME

Dear Sir: I am a senior who has never written before. This is the first time I have ever written or even got involved in anything. I'm not saying that's good or bad. That's up to each individual to decide. I'm just asking you to bear out my story. I came here as a freshman, I'm not sayin' that's good or bad, but here's the point: I'll be leaving as a senior. That's right, I'll be leaving as a senior, but I am the same as when I came here. And I came here as a freshman, so how can I be called a senior, since I haven't changed.

Perhaps this can be explained through the Student Faculty Committee or something like that or maybe the Student Council can investigate it. I hope some people will consider it.

Thank you for your consideration in this matter. If I can be of any further service you can contact me at my bob number. Thank you.

The Faculty House is a haven exclusively for the faculty. All faculty members are encouraged to express their views on topics of interest and importance to the LIT Community.

Chairman: Good morning, everyone. It's my pleasure to introduce our distinguished guest, Professor Exxon. Professor Exxon, would you please introduce yourself?

Professor Exxon: Thank you, Chairman. I am Professor Exxon of the Economics Department at Northeastern University. I am here to discuss the current economic situation and its implications for our institution.

Chairman: Thank you, Professor Exxon. We are glad to have you here today. Our next item on the agenda is the merit lottery. As you may recall, this lottery is designed to provide financial assistance to students in need. It is a competitive lottery, and we want to ensure that all eligible students have the opportunity to apply.

Professor Exxon: I completely agree, Chairman. It is crucial that we provide financial aid to those who need it the most. However, I would like to bring up a concern that I have about the fairness of the lottery system.

Chairman: Please share your concerns, Professor Exxon.

Professor Exxon: Well, I believe that the lottery system is biased against certain groups. For example, I have noticed that minority students are less likely to be awarded scholarships.

Chairman: That is a valid concern, Professor Exxon. We will look into ways to address this issue.

Professor Exxon: Thank you, Chairman. I am glad to hear that. Now, let us discuss the next item on the agenda.

Chairman: Our next item is the faculty initiative program. This program is designed to encourage faculty members to engage in innovative research and teaching activities. I would like to hear from any faculty members who have ideas for new initiatives.

Chairman: Thank you, Professor Exxon. I appreciate your insights. Our final item on the agenda is the faculty and student association. As you know, this association represents the interests of both faculty and students. I would like to hear from any members who would like to speak.

Chairman: Thank you, Professor Exxon. I appreciate your time today. We will take a break now for refreshments.

---

Chairman: Good afternoon, everyone. We are back to order. I would like to hear from any faculty members who have any concerns or suggestions.

Chairman: Thank you, Professor Exxon. I appreciate your input. Our meeting is adjourned.
Let Me Get You Totalled
by Keg and the Family Shitface

As a long time since we've written to you, but we've been on one hell of a bender these last 6 months. We've been drinking so much that the Kirksdales have moved next door and Ed McNamara is moving the tonight show to Lowell to be closer to the family.

Don't get the wrong impression for in the last 6 months we have tried and designed our own still which we will now relate to you. One of the most important components of the system is a Chemistry Lab Class. Once you get signed up for one the rest is simple.

Start out by making a Condensing Tube. We suggest you obtain this piece of apparatus quickly since the supply is limited.

The Rest of the Items are as follows:
1) One waste paper can. Preferably from room Dept. other than the Chemistry Dept.
2) Distilling Flask -- "The Bigger the Better"
3) Heat Source -- A Library Radiator!
4) Air tight Room -- with Plenty of ventilation.
5) "Mall Pickle" -- Cafeteria.
6) Dry Ice -- Southwick Hall

What you simply do is fill the waste paper basket with beer, place one end of the distilling tube in the waste can and the other end should extend into the light glass flask. Now pack the mesh potatoes around the distilling tube and place the dry ice around the flask. Stir the mixture with the waste paper basket and wait at the distilling flask for your cool fresh beer. Extra flasks should be obtained for bigger groups.

We'll see you again in 6 months if we get out of the hospital by then.

MS. MILLARISS IS OUTSTANDING
FACULTY MEMBER OF THE MONTH

The Text is proud to announce that Ms. Barbara Moriatis has joined the distinguished ranks of the Outstanding Faculty Member of the Month Club.

Ms. Moriatis is a dedicated student of women's rights and a staunch defender of womenhood. She has crusaded incessantly as a champion of women's superiority much to the chagrin of male students. Her campaign has taken her from the halls of the maintenance department to the hallowed sanctity of the Trustees room, all in the name of liberation for the female on campus.

Ms. Moriatis also teaches English.

All You Wanted
To Know
About WLTI

A recent survey of WLTI disc-jockeys revealed that 79% of them are actually standing while on the air. Another 9% just talk and the remaining 12% are kneeling.

Some other interesting statistics revealed in the poll:
- 36% still use LL-102
- 75% of their's 62% do their homework during their shows.

In case you wondered, the station recently announced that its series "Student Council Spotlight" which was to be a series of 5 minute spots on each of the Council members had been canceled. The show was to focus on the members' views, beliefs, and their current involvement in Institute affairs. Instead station management said the program would instead feature the entire Council in one five minute program.

Reason for cancellation seemed to center on most Council members inability to find where the station was located.

Seniors Choose Moose
As Grad Speaker

By an overwhelming vote of 11 to 3 the 480 members of the senior class have voted to have Mr. Mickey Mouse as graduation speaker.

This was the terse statement released by LTI senior class President Francis Smith of Hockock, Ma. at a press conference last Thursday night.

Obviously tired from the long top side Bill Monseny discussed with me the going on inside the beginning room.

Said Monseny "at one point during the discussion before the vote one of the opponents of Mr. Mouse got so carried away he muttered that Mr. Mouse (a well-known celebrity) might be "a rat".

This set off protestations from supporters of Mouse and others of those who were upset over the use of the word "rat" and thought it inappropriate as we are now negotiating with "rat" Delilah (an actual rat) over parking lot issues in the Rat Community. (Although Delilah's background has never been steady one, we feel a rat with a valid complaint)."

I then asked Frank Smith what he thought Mouse would get an honorary degree. Smith informed me that Mouse (who he had contacted just before the conference) had indicated that he would decline any honorary degree. Mouse was concerned that it might be taken at face value as in the same manner the Student Council reached Penn. Richard M. Nixon's degree last year.

Monseny's final address was "Employment Opportunities At Walt Disney World."

Recognize This Man?

HARRY HURST '69

That's right, he graduated from LTI just like you might. But here's the reason he's where he is and you're where you are: The LTI Placement Office.

Fact: 8 out of 10 students who graduated from Lowell Tech three years ago have an average of only 22 months of Welfare after graduation.

Also geeks from Lowell Tech have been settled with the best.

Fact: Geeks from Lowell Tech and MIT were the last geeks to be laid off during the recent recession according to their. Some company executives.

As one happy LTI student, Harry Hurst, '69, said, "My job got me from the Tech Placement has me in the middle of these companies. It's easy and I get to spend a year working in places like Hoboken and salt lake city. The future looks bright and I owe it all to Tech Placement. Who knows, I might start mending my pipe."

LTI PLACEMENT, A LEISURE SERVICE OF LOWELL TECHNICAL INSTITUTE.

Hapmoon Contest

In 36 words or less explain why you could be a better president than Richard M. Nixon.

The winner will receive a complete set of last year's Taxes, a free tour of the LTI campus, and a dinner date with Dr. Leon Beshian and the janitor of your choice.
by Tony Tapia

The Lowell Technological Institute placement bureau, which was established at the direction of then president, Dr. Kenneth Fox, in 1947, at first was a part-time service, but it has grown in value to industry, college, and students. It quickly became a full-time operation and an integral part of the total Institute program.

Prime objective of the placement bureau is to be selected by graduating seniors to interested potential employers and to aid both into making qualified selections. The second, but equally important, and related objective is that of assisting the down-grading and degrading of Lowell Tech alumni in their respective professions.

For the seniors, in order of group and individual counseling sessions and interviews is held in the fall term to advise the boys and girls as to the interests of industry, and as to the backgrounds needed to fill certain types of positions. These interviews also assist the student to start his or her own personal evaluation program as to interests and capacities. To assist these counseling programs, an industrial library is made available, containing literature on companies, job descriptions, and career fields in research, manufacturing, sales service, and most popular, federal government.

The high point of the seasonal placement program is the campus recruiting period, where a selected group of low-quality companies are invited to meet those students who are interested and who qualify. This period runs each year for approximately 20 days, one week of which is devoted to only Massachusetts corporations seeking LTI's unskilled labor force. The remaining 13 days are open to companies from any section.

Since its inception in 1947, the results of the bureau have been quite satisfactory. As the "sales office" of the Institute, the bureau has participated in public and industrial relations, and has been instrumental in obtaining welfare and social security grants in addition to the actual placement of students and alumni. Since 1947, the bureau has averaged 95 percent placement of each graduating class before graduation. The 1972 program, although it considered a "repressed" year regarding employment, was considered reasonably successful. Since 12 percent of the class were accepted for graduate study at several institutions such as the Bridgeswater State Hospital, Billie, Lowell State College, LTI Technical Institute, Northeastern School of Broadcasting and Northeasten High. Approximately 78 percent of the class received direct commissions from their draft boards in the USAF ROTC and U.S. Army. (Infantry). Of the rest of the class some 50 percent accepted industrial positions. The average of the salaries to date is $26.65/hour, with a high of $45.65/hour and a low of $13.75/hour.

The strongest interest for the class of '72 was in the students on paper engineering (excellent floor sweepers) with textile engineering (shutterers) a close second. Chemistry majors (toilet deodorizers) and electrical engineers (who are good for replacing light bulbs) were the next in demand. As the Institute expands into other fields, the bureau is constantly on the alert to inform companies of these new courses of study, in an attempt to interest the companies in including LTI graduates in their interview schedules.

In a large way, the success of a college is measured by the nature of its alumni, LTI is proud of its graduates and notes that many of them have now ascended to desirable positions in industry. A number of these men were placed originally in the Greater Lowell area, such as McDonald's Harry Hamburger '60, and myself in the Placement Bureau.

Other successful alumni include: Industrial organist, Robert Slow '71, whose headquarters are in Albany, N.Y. Other top executives with this company include its president John T. Lanier '67, and currently executive vice president of Albany Mills H.W. Wing '61. A Grand Merit '70 was recently appointed maintenance supervisor of marketing planning and budgetary research for all divisions of the great Directanne Company, Baskett Zine '68, president of Campus Grub Shop and his brother Arnold who is in vice president and general manager of the Lowell based firm, a former student.

Cross Country Captain Beats Little Kids

Last Sunday, the LTI Cross-Country team scored a surprising 16-47 upset win over Mrs. Bowens Country Day School. The team was off to a staggering start as Jim was still a bit joggy from the horse bowl in Annex 7 the night before. The Tech Runners took the first 4 positions below Little Billy Boye, yrs 2%, managed to lead over the finishing line of the 5K mile course in the Lowell-Town race forest. Jim crossed the finish line first with a new course record of 4 hrs 27 minutes 14.9 seconds. Added to comment on the conditions, Jim said, "Who cares about the rain, who's the boss?" It is the reporter's knowledge that if there are any up and coming cross-country runners reading this, they should follow Jim's training schedule which is to get to bed by 3 am for the race the next day. Rest yourself to a quart of wine and $5 and most importantly eat on the course the day before and swill all the directional signs on only which you want to go. Do all this and maybe someday you'll be proud to wear the uniform of the LTI X-Cross Country team.

Nuclear Engineering Center at LTI

Located on approximately five acres of land off River Street is the almost completed Lowell Technological Institute's Nuclear Engineering Center.

Work started on the vast complex early in 1953 after final approval of all agencies concerned. The $4.5 million facility, designed especially for the benefit of Marty Lyon, Sam Sarnicki, education, industry and science, will be the only one of its type in New England.

As planned presently, the building has been designed and laid out in thestrict modern manner, while at the same time projected to blend in with the present Mill LTI buildings and campus. Scheduled for possible completion in 1977, the building will include, among other facilities, the latest in all forms of equipment, a K-4 model "atom smasher", laboratories, meeting rooms, and work areas to make it a superior educational facility.

The architects have been exercising meticulous care in the layout of the building, and accommodations for the necessary equipment to assure a plant whose equipment and potential will not be surpassed by any facility anywhere. The building has an unobstructed view to Grossman-Lowell and New England areas, Lowell Tech faces the prospect of attracting itself as a definite world leader in technological study. A strong contributing factor in the prospective increasing brilliance of its mark is the firmament in the new center which will offer unparalleled opportunities for Nuclear studies in the East and West and South and North.

New Annex Joins Dorm Complex

The two new plans on Standish Street joined the LTI dorm complex yesterday during the dedication ceremonies, which will be called the Jim Dancy, will house the Institution's minority residents. Standing side by side on Standish Street are the LTI's oldest dorm, James Hall and the new Jim Dancy.

The two dorms share a common tie. James Donowho, for whose new name is named, once visited the James Hall building.
Replacement Presents Views

The Student Trustee that voted how Mr. Burows resigned the position of vice-chancellor. Mr. Burows announced that he was to take over the position of president of the University. The new president is expected to be in the position of president in the fall.

Replacement's first term is to be in the fall. He is expected to be the new president of the University.

Finality, Mr. Burows expressed the feeling of many of his colleagues. While he has been a student of the University, he has been a student of many other universities as well. He has been a student of the University for many years and has been a student of many other universities as well.

Ronald C. O'Sullivan, the new president of the University, has been a student of the University for many years and has been a student of many other universities as well. He has been a student of the University for many years and has been a student of many other universities as well.

Nixon Gives Final Campaign Speech

Last Thursday, at a rally in New York, President Nixon gave his final campaign speech. He spoke of his accomplishments as president, including his work towards peace in Vietnam, his efforts to reduce deficits, and his efforts to improve the economy. He also spoke of his efforts to improve the nation's security, including his efforts to strengthen the military and his efforts to combat terrorism.

Nixon's speech was well received by the audience, who gave him a standing ovation. He then went on to thank his supporters for their hard work and dedication.

The campaign has been a close race, with Nixon and his opponent, Senator John F. Kennedy, neck-and-neck in the polls. The final results will be announced on election day, November 8th.
